

Xiaoyue River AI Scenario Wing — Concept Boards (A0 1/4)

PROVISIONAL boundary · not an official redline · recalculate after official data

Overall design overview (provisional, ~3 km corridor, concept)

PROVISIONAL boundary · not an official redline · recalculate after official data

Official scope hierarchy

Official three-tier scope (announcement text, geometry pending, official recalculation prevails):
1) Coordinated research c.43.6 km² · 2) Overall design c.11.4 km² · 3) Key areas c.368.4 ha
This wing: the ~3 km waterfront corridor and the P0+N1/N2/N3 banks are a concept sub-scope inside the overall design scope; site_boundary here is a provisional display base map drawn to the announcement's c.11.4 km² textual extent, not an official redline.

Key figures (metrics.json)

Site area c.11.41 km² (provisional concept geometry)
Green ratio c.18.2% (concept)
Public-space ratio c.0.8% (concept)
Road network c.10.2 km (concept)
Slow-traffic spine c.3 km (concept design value)
Land-use zones 23 (land_use_zone_count=23)

Note: all geometry is conceptual (provisional); full recalculation after official release; station names are real, links are conceptual.

Official three-tier scope (announcement text, geometry pending, official recalculation prevails):
1) Coordinated research c.43.6 km² · 2) Overall design c.11.4 km² · 3) Key areas c.368.4 ha

