

## PET-FRIENDLY KEY AREAS • THREE NODES / ONE LOOP

Smart Companion Loop / PET • JZ • schematic, provisional, relocate after official survey

- 01 PET PARADISE

Zhongzhiyuan side • off-leash/social ground
- 02 COMPANION TRAIL

AI Origin Community • time-shared slow path
- 03 PET SERVICE STATION

Dazhongsi side • staffed service point

LOOP / 环线: east-west stitching + north-south permeability • reversible public-space components

All labels are semantic zone names; no statutory redline or engineering position.

Three semantic nodes: PET PARADISE • COMPANION TRAIL • PET SERVICE STATION

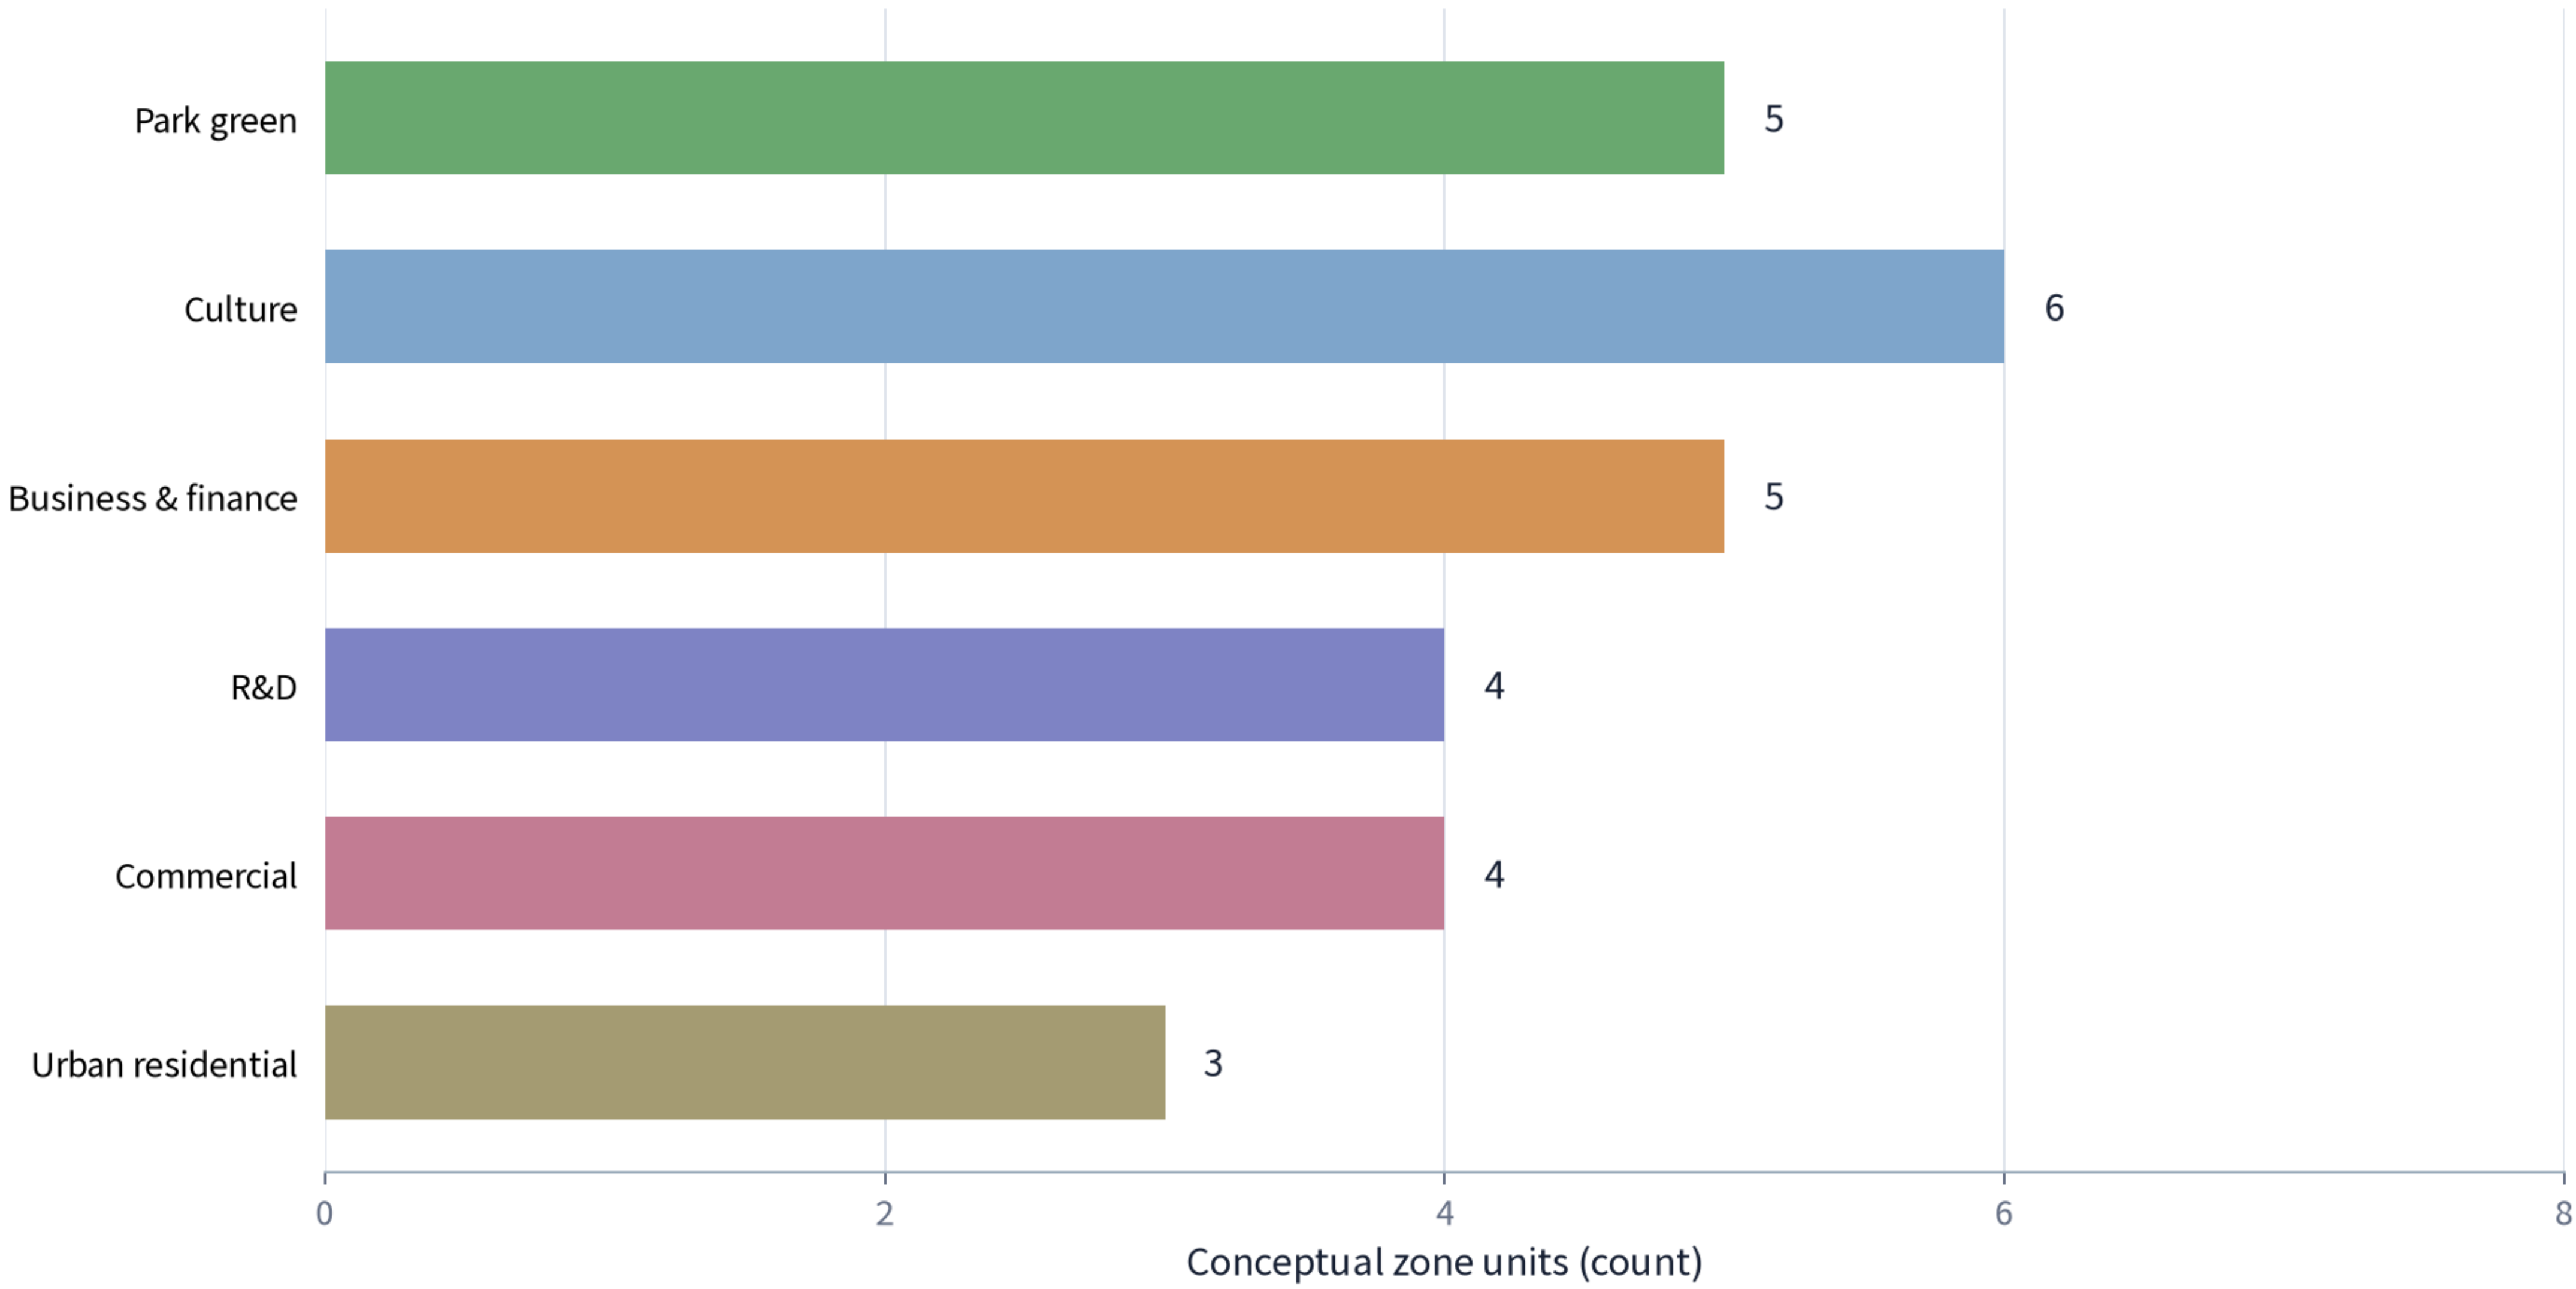

Labels are conceptual zone names; no statutory redline, land commitment or engineering position is implied.

