

Xiaoyue River Scenario Wing - Concept Design Boards | Board 1/2

AI Scenario Roadshow Corridor & Public Experience Trail
Site Overview (provisional geometry)

Overall design overview (provisional, ~3 km corridor, concept)

PROVISIONAL boundary, not an official redline, recalculate after official data

Official scope hierarchy

Official scopes (announcement text; geometry pending; recalculation prevails):
1) Coordinated research c.43.6 km², 2) Overall design c.11.4 km², 3) Key areas c.368.4 ha.
This wing: ~3 km corridor and P0/N1/N2/N3 banks are a concept sub-scope of the overall design scope; site_boundary is a provisional display basemap, not an official redline.

Key figures (metrics.json)

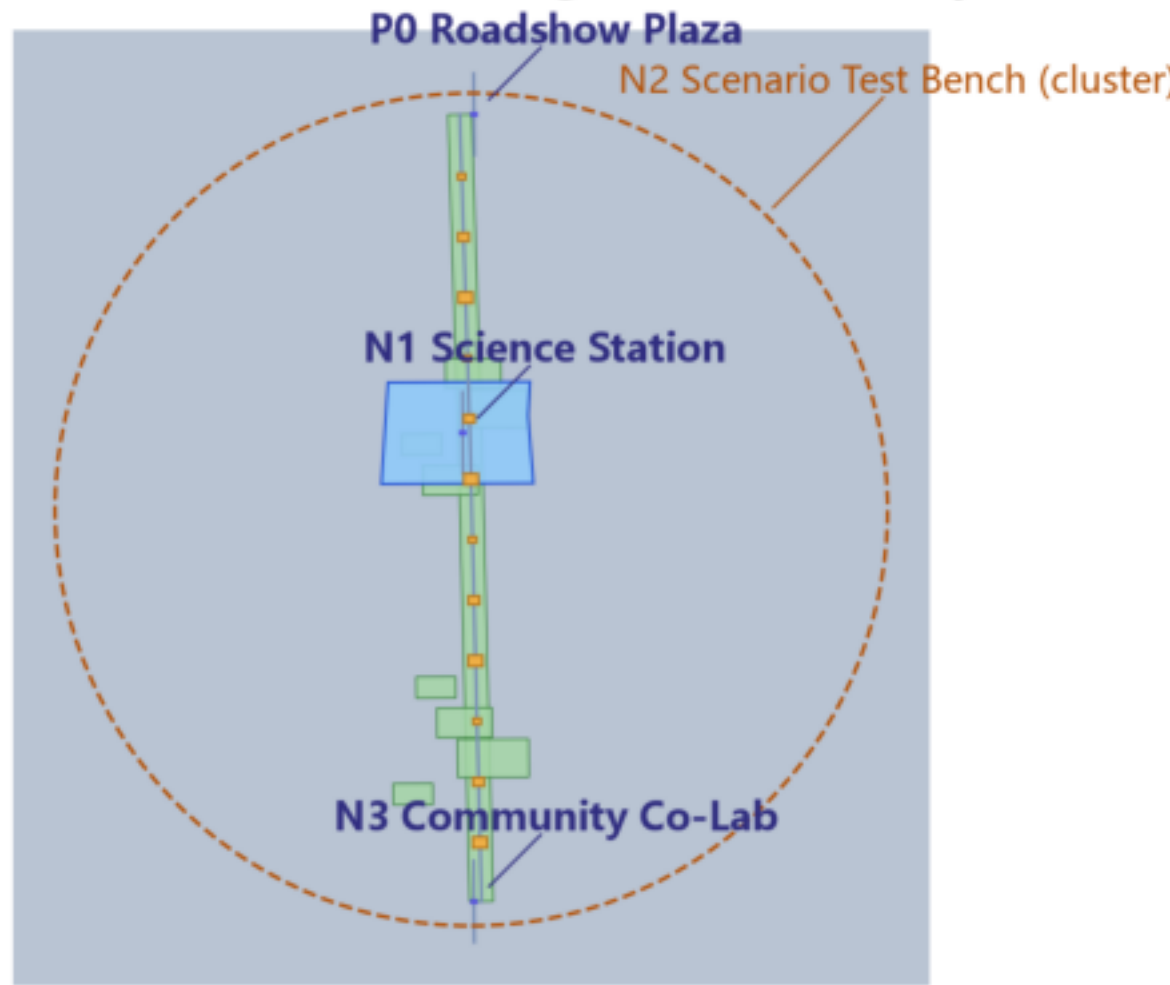

Site area c.11.41 km² (provisional concept geometry)
Green ratio c.18.2% (concept)
Public-space ratio c.0.8% (concept)
Road network c.10.2 km (concept)
Slow-traffic spine c.3 km (concept design value)
Land-use zones 23
(land_use_zone_count=23)

Note: all geometry is conceptual (provisional); full recalculation after official release; station names are real, links are conceptual.

Three Node Index & Design Tasks

Three Node Index & Design Tasks (concept)

Node roles (P0 / N1 / N2 / N3)

P0 Riverside Roadshow Plaza
Stage, lounge, terraces, honour board

N1 AI Science Station
Interactive devices - student
volunteer guides - offline captions

N2 Scenario Test Bench
12 scenario bays (rotating/pop-up)
data feedback interface

N3 Community Co-Lab
AI health service - senior access,
attended staff on site

Landmarks (3) Scenario bays (12) Roads
Green Water channel Scope (provisional)

Note: concept figure; node polygons from public_space.geojson (not the district overlays).

