

THE UNFINISHED CITY

A CENTENNIAL JING-ZHANG URBAN CO-INTELLIGENCE EXPERIMENT BELT

From urbanization to urban co-intelligence: an existing city that can be sensed, respond, decide together, pause and revise.
This is a conceptual urban-design package. The displayed extent follows the task package and is not a statutory boundary or la

03 Conceptual land-use plan: embedded renewal within the provisional ex

03 概念性平面用地：在暂定范围内嵌合更新程序

EMBEDDED LAND-USE PLAN / TESSELLATED PROGRAMME + PUBLIC SPACE

这是一张范围内的用地图：全部功能色块严格落在任务资料库暂定范围内，并以共用边界嵌合。道路、绿地与公共空间从完整的用地结构中切出；不展开、不另造范围。

LAND-USE PLAN

概念用地配置

以空间类型读图：不等同法定代码

- G 公园绿地 / 雨洪修复
- R 适应性居住 / 日常服务
- C 商业与创新服务
- P 公共设施 / 共享界面
- I 研发共学 / 适应更新
- T 共智转换 / 混合过渡
- A 保留—适应改造框架

——道路与慢行公共面

— 连续公共空间

读图规则

- 色块是连续、嵌合的概念用地: G 绿地、R 适应性居住、C 商业创新服务、P 公共设施、I 研发共学、T 共智转换。
- 白色—灰色线为道路与慢行公共面;粗线为连续公共学习地面,细线为横向接口与节点支路。
- 灰色颗粒与框线表示保留—适应更新的既有承载体。
- 图面为横向排版旋转,北向由图内箭头校正;外轮廓即任务资料库定向范围,非精确红线或法定控规边界。

任意资料库暂存范围：用于生成、展示与自恰；非随墙红线：为透视图向展开

图 03 / 概念性平面用地: 整张任务资料库暂定范围横向旋转排版, 所有功能色块在同一外轮廓内共享边界、连续嵌合; 非现状则绘、非控规用地。

AGENT 暂定范围 / 概念性城市更新表达 / 非法定规划图

04 Three key areas: courtyard, street and service threshold

03 Three areas, three non-identical urban rooms

KEY AREAS / THREE DIFFERENT SPATIAL PROTOTYPES

The same public learning ground becomes three spatial mechanisms: open training, everyday co-learning, and controlled deployment.

Difference is not a color code. It is who enters, how it is used, who can pause, and what remains after updating.

FIG 03 / Three spatial prototypes and three responsibility chains.

FIG 03 / KEY AREAS: THREE SPATIAL PROTOTYPES, THREE RESPONSIBILITY CHAINS.

04 Public ground is not a line, but four protected layers of daily life

PUBLIC GROUND / FOUR LAYERS, ONE HUMAN-FIRST SECTION

Railway memory, stormwater, slow movement and restricted service share one continuous loop without compressing each other.
The rose band is not a technology pipe. It is a walkable, inhabitable, contestable public ground; service stays at the edge.

FIG 04 / Public ground: four daily layers run in parallel and transform at nodes.

FIG 04 / PUBLIC GROUND: FOUR DAILY LAYERS RUN IN PARALLEL AND TRANSFORM AT NODES.

05 The future is a stoppable and revisable process, not an endpoint

TIME ATLAS / PHYSICAL HOSTS AND HUMAN DECISION

Each phase changes the relationship between city and people: from being seen, to responding, to deciding together.
AI generates options, reveals consequences and connects feedback; people confirm values, carry responsibility and retain exit.

每一次更新都必须经过同一条责任链 / EVERY UPDATE PASSES THROUGH THE SAME RESPONSIBILITY CHAIN

AI 不替人决定城市应该成为什么; AI 让选择、后果与退出路径变得可见。

FIG 05 / Time atlas: four phases, four physical hosts, four human decisions.
