

Pet Pal Loop PET • JZ - Pet-Friendly Public Space & Companion-Animal Stewardship Network (Concept • A0 Board 1/2)

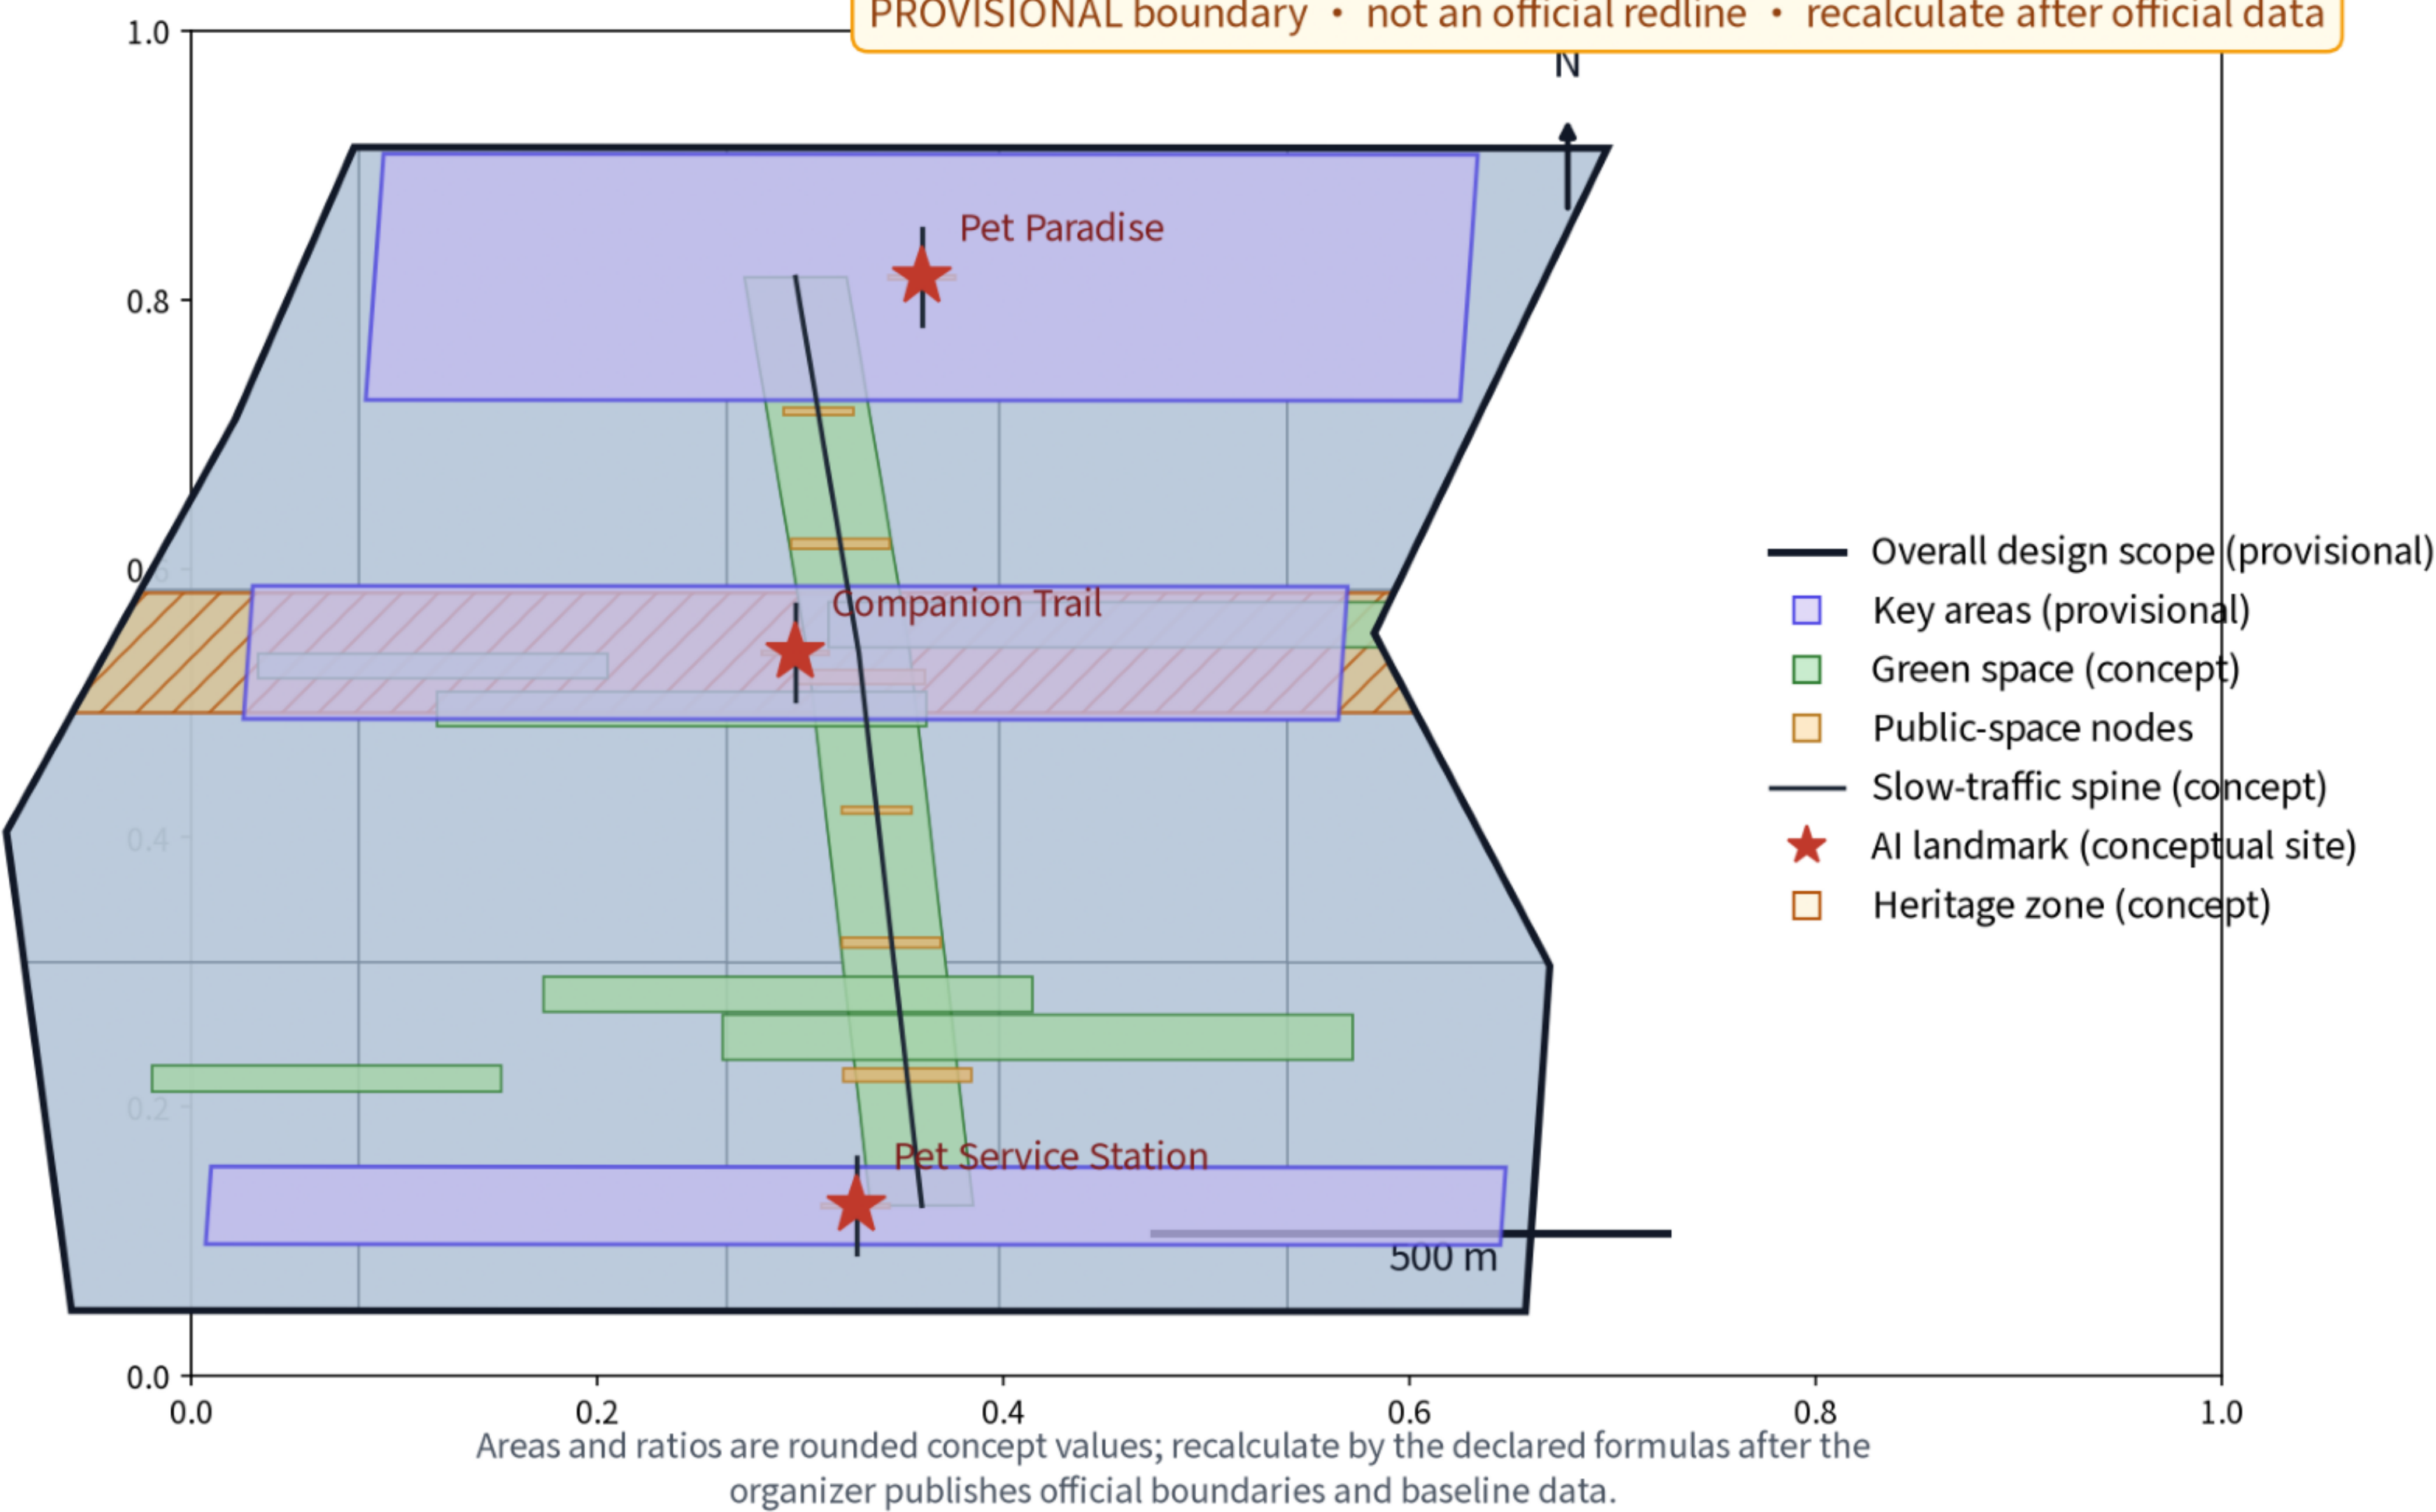

One park, one trail, one station; five AI scenario families (anonymized aggregation + human review only); three-tier scopes per official text (≈43.6 km² / ≈11.4 km² / ≈368.4 ha)