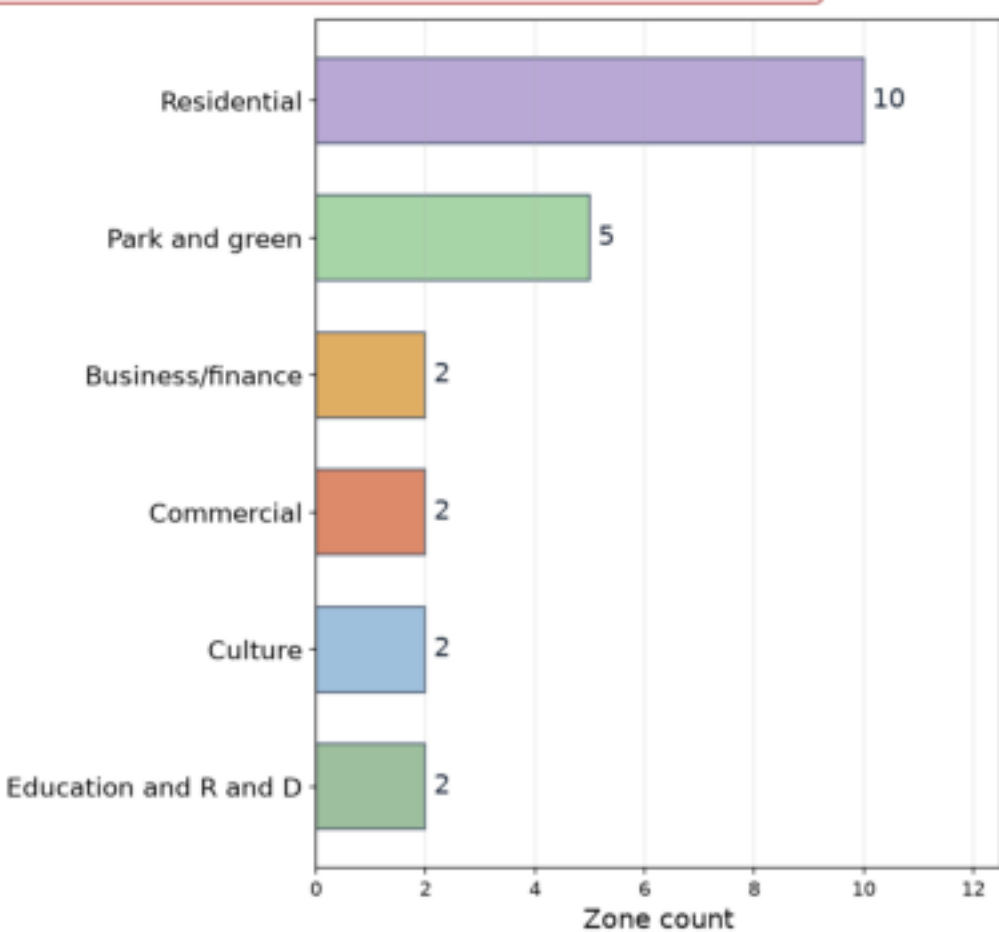

PROVISIONAL concept boundaries - NOT official redlines - recalculate after official data release

Land Use Structure (concept)

Concept land use: 23 zones (land_use_zone_count=23)

PROVISIONAL boundary, not an official redline, recalculate after official data

Calibre note

Zone counts from
land_use.geojson (EPSG:4548,
grouped by land-use code)
The three district key-area
overlays (LU-ZHON/BEIJ/DAZH)
are excluded from the count
Formula: counts per land-use
code; confidence: low
Use limit: concept display only,
no statutory land-use
conclusion
Recalculation trigger: official
land-use classification and
geometry
Retain-renovate-demolish:
retain first, renovate first,
demolish last

Source: package geometry (provisional) + metrics.json + public_space.geojson; concept only - not a statutory drawing.

PROVISIONAL concept boundaries - NOT official redlines - recalculate after official data release.

Participant: JohnXu22786 / dsh-haidian-agent | COMMUNITY-DISPLAY-ONLY (display, review and education only).

