

THE SLOW LINE STARTS WITH ORIENTATION

Text-only concept image, attributed orientation, and a reversible operating relationship.

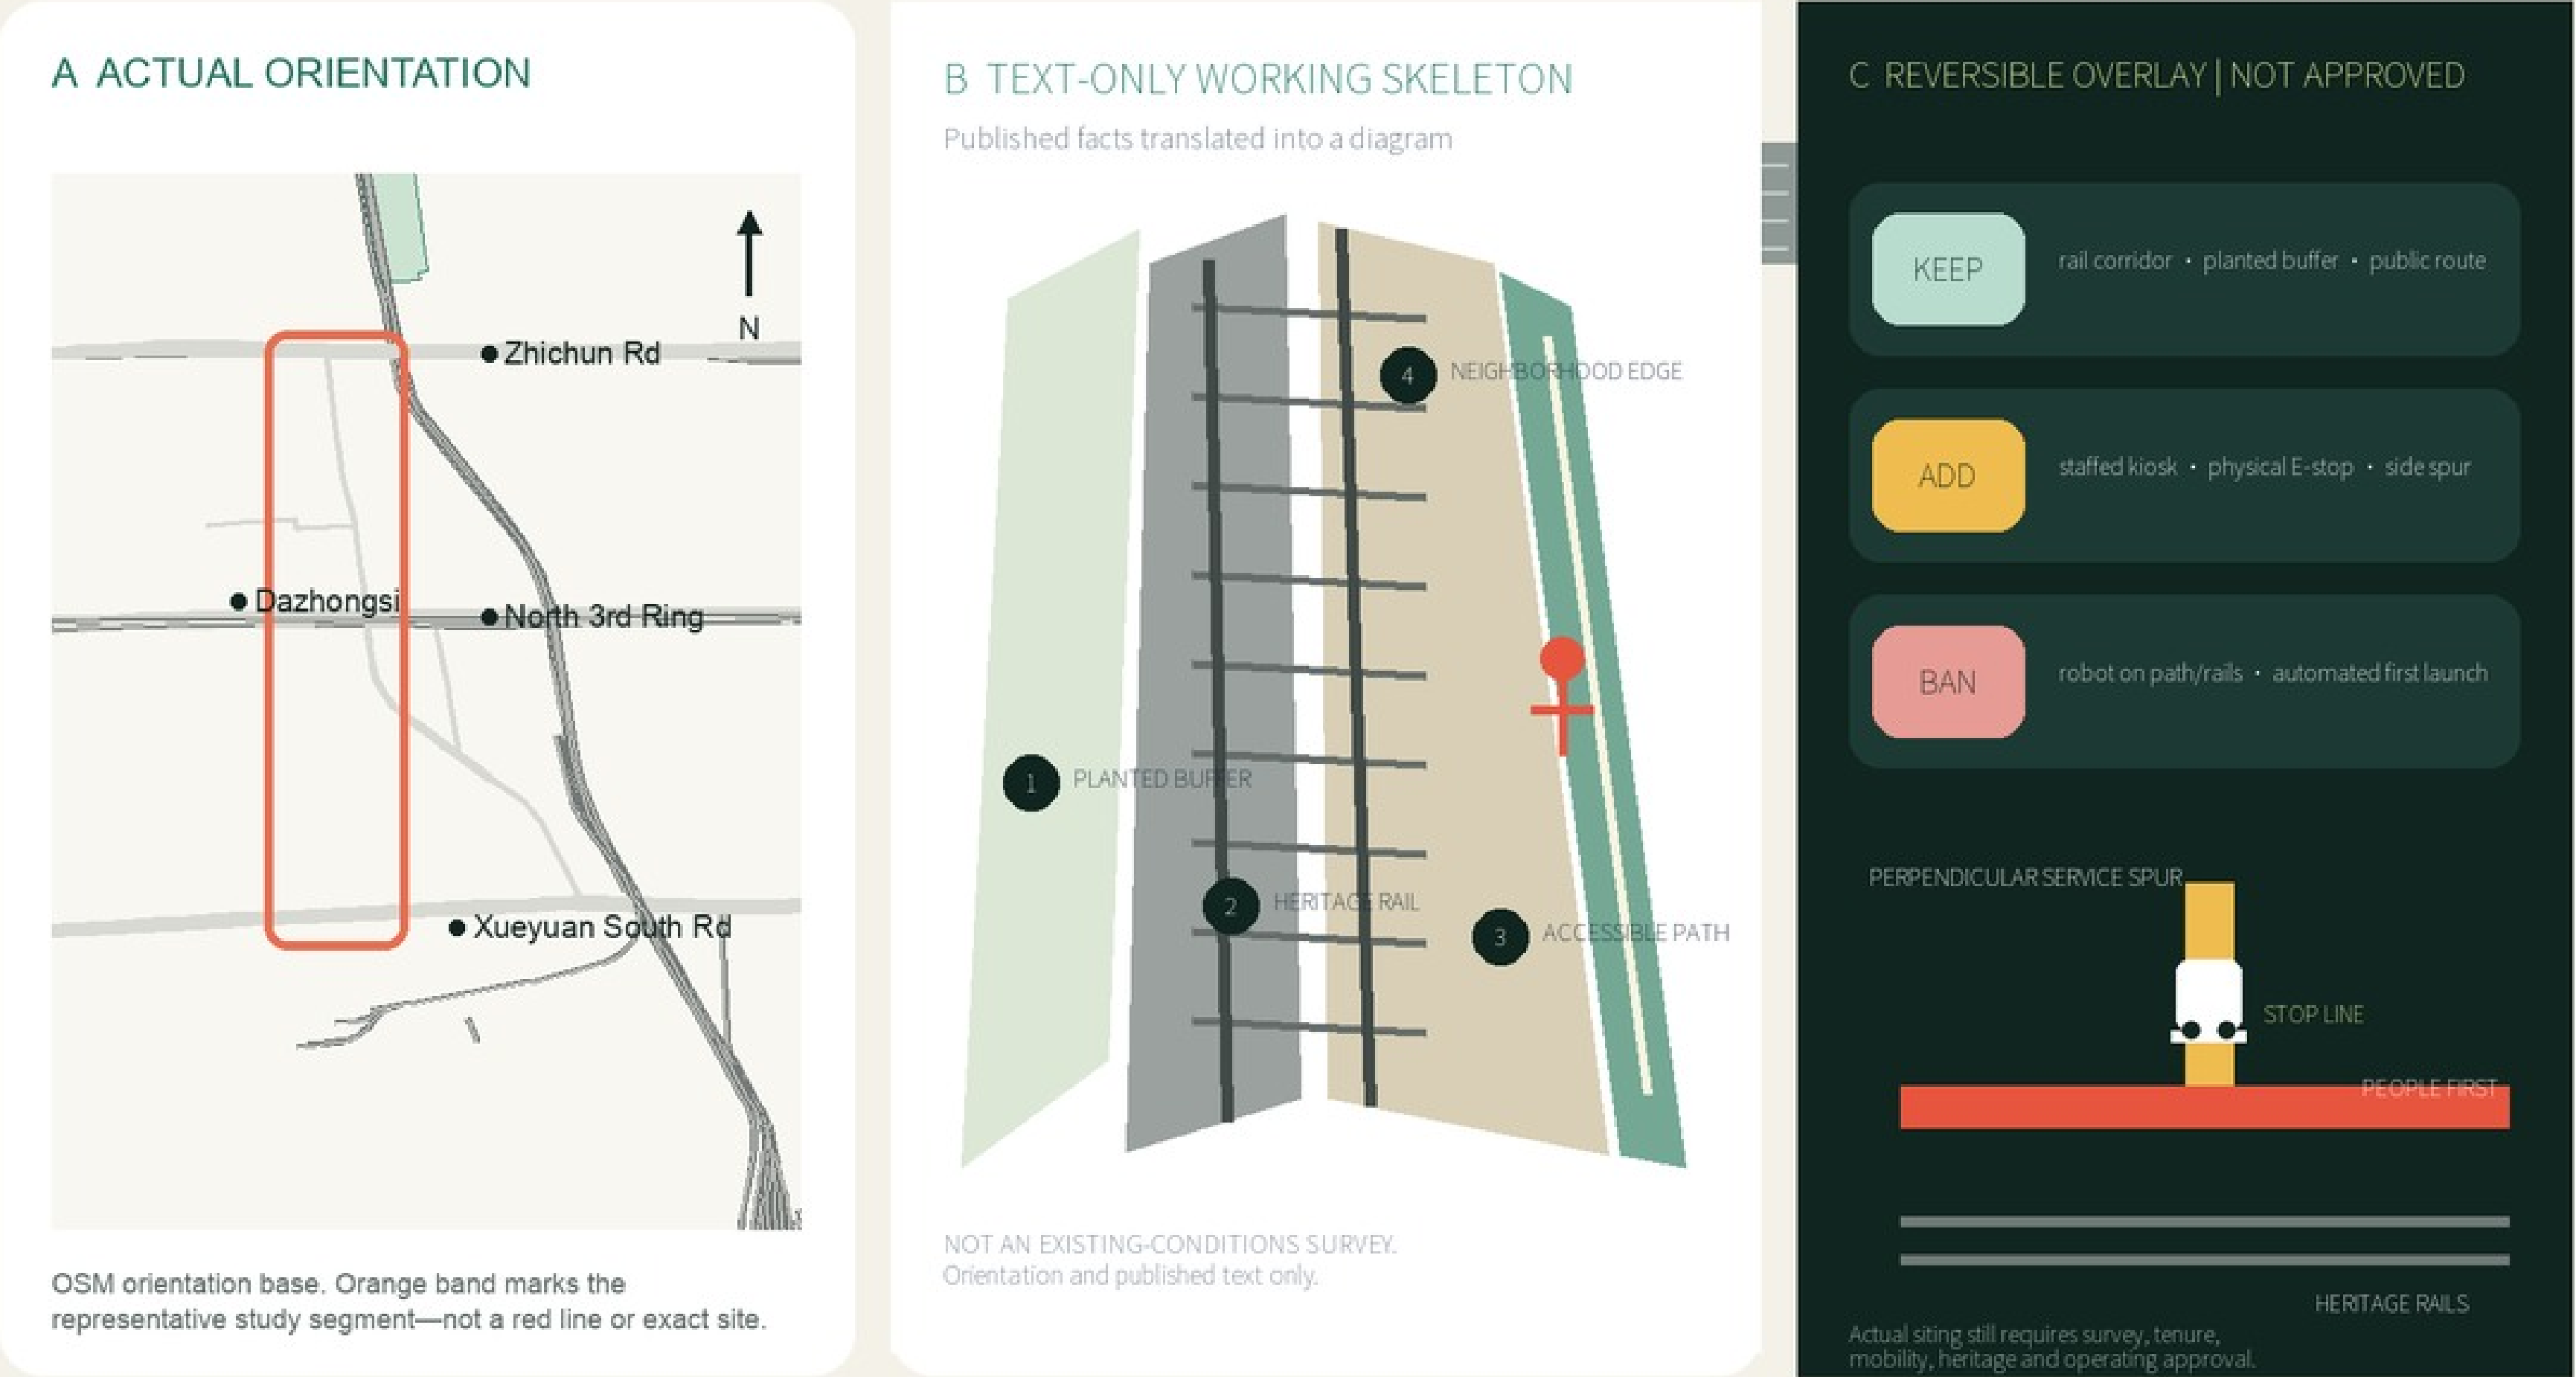

WHAT THE IMAGE CAN AND CANNOT SAY

- CAN: explain parallel rails/path and perpendicular service spur
- CAN: show the robot stopped behind its line
- CANNOT: document an exact site or existing conditions
- CANNOT: replace survey, tenure, heritage, mobility, or operating approval

SITE GROUNDING / REPRESENTATIVE SEGMENT

VERIFY ORIENTATION, THEN ADD THE DESIGN

Representative segment | orientation + text-only facts + reversible overlay

ONE PUBLIC ARMATURE, THREE NON-INTERCHANGEABLE YARDS

Accessible movement, all-stop gates, and a 90-day evidence protocol.

