

Overall design overview — provisional geometry (concept)

Official three-tier scopes

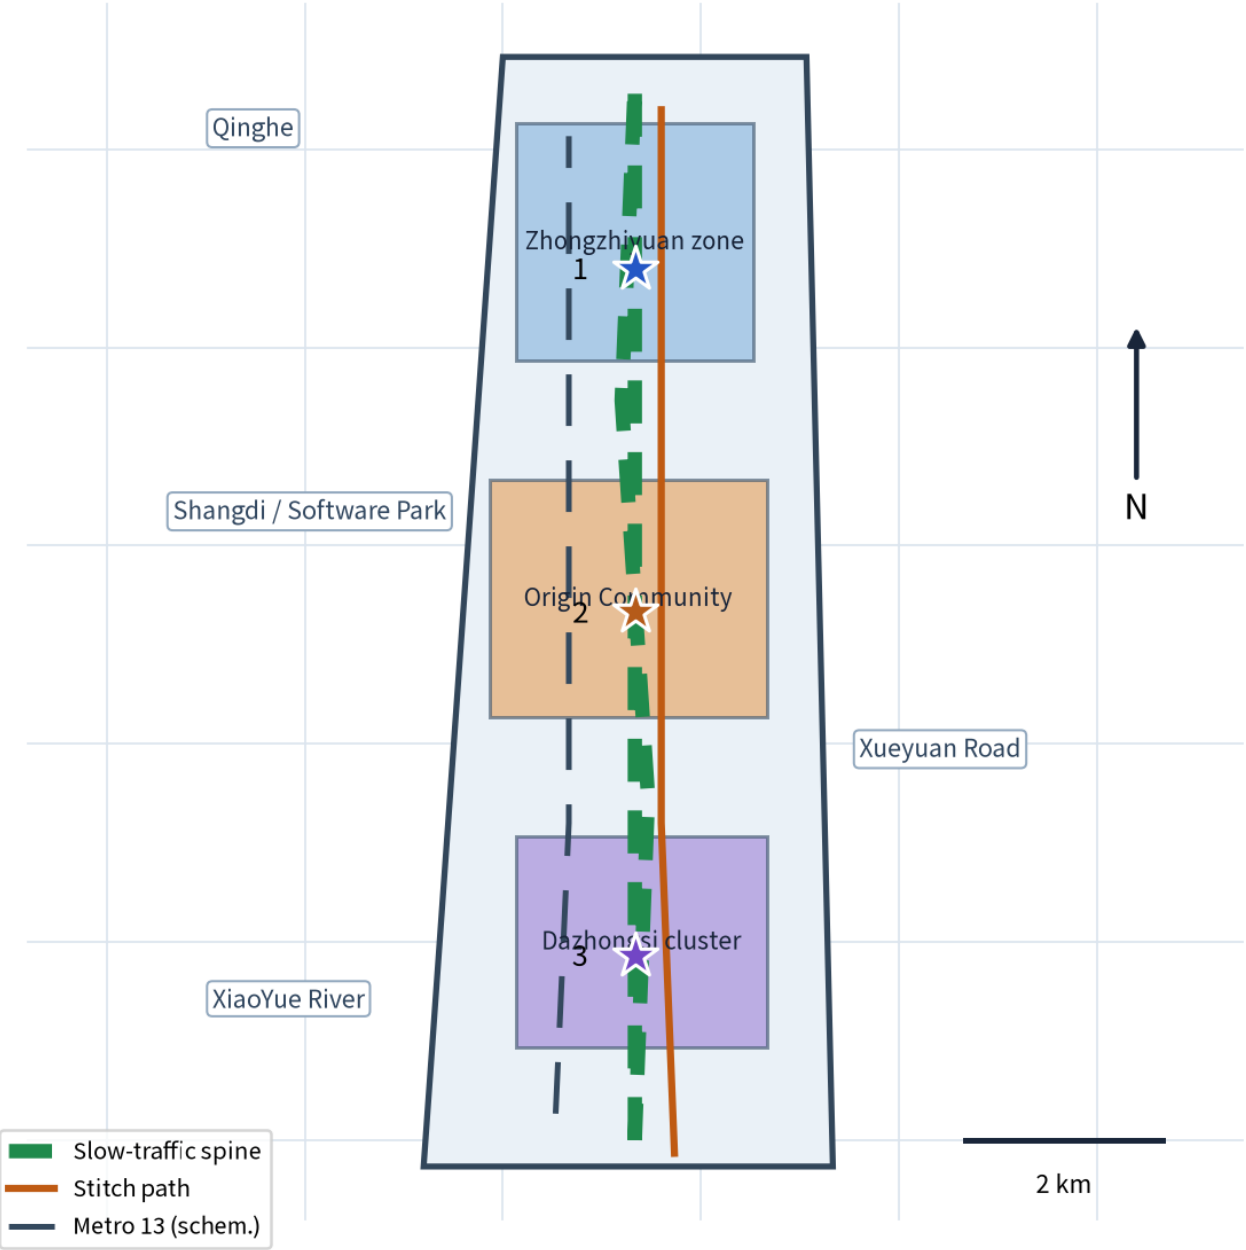

- 1 Coordinated research ~43.6 km²
- 2 Overall design ~11.4 km²
- 3 Key areas ~368.4 ha • three zones + two wings
- Package sub-scope: AI Governance Pilot Zone; concept green-belt topic.
All boundaries are provisional; recompute after official release.

PROVISIONAL concept boundary • not an official redline • recompute after official release

Concept display only; official boundary and professional verification prevail.

PROVISIONAL concept boundary — not an official redline — recompute after official release

Three-node index and design task map — concept locations only

Node cards — space type / siting / relocation triggers

1 Turnout Lab
TYPE governance lab: test + exhibit + participation
SITE community section / park-street interface
MOVE boundary, ownership or setback conflict

2 Signal Tower
TYPE audit and impact-assessment hub
SITE open-view mid-section near software-park direction
MOVE heritage or green-line limit

3 Waymark Walk
TYPE marker trail + open dataset
SITE continuous belt section; barrier-free
MOVE discontinuity or rail-protection conflict