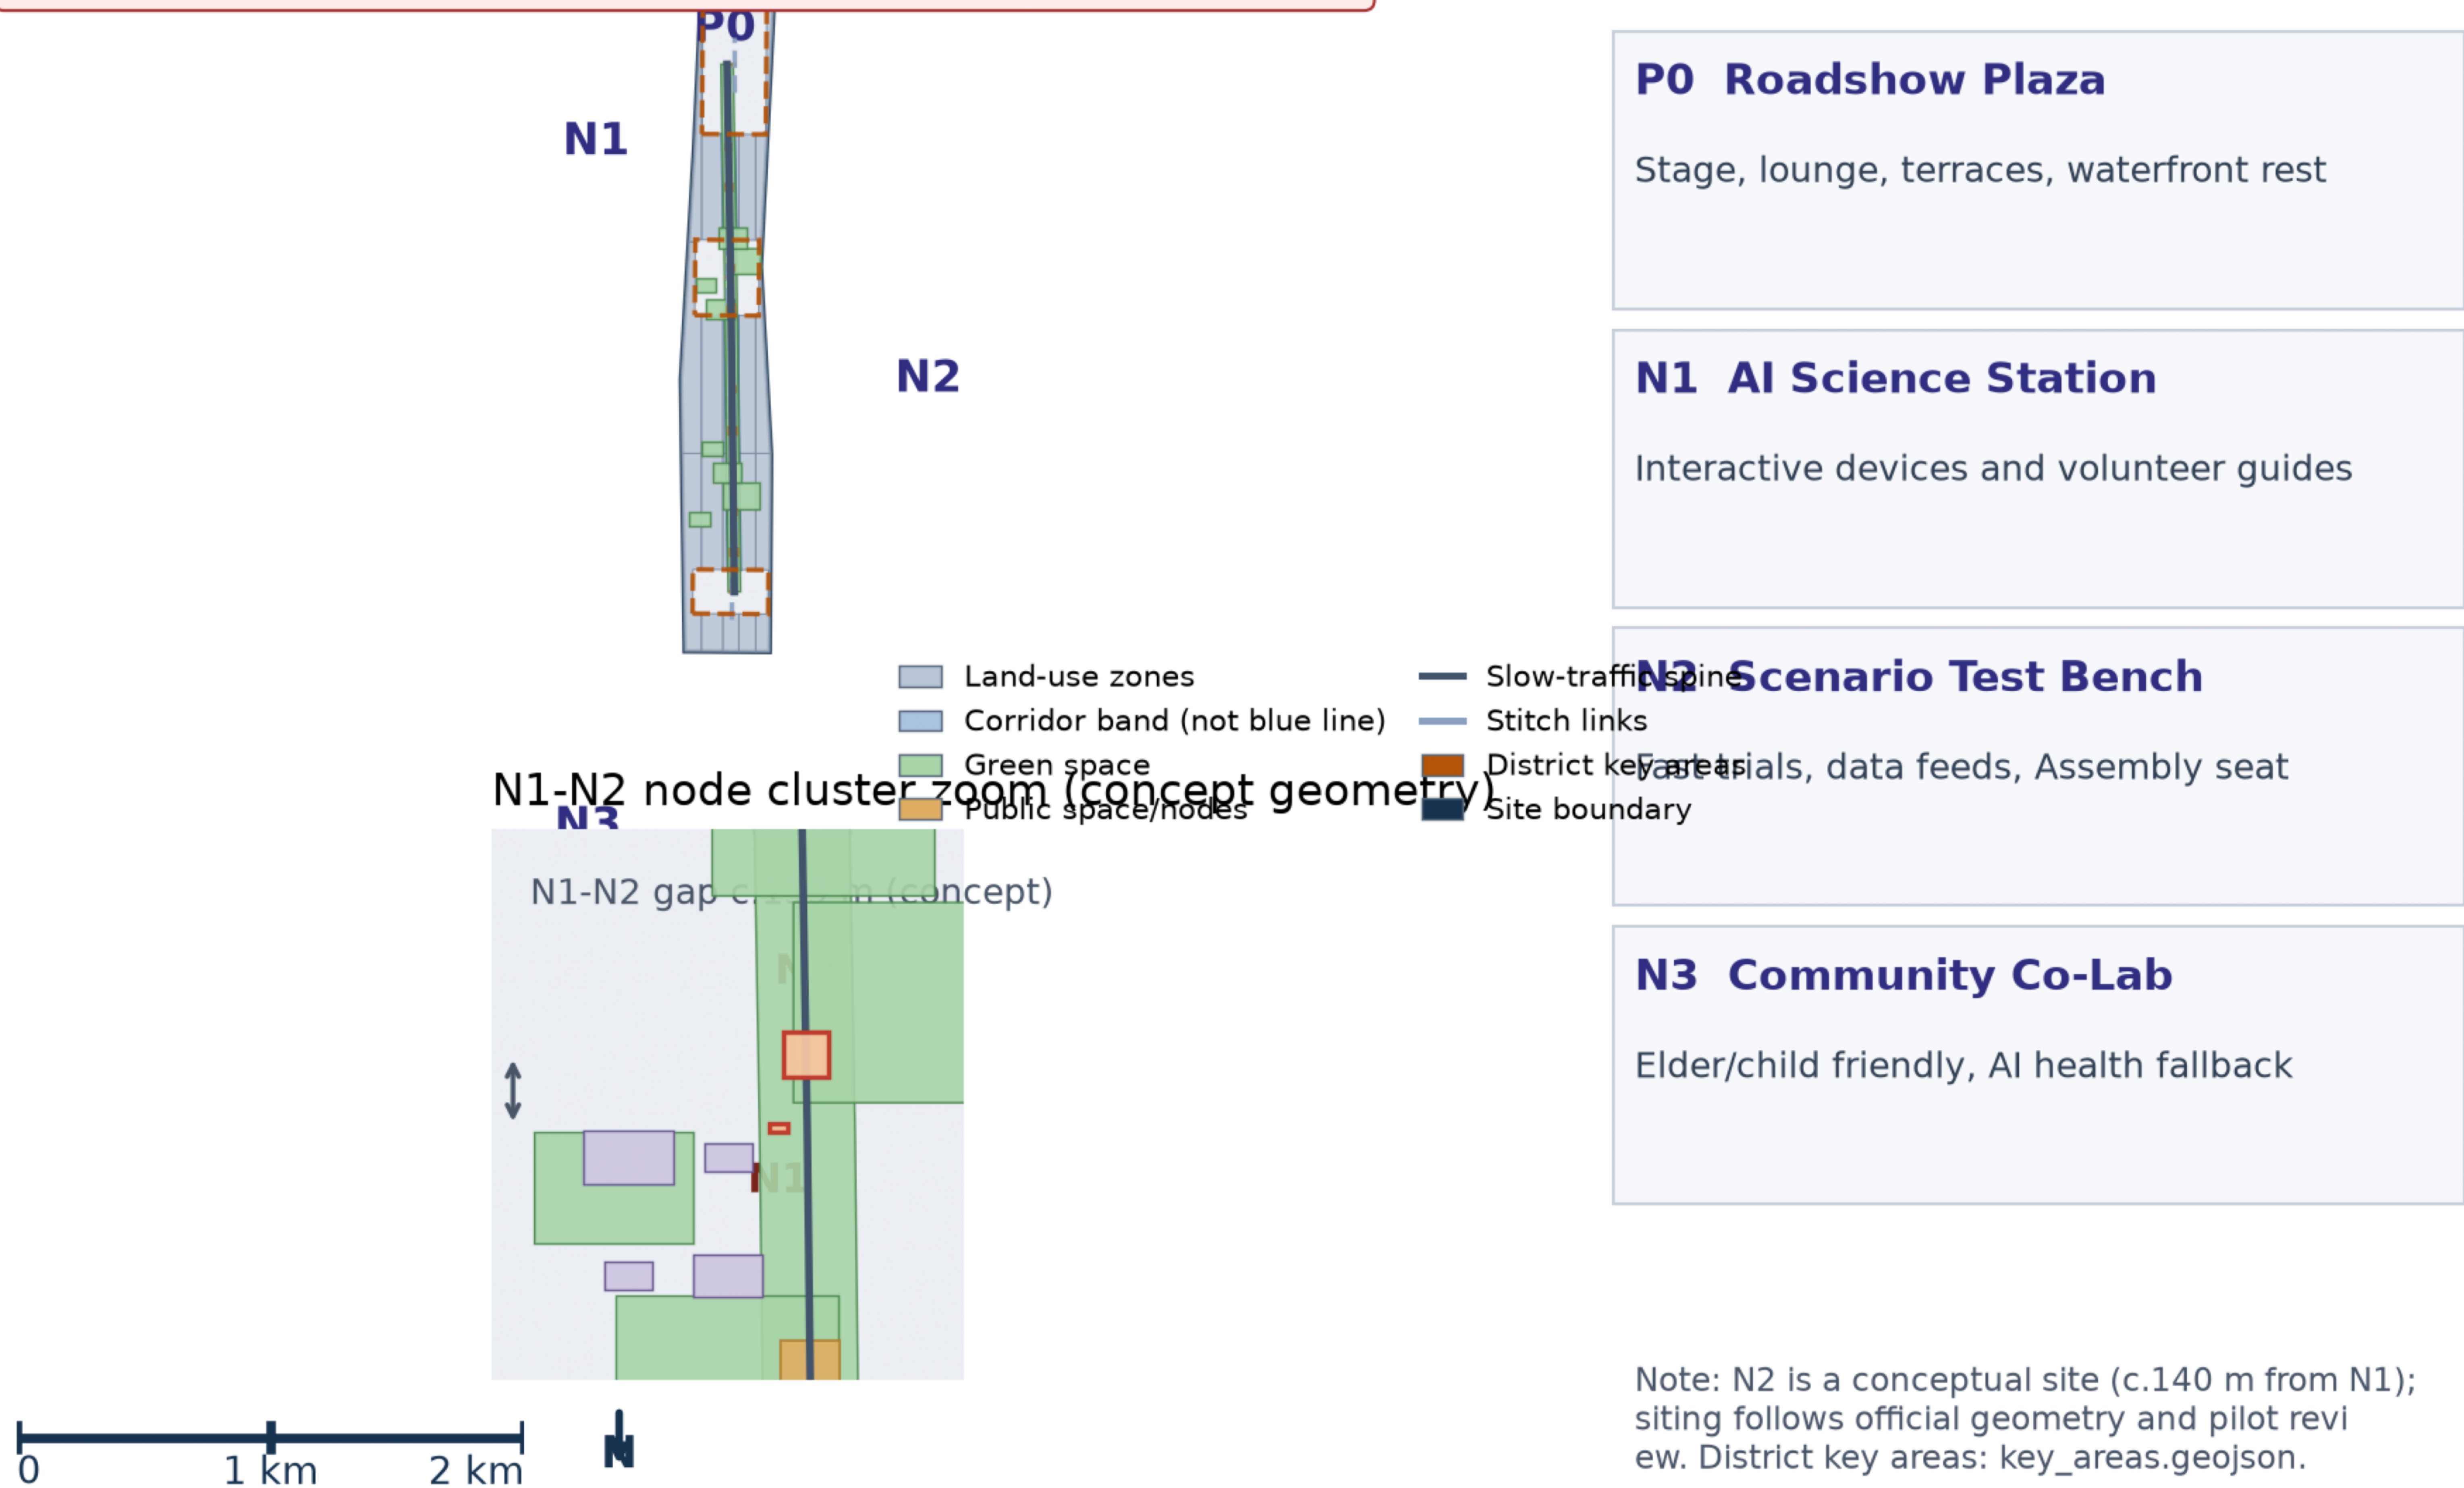

This wing: the ~3 km waterfront corridor and the P0+N1/N2/N3 banks are a concept sub-scope inside the overall design scope; site_boundary here is a provisional display basemap drawn to the announcement's c.11.4 km² textual extent, not an official redline.