PROVISIONAL boundary • not an official redline • recalculate after official data

Overall design overview (provisional)

Overall Design Overview - Pet Pal Loop Network (provisional geometry, with site context)

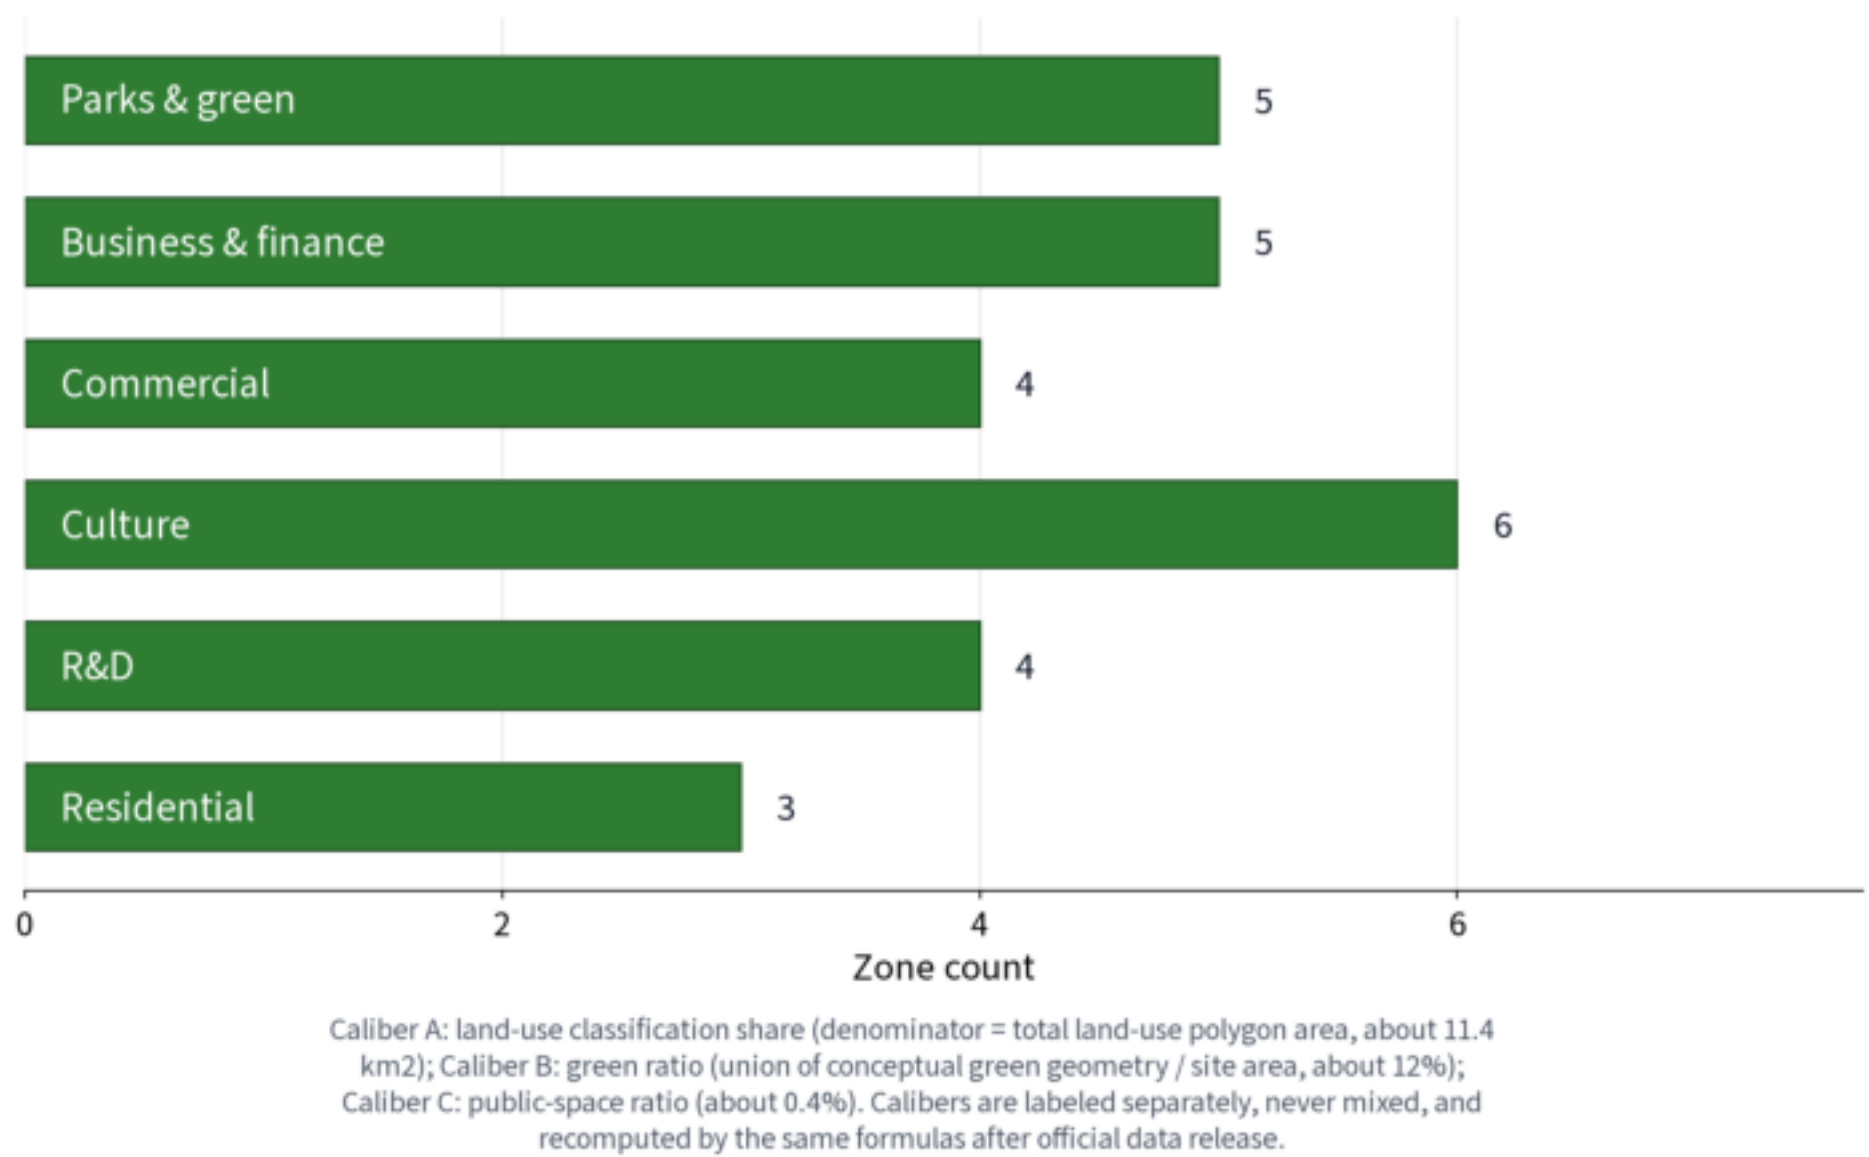

PROVISIONAL boundary • not an official redline • recalculate after official data

Conceptual land-use structure (single caliber)

