

JINGZHANG RE:FRONT

AFTER THE PARK, THE CITY TURNS TO JING-ZHANG AGAIN.

ONE PARK, TWO FRONTS, THREE INNOVATION FRONTIERS

Asymmetric refronting, with real cross streets and civic nodes as handoff conditions

- RESEARCH FRONT
- CAMPUS-CITY FRONT
- STATION-CITY FRONT

EVIDENCE BOUNDARY: concept design may proceed; engineering requires professional verification of doors, grid, rights, fire, and logistics.

Read the Drawing, Then Read Its Boundary

Twenty-four pages place the spatial proposition, evidence ceiling, and professional unlock conditions on one reading line.

01	Overall Structure Evidence boundary / three scopes / corridor scroll / asymmetric mechanism
02	Key Areas Zhongzhiyuan / AI Origin / Dazhongsi / three fronts
03	AI Origin Two anchors and one test / masterplan / ground floor / IF-01 / IF-02 / S2
04	Scenarios + People Ten scenario cards / four hero journeys / seven personas
05	Delivery + Review Unlock phasing / governance / non-regression / professional triggers

Four Lines, Four Evidence States

	Existing / verified clue
	Conceptual primary refront
	Safeguard refront
	Pending connector / variable dimension

READING ORDER

- 1 Read the spatial action
- 2 Read the evidence strip
- 3 Read the unlock condition

Drawings explain; GeoJSON, metrics, and matrices support recalculation.

Concept Design Can Advance; Engineering Remains Locked

Every drawing distinguishes what is known, assumed, proposed, and reserved for professional verification.

KNOW	The announcement, taskbook, public records, and frozen OSM support claims only within their permitted use.
ASSUME	Provisional polygons and unmeasured doors, grids, parking, fire, rights, and works boundaries stay dashed.
DESIGN	Stage M may propose parametric frontier bands, civic thresholds, static wayfinding, and removable operations.
VERIFY	Rights, structure, fire, transport, care, accessibility, ecology, utilities, and operator are unlocked discipline by discipline.

concept_design_eligible=true / engineering_implementation_verified=false / M_CONCEPT_DESIGN=GO / M_ENGINEERING_IMPLEMENTATION=LOCKED

Three Scopes, Never Collapsed into One Redline

Coordinated research, overall design, and key areas carry strategy, spatial organisation, and typological testing respectively.

01

Coordinated Research Area

43.6 km²

WHY UPDATE

Industry and future-city judgement; no parcel control.

02

Overall Design Area

11.4 km²

HOW THE CORRIDOR WORKS

Refronting scroll, two-sided interfaces, mobility and blue-green systems; no exact frontage-length claim.

03

Key-Area Detailed Design

368.4 ha

HOW SPACE OPERATES

Three fronts, AI Origin demonstrator, plans, sections, scenarios, and phasing.

43.6 km², 11.4 km², and the combined 368.4 ha are announcement text references. Current polygons are provisional constraints, not official boundaries, and do not support exact area, rights, or engineering decisions.

A Corridor of Fronts

The refronting scroll: a second update of the two urban edges along an existing civic spine.

01 / SPATIAL SIGNATURE

ONE PARK, TWO FRONTS, THREE ZONES + TWO WINGS

JINGZHANG RE:FRONT / CONCEPT DESIGN

Refronting does not redraw the park; it turns adjacent ground floors, forecourts and back-of-house systems towards a shared civic spine.

EVIDENCE ATLAS / FROZEN OSM

The fifteen segments are analytical bands; the two wings are service relationships. Neither defines statutory land, roads or approved works.

DESIGN SIGNATURE + OSM TYPE 1:18,000 · NORTH UP

CONCEPT DESIGN MAY PROCEED / ENGINEERING REQUIRES PROFESSIONAL VERIFICATION

OSM © CONTRIBUTORS, ODbL 1.0 · SNAPSHOT 2026-08-28T14:20:06Z

SPATIAL MOTHER DIAGRAM IS CONCEPTUAL; OSM FRAME IS NOT A STATUTORY REDLINE

Turn the Ground Floor to the Park

One park and two fronts: primary refront, safeguard refront, and the ground-floor frontier band.