East-west stitching + north-south permeability • reversible public-space components

LAND-USE STRUCTURE • CONCEPTUAL ZONE UNIT COUNT

Caliber A • no area-share claim • 27 units total

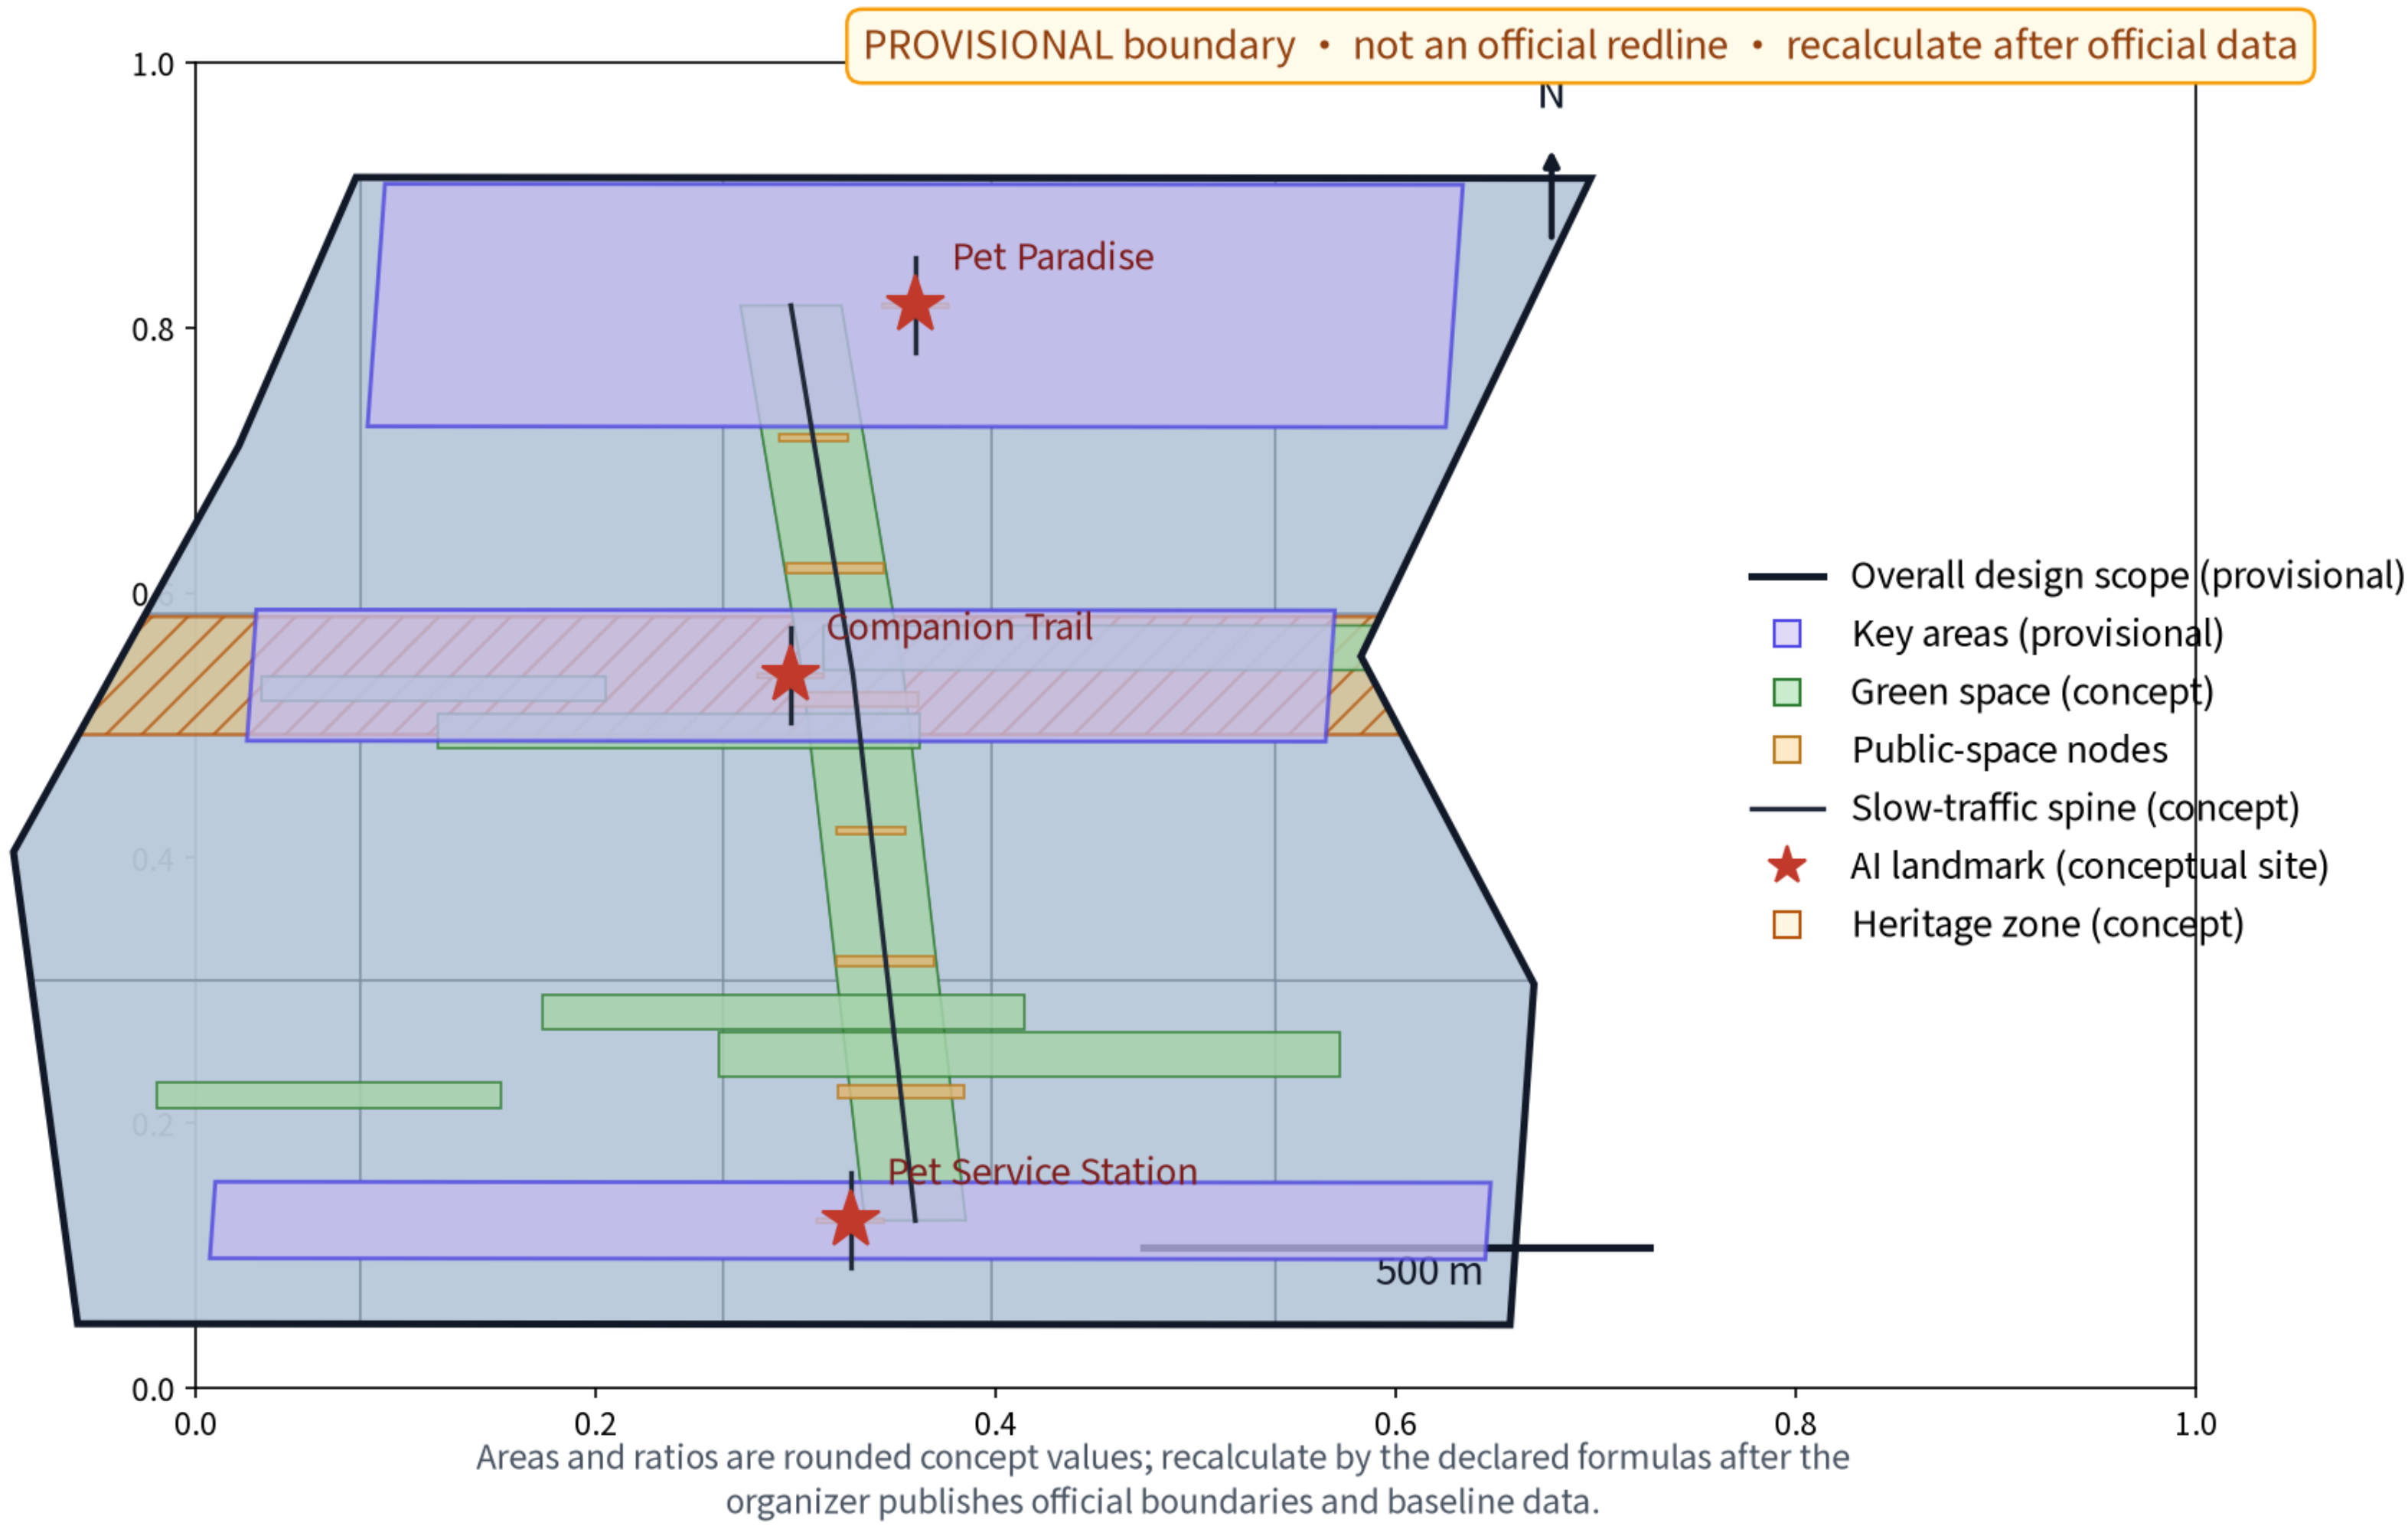

Caliber A counts features in land\_use.geojson; official land classification and area data trigger a separate recompute.

Green ratio (Caliber B) and public-space ratio (Caliber C) are separate geometry measures, not shares in this chart.