Conceptual land-use structure (zone counts in land_use.geojson, single caliber)

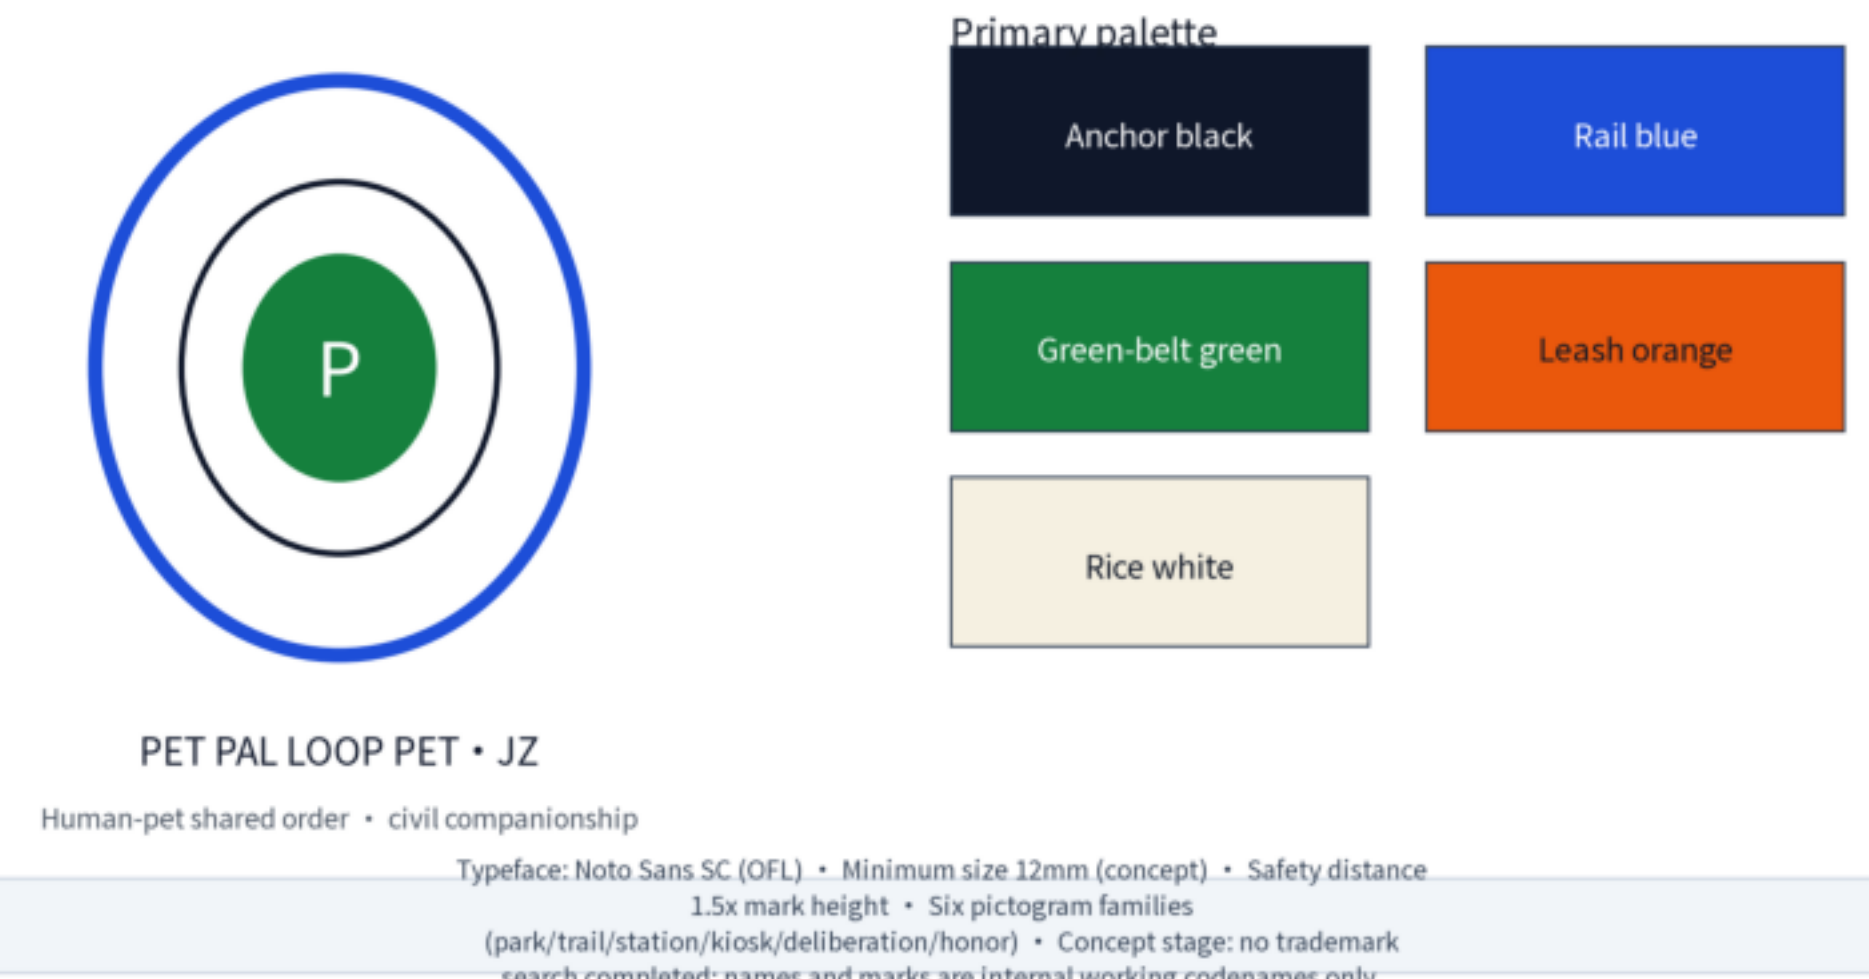

PROVISIONAL boundary • not an official redline • recalculate after official data

Logo & visual identity

Logo & Visual Identity (concept)