02 / ECOSYSTEM MAP

THREE ZONES + TWO WINGS × EIGHT ENABLERS

JINGZHANG RE:FRONT / CONCEPT DESIGN

The innovation ecosystem is translated into spatial carriers, accountable people and stoppable projects; links show service relationships, not roads, utilities or ownership.

TEN PROJECT PACKAGES

ECOSYSTEM RELATIONSHIP MAP / NOT TO SCALE

CONCEPT DESIGN MAY PROCEED / ENGINEERING REQUIRES PROFESSIONAL VERIFICATION

OSM © CONTRIBUTORS, ODbL 1.0 · SNAPSHOT 2026-08-28T14:20:06Z

SOLID=PRIMARY CARRIER; OPEN DOT=SUPPORT OR UNVERIFIED. RIGHTS + OPERATING RESPONSIBILITY UNLOCK EVERY RELATIONSHIP.

Cross Only with Cause

Real cross streets, legal crossings, civic nodes, and continuous logistics determine every handoff.

04 / PUBLIC GROUND SYSTEM

THE PARK IS CIVIC GROUND, NOT A DISPLAY STRIP

JINGZHANG RE:FRONT / CONCEPT DESIGN

Ordinary movement, accessibility, blue-green performance and logistics continuity come first; refronting and AI occupy only residual, recoverable space.

FOUR LINES THAT DISPLAY CANNOT DISPLACE

- 01** ——— ORDINARY MOVEMENT
WIDTH · HOURS · CAPACITY ≥ BASELINE
- 02** - - - ACCESSIBILITY + STAFFED HELP
VERIFY SEGMENT BY SEGMENT; STATIC + STAFFED ROUTES REMAIN
- 03** ——— BLUE-GREEN + DAILY CARE
ZERO TREE-REMOVAL PROPOSAL; CANOPY, INFILTRATION, DRAINAGE + CARE DO NOT DECLINE
- 04** - - - FIRE, LOADING, WASTE + MAINTENANCE
ALL VERIFIED NECESSARY ENDPOINTS REMAIN 100% ACCESSIBLE

S2 / SHUANGQING ROAD: ONE HANDOFF TEST

EAST LANDING UNVERIFIED

HANDOFF ONLY AFTER LEGAL LANDING + CONTINUOUS ACCESSIBILITY + ORDINARY MOVEMENT + RIGHTS/FIRE ALL PASS.

CORRIDOR TYPE 1:18,000 + S2 INSET TYPE 1:4,000 · NORTH UP

CONCEPT DESIGN MAY PROCEED / ENGINEERING REQUIRES PROFESSIONAL VERIFICATION

OSM © CONTRIBUTORS, ODbL 1.0 · SNAPSHOT 2026-08-28T14:20:06Z

FOUR LINES ARE CONCEPTUAL SYSTEM GRAMMAR; S2 EAST LANDINGS ARE CONDITIONAL., NOT A CLAIMED CONNECTION

S2 EASTWARD LEGAL LANDING IS UNVERIFIED: SHOW THE TEST; CLAIM NO NEW THROUGH-ROUTE.

One Civic Spine, Three Fronts

Research, campus-city, and station-city fronts use one comparison scale without copying one form.

03 / THREE FRONTS

THREE CONFLICTS, THREE RE:FRONT TYPES

JINGZHANG RE:FRONT / CONCEPT DESIGN

At one scale, each area pairs its conflict with a spatial action, accountable decision and stop condition.

01

ZHONGZHIYUAN

RESEARCH RE:FRONT

- CONFLICT

Research should be legible to the public without crossing laboratory, IP or operational boundaries.
- SPATIAL ACTION

Form a staffed public arcade at a verified entrance; observation stays in front while research and maintenance remain behind.
- KIT / DECISION

Research arcade + staffed explanation + open-research marker; research, IP and operations decide.
- STOP CONDITION

Stop if entrance, rights or front/back separation is unverified, ordinary movement is reduced, or no staff is present.

Boundary, entrance and research front/back line remain to be verified.

02

AI ORIGIN

CAMPUS-CITY RE:FRONT

- CONFLICT

Innovation, care, civic service, parking/drop-off, fire access and logistics compete for one park edge.
- SPATIAL ACTION

Share the IF-01 frontage, keep IF-02 staffed, and hand off at S2 only after a legal east landing is proven.
- KIT / DECISION

Two anchors + one test, ground-floor frontier and public archive; operations, care, fire and community staff decide.
- STOP CONDITION

Stop if the ground floor cannot open lawfully, parking/fire conflicts remain, service becomes AI-only, or S2 stays NO-LINK.

