

ATLAS • JZ — Global AI Ecosystem Atlas

Public Atlas Platform of Global AI Innovation Ecosystem Cases

Project: ATLAS • JZ - Global AI Ecosystem Atlas

Concept suggestion and reference scheme (not a decision)

Three scopes: ~43.6 km2 / ~11.4 km2 / ~368.4 ha

One belt, three pavilions: Atlas Pavilion, Radar Station, Co-creation Gallery

10 scenario cards, 3 test scenarios, 8 sourced benchmark cases

AI governance: anonymized only, human review, no over-surveillance

PROVISIONAL boundary - not an official redline

Overview & slow-traffic blue-green (concept)

Overall Design Overview: three-level scope & synergy (concept)

Regional synergy: Beiwai • Future SC • Huairou SC • E-Town • BTH

LEGEND

- Blue-green space
- Stock buildings
- Slow axis
- E-W stitch street
- Atlas node
- Key area (concept)

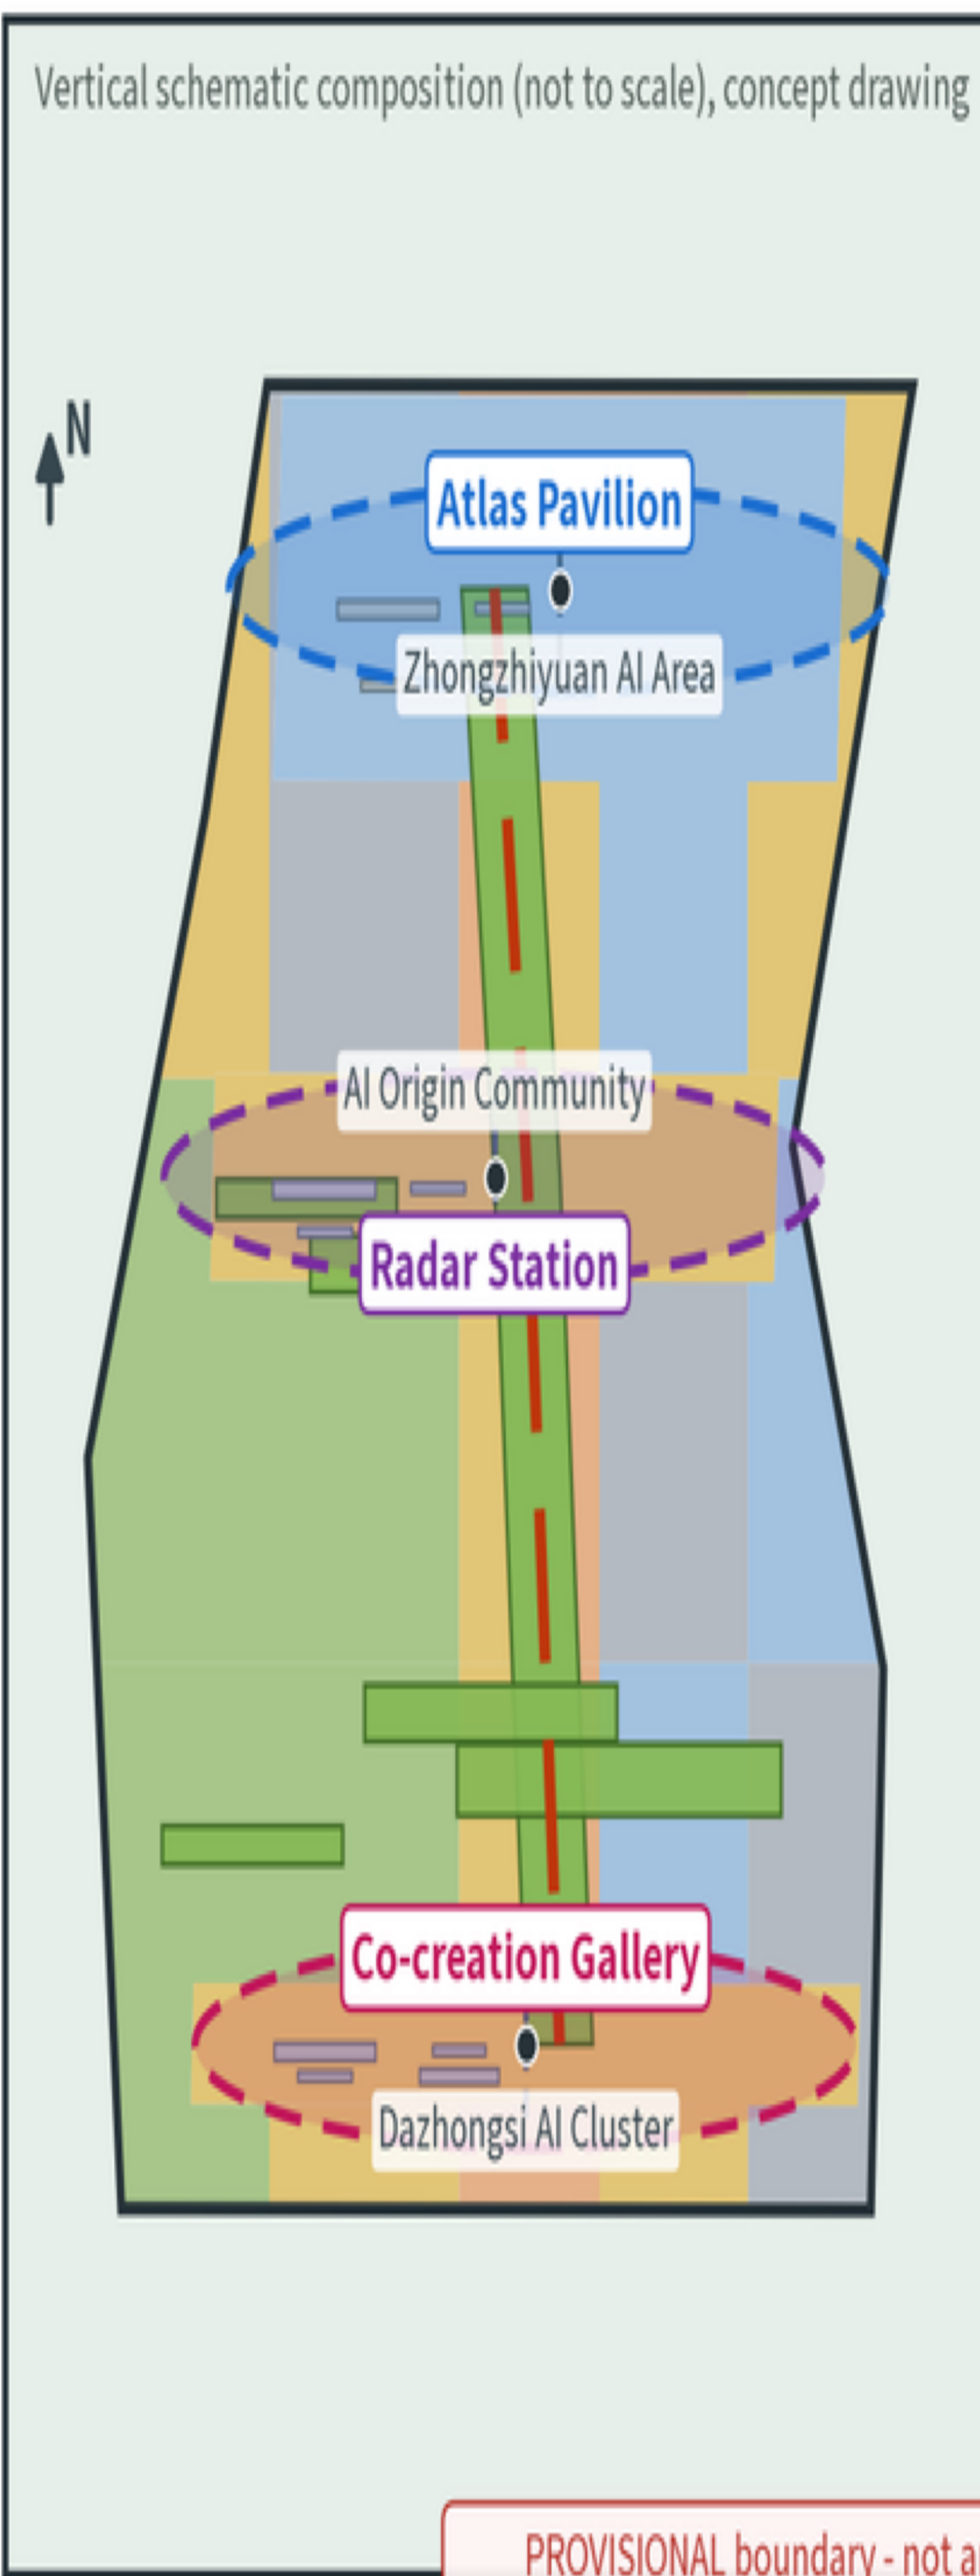

Three official scopes (text)