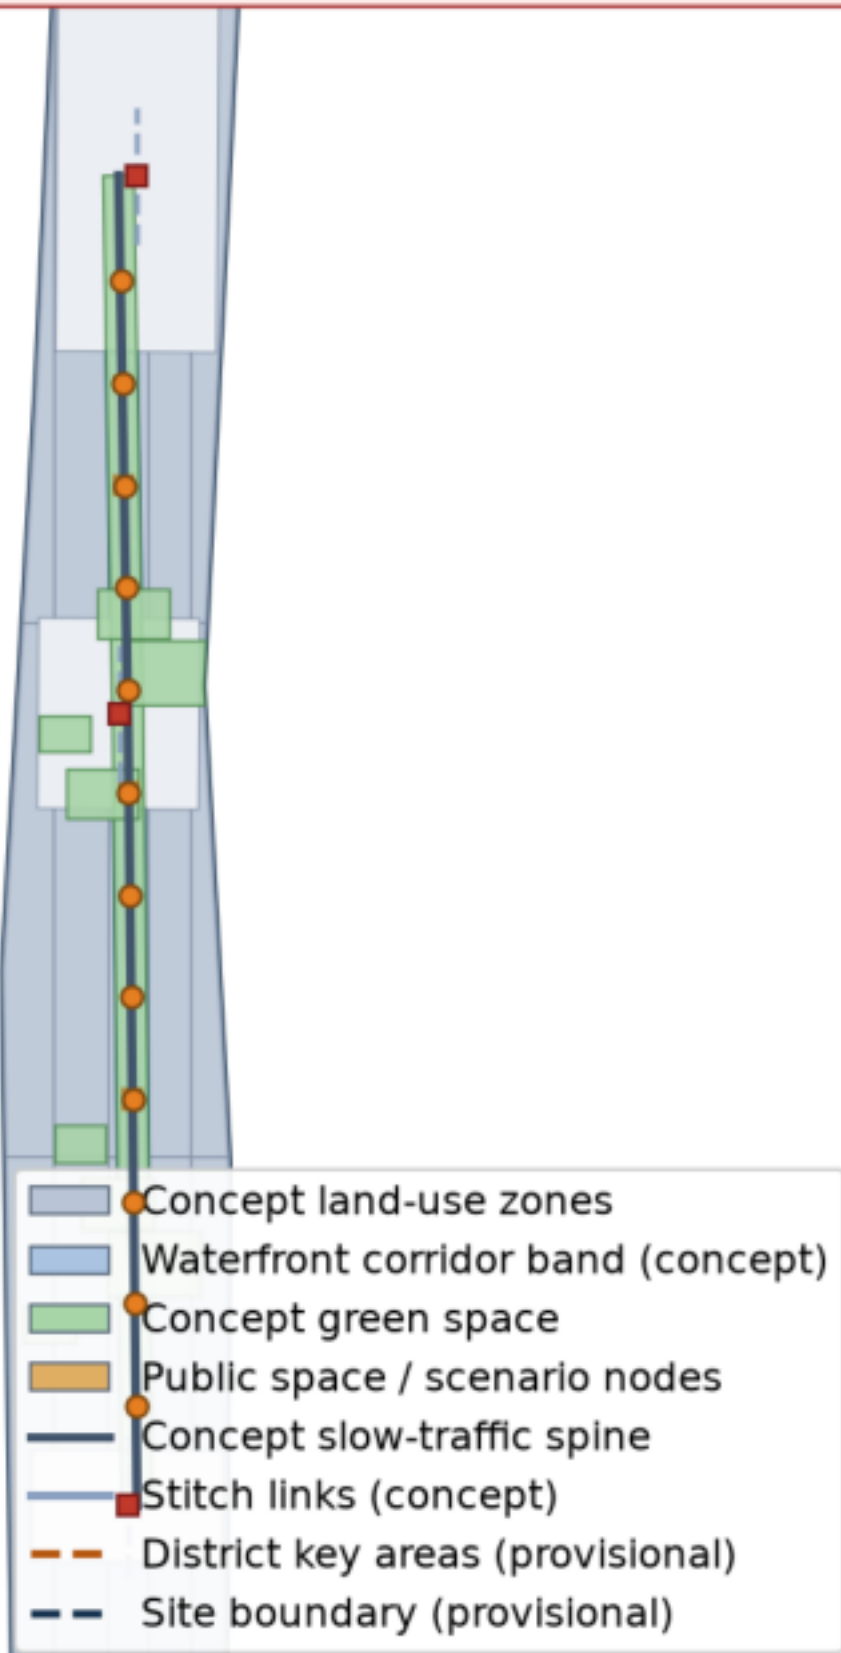

Xiaoyue River Scenario Wing - Concept Design Boards | Board 2/2

AI Scenario Roadshow Corridor & Public Experience Trail

Mobility & Blue-Green Network

Slow mobility and blue-green analysis (~3 km spine, provisional)

PROVISIONAL boundary, not an official redline, recalculate after official data

Slow mobility

~3 km continuous walk and cycle trail (concept main path)
Gaps removed; under-bridge spaces become passages and stops
5-10 min feeder links to rail stations (concept)
Shared bikes and remote parking at corridor ends

Blue-green and ecology

Classified bank naturalisation (ecological/living/roadshow segments)
Wetland purification, sponge stormwater, separated sewers
Native trees retained, shade trees added
Flood/water-level/blue-line checks are pre-review items, no conclusion prejudged

