

KEEP PACE WITH THE SLOWEST PERSON

One line, three slow yards, six all-stop gates, and twelve AI scenarios with an equivalent non-AI path.

TEXT-ONLY GENERATED CONCEPT | NO PHOTO INPUT | NOT AN EXISTING-CONDITIONS RECORD

90 DAYS

stoppable pilot

6 GATES

evidence before launch

12/12

non-AI equivalents

THREE LEVELS, ONE DECISION CHAIN

A 43.6 km² research frame supports an 11.4 km² provisional container and three reversible prototypes.

FROM STRATEGY TO GROUND: THREE LEVELS, ONE DECISION CHAIN 02

43.6 km² research → 11.4 km² provisional container → three transferable prototypes

ONE MAP: SPACE × SERVICE × OPERATIONS

SPACE	SERVICE	OPERATE
- continuous accessible line - six cross-city gates - three reversible yards	- works without login - a human is findable - non-AI path is equivalent	- pilot before building - failure defaults to stop - publish review before scale

Official geometry → replace constraints → regenerate all layers, metrics, figures and PDFs

ORIENTATION BEFORE INTERVENTION

OSM orientation, published textual facts, and design additions remain visibly separate.

SITE GROUNDING / REPRESENTATIVE SEGMENT

VERIFY ORIENTATION, THEN ADD THE DESIGN

Representative segment | orientation + text-only facts + reversible overlay

A ACTUAL ORIENTATION

OSM orientation base. Orange band marks the representative study segment—not a red line or exact site.

B TEXT-ONLY WORKING SKELETON

Published facts translated into a diagram

NOT AN EXISTING-CONDITIONS SURVEY.
Orientation and published text only.

C REVERSIBLE OVERLAY | NOT APPROVED

KEEP

rail corridor • planted buffer • public route

ADD

staffed kiosk • physical E-stop • side spur

BAN

robot on path/rails • automated first launch

PERPENDICULAR SERVICE SPUR

STOP LINE

PEOPLE FIRST

HERITAGE RAILS

Actual siting still requires survey, tenure, mobility, heritage and operating approval.

Orientation/data: © OpenStreetMap contributors (ODbL), snapshot 2026-08-29. Text facts: Beijing Municipal Government report, 2026-07-30. Not a survey.

ONE PROTOTYPE THAT CAN STOP

Six evidence gates prevent a visually persuasive idea from becoming an unauthorized launch.

90-day All-Stop Gate: prove one pilot can stop

Three study windows · six evidence gates · six separately reported groups · NOT_AUTHORIZED

DAYS 0–30

Baseline + co-design

Four-party walk · same task with AI off · barrier/dissent ledger

Unclear tenure, fire status, or staffed equivalent → HOLD

DAYS 31–60

Closed offline rehearsal

Emergency stop · human transfer · refusal · failure review

Missing audit or AI open while staff desk closed → HOLD

DAYS 61–90

Time-limited micro-trial

One time slot · one entrance · one bounded low-risk task

Any group critical failure or failed restoration → HOLD

SIX EVIDENCE GATES

G0 tenure/permission

G1 accessibility co-design

G2 staffed equivalent/roster

G3 privacy/safety/duty

G4 limited run/independent watch

G5 restore/public review

Same task, group by group

- Wheelchair users
- Blind/low-vision users
- Older people without smartphones
- Carers with children
- Non-Chinese speakers

One safety-critical failure, missing equivalent service, or failed exit in any group places the whole pilot on HOLD. No average can compensate.

THREE KEY AREAS, THREE PRODUCTIVE FORMS OF “SLOW”

technology learns to stop · services learn to wait · markets serve every stop

01 SAFE-SPEED YARD
ZHONGZHIYUAN

CORE MOVES

- robot stop & yielding
- weather/occlusion tests
- physical stop & rescue
- public safety review

ENTRY GATE

co-design + baseline + approvals + rollback budget

PROVISIONAL KEY AREA / CONCEPT ONLY

02 NO-LOGIN COMMONS
AI ORIGIN COMMUNITY

CORE MOVES

- human desk stays
- services without account
- assistive co-design
- campus-to-city translation

ENTRY GATE

co-design + baseline + approvals + rollback budget

PROVISIONAL KEY AREA / CONCEPT ONLY

03 EVERY-STOP MARKET
DAZHONGSI

CORE MOVES

- cash/phone/on-site parity
- time-shared curb
- SME agent check-up
- credit corrections too

ENTRY GATE

co-design + baseline + approvals + rollback budget

PROVISIONAL KEY AREA / CONCEPT ONLY

Six evidence gates prevent a visually persuasive idea from becoming an unauthorized launch.