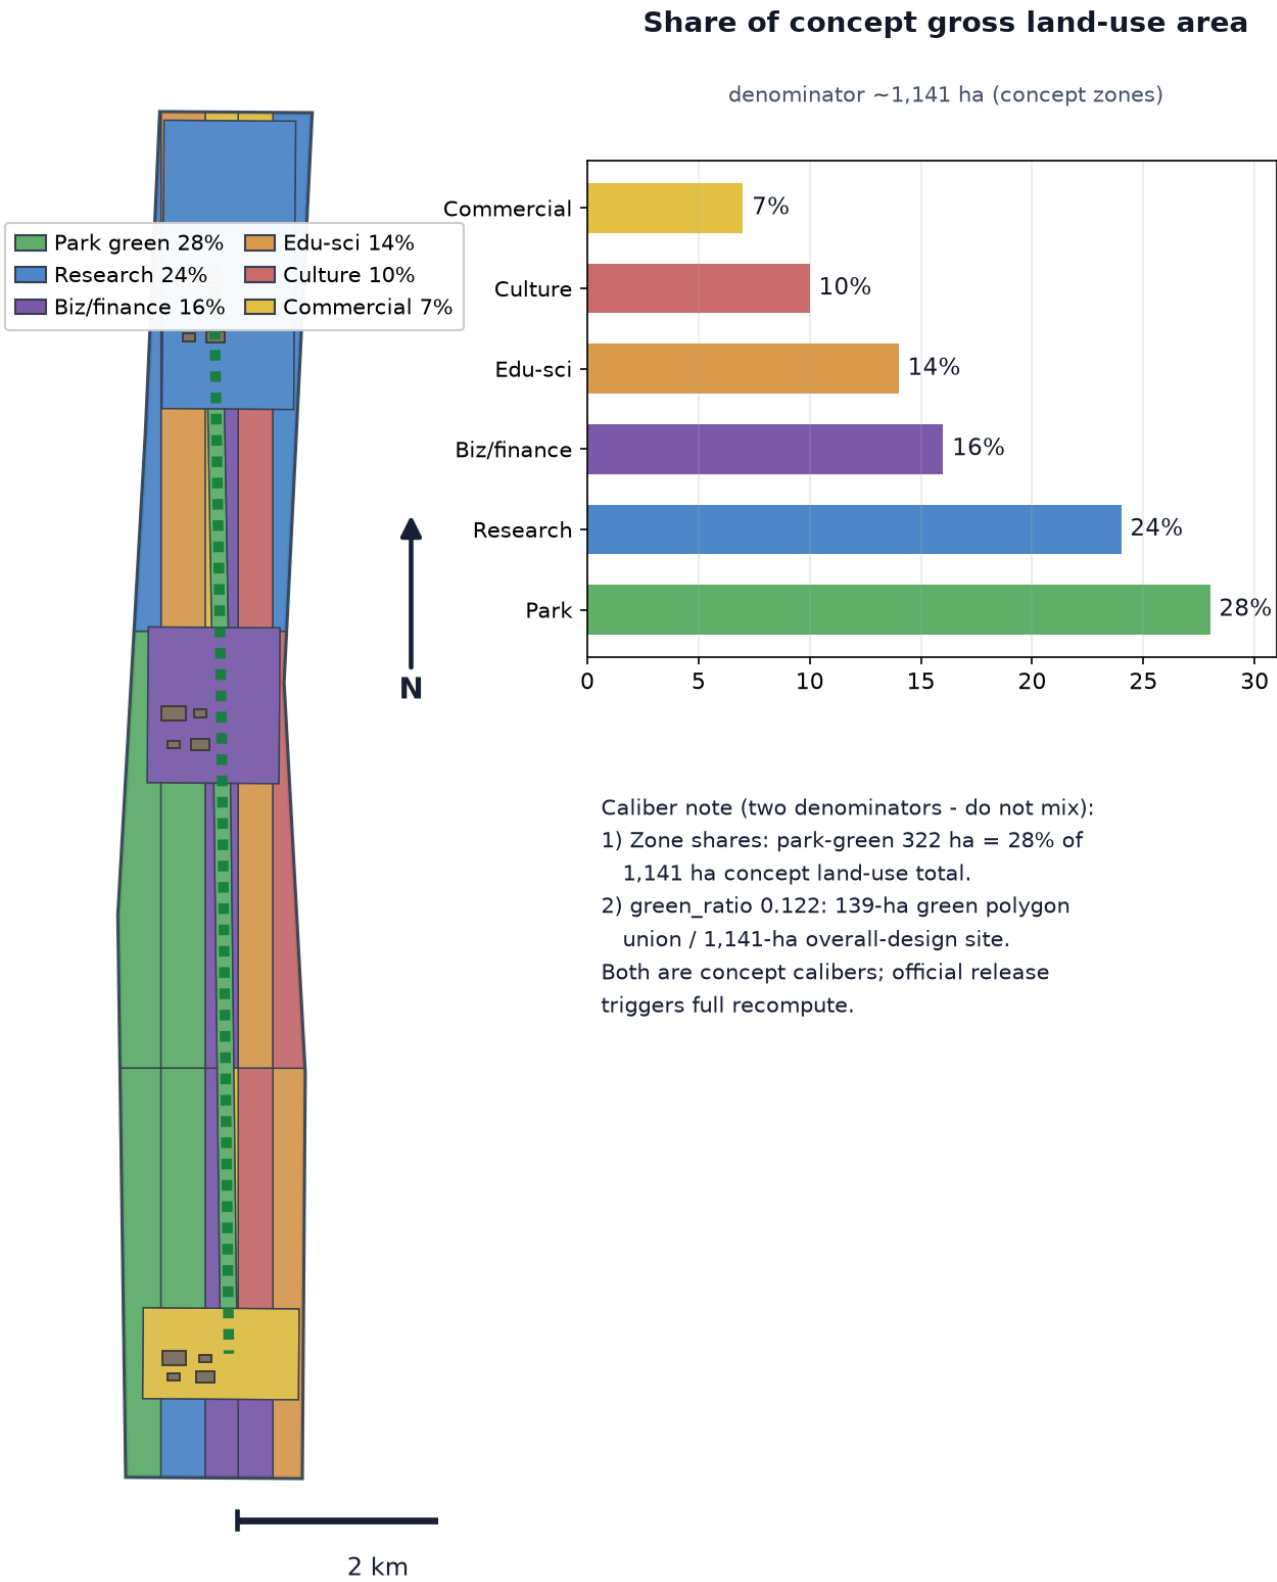

Concept locations only; official boundary pending

PROVISIONAL concept boundary • not an official redline • recompute after official release

Concept display only; official boundary and professional verification prevail.