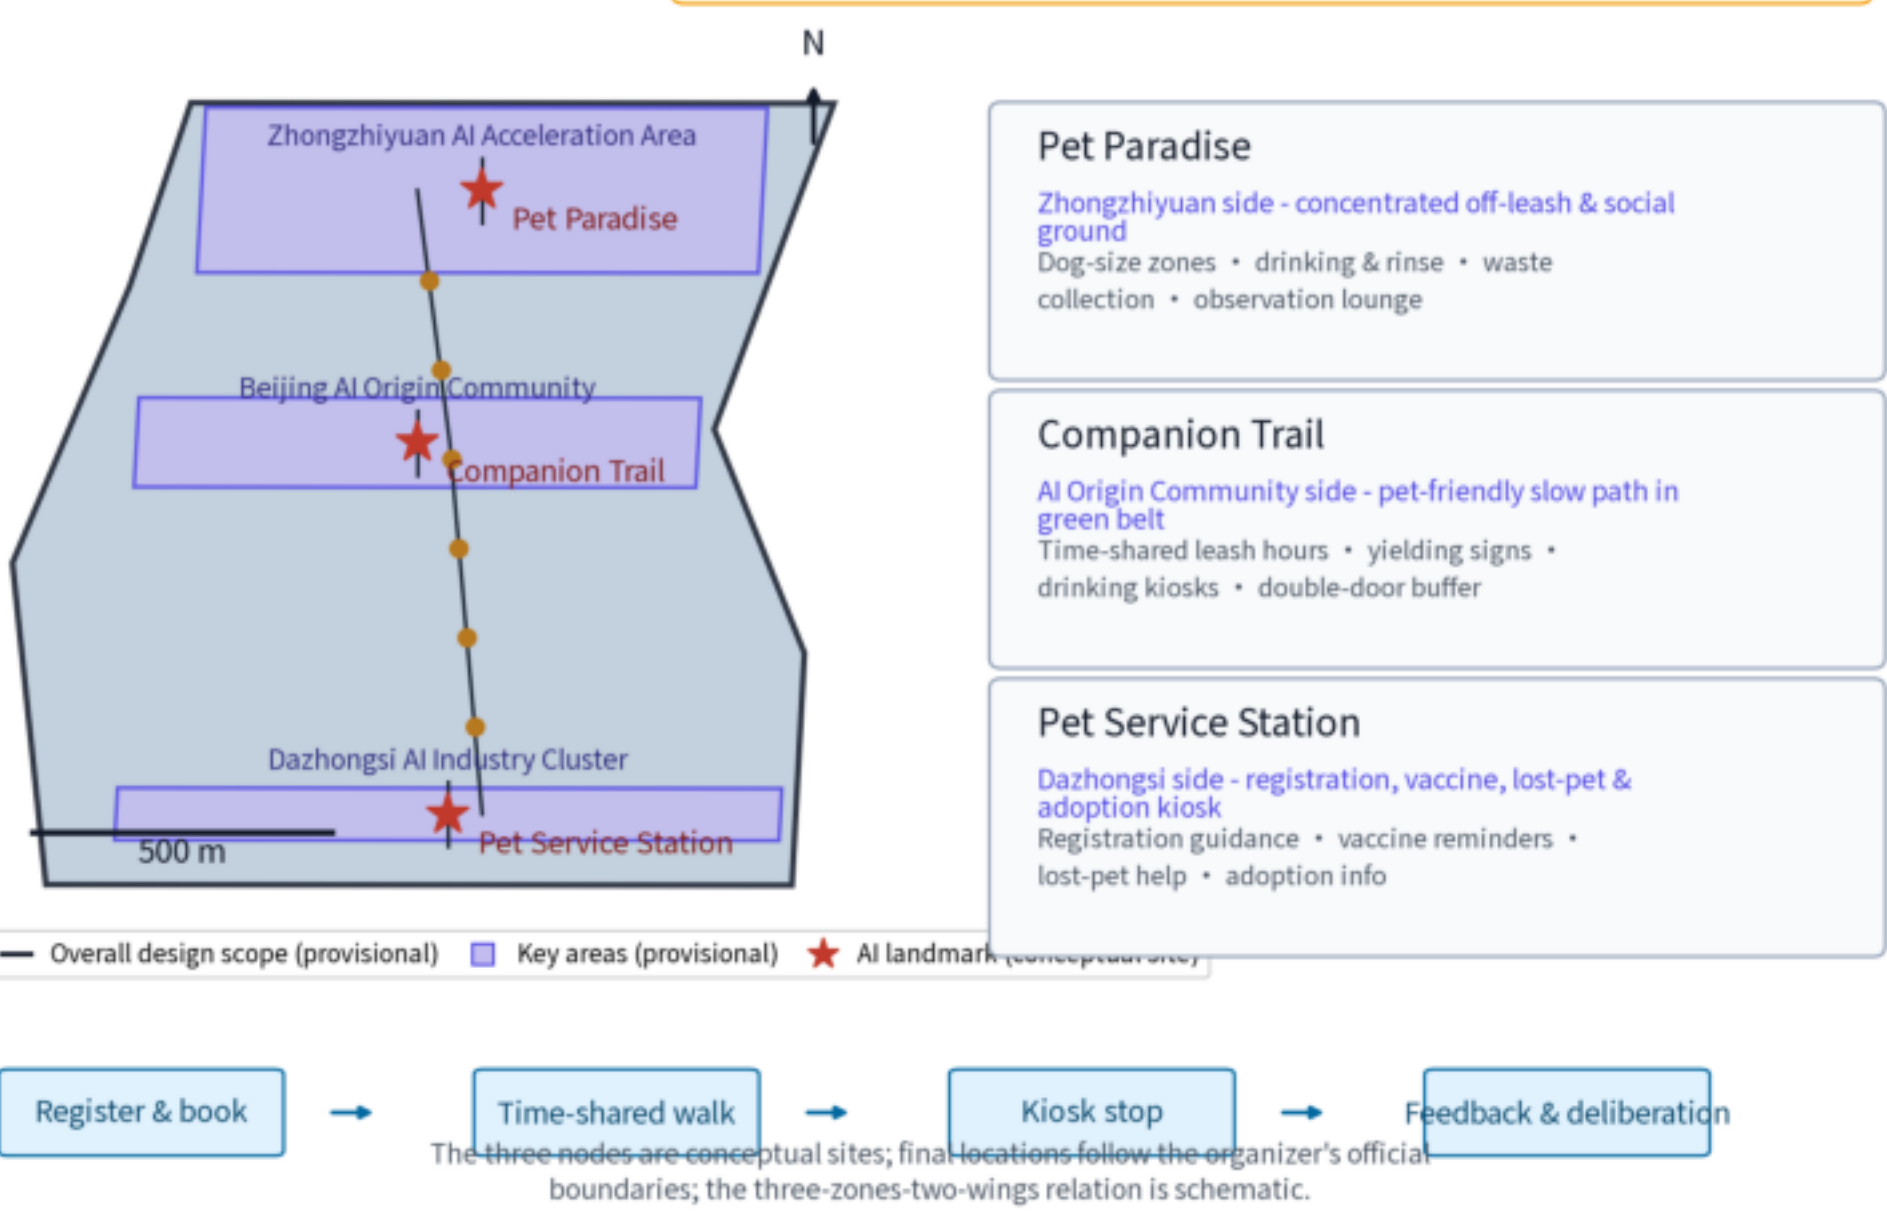

PROVISIONAL boundary • not an official redline • recalculate after official data

Three nodes: index & experience path

Three Nodes: Index, Landmarks & Experience Path

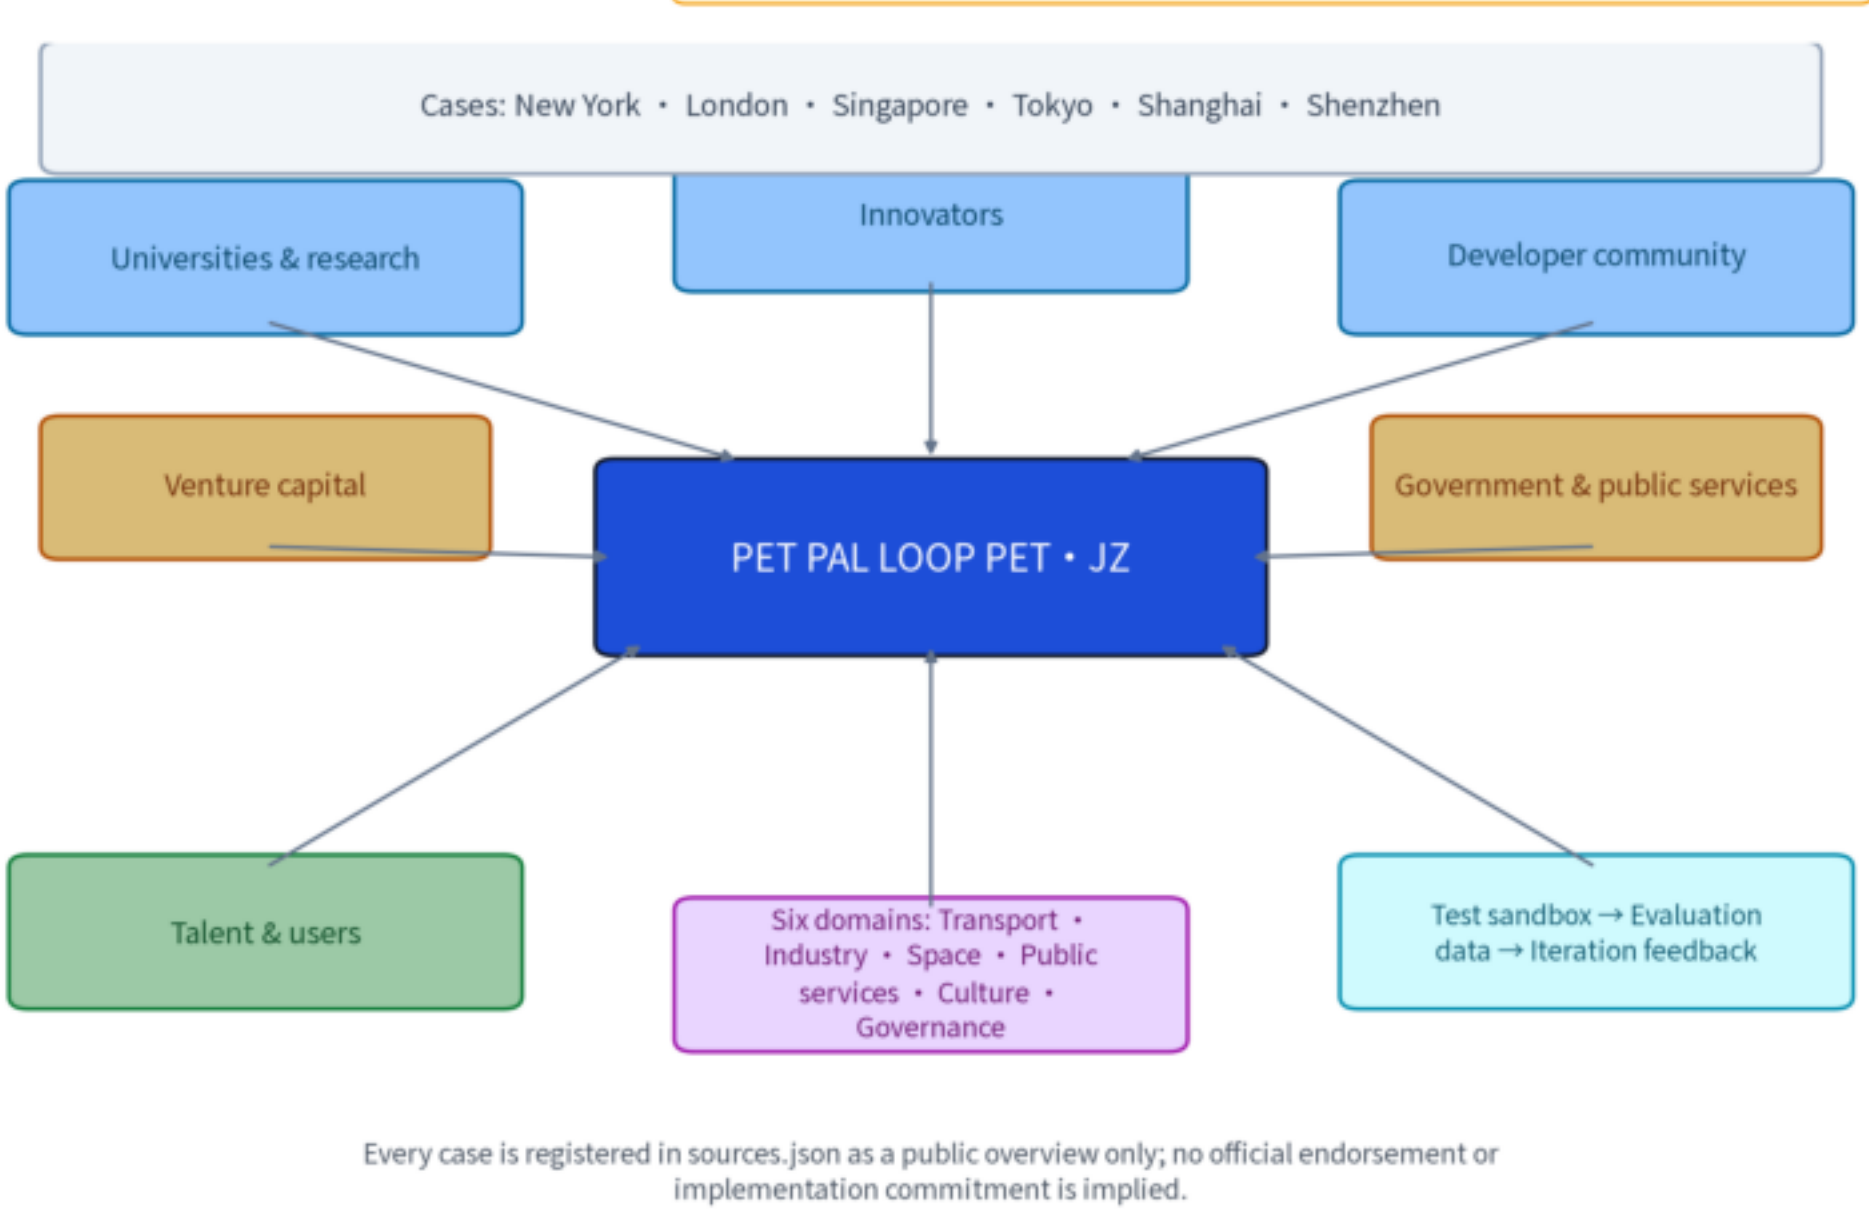

PROVISIONAL boundary • not an official redline • recalculate after official data

Global AI ecosystem atlas

Global AI Innovation Ecosystem Atlas: Pet Pal Loop (6 circles x 6 domains x cases)