CONCEPT ONLY | provisional geometry | not a survey, exact site, approval, or engineering scheme

JINGZHANG SLOW LINE / v1.2

FAILURES REMAIN VISIBLE

The offline synthetic ledger reports 10/12 outcomes and keeps one wrong payload and one audit gap.

Offline rehearsal: failure is a reading

Fixed seed · 12 synthetic tasks · no online model, participant, personal data, or real robot

TASKS
12

SYNTHETIC OUTCOME
10/12

SCHEMA
11/12

AUDIT COMPLETE
11/12

TASK LEDGER

SUT-01	PASS	SUT-02	PASS	SUT-03	PASS	SUT-04	PASS	SUT-05	PASS	SUT-06	PASS
SUT-07	FAIL	SUT-08	PASS	SUT-09	PASS	SUT-10	PASS	SUT-11	PASS	SUT-12	FAIL

ADVERSE FINDINGS → DESIGN CHANGE

Staffed desk closed
Service task failed; digital and staffed service must open and close together

Audit record missing
Default no-release; do not manufacture completeness after the event

Tactile route blocked
Choosing HOLD counts as success; bypassing the slowest user does not

Proves only that the contract ledger can be recomputed—not field, accessibility, staff-response, or robot performance.

ACCESS FIRST, AUTOMATION SECOND

Continuous accessible movement remains public; robot service waits on a perpendicular spur.

MOBILITY + BLUE-GREEN: THE FASTEST SYSTEM MUST WAIT

continuity, crossings, rest, help and stop authority before spectacle

04

FIVE PERFORMANCE GATES

- 01 STEP-FREE CONTINUITY
delours do not count as access
- 02 REST + SHADE
spacing tested by slowest users
- 03 MULTI-SENSORY
visual, audio and tactile
- 04 HUMAN IS FINDABLE
on-site, phone and paper
- 05 ROBOTS CAN STOP
physical stop beats inference

NO SITE BASELINE: thresholds require co-design and professional review

THREE KEY AREAS, THREE PRODUCTIVE FORMS OF “SLOW”

technology learns to stop · services learn to wait · markets serve every stop

03

Continuous accessible movement remains public; robot service waits on a perpendicular spur.

STATUS, FORMULA, TRIGGER

Known values are recomputable from provisional geometry; absent official controls remain pending.

METRICS ARE NOT PROMISES: STATUS, FORMULA, TRIGGER

05

KNOWN = recomputable from provisional geometry; PENDING = official controls absent

SITE

11.41 km²

provisional container

GREEN

14.5%

concept green

PUBLIC

5.4%

concept public

FALLBACK

100%

12/12 non-AI paths

RECOMPUTABLE EVIDENCE CHAIN

- 01 SOURCES brief, standards, official policy
- 02 CONSTRAINTS provisional geometry + gaps
- 03 LAYERS partition, line, yards, phases
- 04 METRICS EPSG:4548 + status
- 05 DISPLAY paired figures, HTML, PDFs
- 06 GATES deterministic, spatial, visual, evidence

PENDING OFFICIAL DATA

- official SITE_BOUNDARY
- three key-area polygons
- statutory FAR / height / density
- road redlines and sections
- building, tenure and condition survey
- heritage, utilities, fire and flood controls

GAPS DO NOT LOWER CONTENT SCORE; THEY TRIGGER RECALCULATION

A SMALLER, SAFER NEXT STEP

No field launch before tenure, co-design, human equivalence, safety, privacy, and restoration evidence.

THE SLOW LINE | Keep pace with the slowest person

Not slower innovation: a city latency budget for safety, comprehension and choice

01

ONE LINE · THREE YARDS · SIX ALL-STOP GATES

SAFE-SPEED YARD

NO-LOGIN COMMONS

EVERY-STOP MARKET

Dashed = repository provisional envelope; not the real park alignment or planning boundary

SLOWEST-USER TEST · SUT-6

- MOBILITY · wheelchairs & slow walkers
- SENSORY · low vision & hearing loss
- DIGITAL · no phone, no account
- LANGUAGE · children & newcomers
- CARE · carers & strollers
- TIME · night and shift workers

EVERY-STOP CONTRACT

purpose → slowest user → non-AI equivalent → human takeover →
minimum data → physical stop → appeal → public review

No field launch before tenure, co-design, human equivalence, safety, privacy, and restoration evidence.