PROVISIONAL concept boundary — not an official redline — recompute after official release

Conceptual land-use structure - provisional
recompute after official release

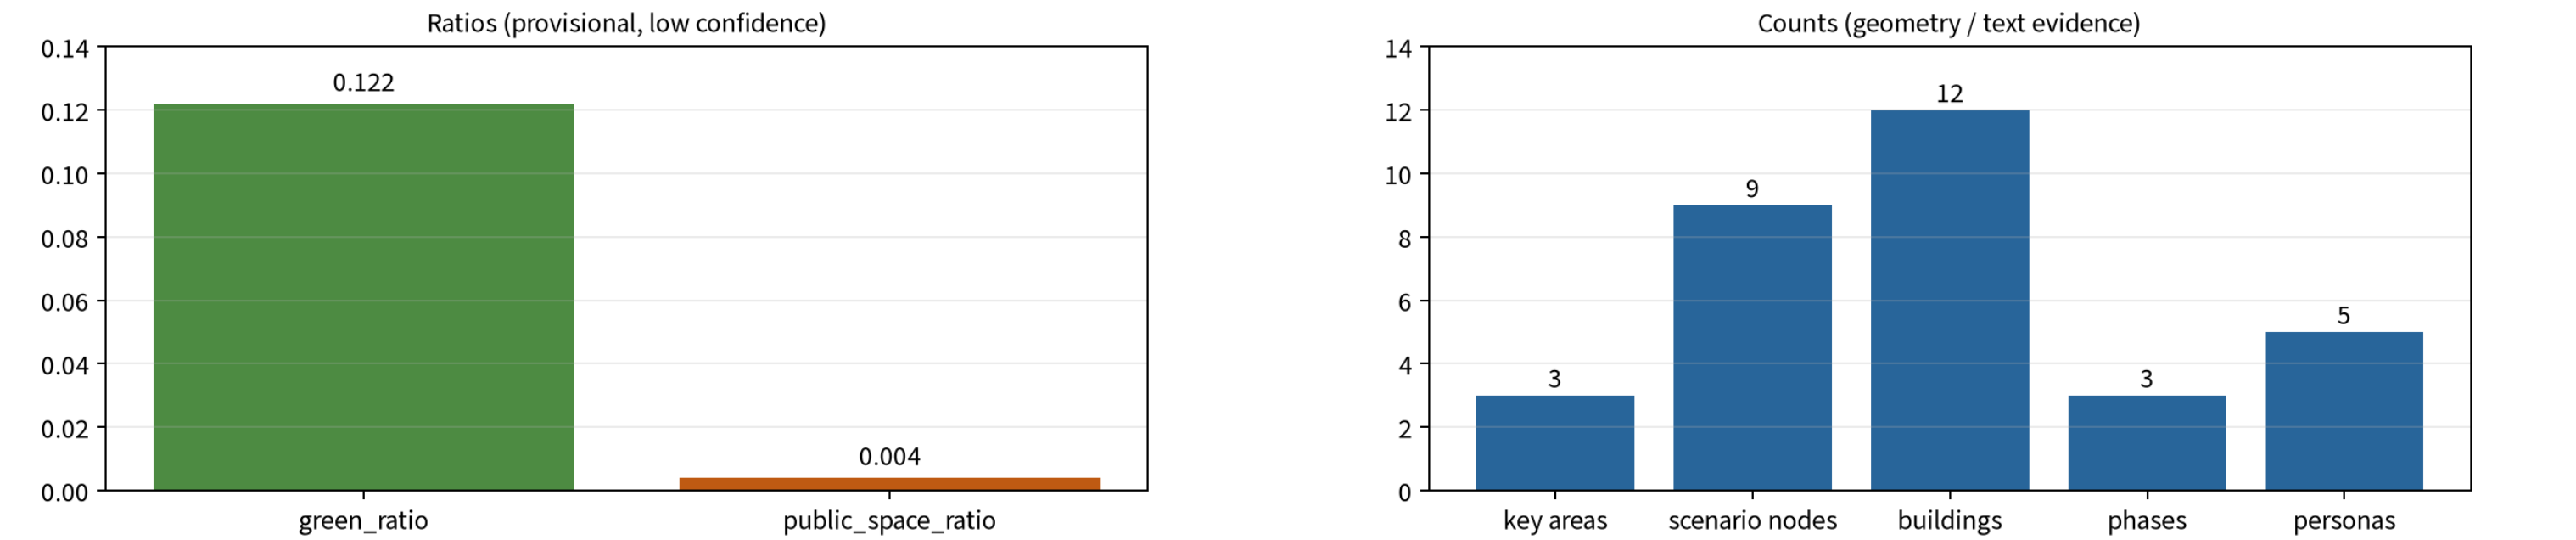

PROVISIONAL concept boundary - not an official redline - recompute after official release
临时概念边界 · 非官方红线 · 官方数据发布后复算

Concept display only; official boundary and professional verification prevail.