PROV-KEY-002 and real A/RF-06 are offset; no silent relocation.

03

DAZHONGSI

STATION-CITY RE:FRONT

- CONFLICT

Station arrival, interchange, accessibility, civic service and commuting need one legible ground.
- SPATIAL ACTION

Use a static arrival grammar to connect verified exits, staffed help, pauses and ground-floor services without inventing transport works.
- KIT / DECISION

Ground arrival system + arrival marker + non-digital kit; transport, accessibility, culture and operations decide.
- STOP CONDITION

Stop if exits or routes are unverified, static alternatives are missing, or evacuation, transit, drop-off or movement is impaired.

PROV-KEY-003 is offset from the real station; rebind when official geometry arrives.

COMMON WINDOW = 1.7 km × 1.7 km · TYPE 1:10,000 · NORTH UP

CONCEPT DESIGN MAY PROCEED / ENGINEERING REQUIRES PROFESSIONAL VERIFICATION

OSM © CONTRIBUTORS, ODbL 1.0 · SNAPSHOT 2026-08-28T14:20:06Z

PALE DASH=REPOSITORY PROVISIONAL CONSTRAINT; ALL ACTIONS ARE PARAMETRIC CONCEPT PROPOSALS

ALL THREE POLYGONS ARE PROVISIONAL, NOT OFFICIAL BOUNDARIES. THE DAZHONGSI MISMATCH IS APPROX. 1.7 KM (PROVISIONAL-GEOMETRY CALCULATION).

Make Research Visible, Without Crossing the Boundary

Zhongzhiyuan pairs public observation and staffed explanation with a controlled research back line.

- A verified public entrance and shared ground floor establish one civic address.
- Reviewed samples, a research directory, and staffed explanation create an observable porch.
- Controlled labs, sample movement, maintenance, and research security retain an independent back line.
- Under-bridge or riverside hardscape waits for flood, bridge, fire, and maintenance review.

Two Anchors, One Test: AI Origin Re:Front Demonstrator

IF-01, IF-02, and S2 test whether ground floors, forecourts, park, and logistics can coexist.

06 / AI ORIGIN MASTERPLAN

TWO ANCHORS, ONE TEST: AI ORIGIN RE:FRONT DEMONSTRATOR

JINGZHANG RE:FRONT / CONCEPT DESIGN

IF-01, IF-02 and S2 test whether ground floors, forecourts, ordinary park passage and logistics can coexist.

- IF-01: innovation, care, parking, drop-off, fire access, and logistics coexist; care and safety always take priority.
- IF-02: staffed civic service and human governance; never an AI showroom.
- S2: a western cross-street clue is visible; the legal eastward landing is unknown, so no new through-route is claimed.
- The real RF-06/A study window and provisional PROV-KEY-002 are misaligned and disclosed side by side.

Ground-Floor Frontier Band—Logistics Repositioning

One structural bay is only a parametric cap; doors, grid, fire, parking, and rights remain dashed or alternative until verified.

07 / GROUND-FLOOR INTERFACE

GROUND-FLOOR INTERFACE STRATEGY: PUBLIC THRESHOLD AND LOGISTICS REPOSITIONING

JINGZHANG RE:FRONT / CONCEPT DESIGN

Building outlines come from frozen OSM. Unverified rooms, grids and doors are not drawn; frontier depth remains variable.

IF-01 MEET AT THE FRONT; KEEP THE BACK RUNNING

D's ground floor has evidence of innovation events and a clinic; B/C are OSM-mapped. A duplicate C footprint remains C?. Release P? only after replacement parking, drop-off, fire access and drainage pass.

IF-02 PEOPLE REMAIN PRESENT

No. 27 is a staffed public-service and human-governance anchor, not an AI showroom. Verify the clinic building, park-facing door, medical waste/emergency route, residential access and fire route.

TWO TYPE WINDOWS ≈ 1:500 CONCEPT RELATION · NORTH UP · 50 m BAR

VERIFY SIGNALS, WIDTH/FLOW, EAST LANDING, PROPERTY AND FIRE CONDITIONS; NO NEW LINK IS CLAIMED

Bring Arrival and Service Together on the Ground

Dazhongsi lets station thresholds, interchange, community service, and ordinary park movement share a legible ground.