Coordinated research ~43.6 km2

Overall design ~11.4 km2

Key areas ~368.4 ha

Sub-scope: inside the overall design area,
three key areas as nodes (concept)

Three zones-two wings synergy loop (concept)

AI Origin Community

Zhongzhiyuan AI Area

图谱京张
loop: function - scenario - factor

Dazhongsi AI Cluster

Node-zone mapping (concept)

Atlas Pavilion ⇒ Zhongzhiyuan AI Area

Radar Station ⇒ AI Origin Community

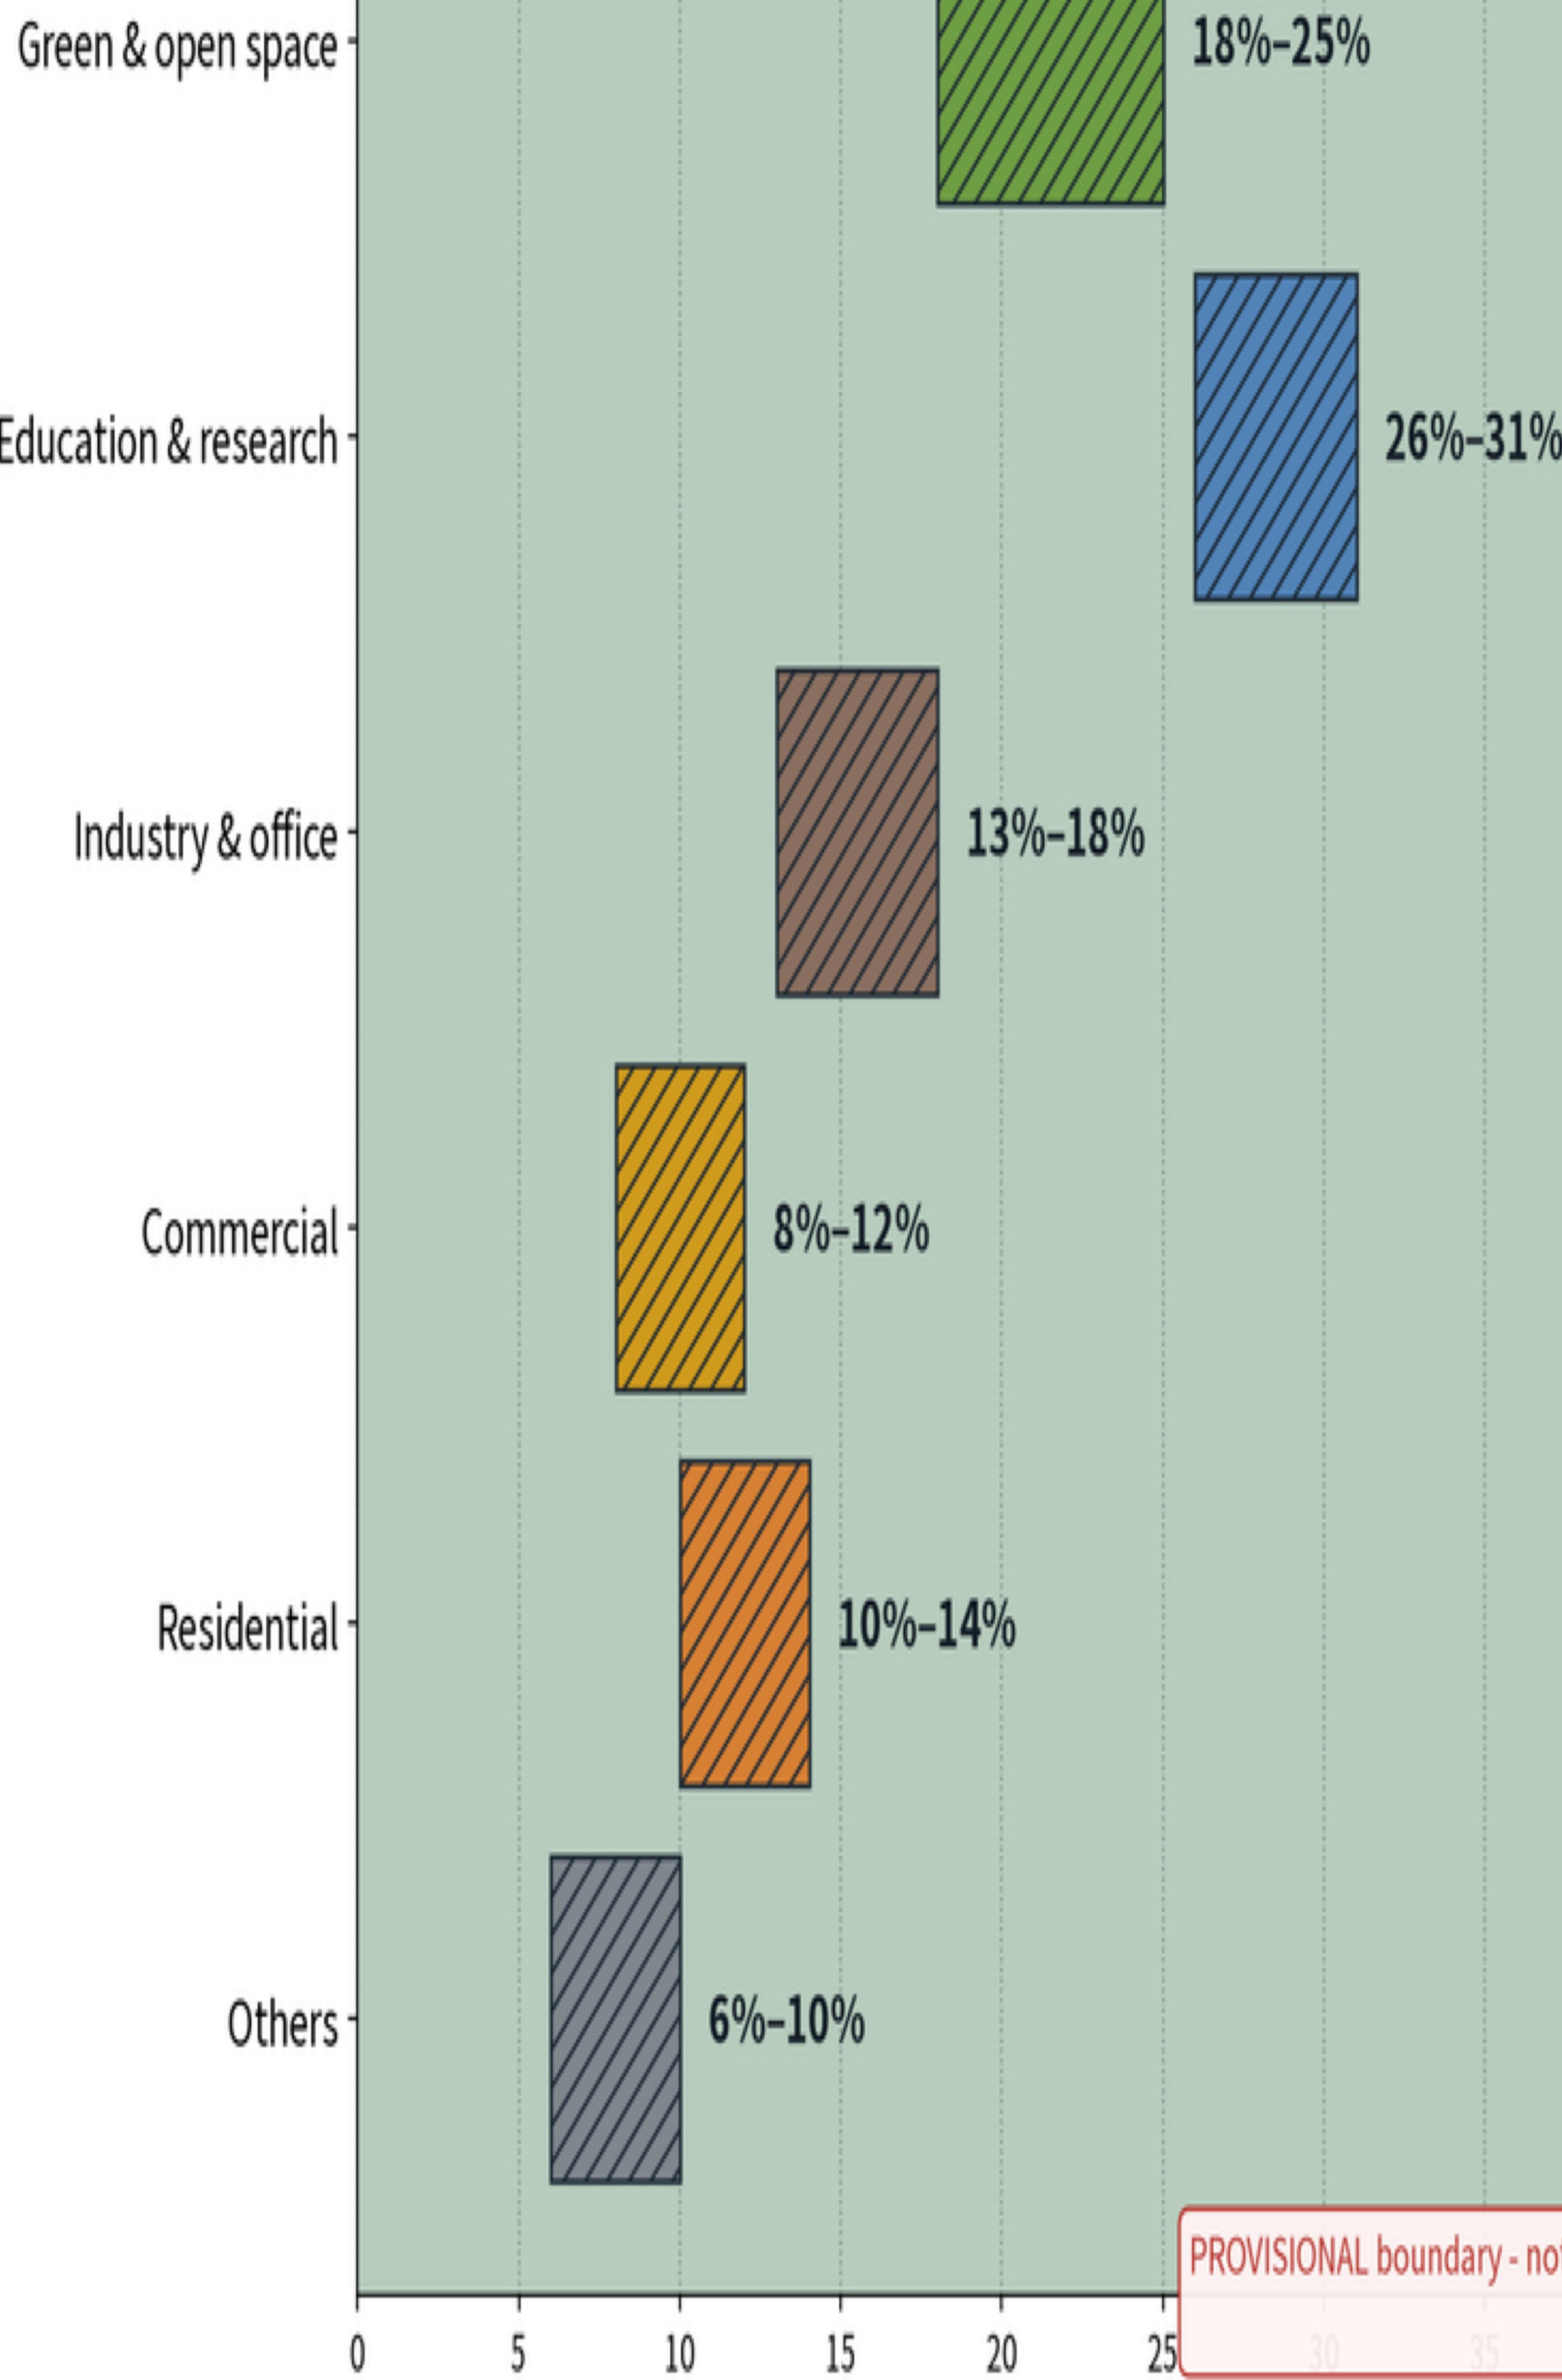

Co-creation Gallery ⇒ Dazhongsi AI Cluster

PROVISIONAL boundary - not an official redline - recompute after official data release

临时概念边界 • 非官方红线 • 官方数据发布后复算

Geometry: organizer provisional boundary + package geometry (concept, low confidence)

Conceptual land-use scenario ranges (land_use layer, non-statistics)

R-R-D principles (concept)

R Retain first

N Renovate second

D Demolish case by case

Scenario ranges are concept calibers,
not current statistics or precise percentages