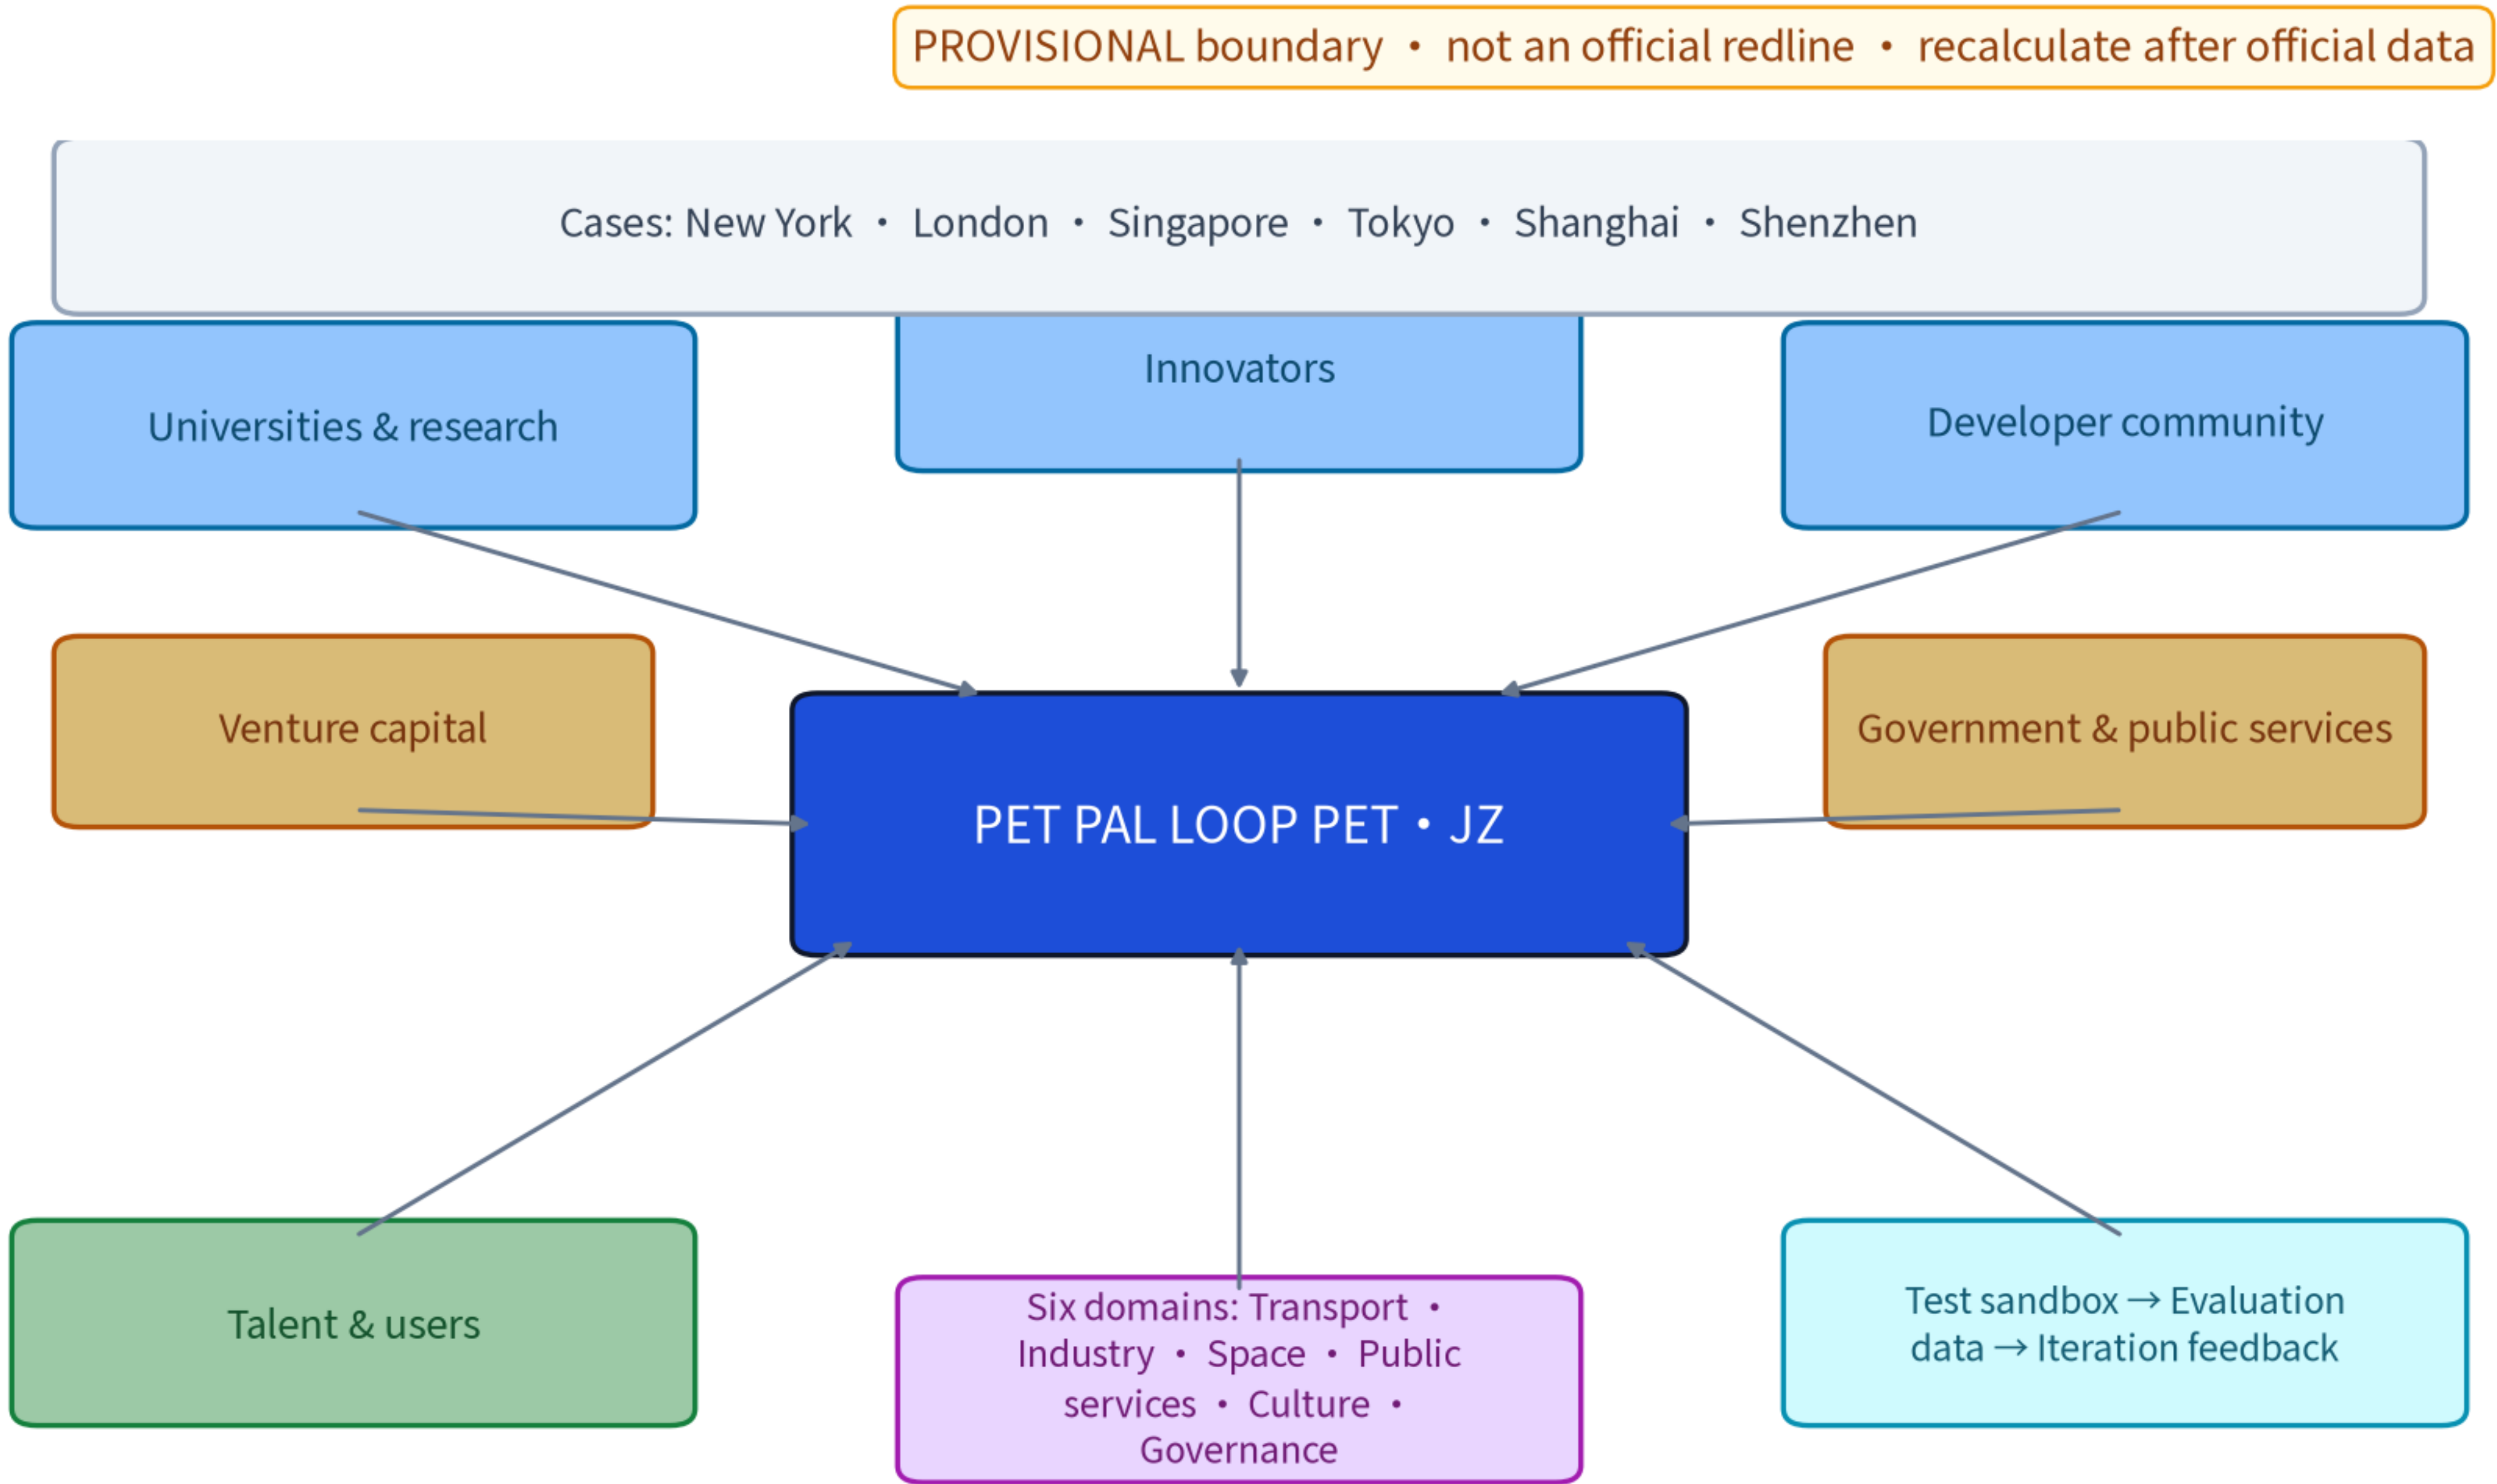

27 conceptual zone units • no area-share denominator

Overall Design Overview - Pet Pal Loop Network (provisional geometry, with site context)