Key-area detailed design: P0 + N1/N2/N3 (provisional)

PROVISIONAL boundary · not an official redline · recalculate after official data

Key areas: P0 + N1/N2/N3 experience nodes (provisional)

PROVISIONAL boundary · not an official redline · recalculate after official data

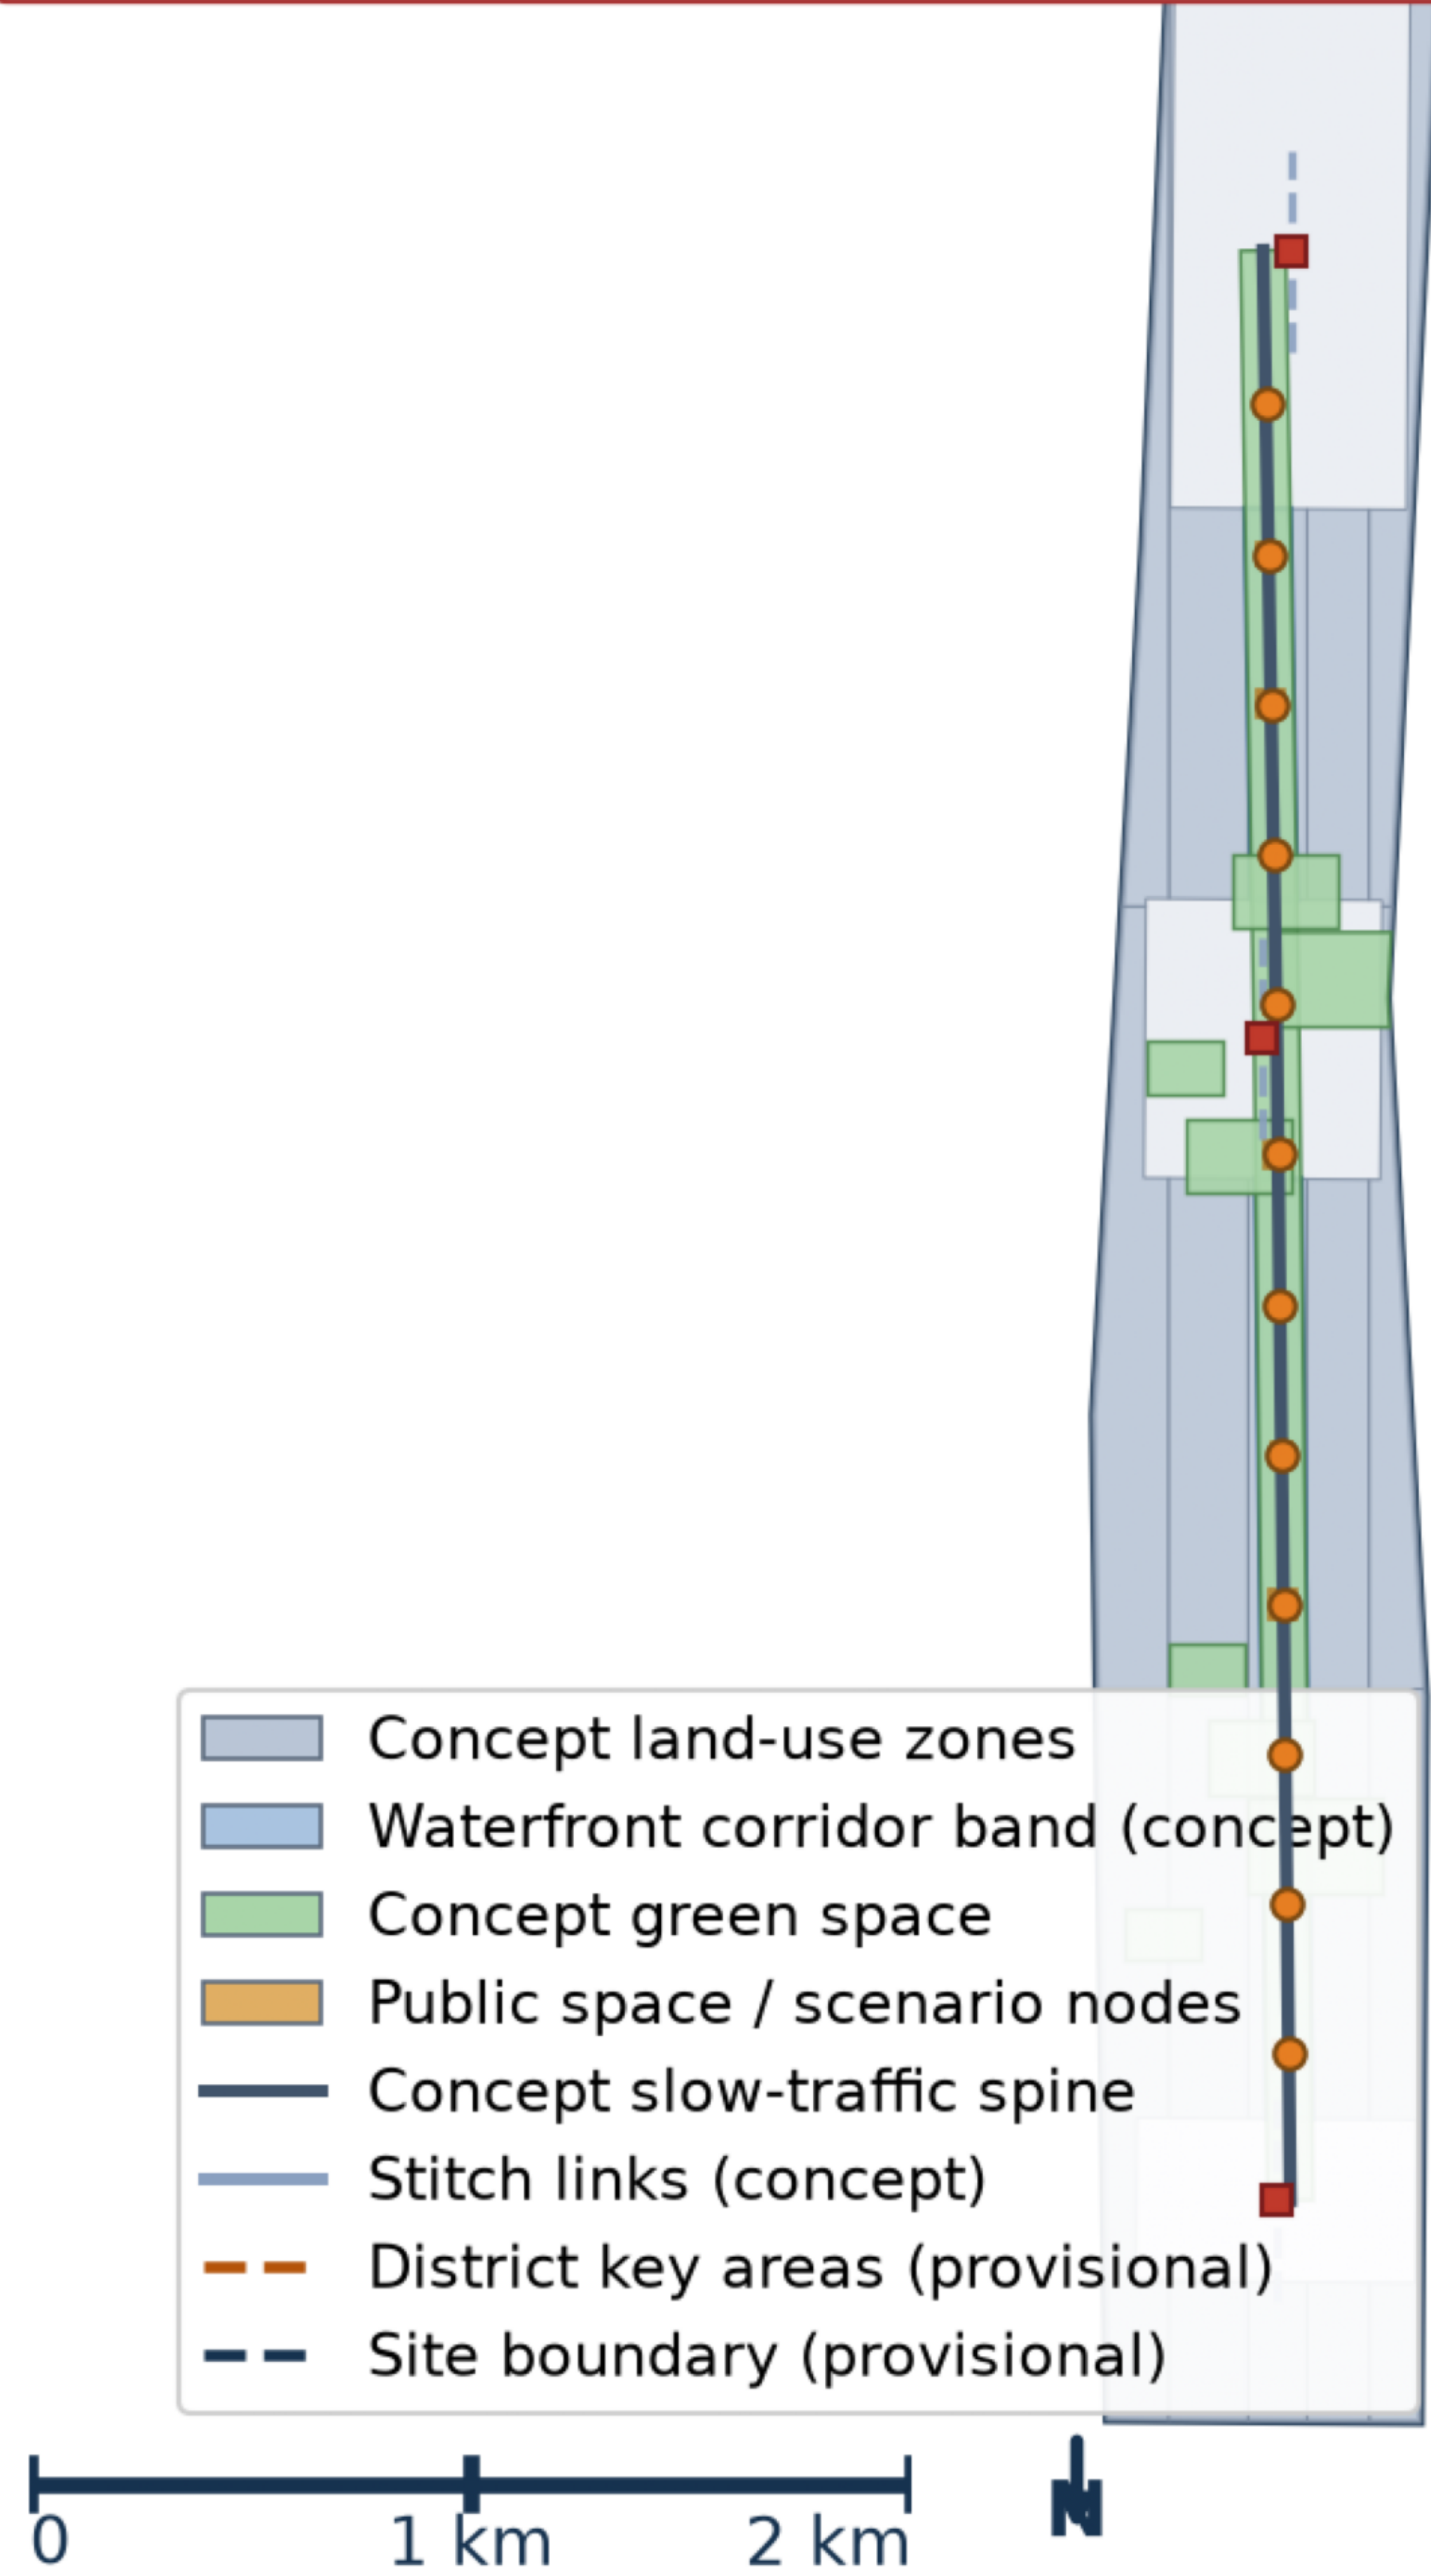

Node IDs unified across the document: P0 (Roadshow Plaza) · N1 (AI Science Station) · N2 (Scenario Test Bench) · N3 (Community Co-Lab); modular reversible facilities with offline human fallback.