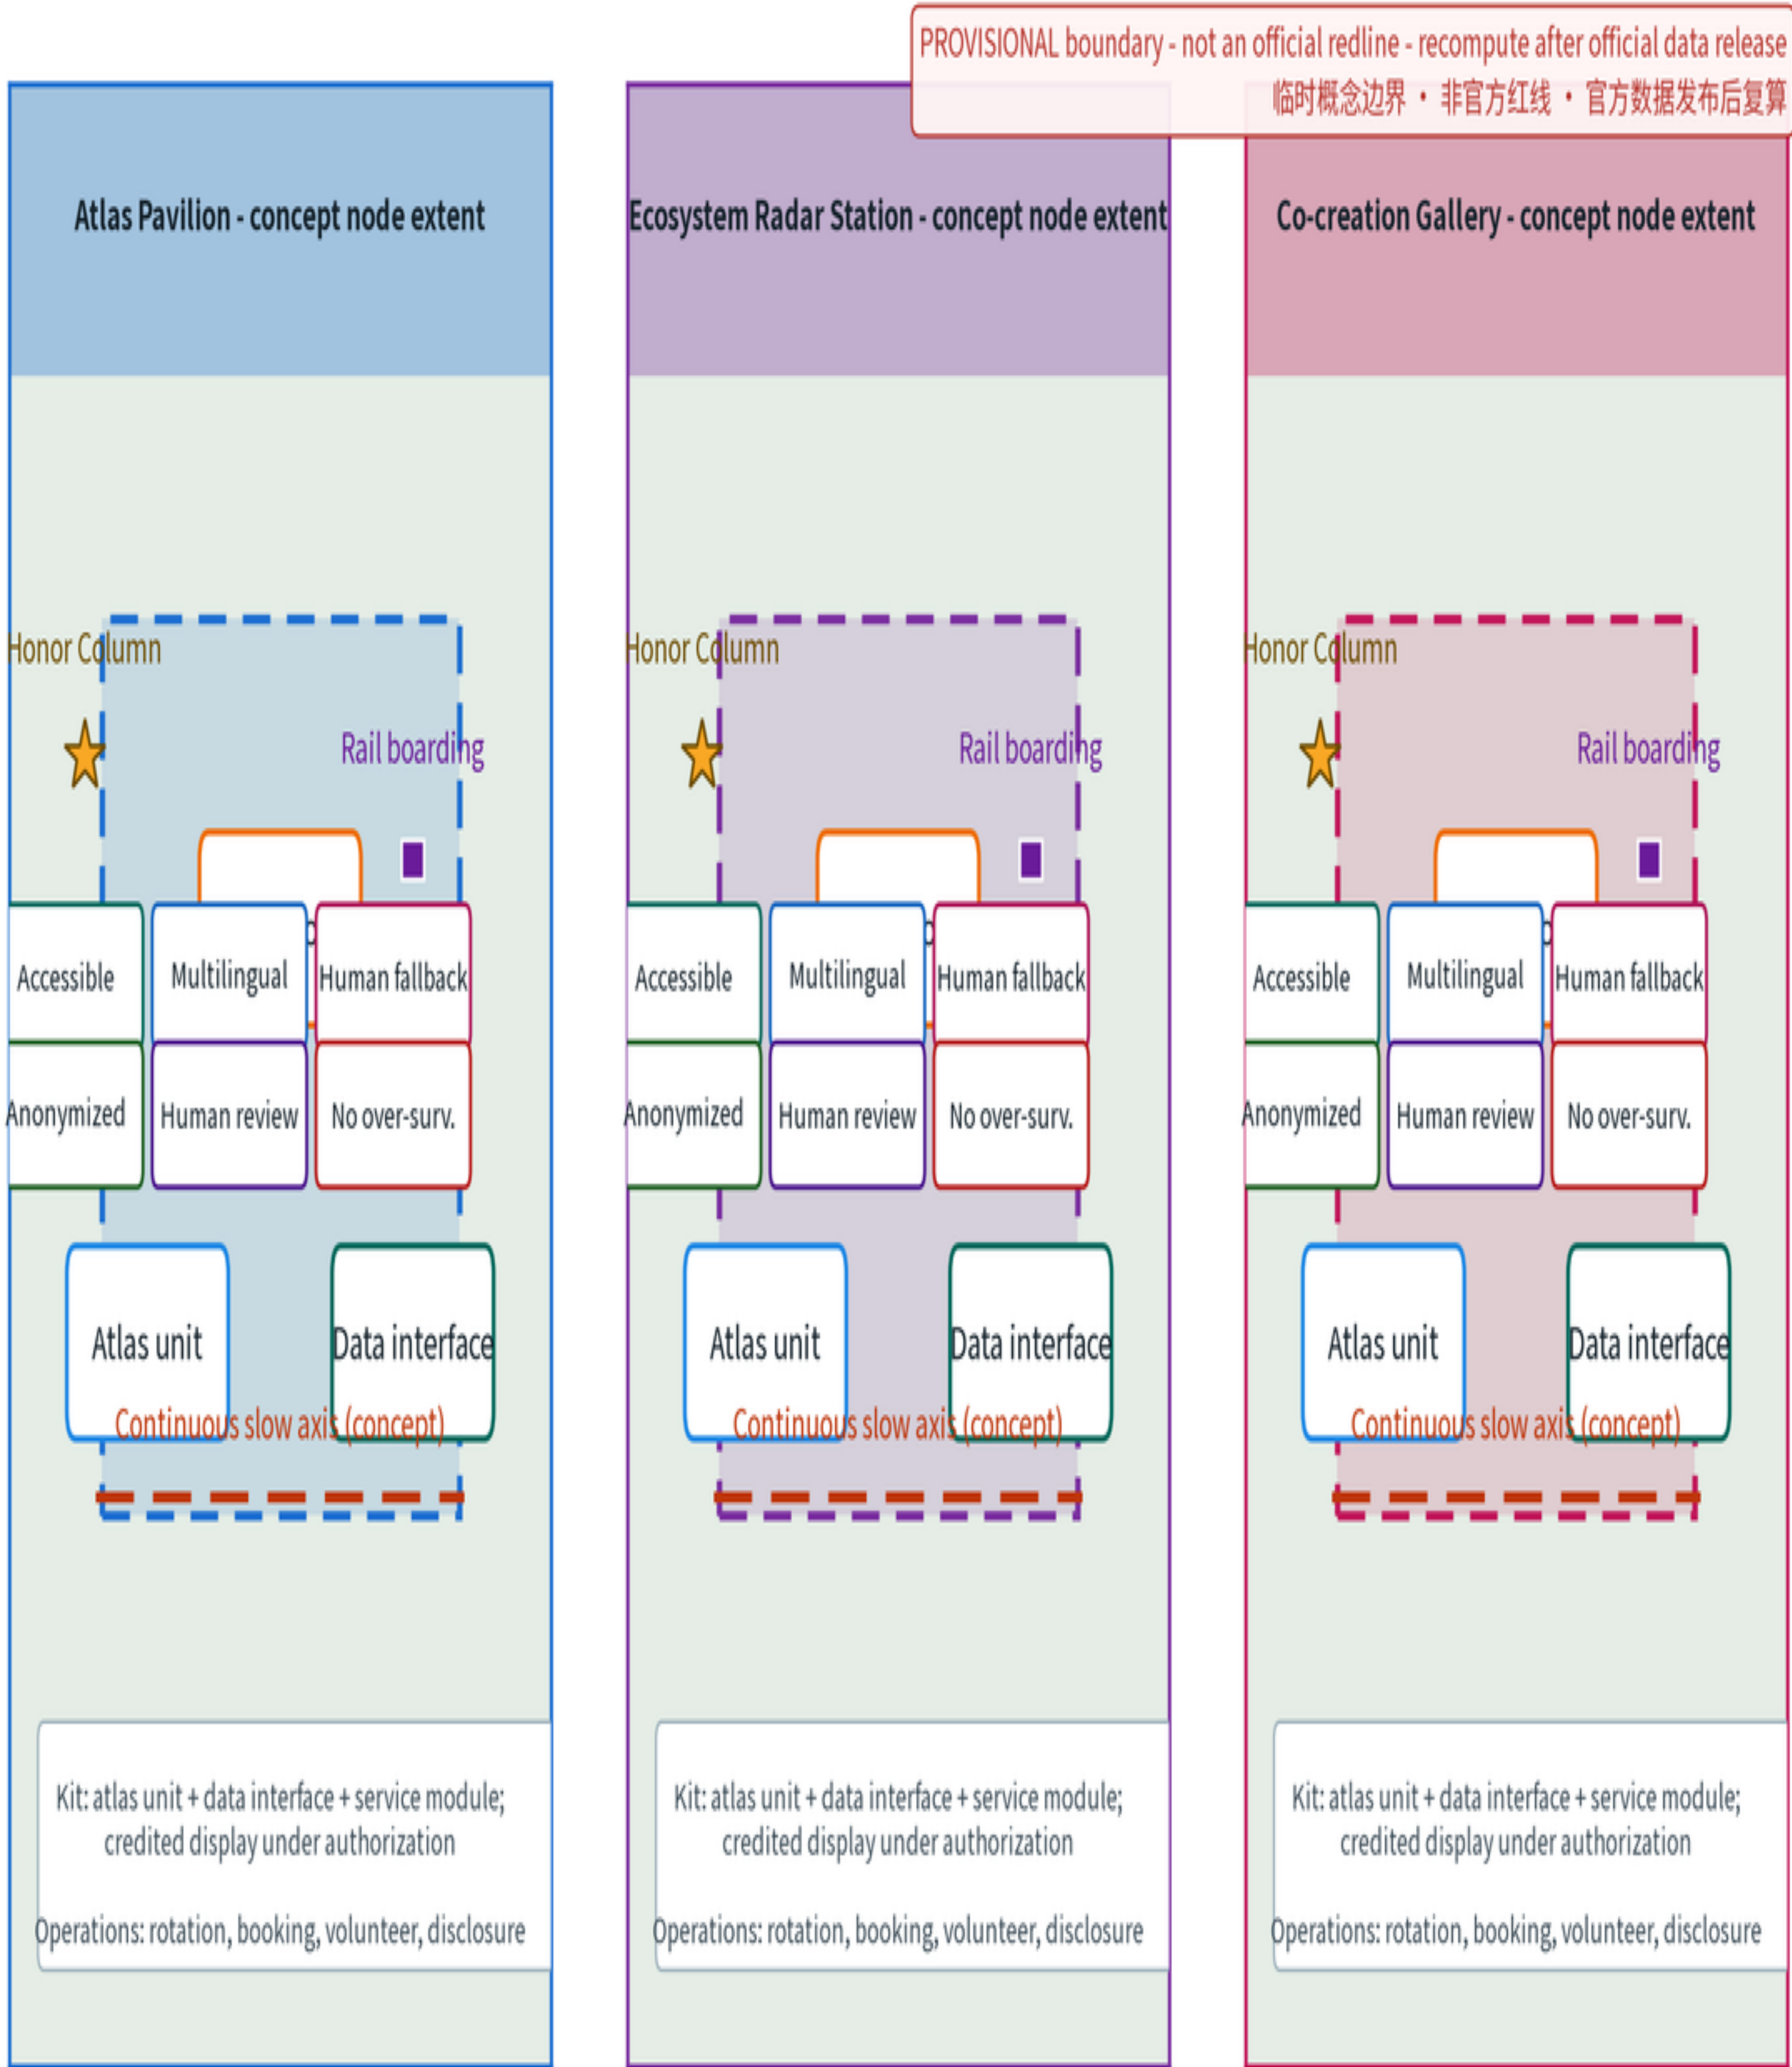

Recompute all areas and shares
after official land data release

land_use vs green_space layer calibers
(not interchangeable with green_ratio)

PROVISIONAL boundary - not an official redline - recompute after official data release

临时概念边界 • 非官方红线 • 官方数据发布后复算

Key areas & metrics evidence (concept)