- One ground-arrival map first combines finding the exit, park, accessible route, and civic service.
- Static wayfinding, tactile paths, and staffed service form the AI-off baseline.
- A removable civic threshold waits for station egress, bus/drop-off, fire, rights, and accessibility review.
- The provisional key area and the real Dazhongsi anchor are approx. 1.7 km apart (provisional-geometry calculation); official boundary correction is required.

Three Fronts Are Three Spatial Relationships

Research, campus-city, and station-city fronts may work in parallel; they are not a north-to-south industry chain.

03B / OPTIONAL DIAGRAM

THE SPATIAL GRAMMAR OF THREE FRONTS

JINGZHANG RE:FRONT / CONCEPT DESIGN

THIS IS AN OPTIONAL MECHANISM DIAGRAM; THE FORMAL key-areas.png USES REAL OSM BASEMAPS AND EQUAL-SCALE WINDOWS.

SPATIAL TYPE ONLY; IT DOES NOT REPLACE THE REAL OSM EQUAL-SCALE COMPARISON IN key-areas.png

Equivalent Human Routes Come Before AI Enhancement

Research matching, shared timetables, care guidance, and civic service all retain non-digital access.

SC-01

Visible Testing, Without Crossing Research Boundaries

Zhongzhiyuan civic porch

Search only public, rights-cleared projects and expert directories.

Staff confirm every introduction; no lab data. Printed directories remain after shutdown.

SC-02

Care, Innovation, and Maintenance Do Not Compete for One Door

IF-01 / shared timetable TVS

Flag conflicts among care, events, loading, and maintenance windows.

Each lead approves; emergency and fire access always override scheduling.

SC-03

Reach the Right Place Before Adding Intelligence

IF-01 / IF-02

Provide multilingual, large-type, and audio guidance; never diagnose or triage.

Care or service staff decide; fixed signs and phone service remain available.

SC-04

AI Makes It Clear; People Make the Decision

IF-02 staffed service desk

Explain published procedures, translate, and pre-check forms.

Staff review; no eligibility decision and no personal profile.

Test Handover and Exit, Not Spectacle

Low-speed logistics, legal landings, and environmental evidence keep AI inside reviewable tasks.

SC-05

Deliveries Yield; Fire Access Never Waits

Back lines across three areas / TVS

Use verified routes and anonymous aggregate flow to suggest off-peak movement.

Property and fire leads approve; revert to manual delivery on failure.

SC-06

A Connection Is a Proven Act

S2 / station-city arrival

Compare maps, field route checks, and accessibility review.

No legal landing means NO-LINK; delete the connector and retain existing routes.

SC-07

A Screen Does Not Stand in for a Tree

Environmental calibration points / TVS

Flag anomalies in heat, wind, noise, air, and rainwater data.

Professionals interpret; poor data means indeterminate, and low-tech improvements remain after removal.

The Space Still Works with AI Off

Inclusive wayfinding, cultural narration, and event operations return to static, staffed, everyday states.

SC-08

Find the Park Without Opening a Phone

Dazhongsi arrival system

Offer multilingual alternatives only along staff-verified routes.

Static maps, tactile ground, and station staff complete the basic task.

SC-09

The Park Speaks Without Profiling Visitors

Heritage nodes

Create multilingual, age-specific, audio, and text versions from rights-cleared history.

Editors approve; no tracking, and unclear rights mean removal.

SC-10

Events Can Close; Everyday Space Continues

Removable event nodes

Compare clear width, egress, noise, weather, power, and waste conflicts.

Cancel when any baseline fails; remove everything and restore ordinary use.

Four Everyday Journeys Turn Scenarios into City Life

A research forecourt, one day across two anchors, station arrival, and a two-wing open test day probe people—time—space relationships.

Seven People, Seven Questions the Design Cannot Ignore

Personas are not survey statistics; they are a public-interest acceptance checklist.

13 / PERSONAS

SEVEN EVERYDAY LIVES, ONE SHARED ACCEPTANCE SEQUENCE

JINGZHANG RE:FRONT / CONCEPT DESIGN

These personas are not consumer profiles. They test whether ordinary service, human decisions, logistics and accessibility remain intact.