PROVISIONAL boundary • not an official redline • recalculate after official data

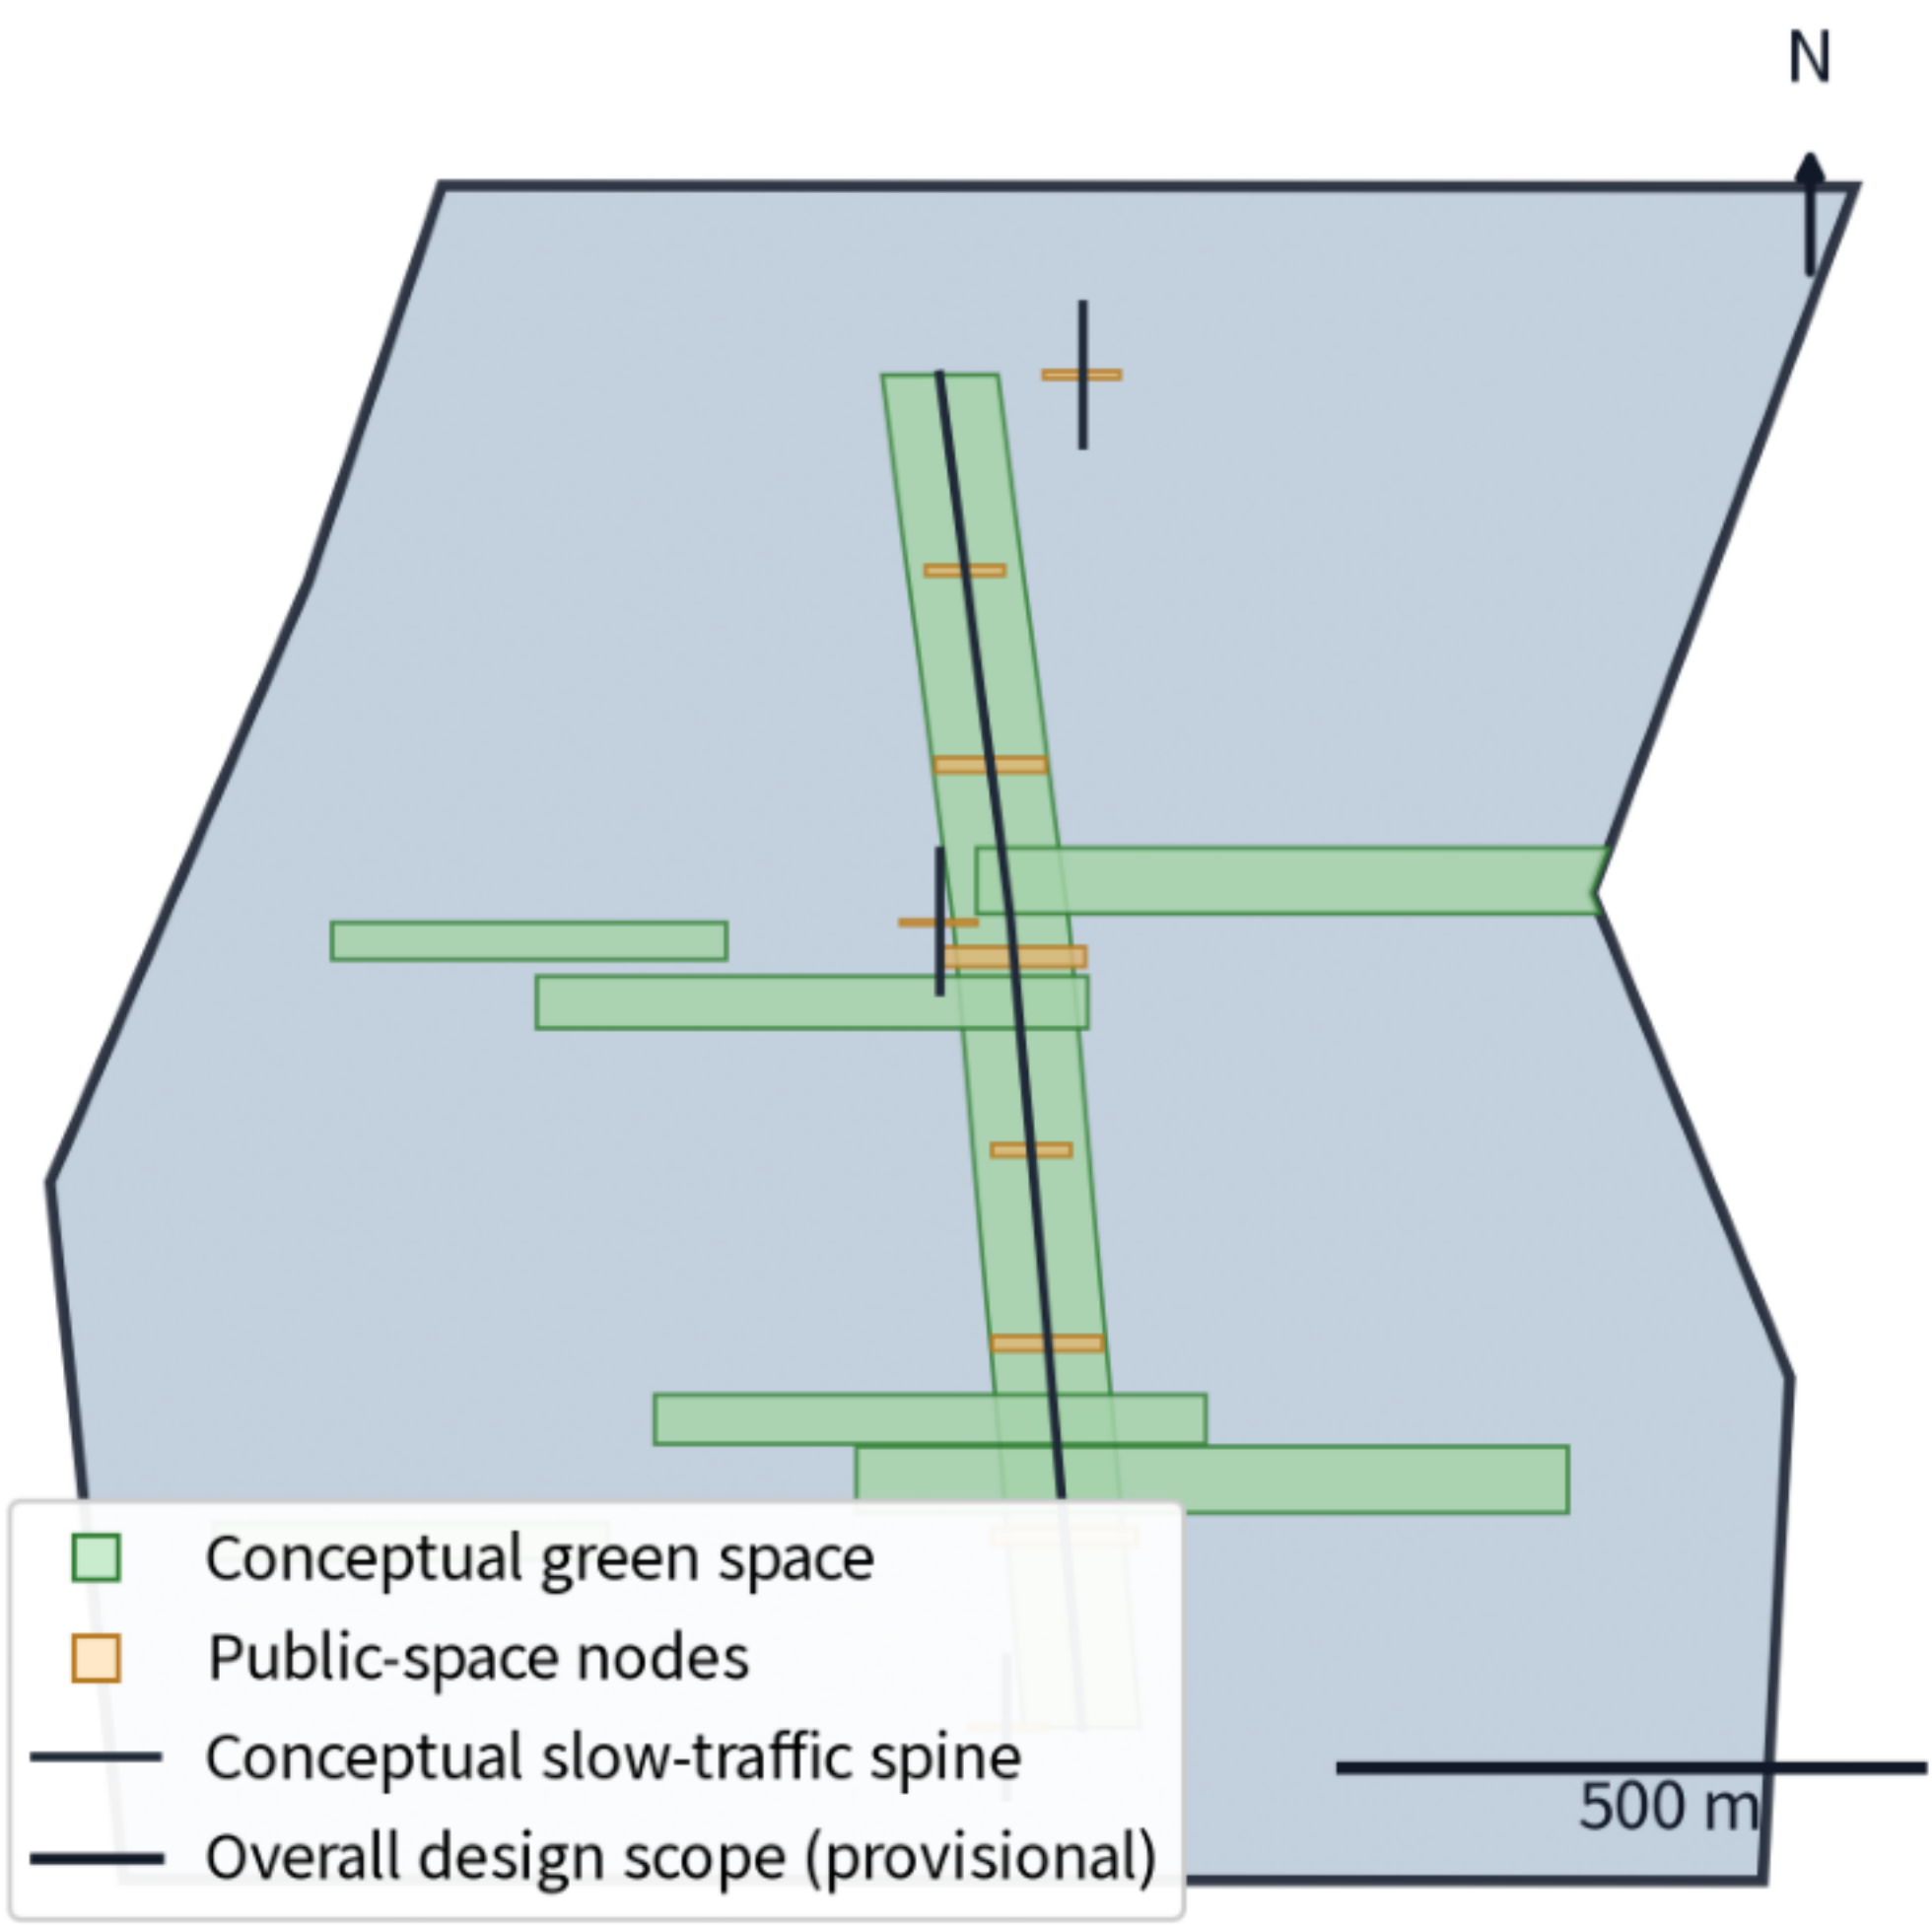

Pet Pal Loop PET • JZ - Design Depth: Nodes • Land Use • Mobility • Metrics (A0 Board 2/2)