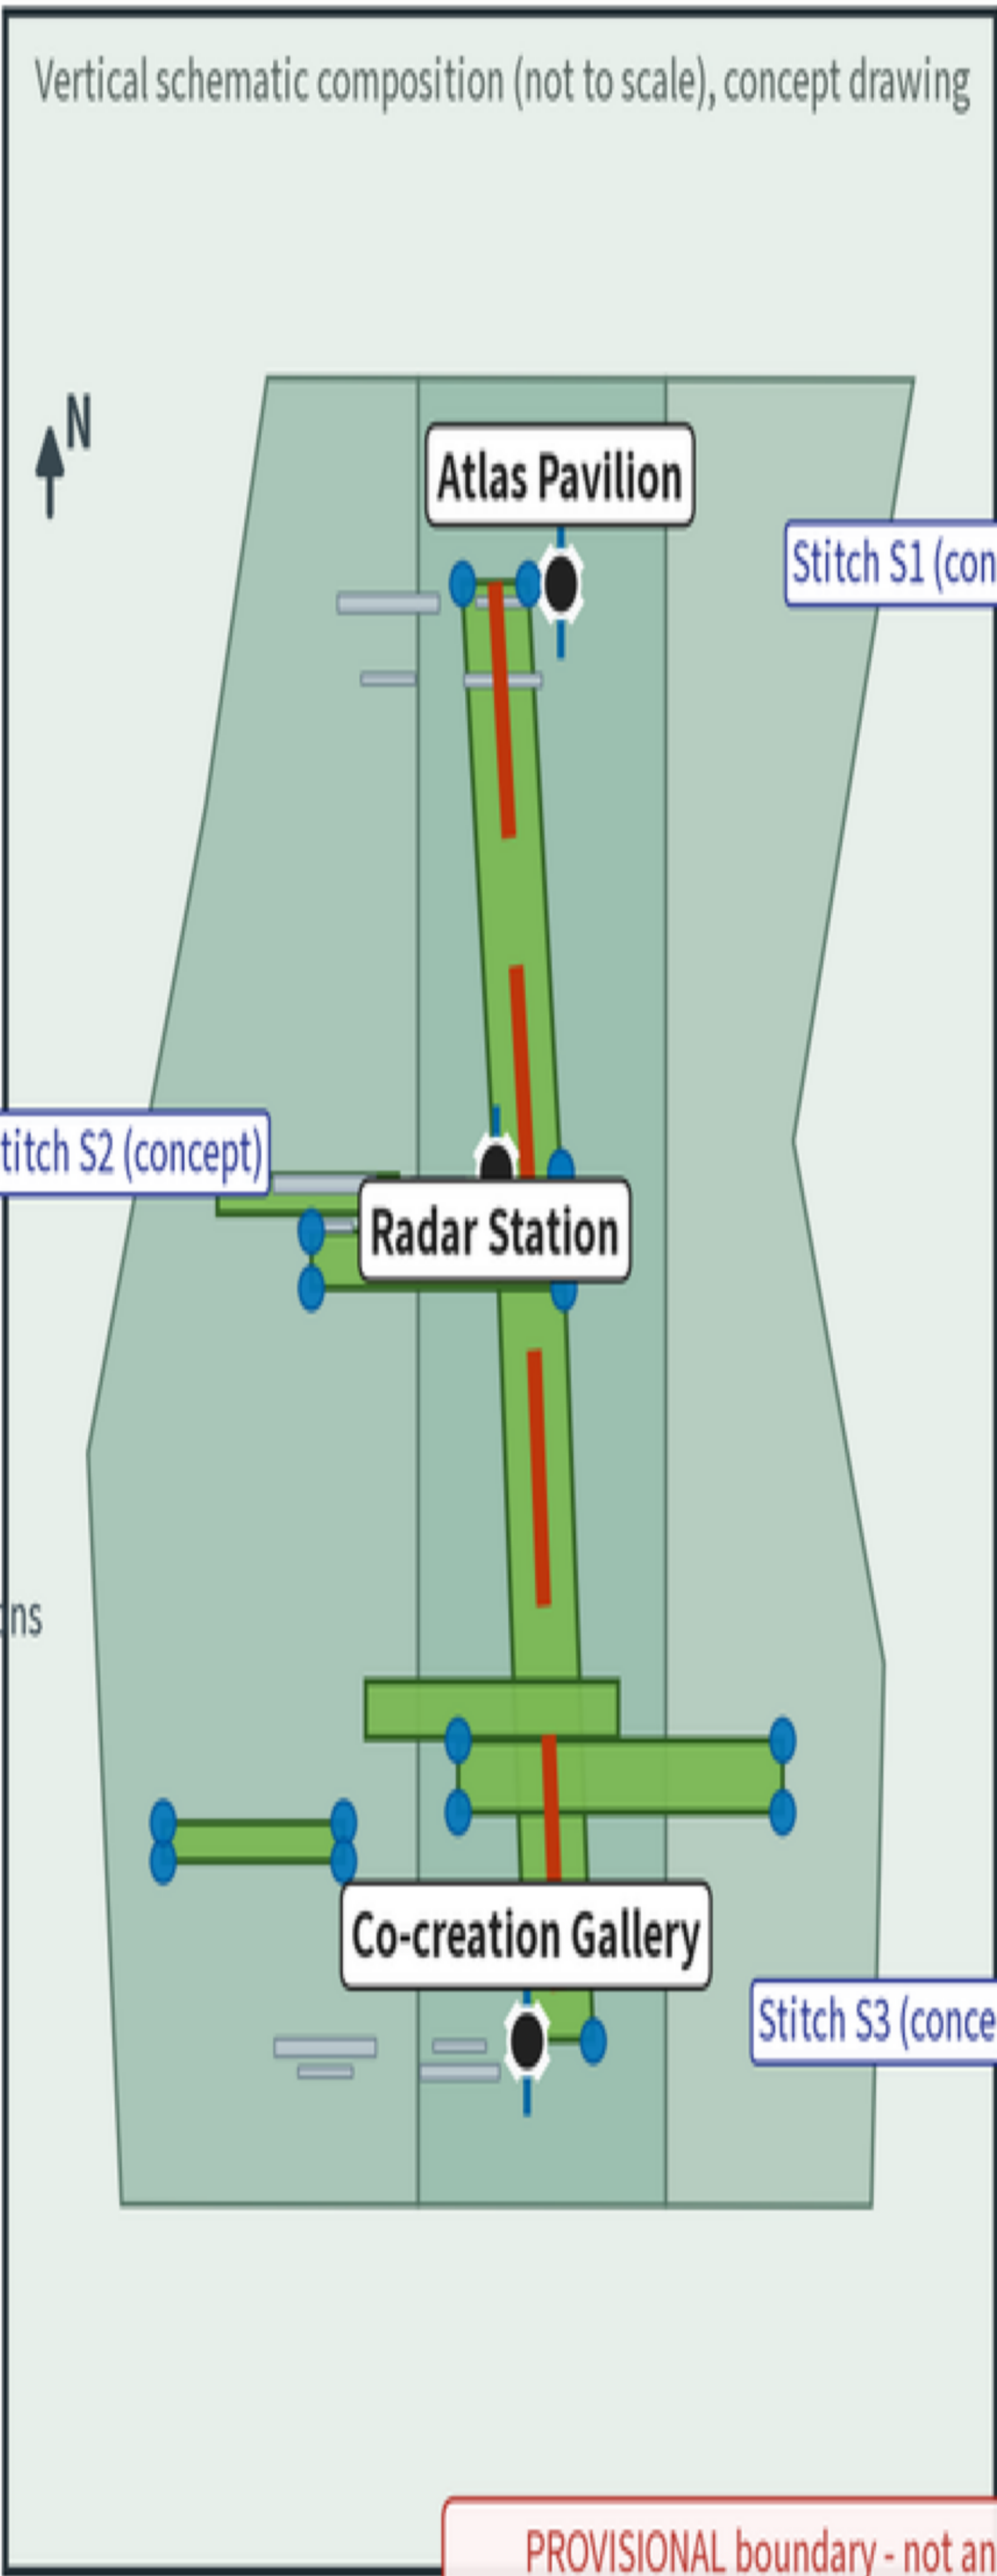

Slow-traffic & blue-green analysis: axis, stitch nodes, rain gardens (concept)

