

A provisional, evidence-linked concept package

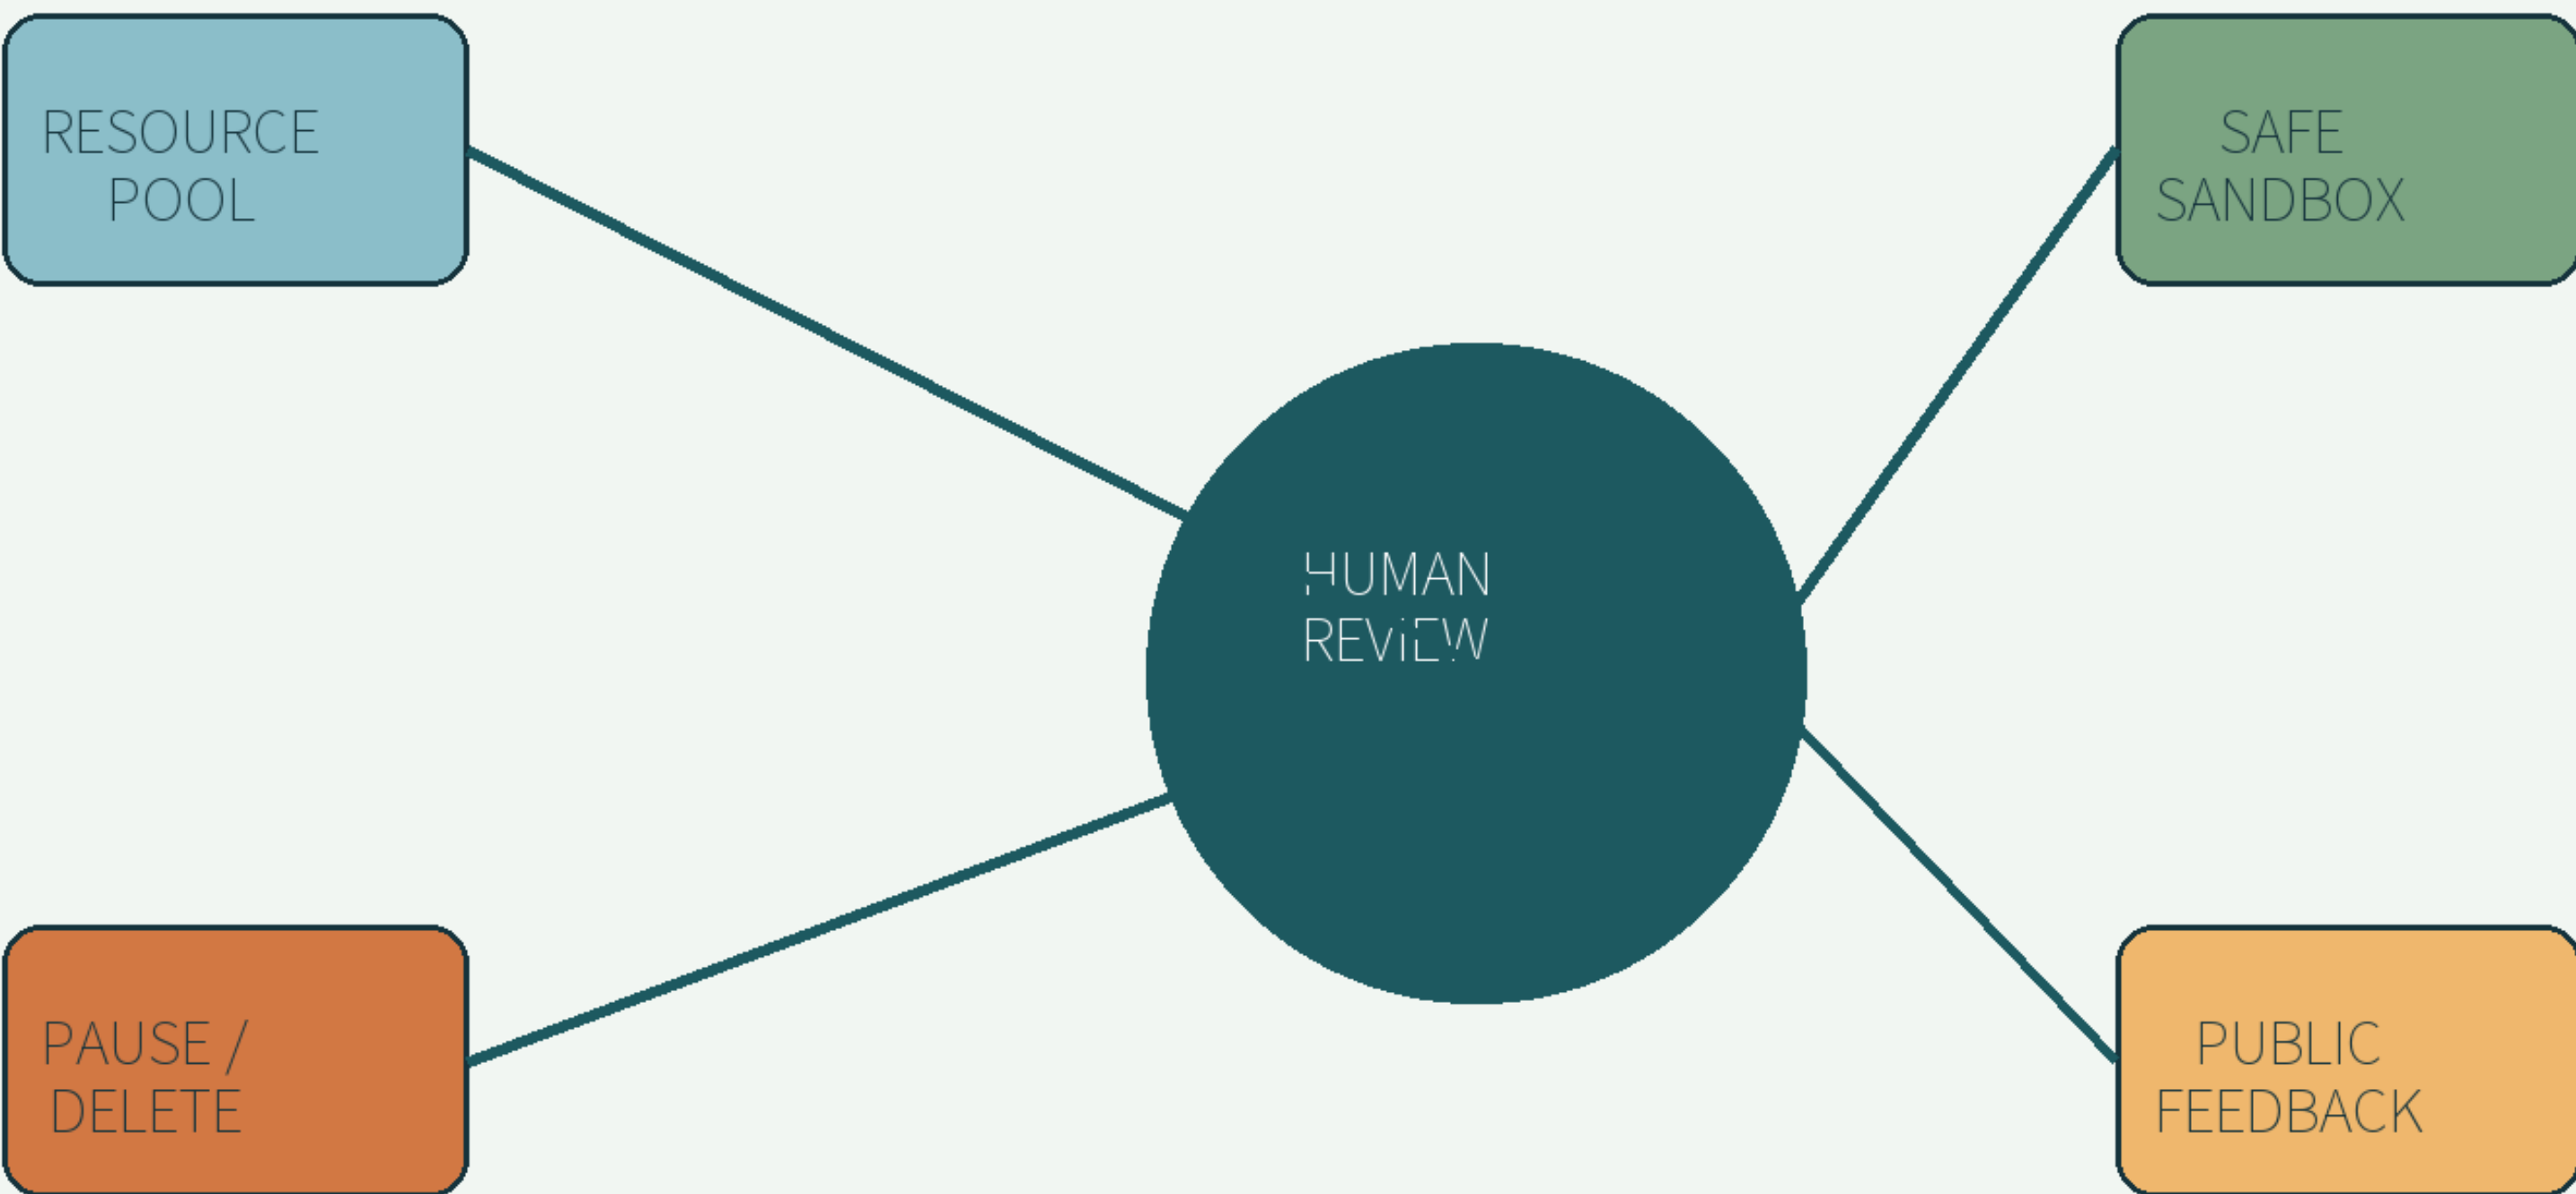

OPEN-DOOR JZ / Accessible Civic Interface Belt

Three levels × three nodes × two wings

Resource - Sandbox - Feedback - Human review

Core metrics: recomputable, accountable, reversible

Provisional geometry is disclosed; recalculate when official geometry is supplied.

site_area_sqm	6,374,567.284
green_ratio	0.160342
public_space_ratio	0.059524
scenario_card_count	12

Status: provisional / to_verify

Scope, spatial logic and provisional boundary discipline

Three levels × three nodes × two wings

L1 统筹研究 / Coordinated research

L2 总体设计 / Overall design

L3 重点区域 / Detailed design

three zones + two wings + three civic nodes

L1 coordinated research: 43.6 km² text scope

L2 overall design: 11.4 km² text scope

L3 detailed area: 368.4 ha text scope

N1 origin / N2 test / N3 service

All extents and points: provisional; official boundary to verify

Three zones: origin community · autonomous innovation · industry cluster

Two wings: technology service · scenario empowerment

Accessible components and human fallback

No face. No voiceprint. No continuous trajectory.

- 12 scenario cards
- 3 industry test protocols
- 6 representative personas
- Anonymous aggregation only
- Human review for key decisions
- Stop conditions are explicit

No face / voice / trajectory profiling

A snapshot is not a permission

Core metrics: recomputable, accountable, reversible

Provisional geometry is disclosed; recalculate when official geometry is supplied.