PROVISIONAL boundary • not an official redline • recalculate after official data

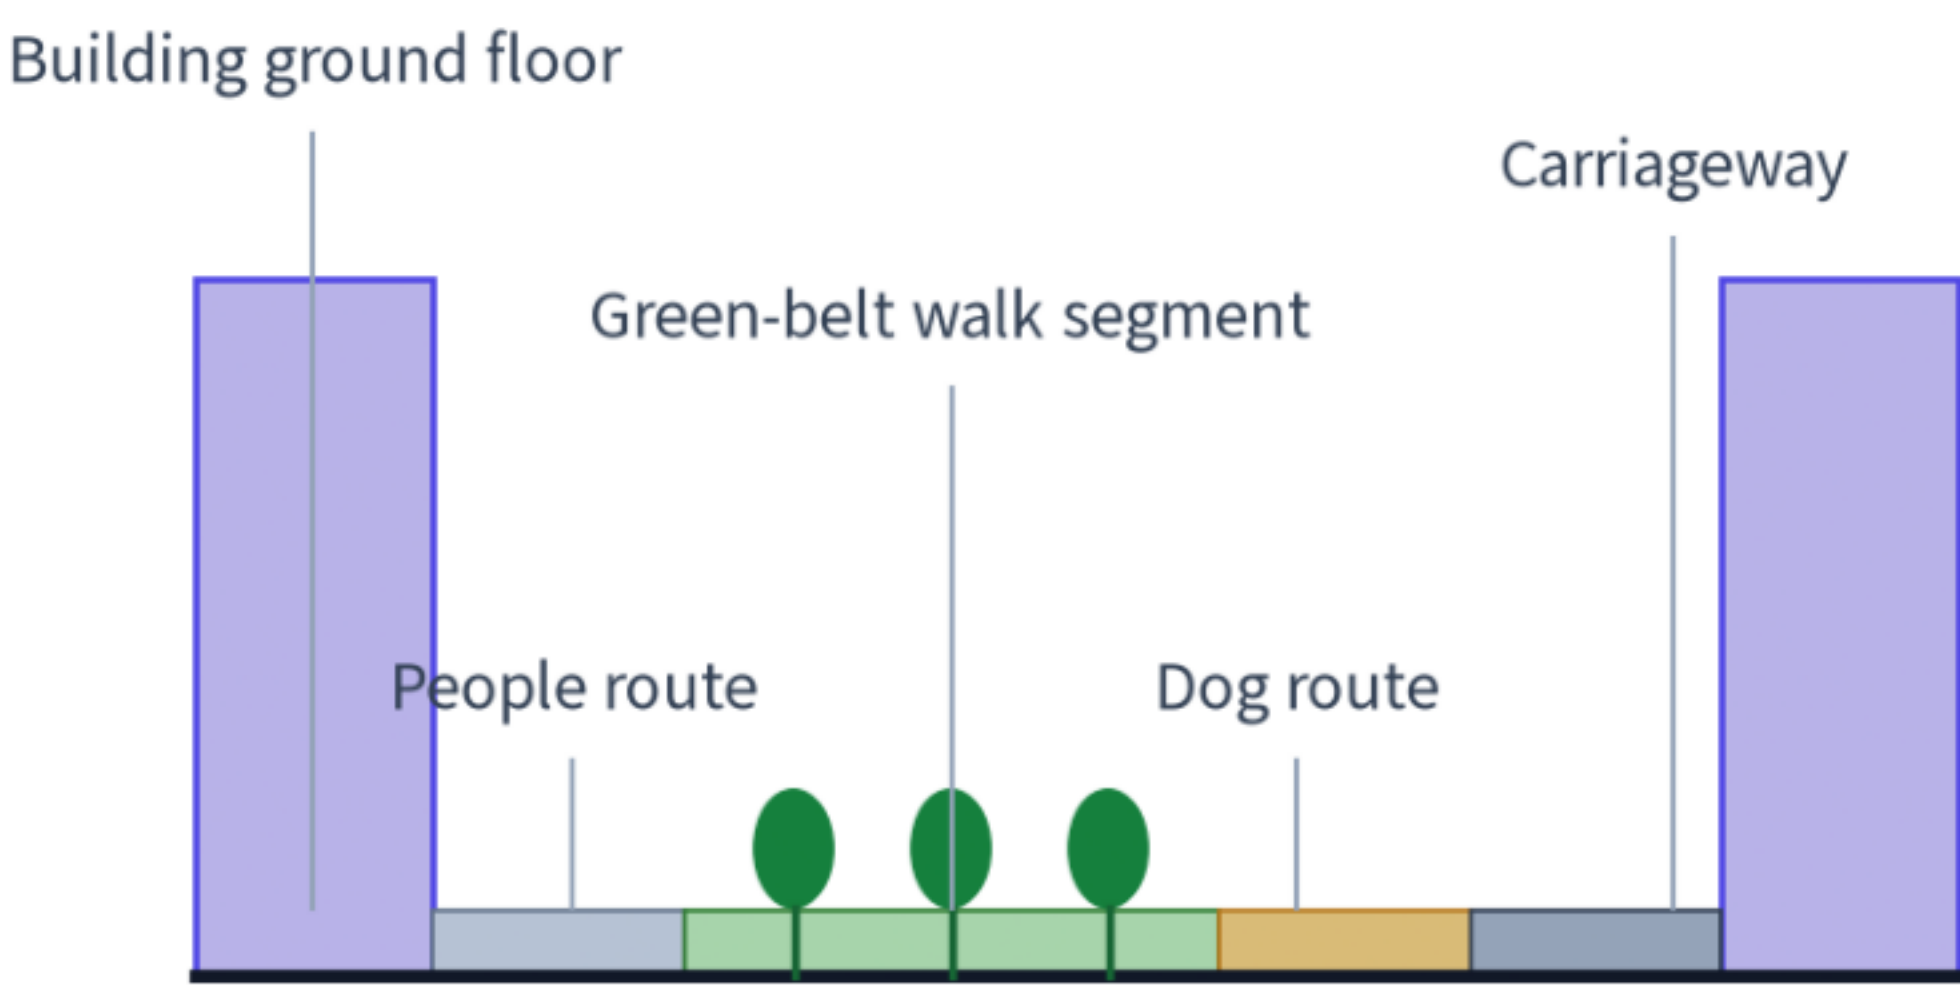

Mobility & blue-green (with shared human-pet section)

Mobility & Blue-Green Network (with shared human-pet section sketch)

PROVISIONAL boundary • not an official redline • recalculate after official data

Shared human-pet section (conceptual)