LEGEND

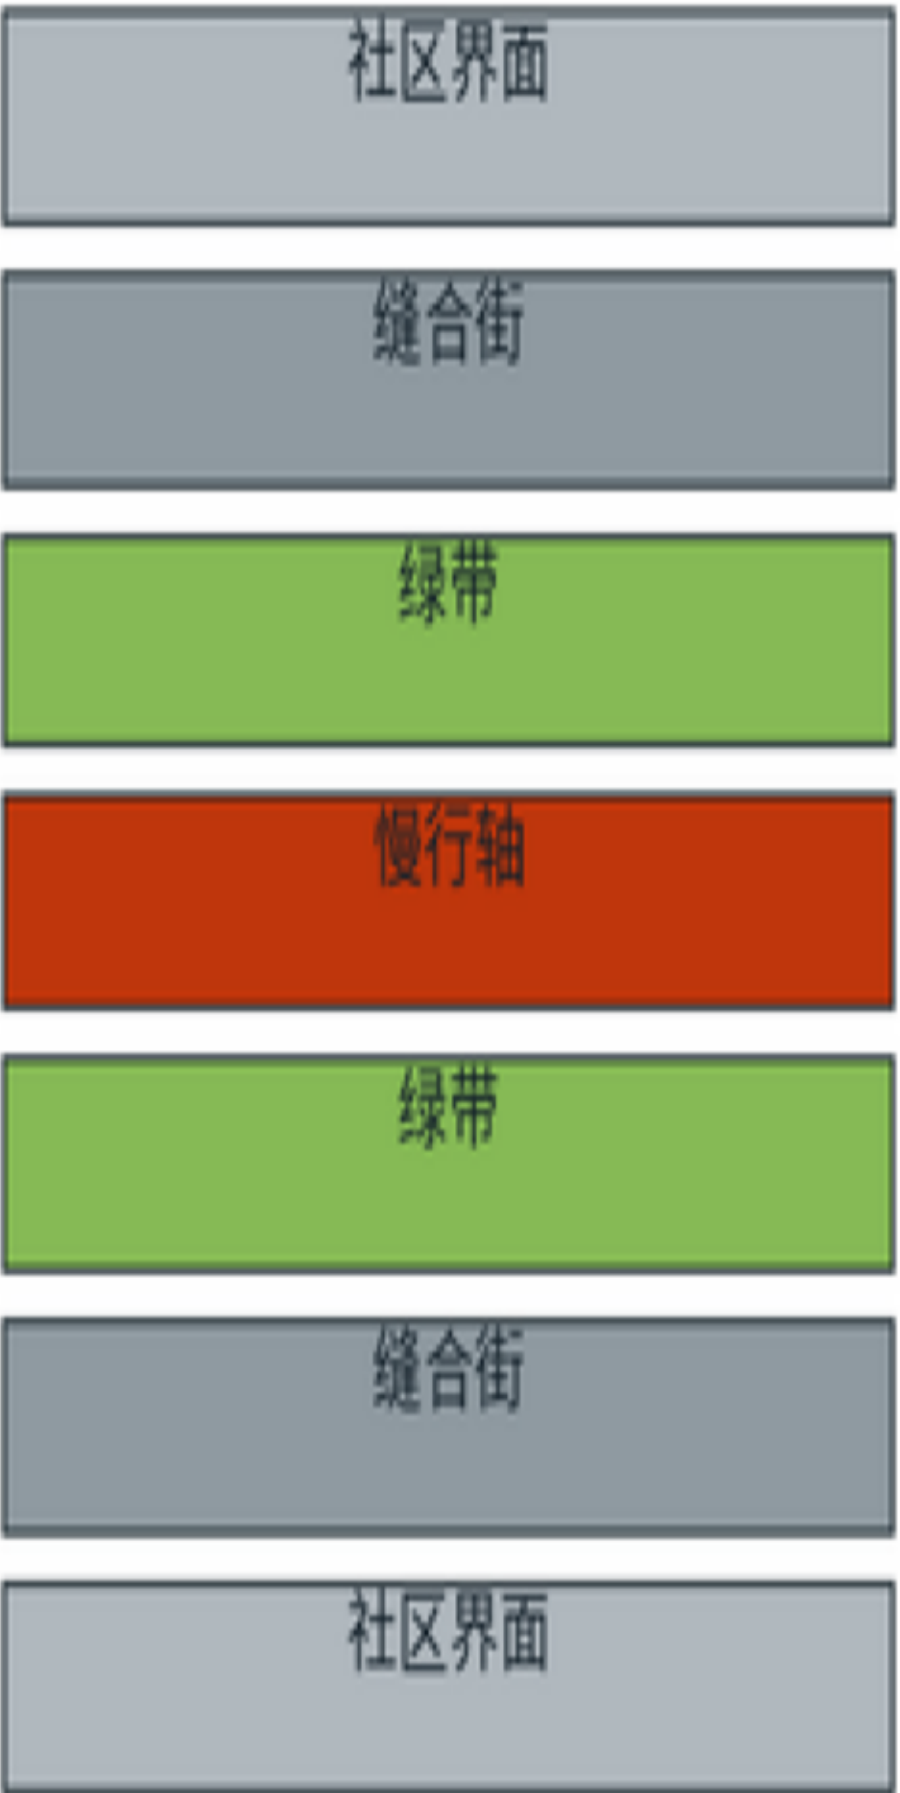

- Blue-green space
- Stock buildings
- Slow axis
- E-W stitch street
- Stitch node
- Rain garden
- Atlas node
- Phasing extents

Slow-traffic-first mechanism (concept)

- Continuous axis links the three nodes and rail stations
- Walking/cycling first; event crowds time-zoned
- AI route/tide: anonymized, human review
- Municipal loads daily+event, no capacities
- Rail/road engineering left to special studies

Green-belt section (concept)

E-W stitching & N-S: stitch streets, priority crossings, continuous green-belt spine (concept)