Slow mobility and blue-green network (~3 km spine, provisional)

PROVISIONAL boundary · not an official redline · recalculate after official data

Slow mobility and blue-green analysis (~3 km spine, provisional)

PROVISIONAL boundary · not an official redline · recalculate after official data

Slow mobility

~3 km continuous walk+cycle trail (concept made in path)
Gaps removed; under-bridge spaces become passages and stops
5-10 min feeder links to rail stations (concept)
Shared bikes and remote parking at corridor ends

Blue-green & ecology

Classified bank naturalisation (ecological/living/roadshow segments)
Wetland purification + sponge stormwater + separated sewers
Native trees retained, shade trees added
Flood/water-level/blue-line checks are pre-review items; no conclusion prejudged

Rail feeders (names real, links conceptual): Changping Line south ext. Xueyuanqiao/XueZhiyuan/Liudaokou; Line 15 Liudaokou.

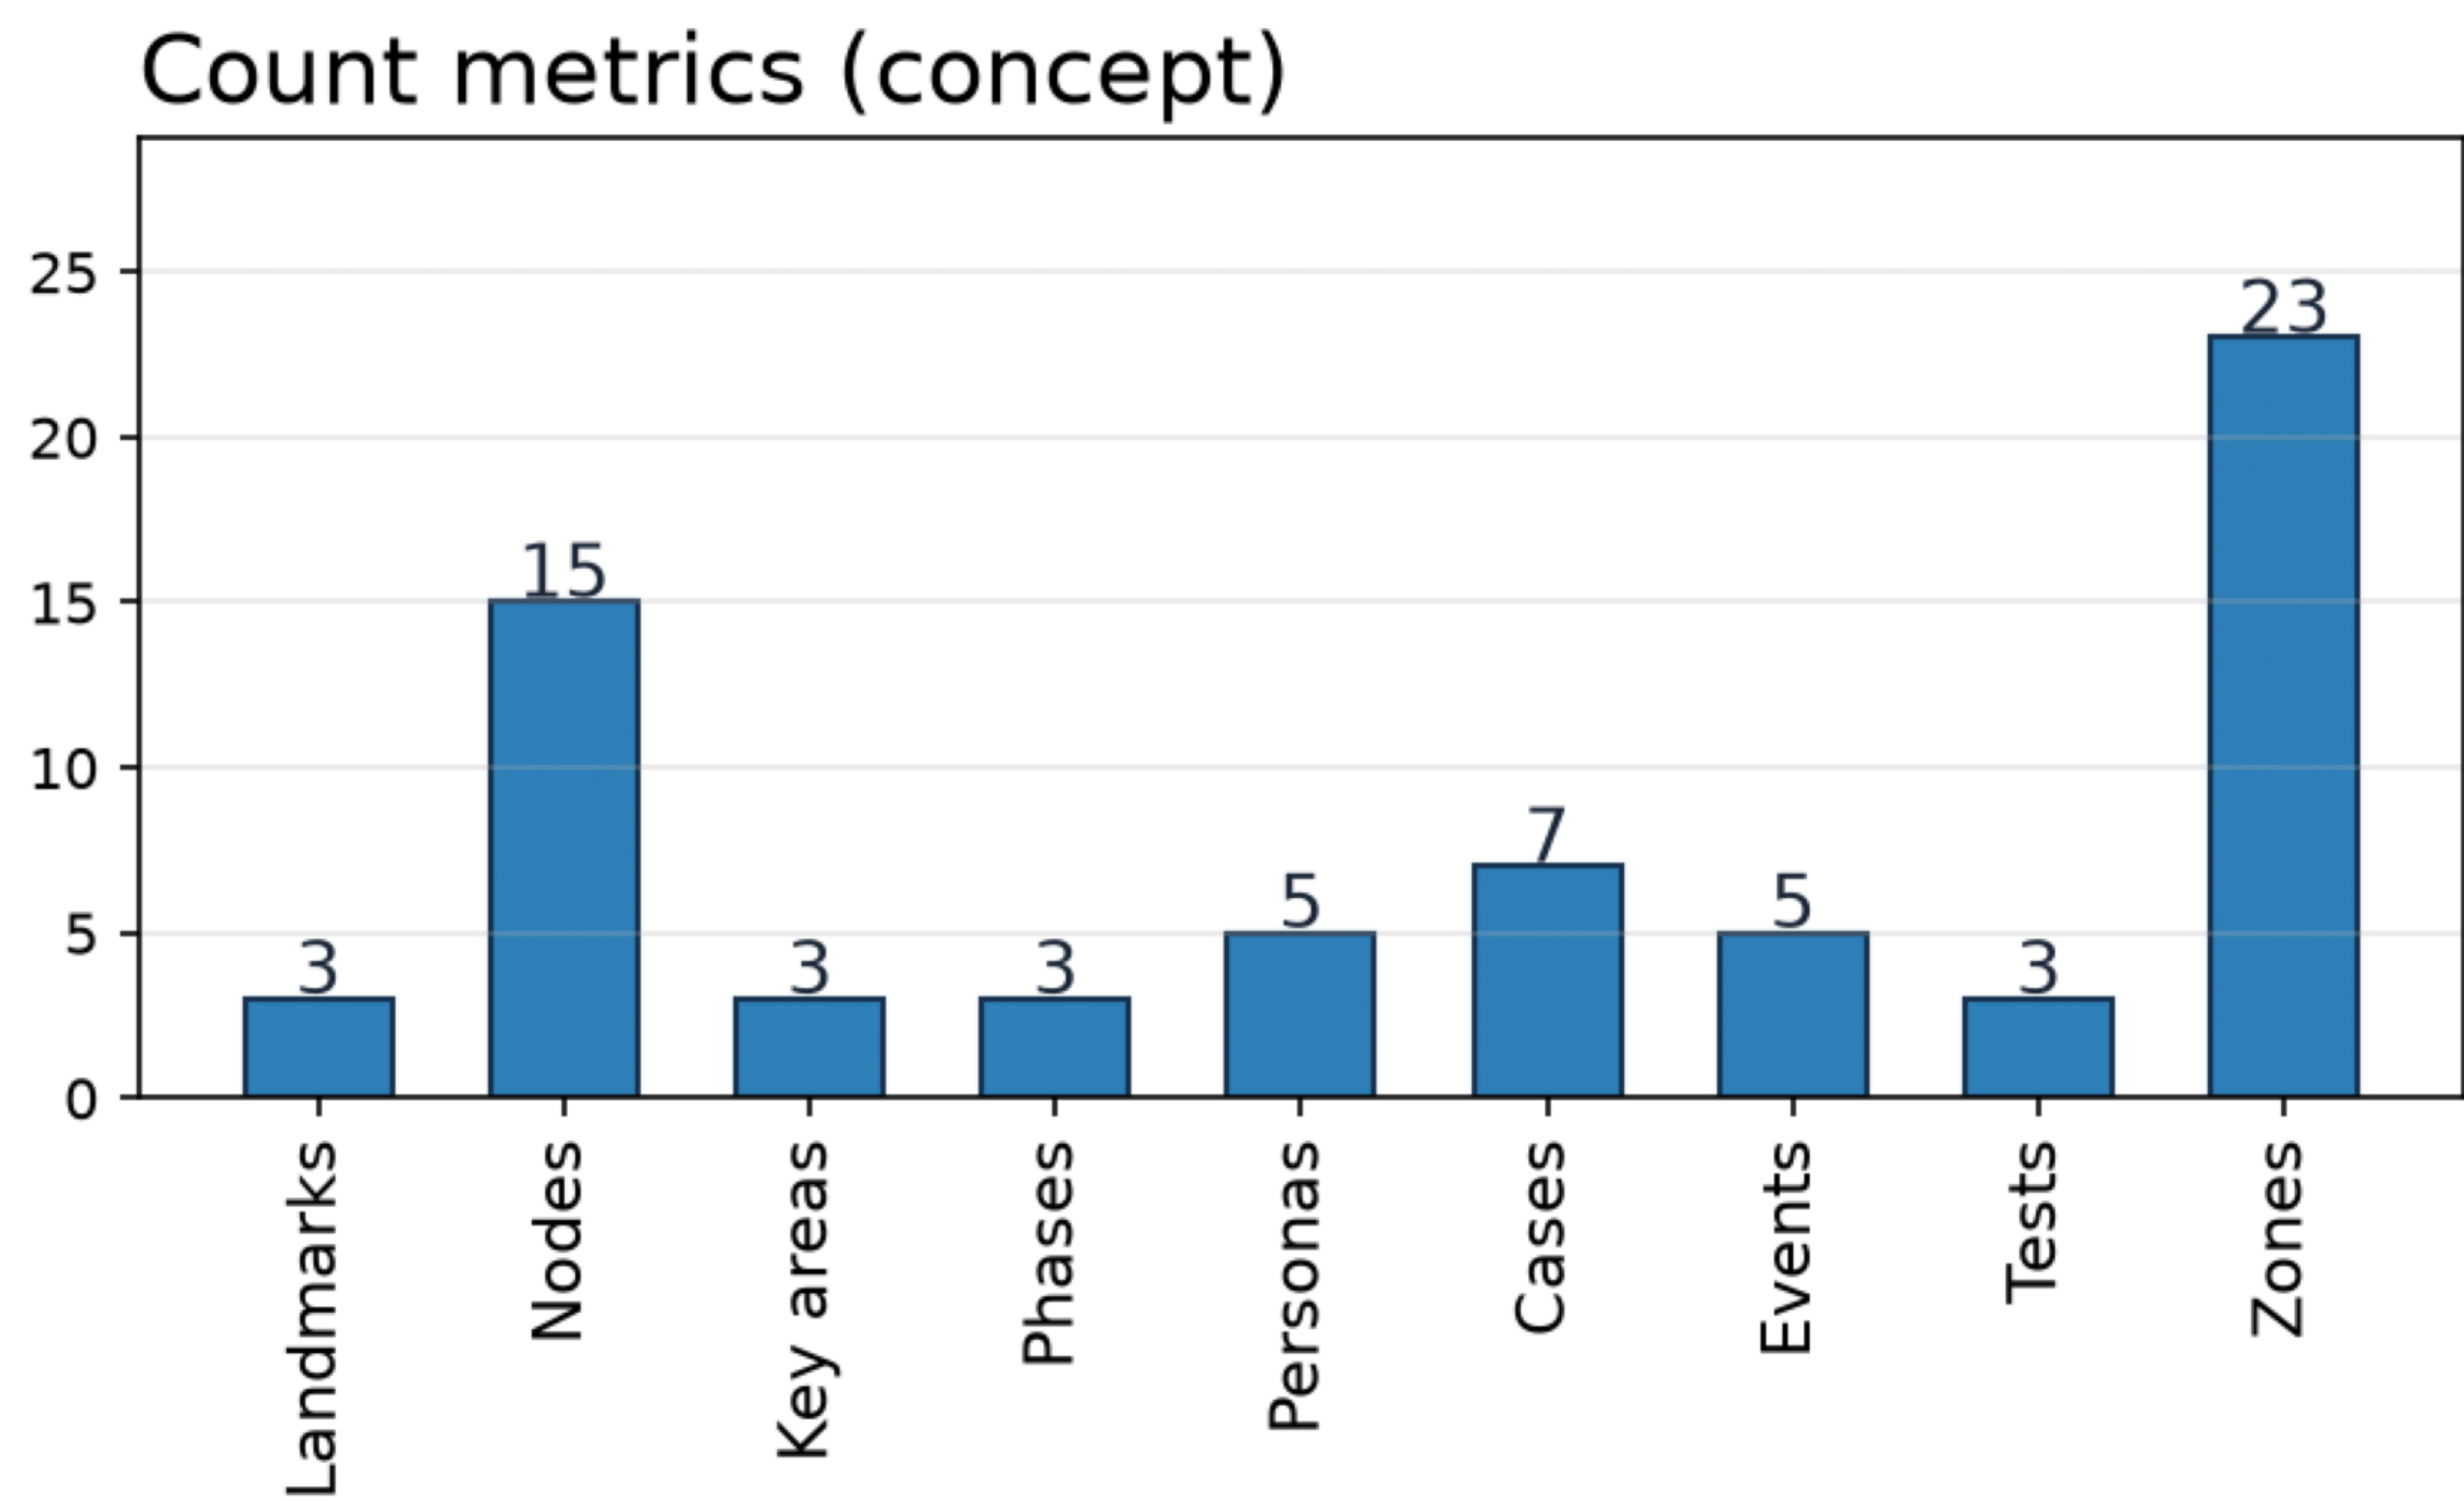

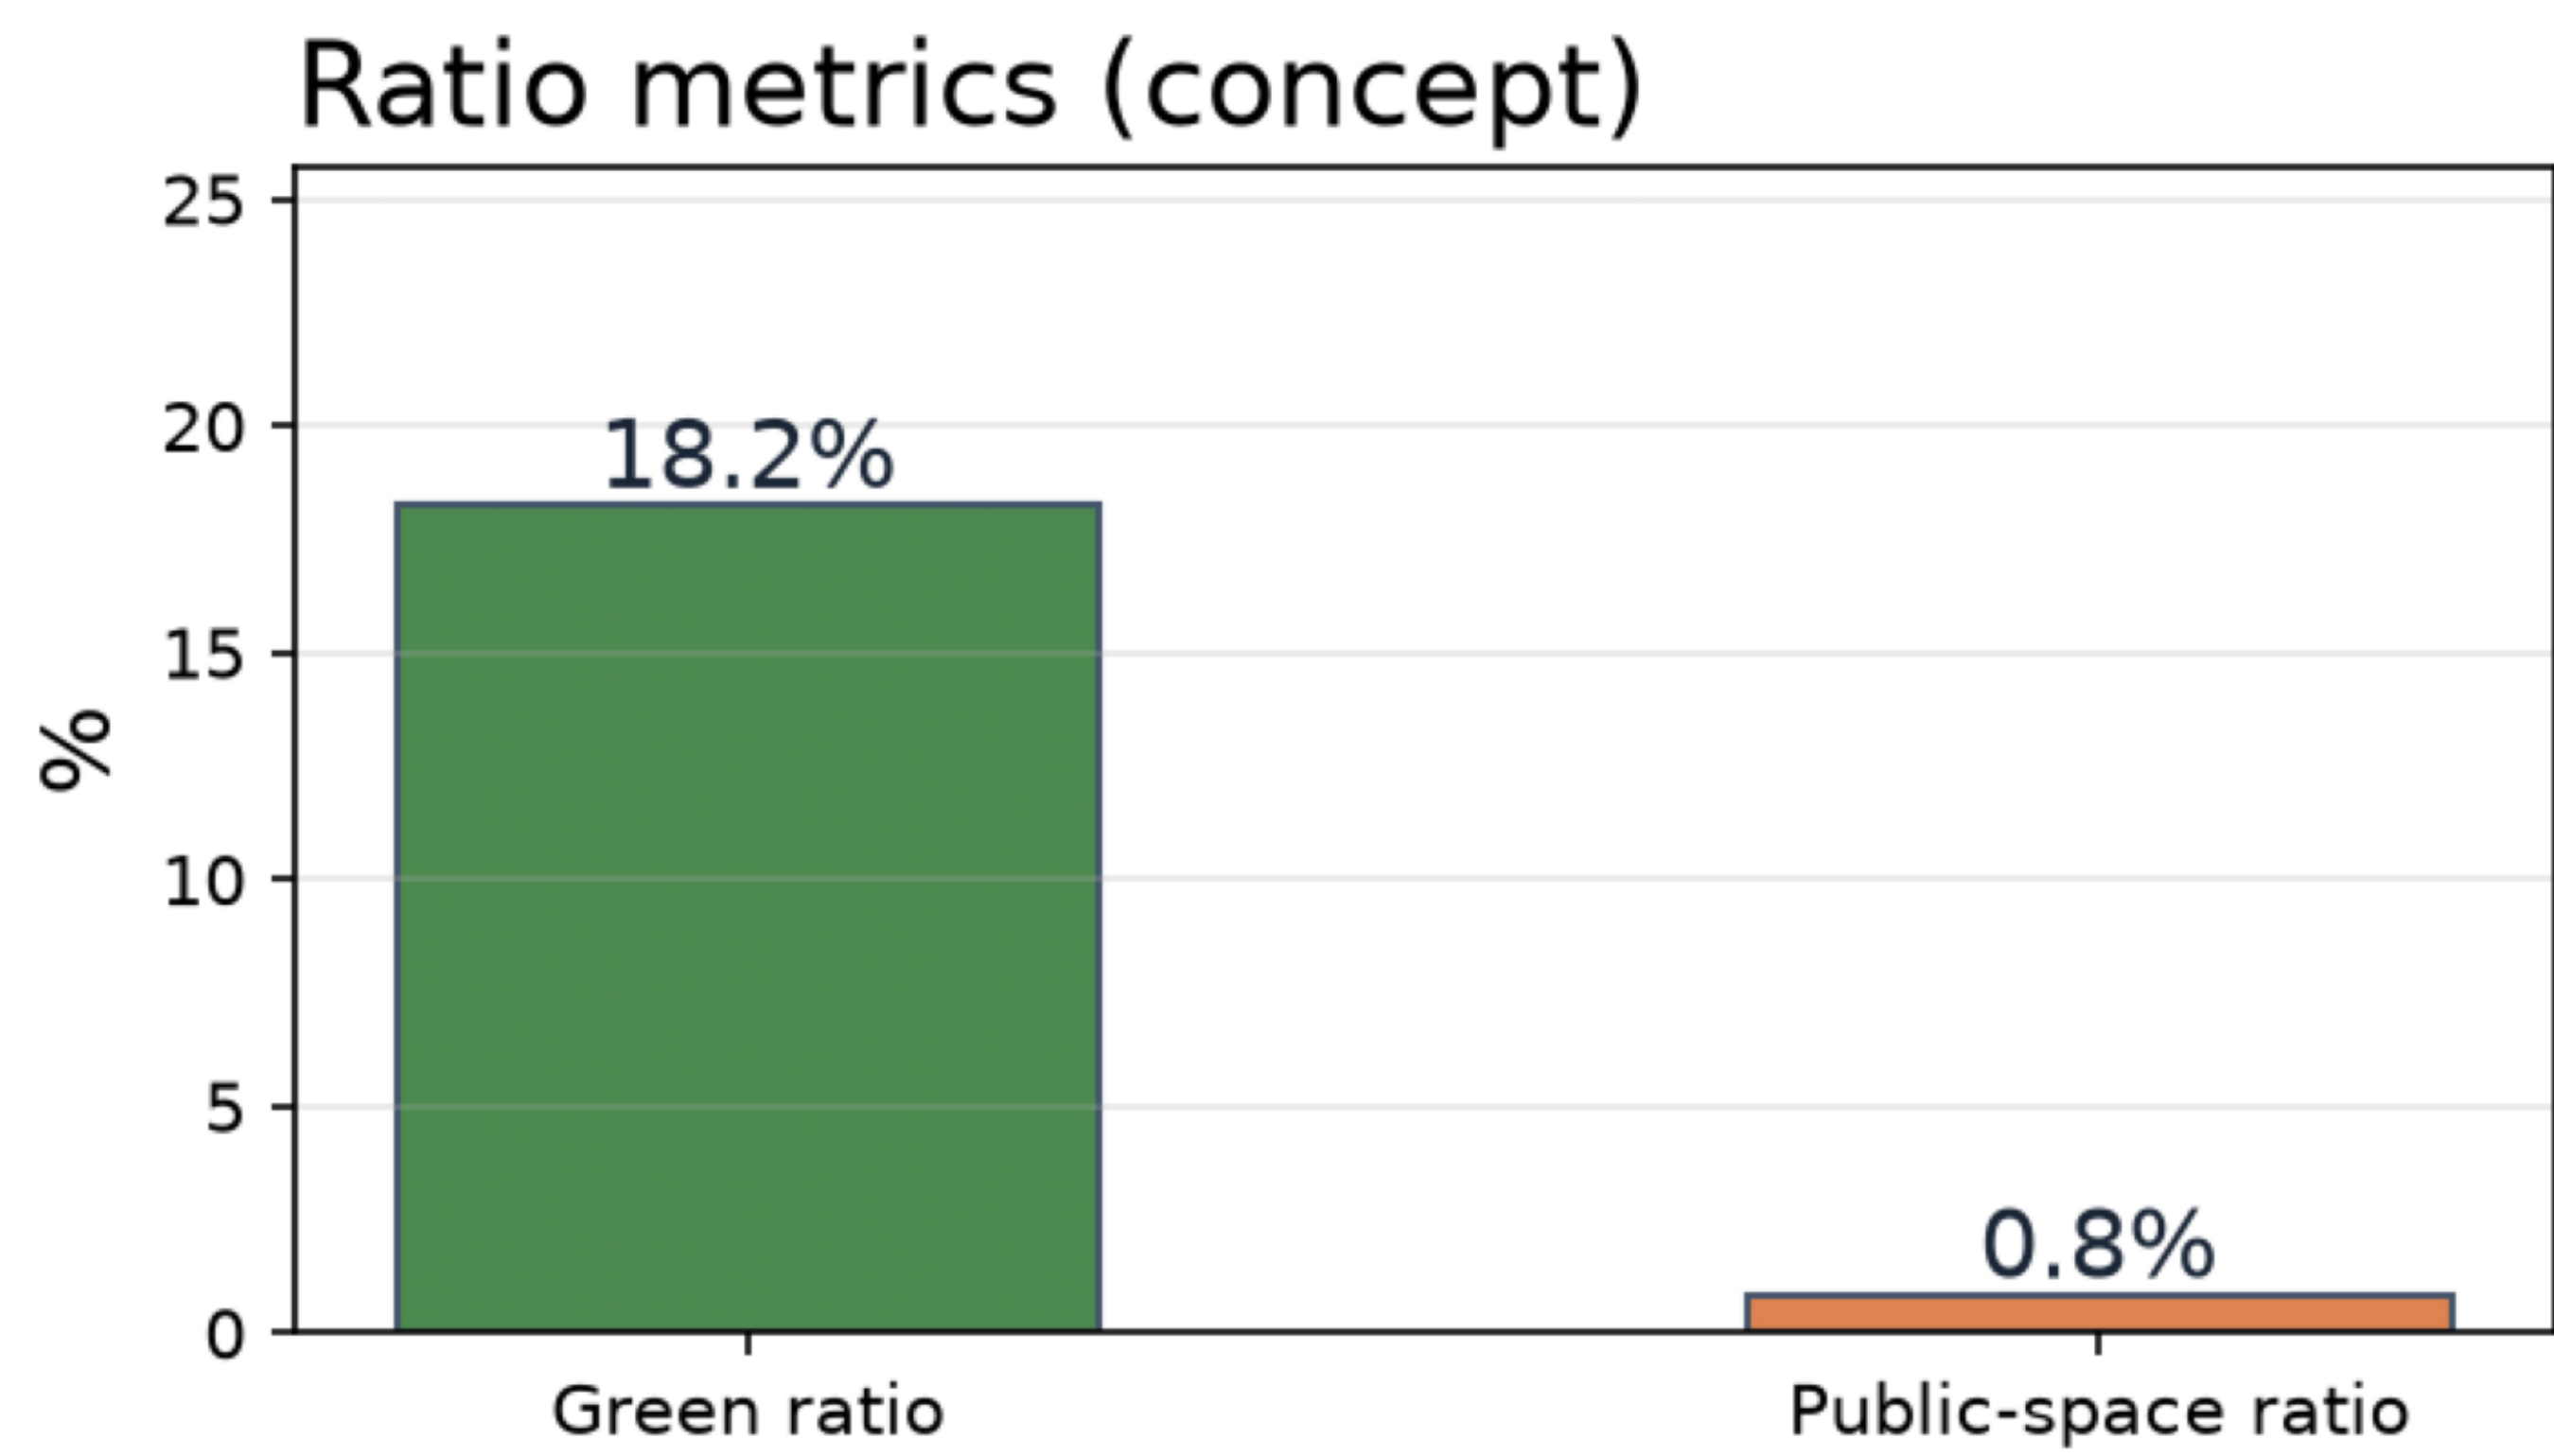

Rail feeders (names real, links conceptual): Changping Line south ext. Xueyuanqiao/XueZhiyuan/Liudaokou; Line 15 Liudaokou.

Core metric evidence and ecosystem mechanism (metrics.json, provisional)

PROVISIONAL boundary · not an official redline · recalculate after official data

Core metric evidence (metrics.json, concept-scale)

PROVISIONAL boundary · not an official redline · recalculate after official data

Per-metric calibre, source, formula, confidence, trigger
Calibre (consistent with metrics.json; shown rounded):
Green ratio = concept green area / site area (EPSG:4548) c.18.2%; public-space ratio c.0.8%
Counts: landmarks 3 / scenario nodes 15 / key areas 3 / phases 3 / personas 5 / cases 7 / annual events 5 / tests 3 / zones 23
Confidence: ratios low (concept geometry); counts high (layers and text counts)
Recalculation trigger: after official boundary, land-use, public-space and rail data release
Use limit: concept display and review; not a budget or engineering-feasibility basis

All metrics are concept-scale and shown rounded; ratio and count panels are separated; full recalculation after official data release.