PROVISIONAL concept boundary — not an official redline — recompute after official release

Core indicator evidence — ratios and counts on separate axes

Indicator	Source	Formula	Confidence	Use limit	Recompute
site area ~1,141 ha	site_boundary.geojson	polygon area, EPSG:4548	medium	concept display	official geometry
green_ratio 0.122	green_space + site boundary	union(green) / site area	low	caliber display	official geometry
public_space_ratio 0.004	public_space + site boundary	public area / site area	low	caliber display	official geometry
park-green zone share 28%	land_use.geojson code 1401	1401 area / zone total	low	zonal aggregation	official land-use data

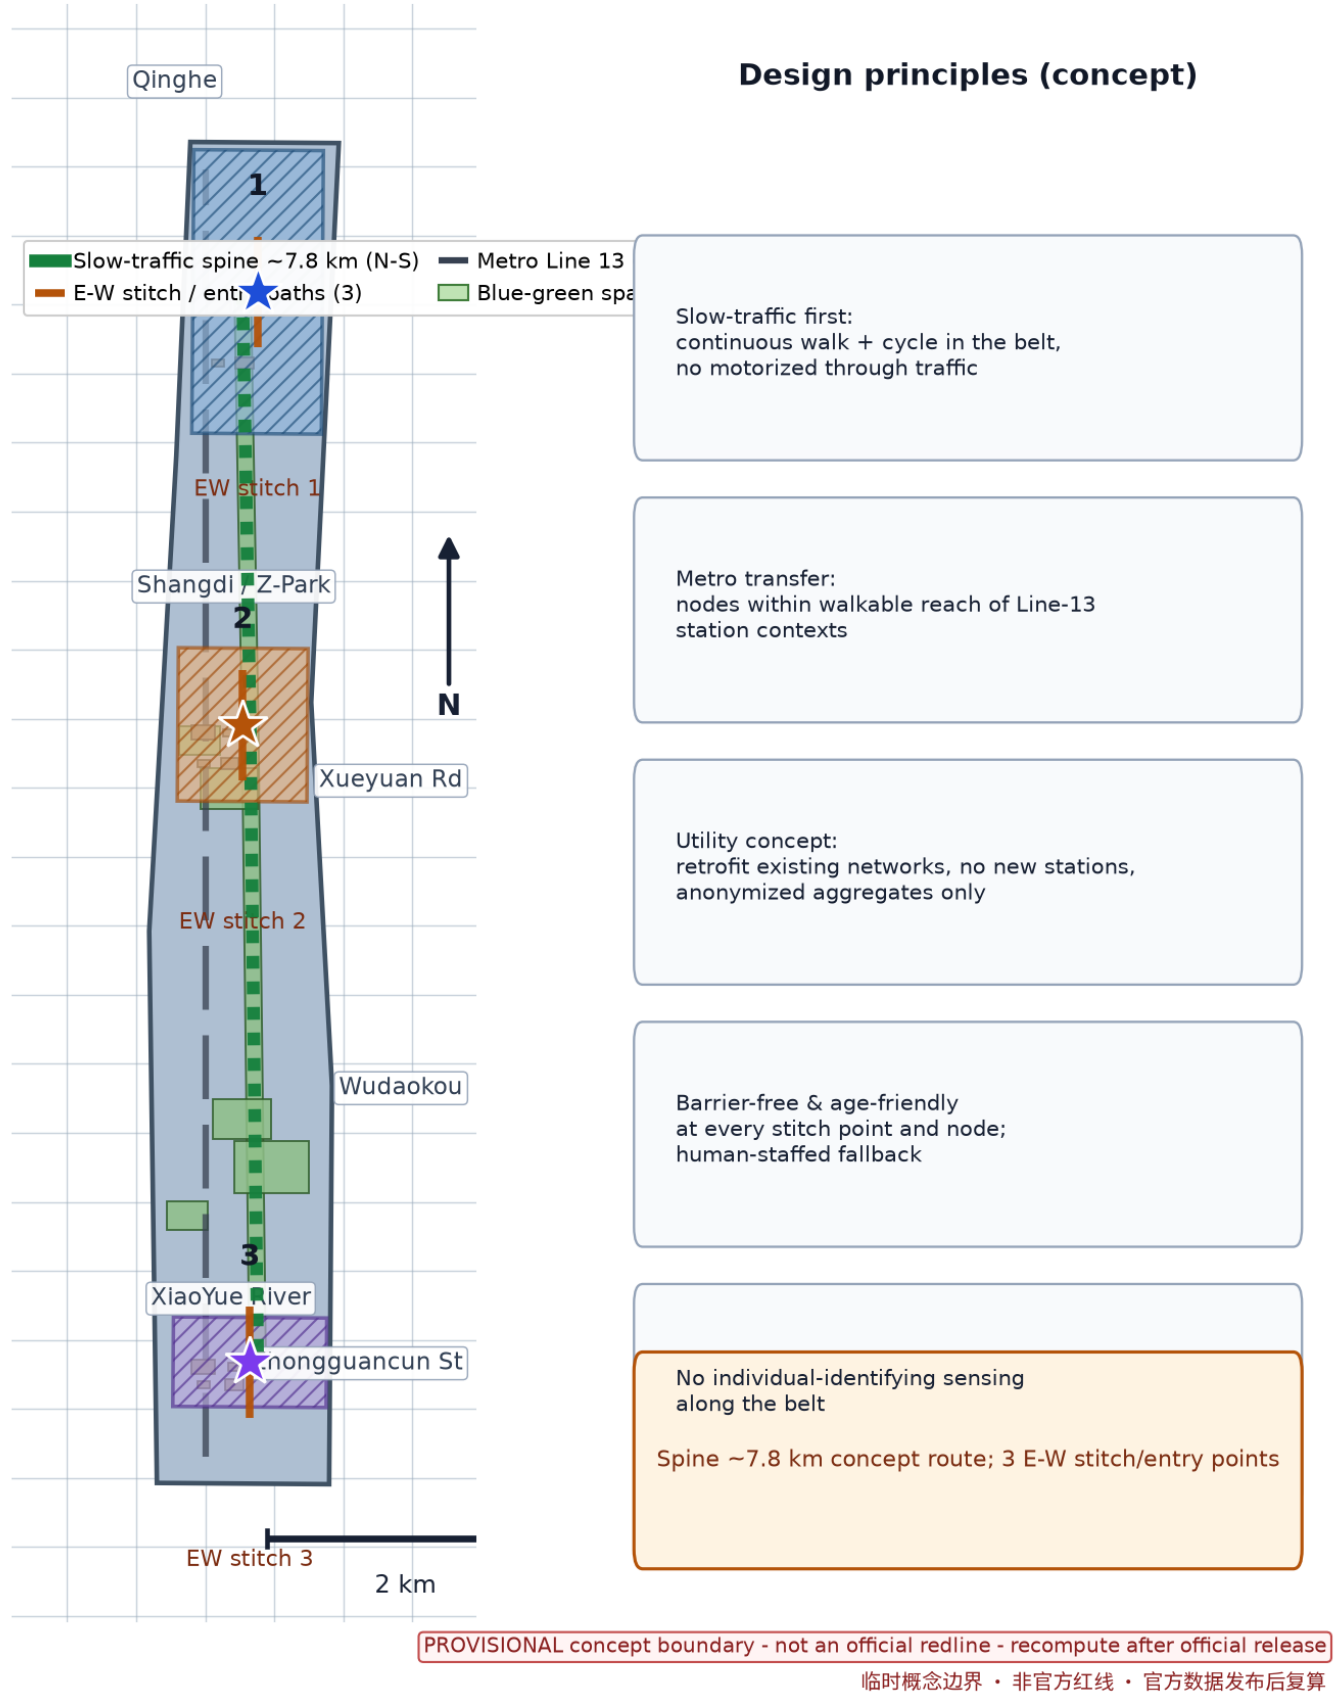

Provisional values are display-only; every ratio and count has a source, formula, confidence and recomputation trigger.

PROVISIONAL concept boundary • not an official redline • recompute after official release

Concept display only; official boundary and professional verification prevail.

PROVISIONAL concept boundary — not an official redline — recompute after official release

Mobility, metro and blue-green network - slow-traffic-first concept

Concept display only; official boundary and professional verification prevail.

PROVISIONAL concept boundary — not an official redline — recompute after official release