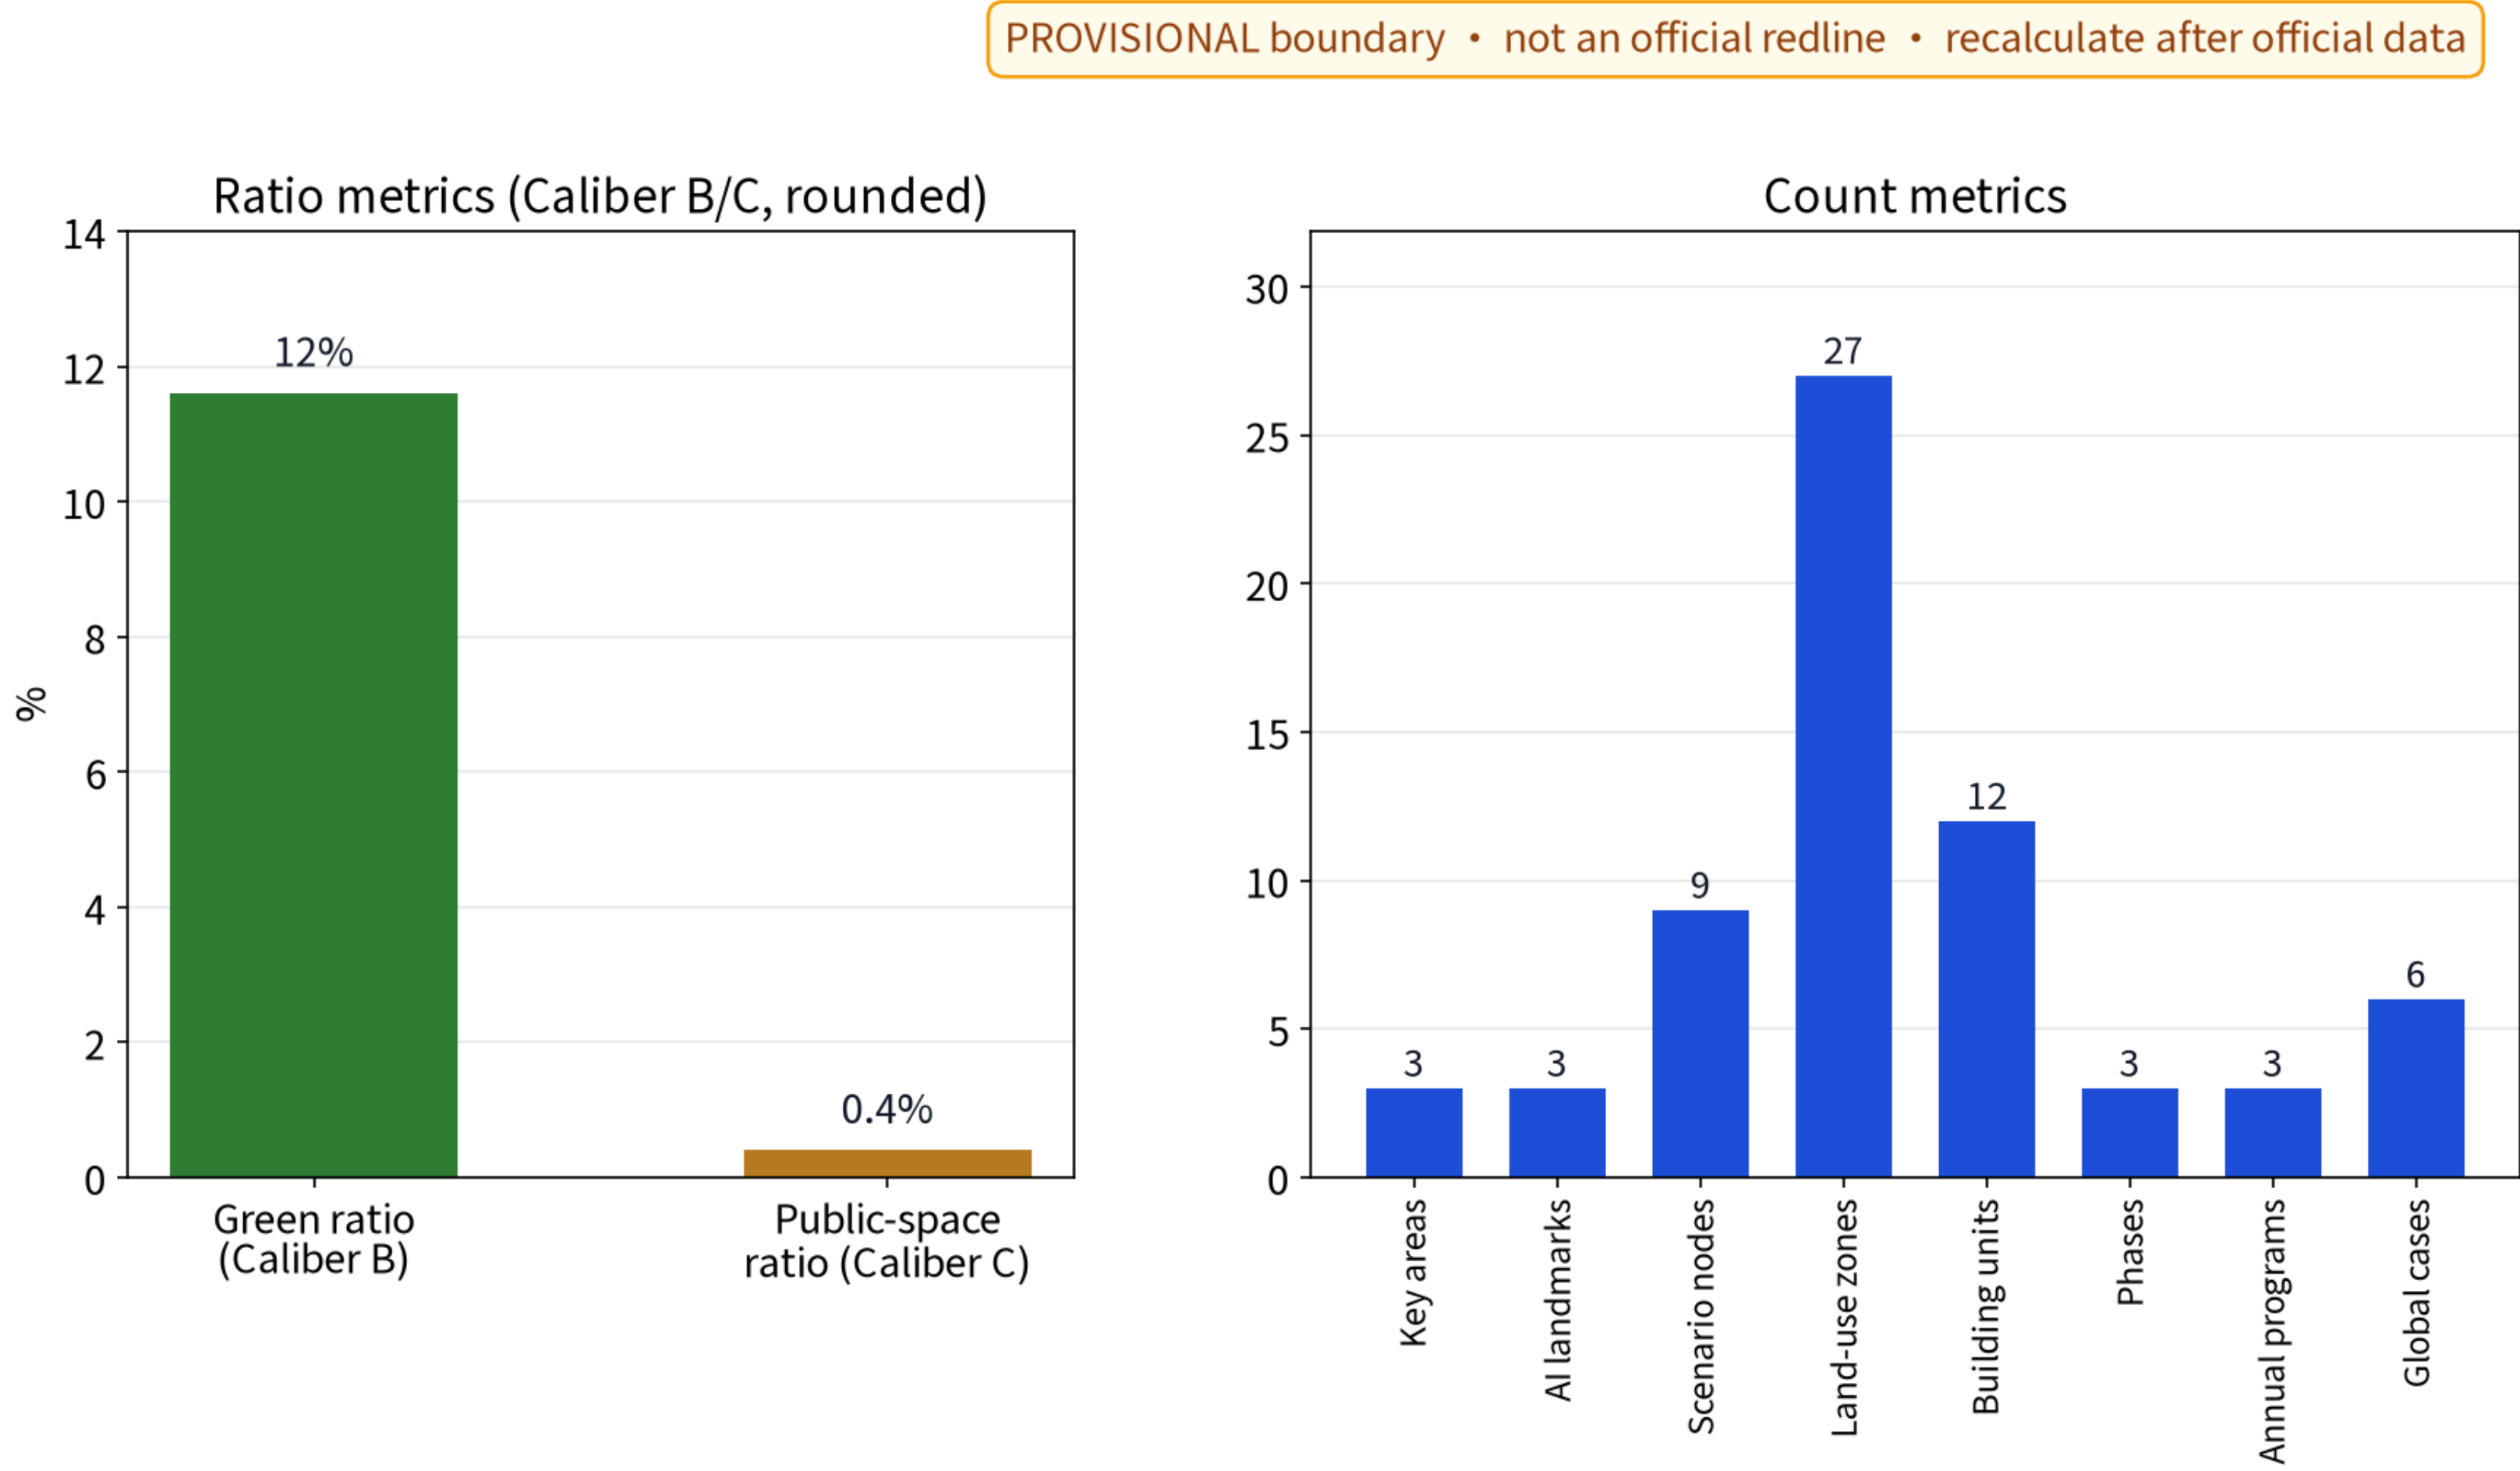

Global AI Innovation Ecosystem Atlas: Pet Pal Loop (6 circles x 6 domains x cases)

Every case is registered in sources.json as a public overview only; no official endorsement or implementation commitment is implied.

global\_case\_count=6 • pet\_friendly\_case\_count=6

Key Metric Evidence (ratios and counts on separate axes, rounded)

Source: metrics.json (recomputed from package geometry); formulas, confidence, use limits and recompute triggers are listed in the metrics table of proposal.md.