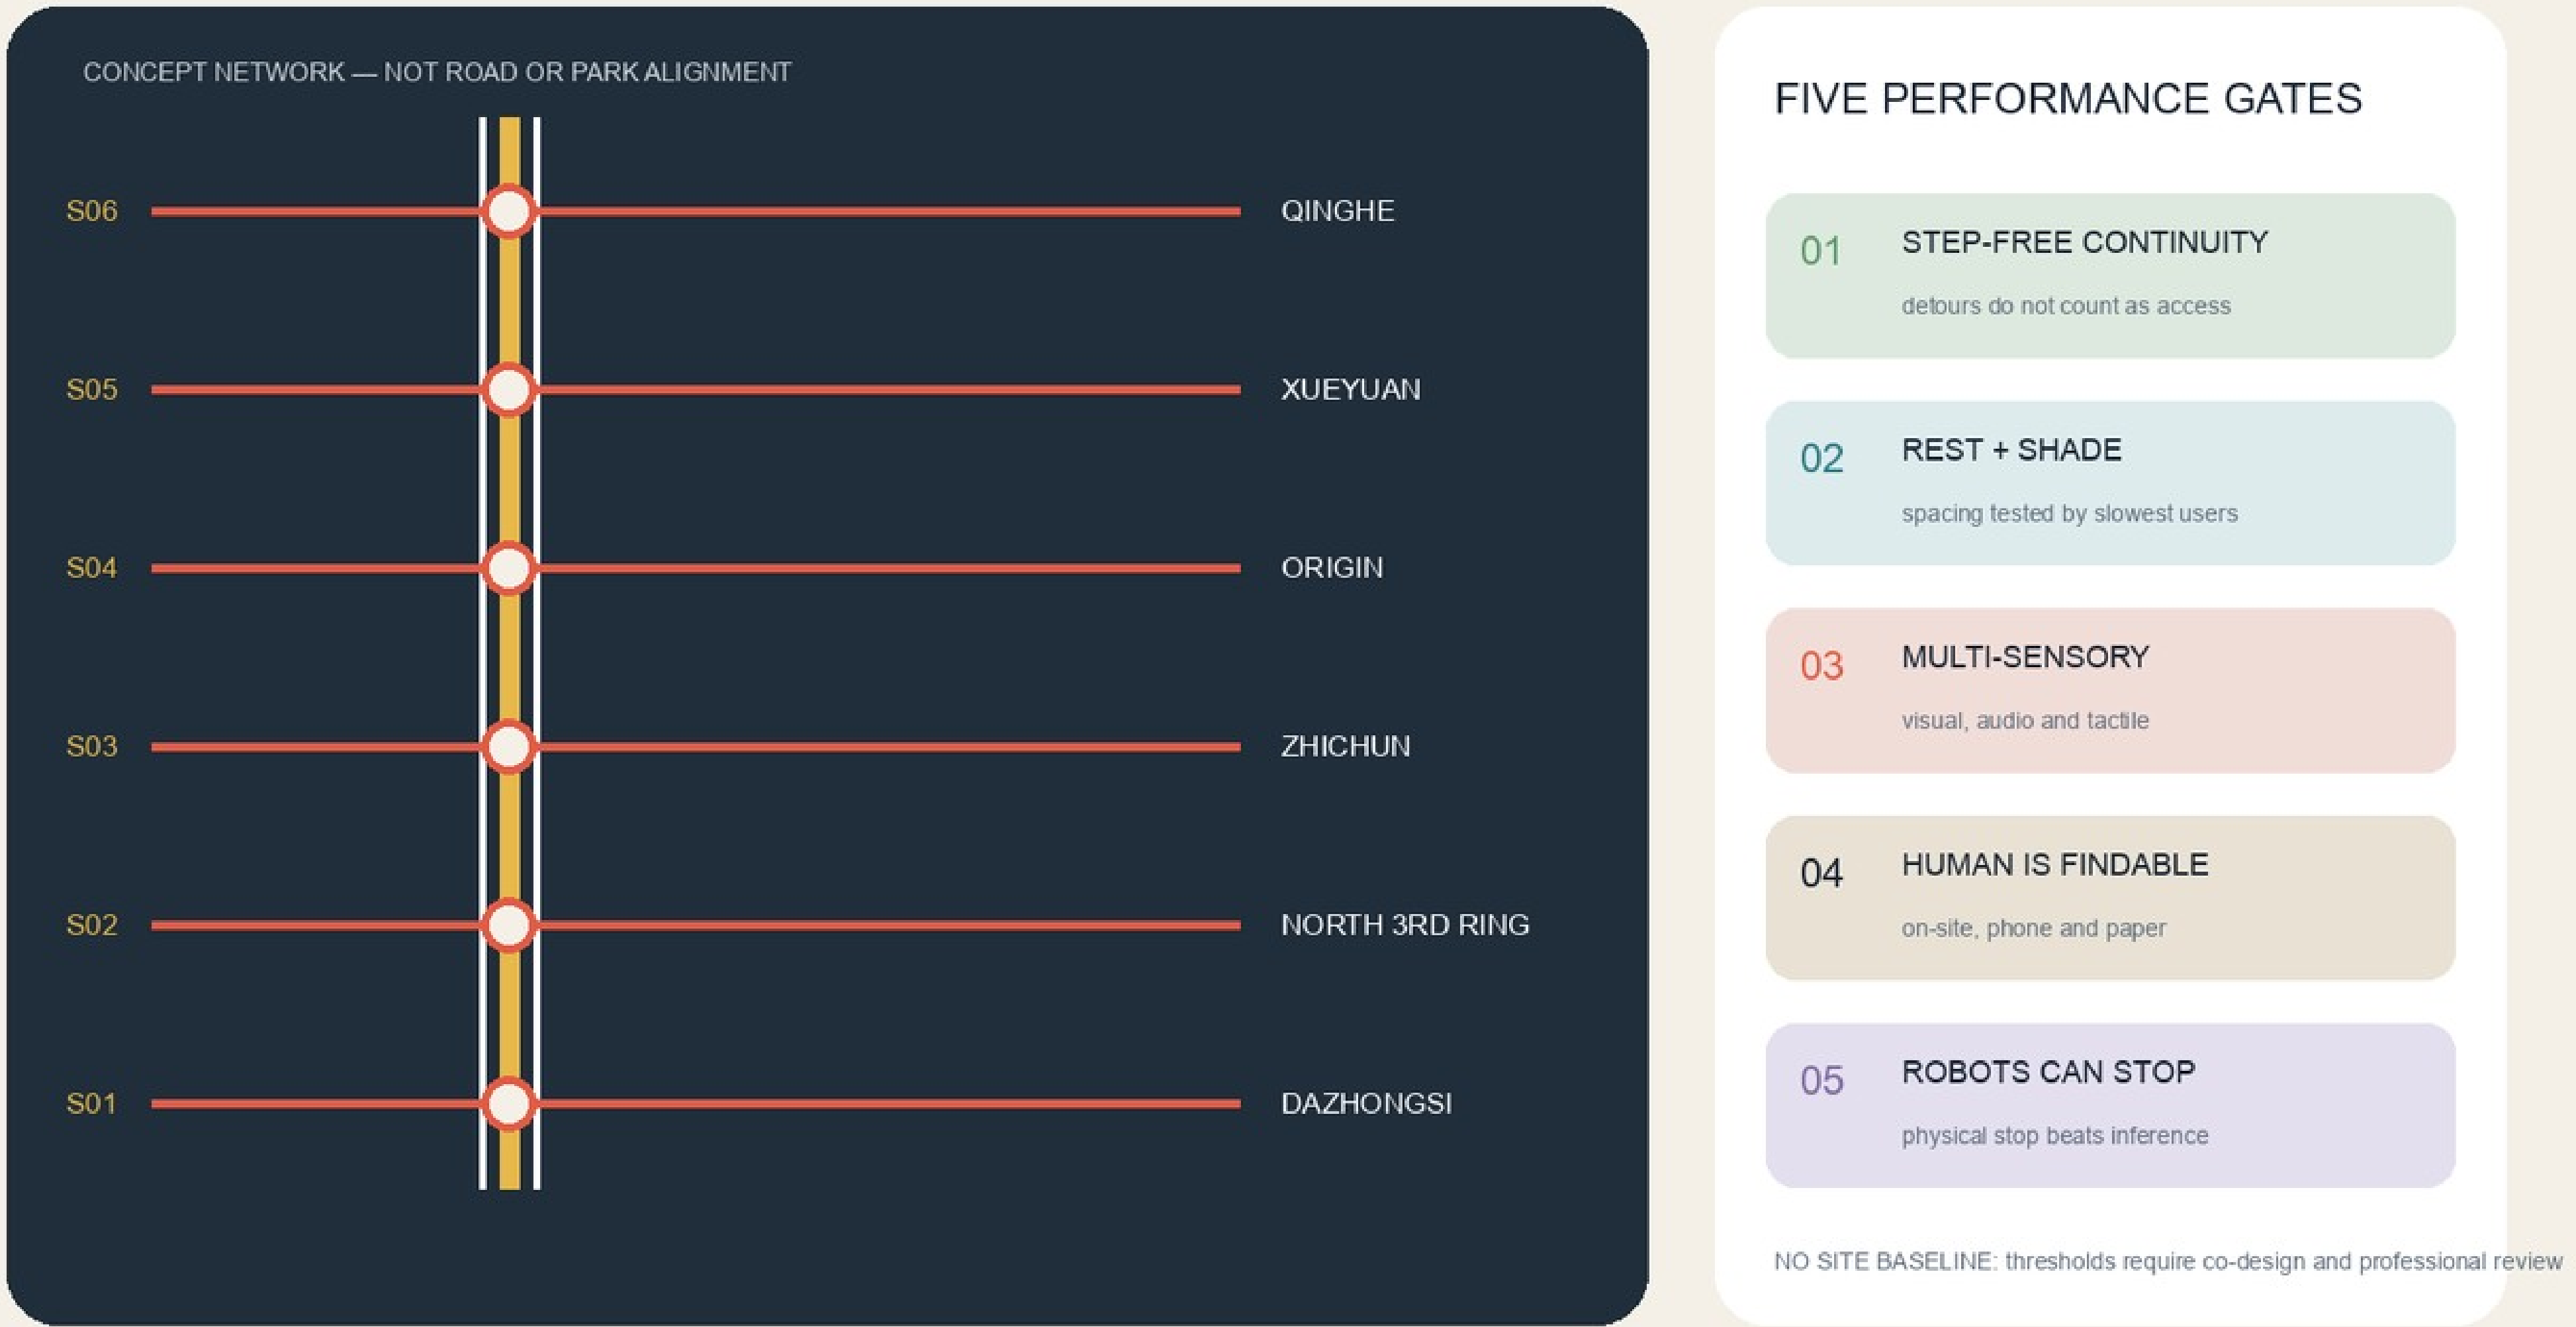

FROM STRATEGY TO GROUND: THREE LEVELS, ONE DECISION CHAIN 02

43.6 km² research → 11.4 km² provisional container → three transferable prototypes

90-day All-Stop Gate: prove one pilot can stop

HARD HOLD CONDITIONS

Any safety-critical group failure, missing equivalent human service, failed exit, unassigned responsibility, or unrecoverable state stops the pilot.

- 01 TENURE / 权属
No unverified site launch
- 02 HUMAN / 人工
Equivalent service stays open
- 03 RESTORE / 恢复
Exit must return to a safe state
