

Figure 01 — Site overview

RIDE · JZ LOOP OVERVIEW | CONCEPT STRUCTURE

PROVISIONAL CONCEPT • NOT AN OFFICIAL REDLINE • RECALCULATE AFTER OFFICIAL DATA

THREE AREAS + TWO WINGS

- A1 Zhongzhiyuan AI Acceleration Area
- A2 AI Origin Community
- A3 Dazhongsi AI Industry Cluster

Two wings

Zhongguancun service wing + Xiaoyuehe scenario wing provide conceptual capability and public-scenario interfaces.

Loop structure

Main line passes through the three areas; side arcs provide conceptual interfaces to the two wings.

Station chain

12 scenario cards + 3 landmarks; concepts only, not confirmed facilities.

The loop links three areas and two wings. Alignment, areas and ratios are provisional; recompute after official boundary data.

Figure 03 — Three areas / two wings / loop nodes

THREE-AREA / TWO-WING SYNERGY AND LOOP NODES | CONCEPT

PROVISIONAL CONCEPT • NOT AN OFFICIAL REDLINE • RECALCULATE AFTER OFFICIAL DATA

LOOP NODES + EXTERNAL INTERFACES

Node chain

Zhizao Cycle Port — Zhongzhiyuan prototype / ride-test interface.

Origin Loop Gallery — AI Origin railway heritage / culture interface.

Loop Market — Dazhongsi native-AI service / cycling lifestyle interface.

Two wings

Zhongguancun capability/resource + Xiaoyuehe public/open-scenario interfaces; conceptual only.

Interfaces are conceptual exchange points only; they imply no ownership, signed cooperation, approval or statutory zoning conclusion.

Figure 02 — Land-use structure

CONCEPT LAND-USE STRUCTURE | SINGLE SCENARIO CALIBER

PROVISIONAL CONCEPT • NOT AN OFFICIAL REDLINE • RECALCULATE AFTER OFFICIAL DATA

Concept-only share; not a statutory zoning or area decision

- Research 18%
- Business / finance 12%
- Commercial 10%
- Cultural 12%
- Urban residential 10%
- Logistics / transport 3%
- Parkland 20%
- Protective greenland 12%
- Retained 3%

Caliber: ring green band is aggregated into parkland for this concept scenario.
Baseline and statutory controls: not published. Recalculate after official data.

Land-use names follow the public subset of the Land-Use Classification Guide; percentages are a concept configuration, not a regulatory-plan conclusion.

Figure 04 — Slow traffic and blue-green space

SLOW-TRAFFIC NETWORK AND BLUE-GREEN PUBLIC SPACE | CONCEPT

PROVISIONAL CONCEPT • NOT AN OFFICIAL REDLINE • RECALCULATE AFTER OFFICIAL DATA

CYCLING-FRIENDLY SUPPORTS

Wayfinding

Bilingual, paper and human alternatives.

Rent and return

Cross-station allocation concept; no personal identity input.

Stations

Reversible modules; remove if safety, access or maintenance conditions fail.

Safety

Anonymous aggregation + human review; stop on unsafe bias.

Station dots and cross-sections are conceptual; no road redline, engineering, capacity or investment conclusion is made.

Figure 05 — Core metric evidence

CORE METRIC EVIDENCE | GEOMETRY-RECOMPUTED, PROVISIONAL

PROVISIONAL CONCEPT • NOT AN OFFICIAL REDLINE • RECALCULATE AFTER OFFICIAL DATA

FORMAL CORE RATIOS

DELIVERY COUNTS

Concept land-use shares and geometry ratios use different denominators. The 20% parkland + 12% protective-greenland configuration is not the same statistic as green_ratio = 22.6278%. The formal green_ratio is recomputed only from green_space.geojson / site_boundary.geojson.

All values are geometry- or package-count evidence, not official targets. FAR, height, demand, capacity and investment remain unknown pending official controls and baseline data.