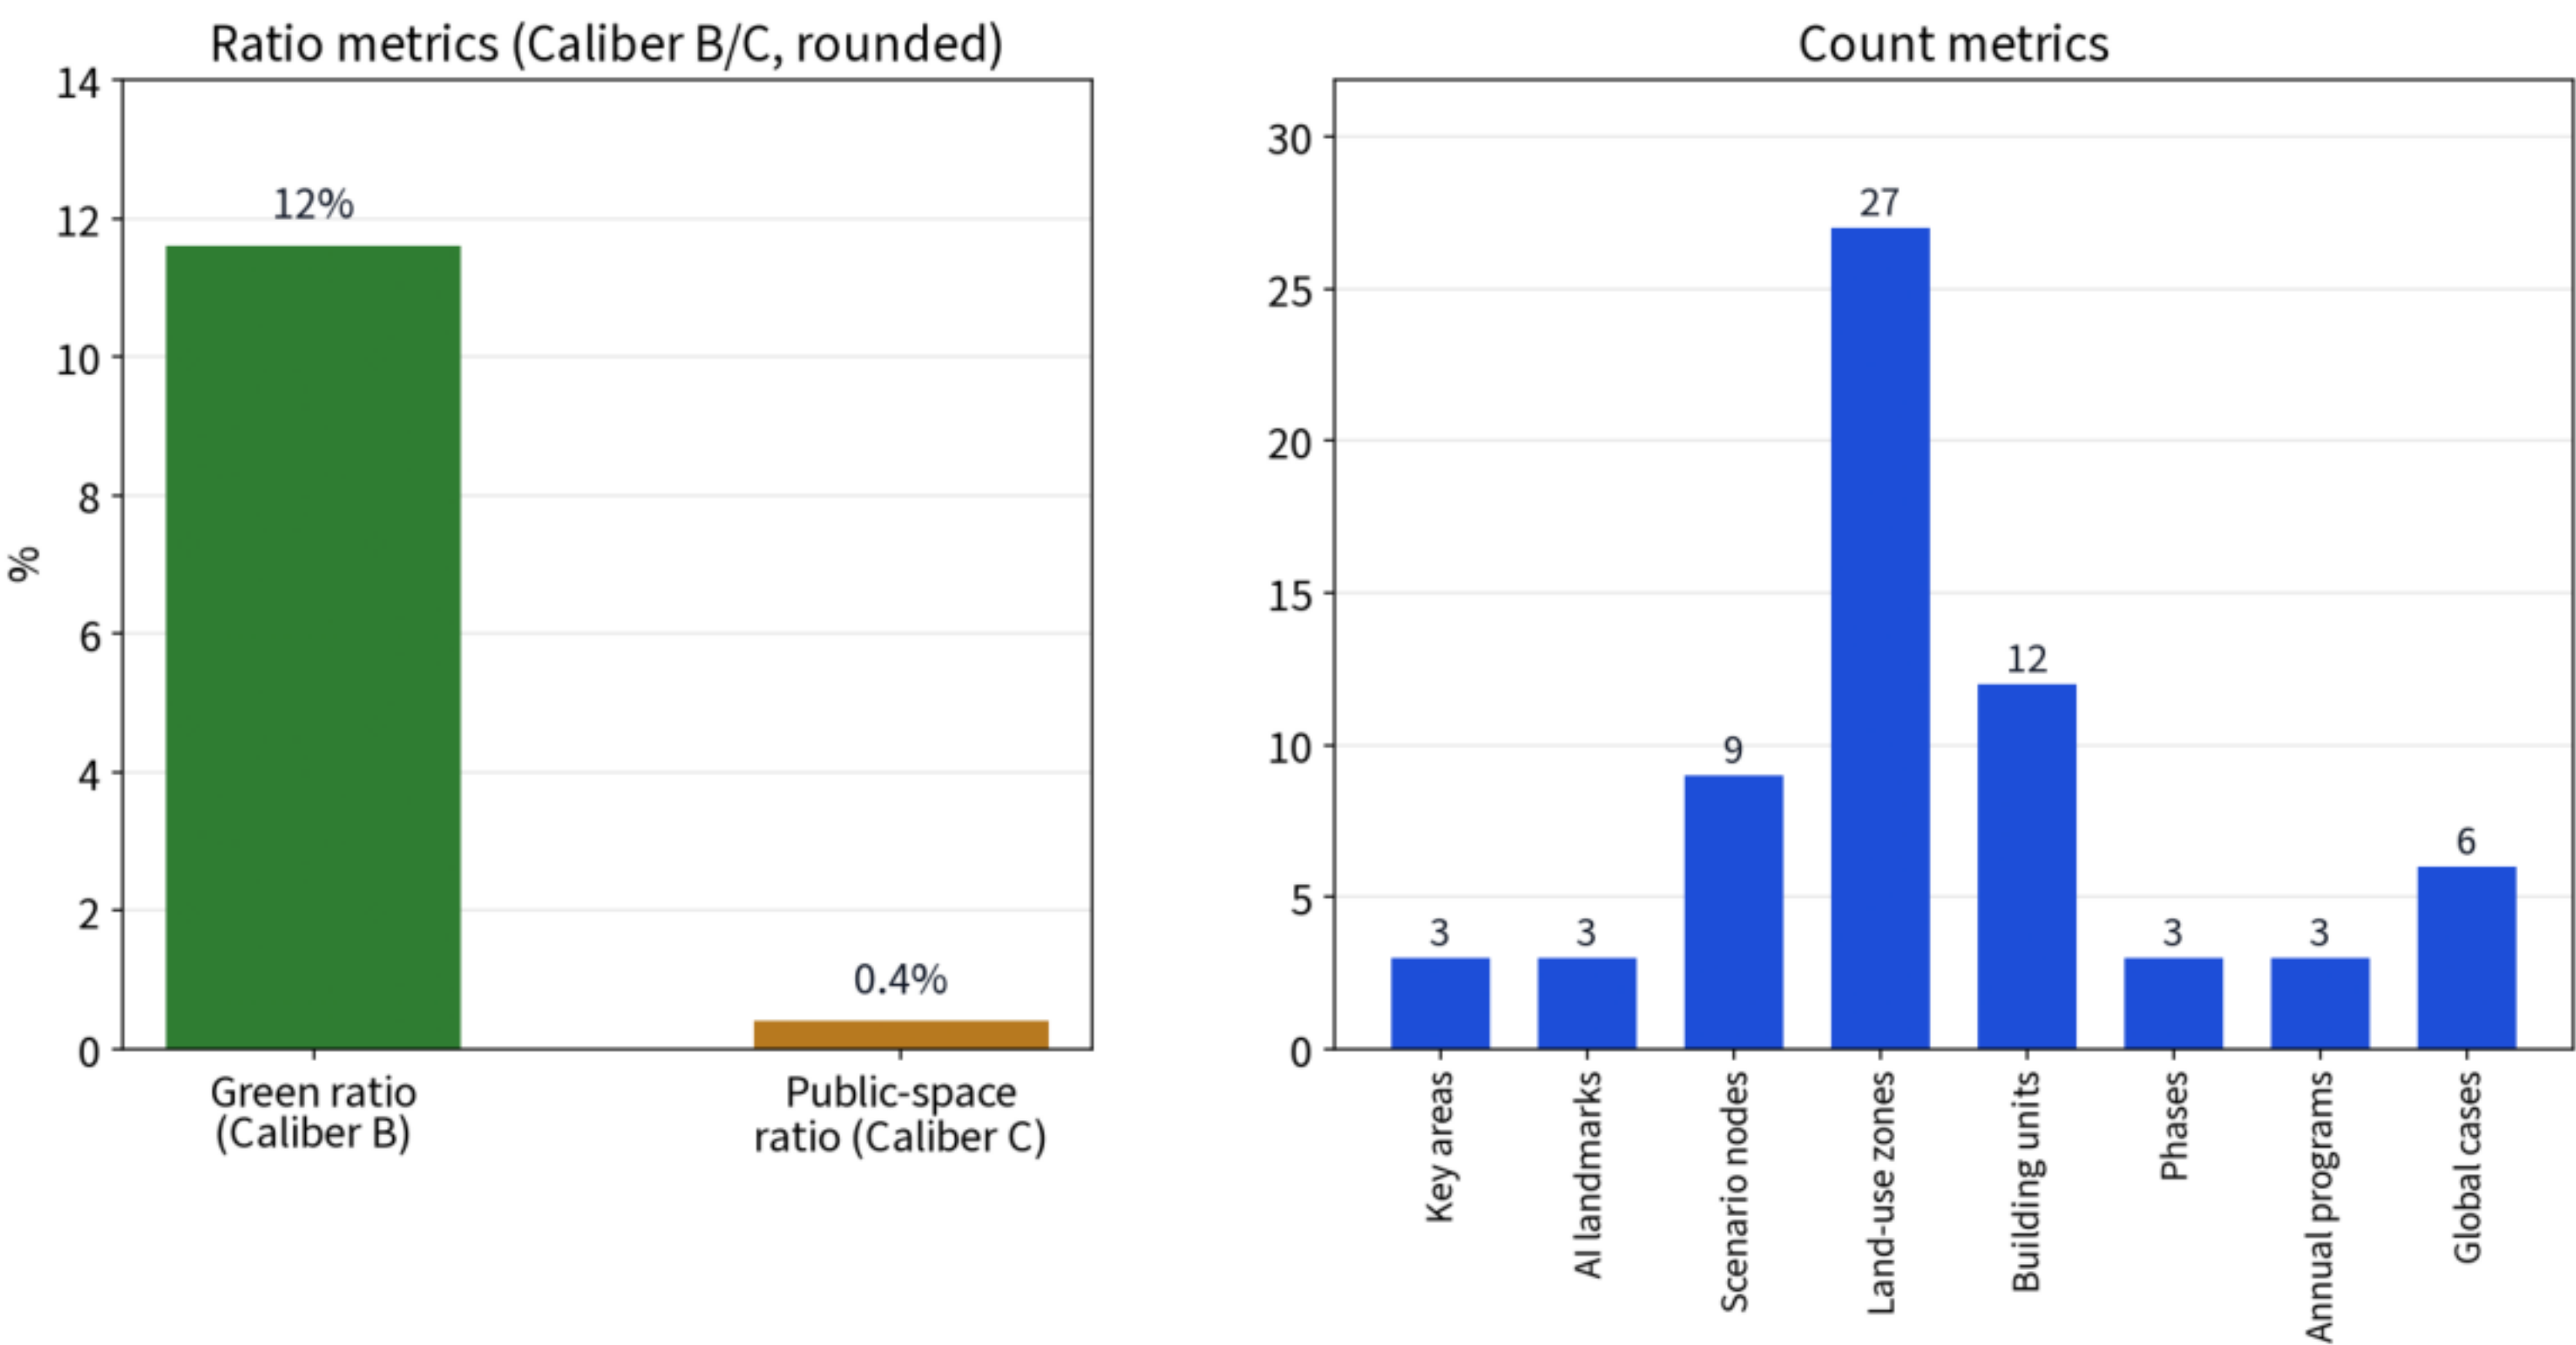

The section is a conceptual sketch, not an engineering cross-section.

Areas and ratios are rounded concept values; recalculate by the declared formulas after the organizer publishes official boundaries and baseline data.

Key metric evidence (ratios and counts on separate axes)

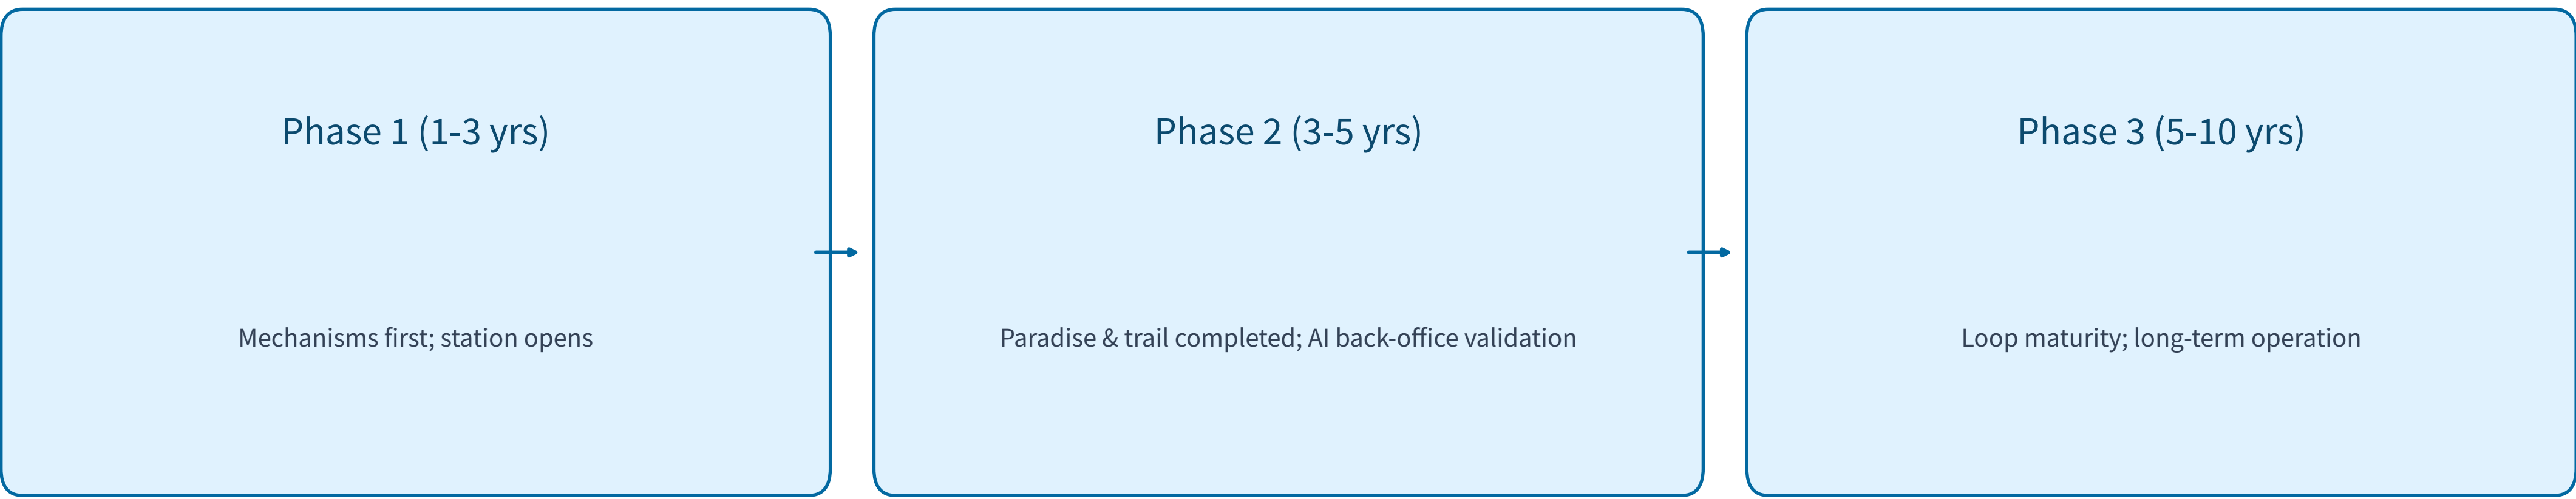

Key Metric Evidence (ratios and counts on separate axes, rounded)

PROVISIONAL boundary • not an official redline • recalculate after official data

Source: metrics.json (recomputed from package geometry); formulas, confidence, use limits and recompute triggers are listed in the metrics table of proposal.md.

Phasing and key mechanisms (concept)

Mechanisms: lean RACI (government coordinates / university collaborates / enterprises operate / community oversees / volunteers backstop) • phase gates • stop & exit (removal) conditions • annual disclosure and resident feedback channels • developer community and scenario opening