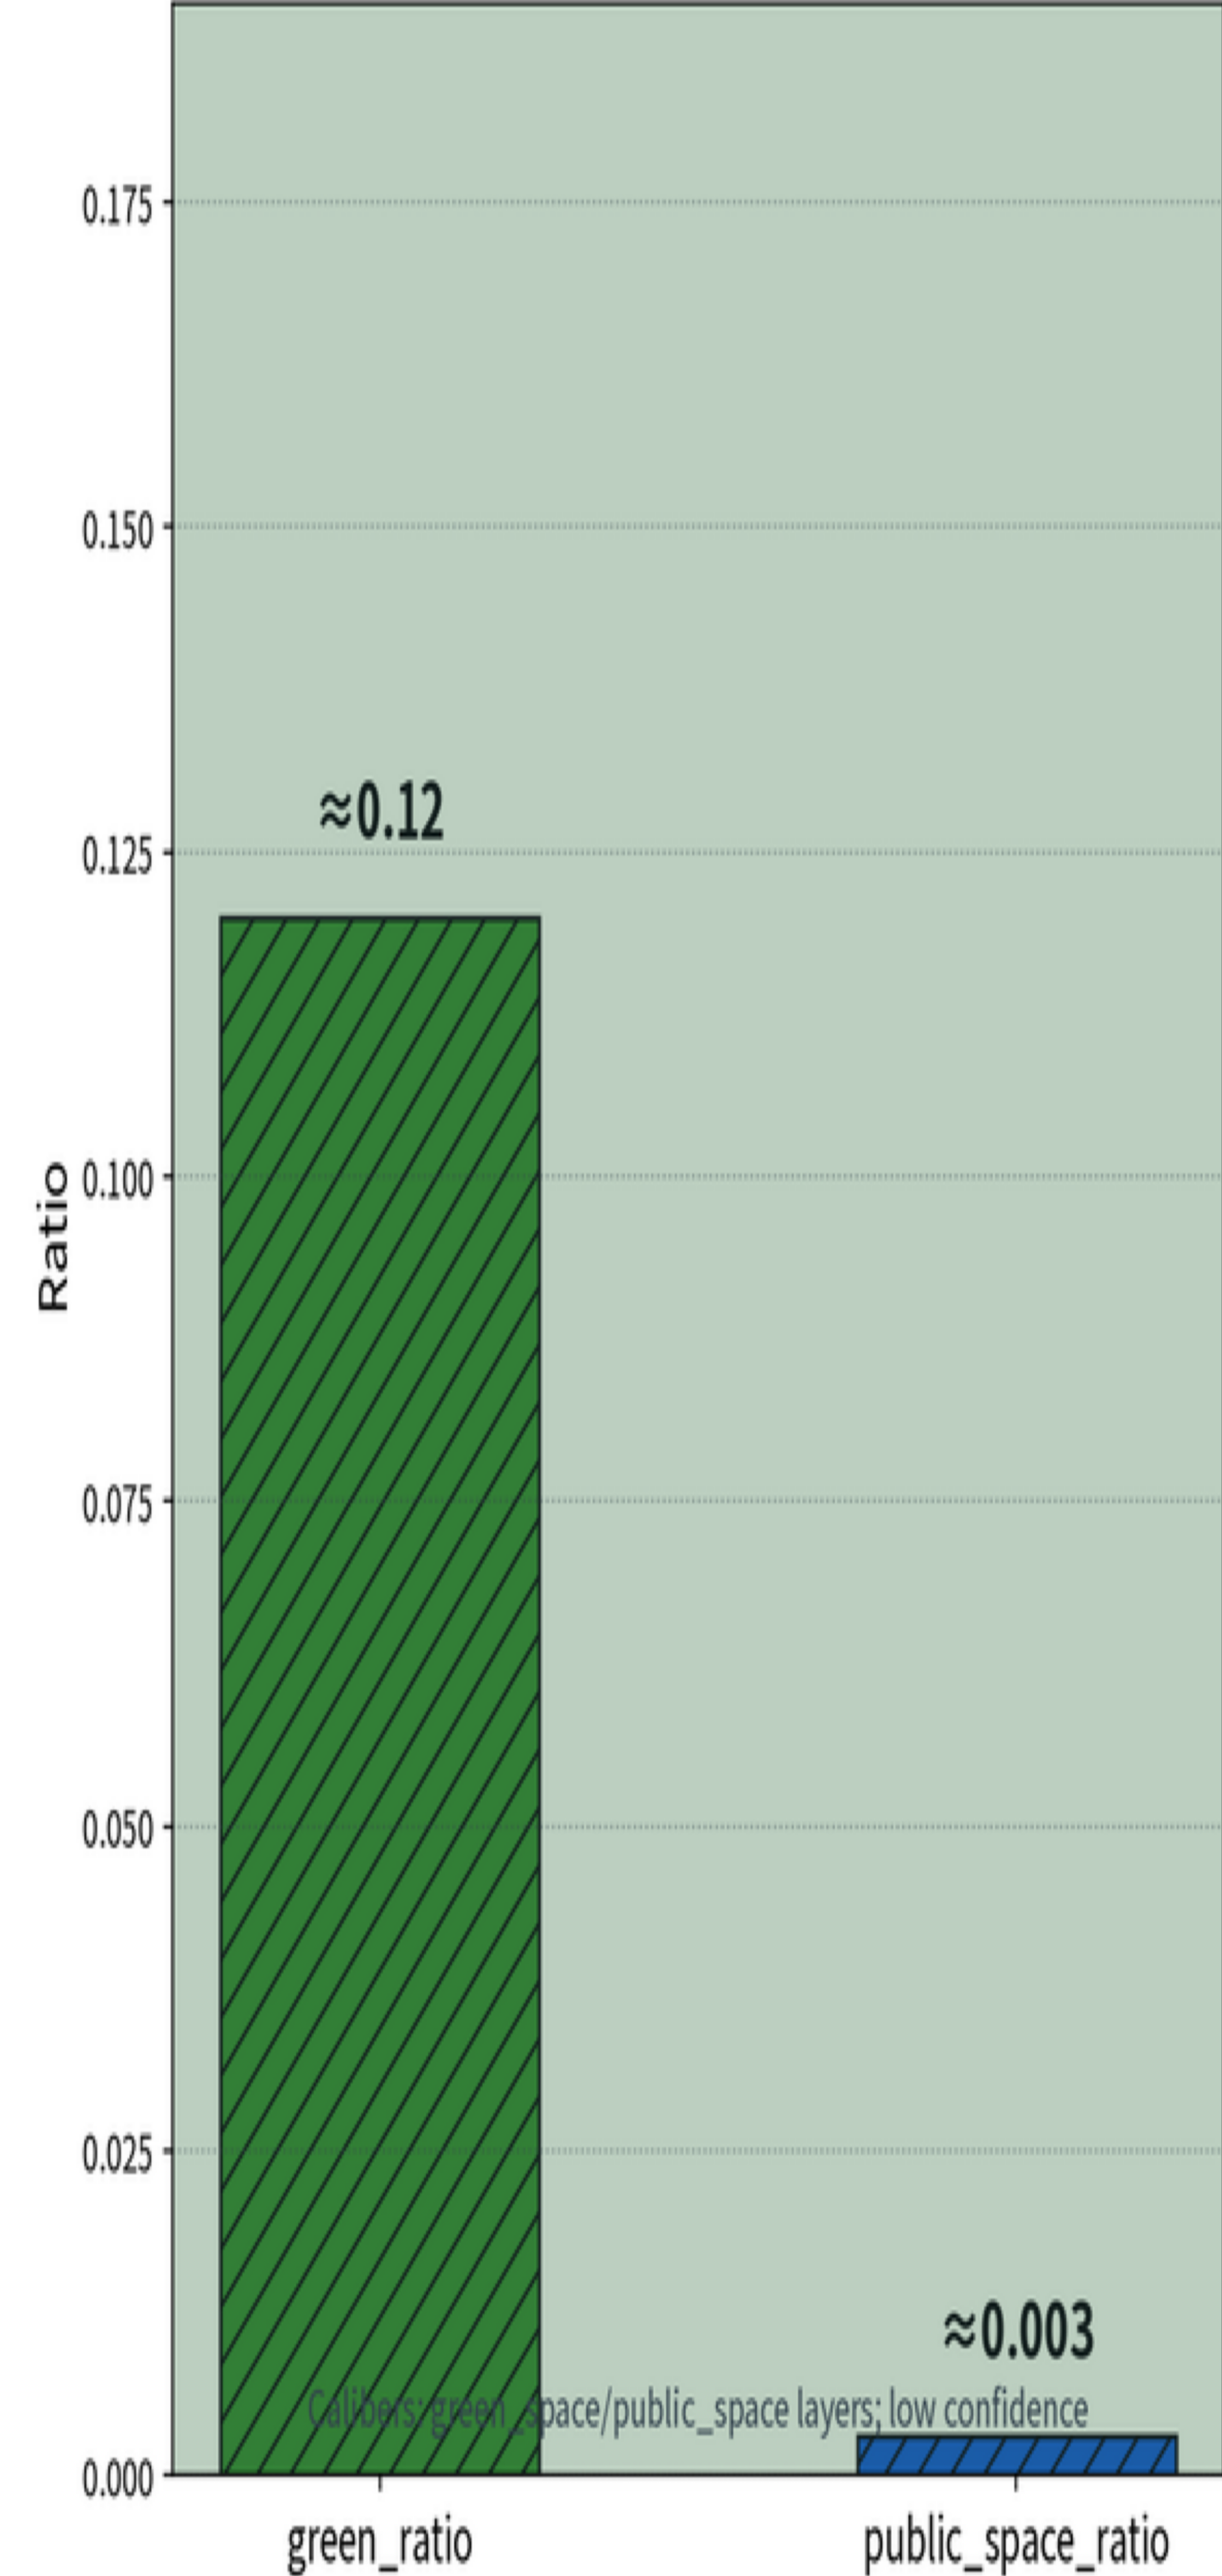

Node-rail boarding (concept, pending)

- Atlas Pavilion walk + shared-bike marshalling
- Radar Station cycle + booked shuttle
- Co-creation Gallery walk + accessible route

