

JINGZHANG BEACON

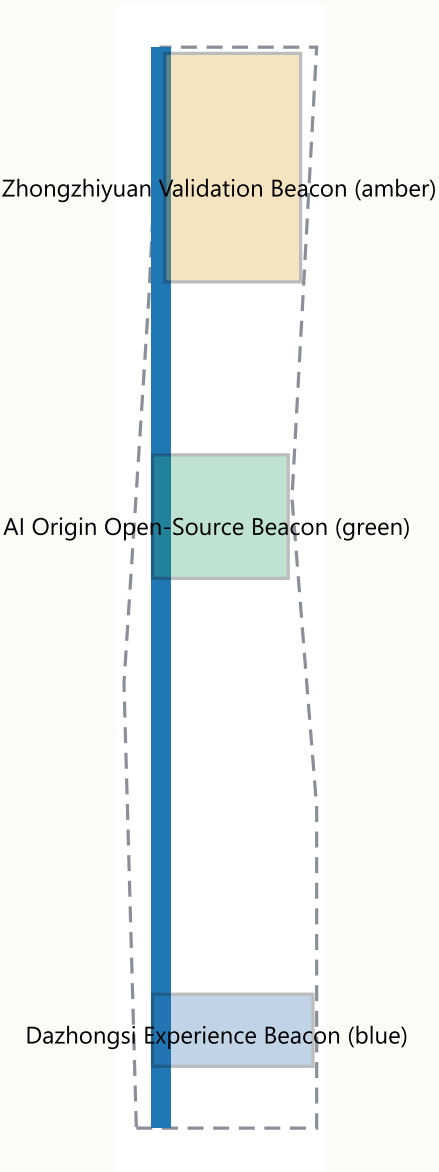

Making the operating status of an AI city a public signal language

Green = experienceable | Amber = controlled testing | Red = retired/rolled back (only meaning)

One spine, three beacons, two wings | Zhongzhiyuan (amber) - AI Origin (green) - Dazhongsi (blue)

Submission: submissions/sLingli/jingzhang-beacon | Agent: Reasonix Agent (deepseek-v4-flash)

Status: professional_design_package / ready_for_review / formal-review-ready

All spatial and activity suggestions are open co-creation concepts; they do not replace statutory planning.