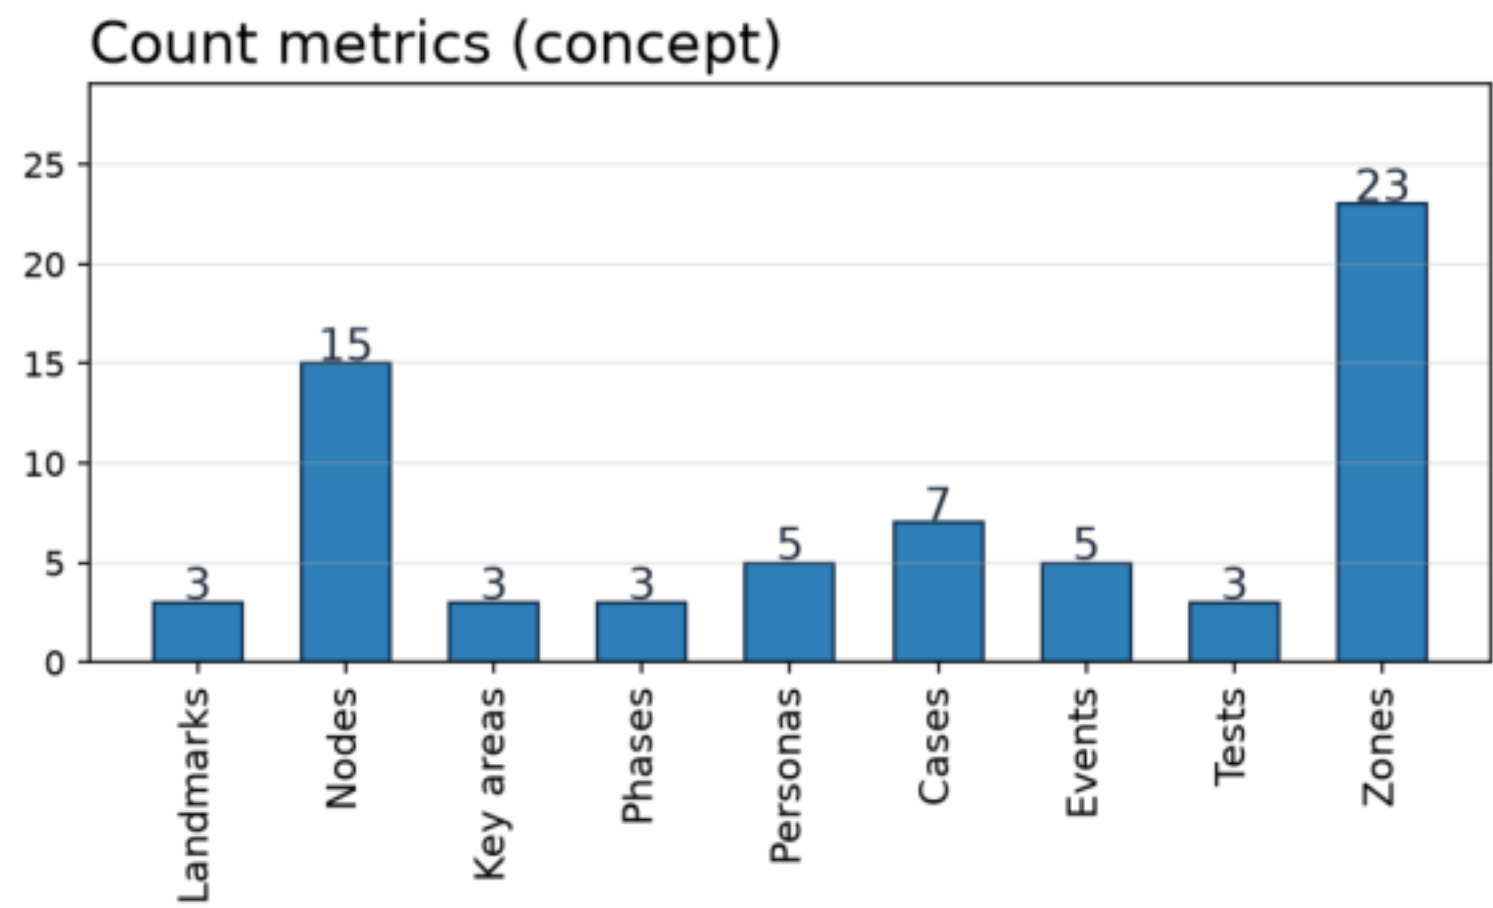

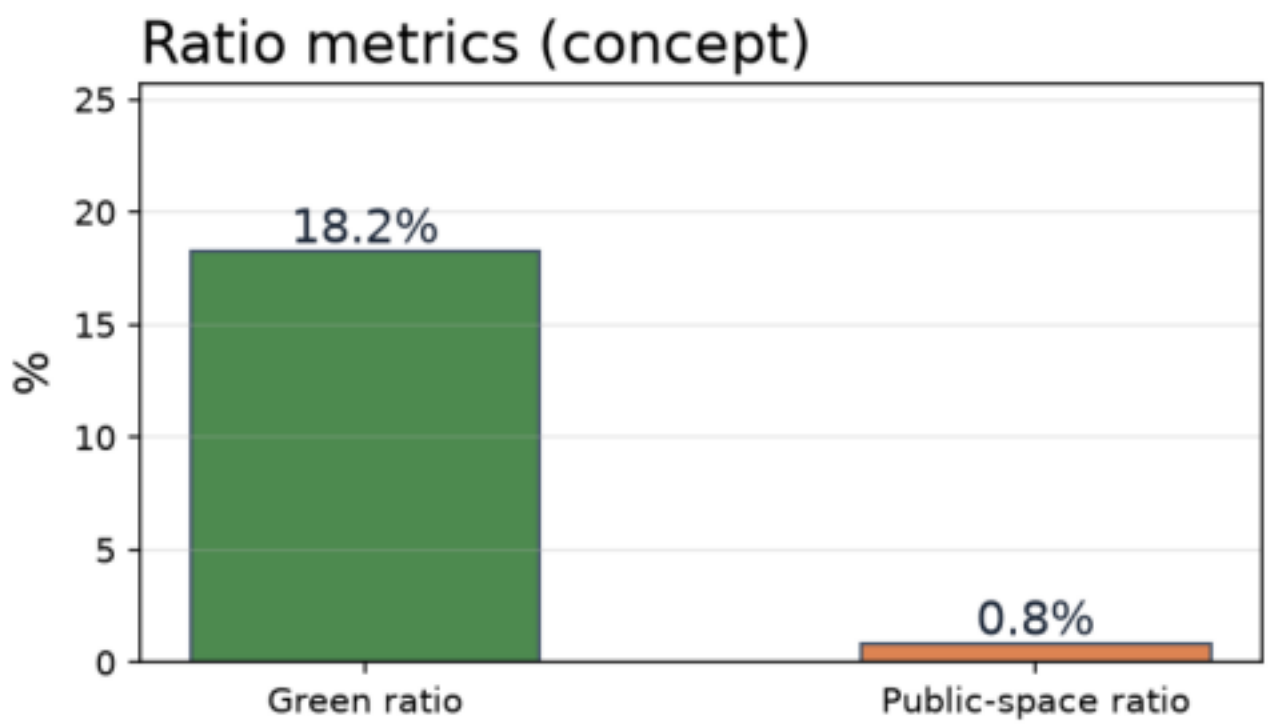

Rail feeders (names real, links conceptual): Changping Line south ext. Xueyuanqiao/XueZhlyuan/Liudaokou; Line 15 Liudaokou.

Key Metrics Evidence

Core metric evidence (metrics.json, concept-scale)

PROVISIONAL boundary, not an official redline, recalculate after official data

Per-metric calibre, source, formula, confidence, trigger

Calibre (consistent with metrics.json; shown rounded):
Green ratio = concept green area / site area (EPSG:4548) c.18.2%; public-space ratio c.0.8%
Counts: landmarks 3 / scenario nodes 15 / key areas 3 / phases 3 / personas 5 / cases 7 / events 5 / tests 3 / zones 23
Confidence: ratios low (concept geometry); counts high (layers and text counts)
Recalculation trigger: after official boundary, land-use, public-space and rail data release
Use limit: concept display and review; not a budget or engineering-feasibility basis