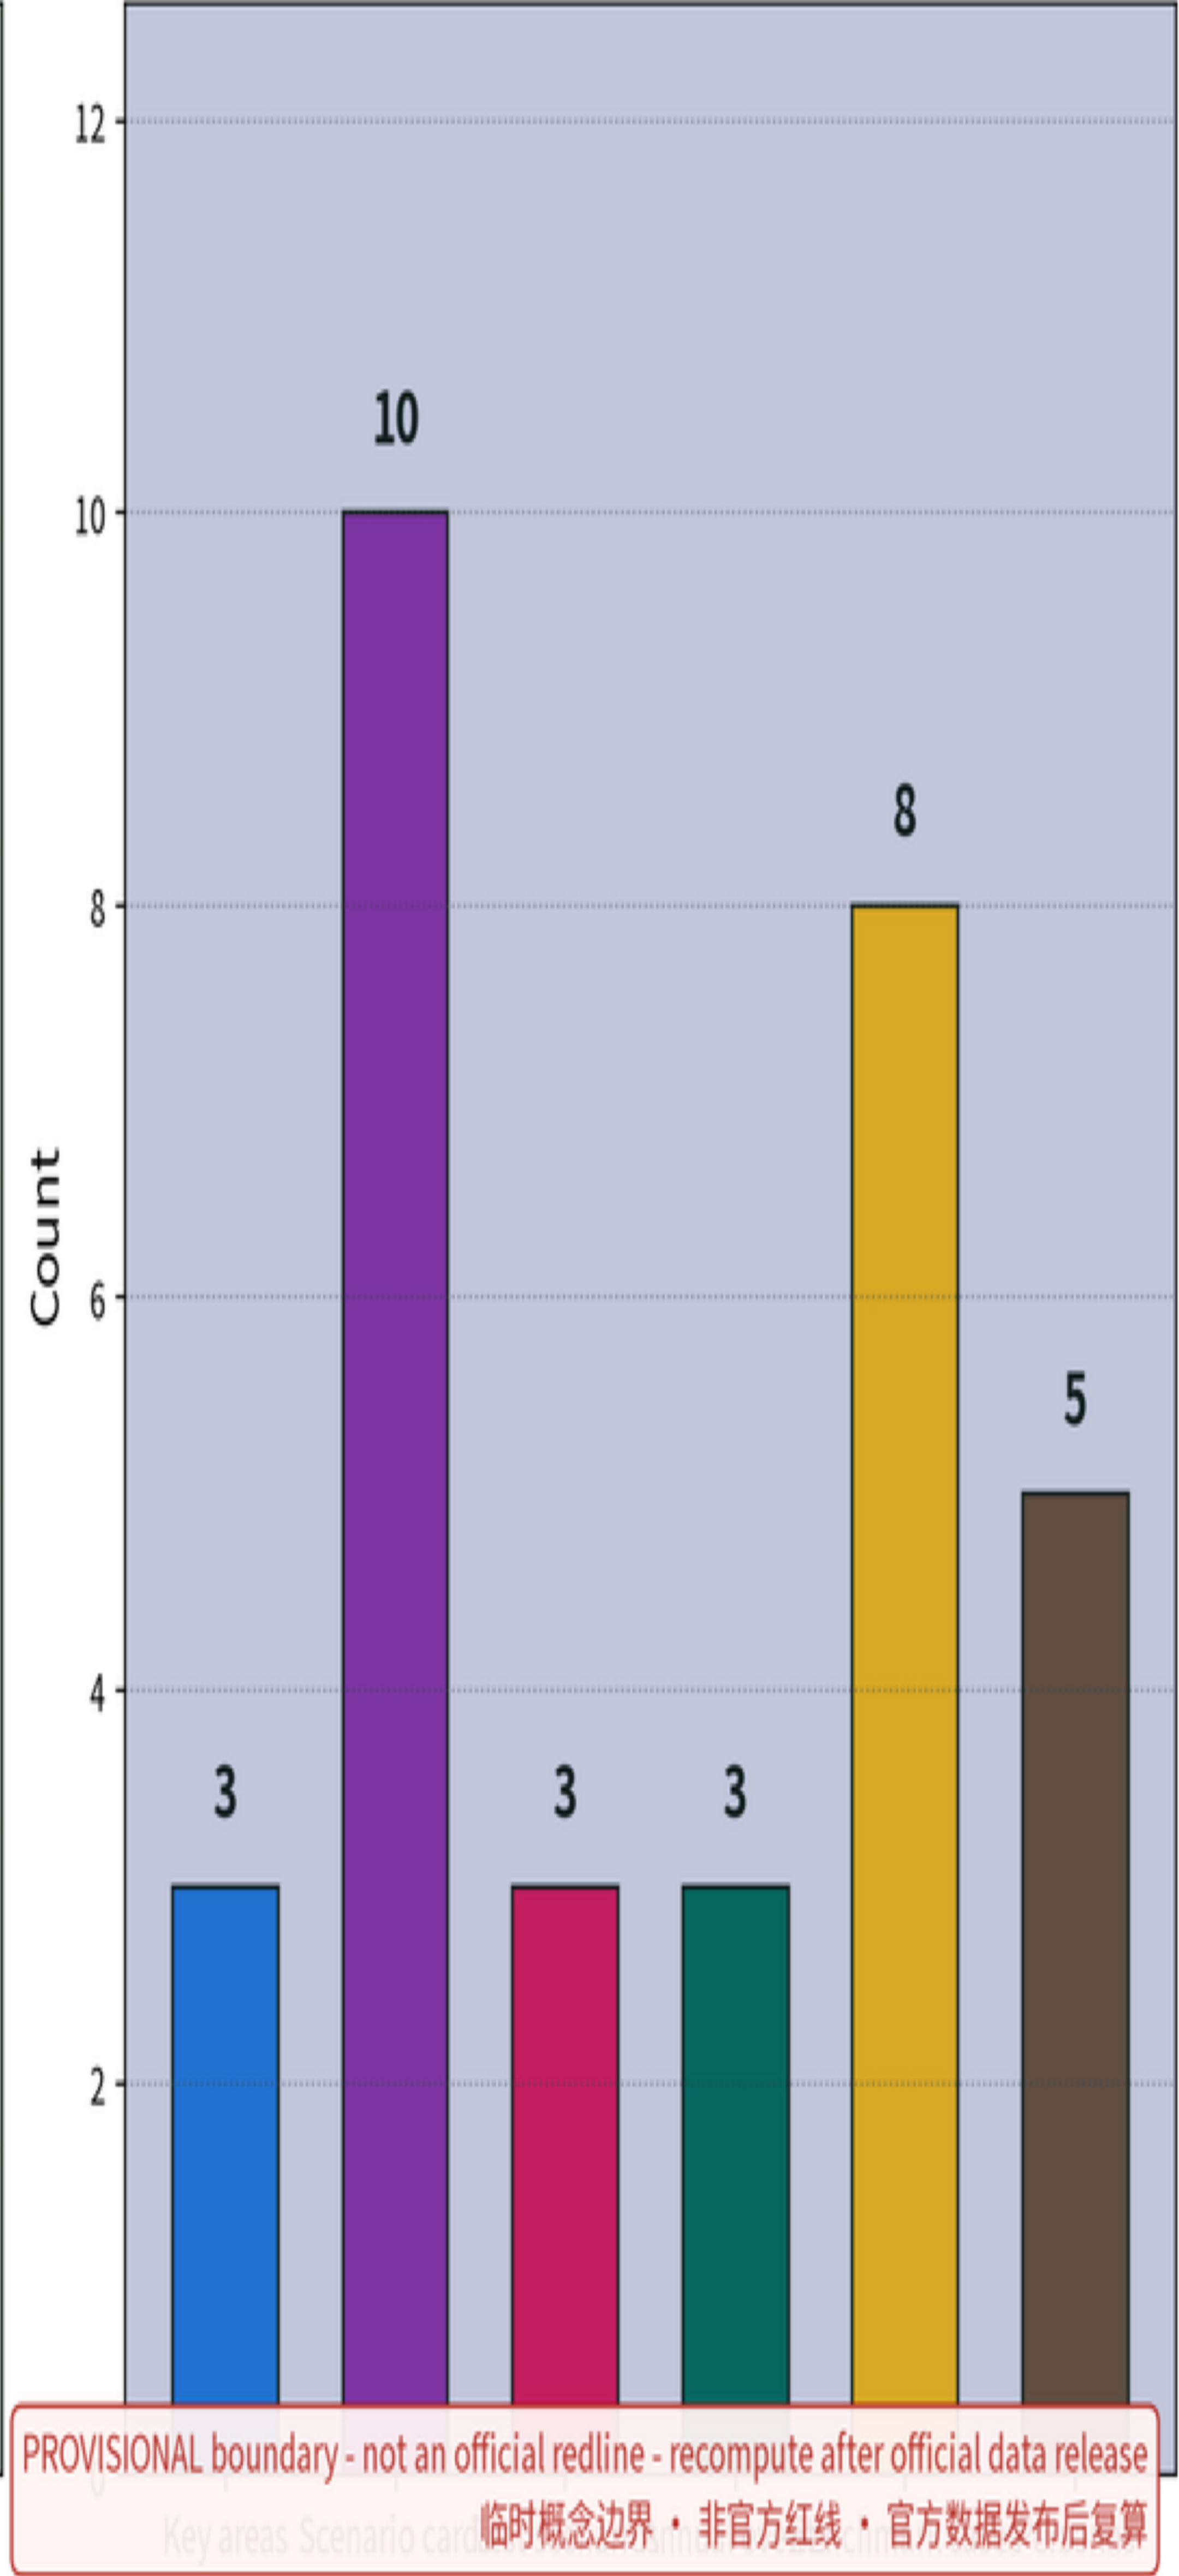

PROVISIONAL boundary - not an official redline - recompute after official data release
临时概念边界 · 非官方红线 · 官方数据发布后复算
Geometry: organizer provisional boundary + package geometry (concept, low confidence)

Metrics & ecosystem map (concept)

Core metrics: ratio indicators
(provisional, reduced precision)

Core metrics: count indicators
(evidenced by the visible tables)

Global AI ecosystem atlas: zones-wings × factors × cases (concept)