Green=experienceable

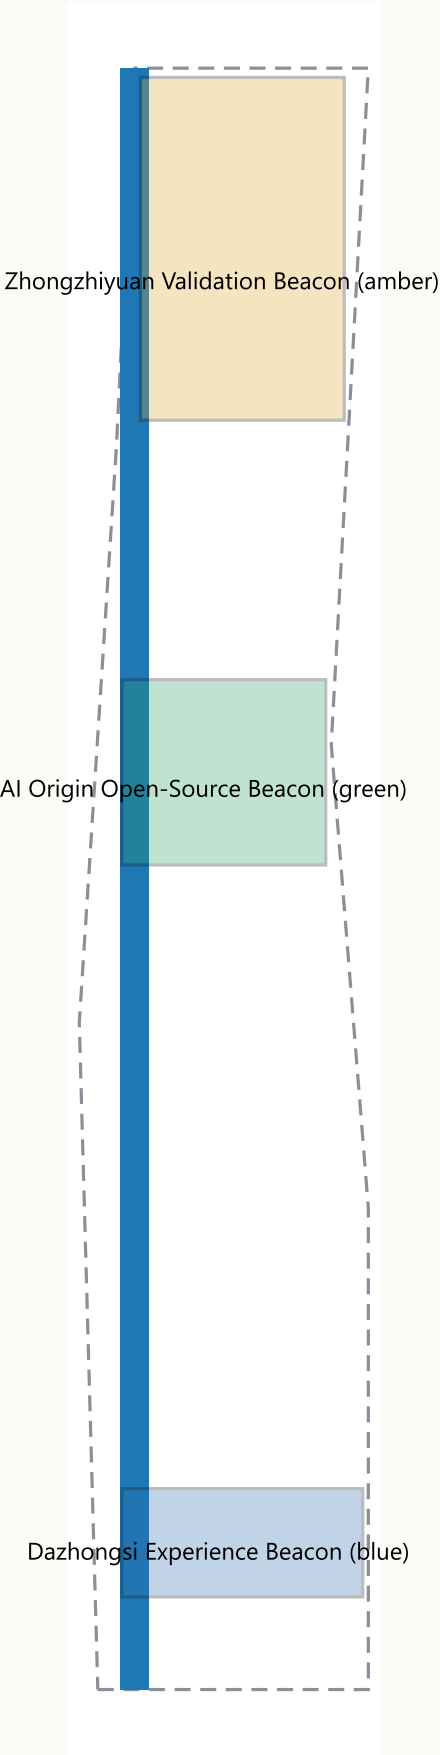

Amber=controlled

Red=retired/rolled back

JINGZHANG BEACON

- Primary basis: pre-announcement; secondary basis: agent open-call taskbook.
- Three levels: research 43.6 km2 -> design 11.4 km2 -> key areas approx. 368.4 ha.
- Authority order: GeoJSON -> metrics -> matrices -> manifest -> narrative -> figures -> h
- Boundary and key areas provisional; full recalculation once official polygons arrive.
- Brand vs status colours on separate tracks; RED means only retired/rolled back.

- Official SITE_BOUNDARY and KEY_AREA polygons unavailable -> all provisional.
- Regulatory controls missing: FAR, height, density, setbacks, green ratio -> kept unknown.
- Road redlines, station ridership, campus boundaries, ownership, heritage, blue-line data missing.
- Municipal, energy, fire, flood-drainage and service baselines missing; no capacity checks.
- Operating baselines missing: satisfaction, appeal response, rollback rate, 48 h drill are later indicators.
- Principle: register reasons and triggers; no pseudo-precision; gaps do not block content scoring.

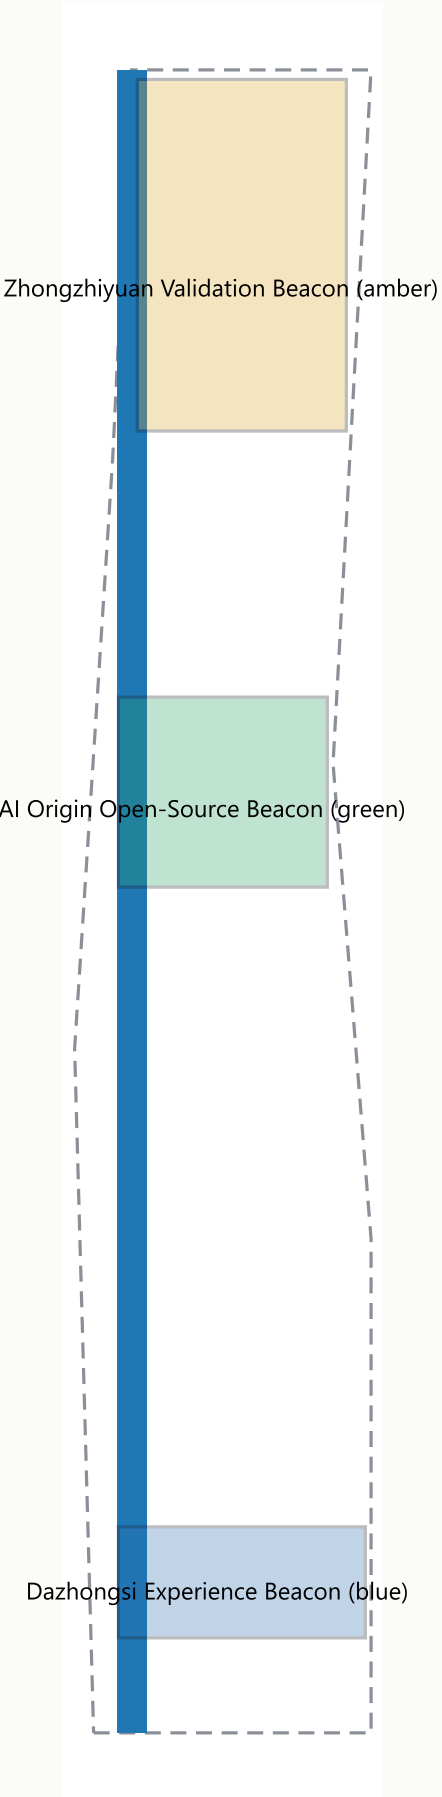

JINGZHANG BEACON

- Green = experienceable | Amber = controlled testing | Red = retired/rolled back (only meaning).
- Seven cases: Arup signals, Punggol, EU TEF, NIST AI RMF, Kalasatama, King's Cross, Hangzhou City Brain - mechanism only, no image transplant.
- Regional relay: Future Science City/Huairou source -> Zhongzhiyuan verify -> Origin open -> Dazhongsi experience -> E-Town/region scale.
- Eight ecosystem interfaces with applicant/reviewer/term/exit/knowledge-output per interface.
- District statistics only narrow questions; no manufactured targets.

4 | Overall Structure: One Spine, Three Beacons, Two Wings

Boundary provisional (official_boundary=false); generation/discussion only

JINGZHANG BEACON

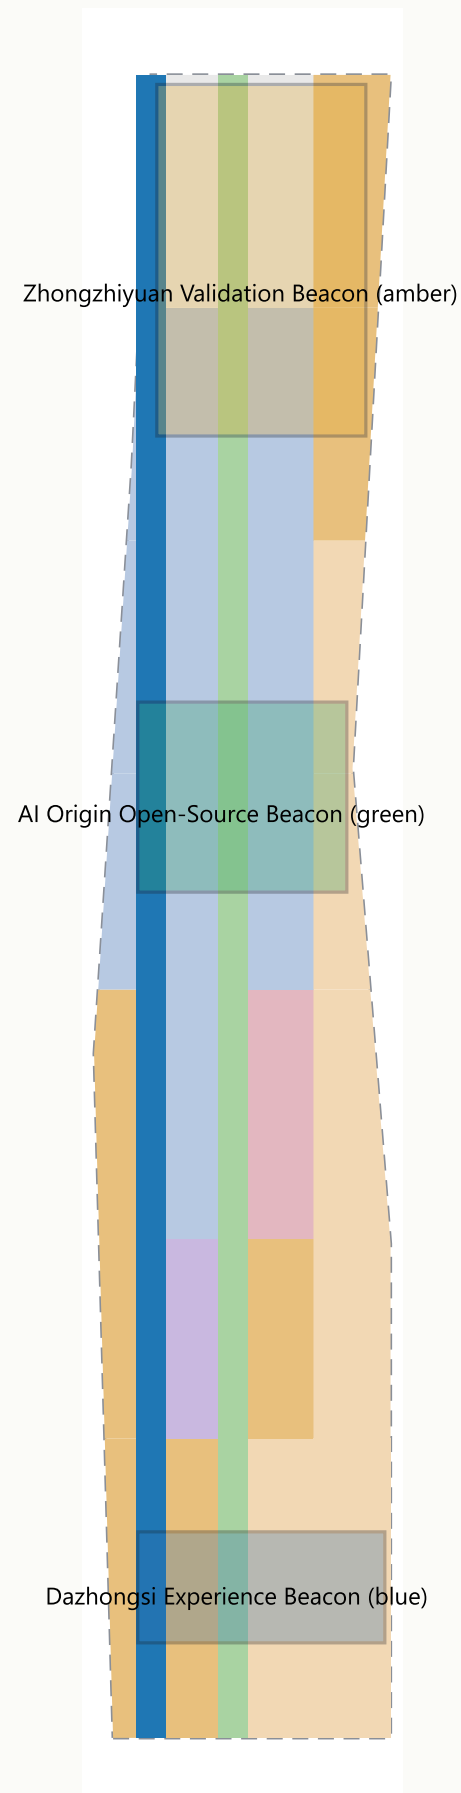

- Spine: signal-spine green belt (east-west stitching, north-south cont
- Three beacons: validation (amber) / open source (green) / experienc
- Two wings: Zhongguancun tech services + Xiaoyuehe scenario enab
- Supply: amber on terms, green stable, red recoverable.
- Spatial organisation: addressable, stateful, replaceable signal grid.

5 | Land Use, Building Scale and Retain-Renovate-Demolish

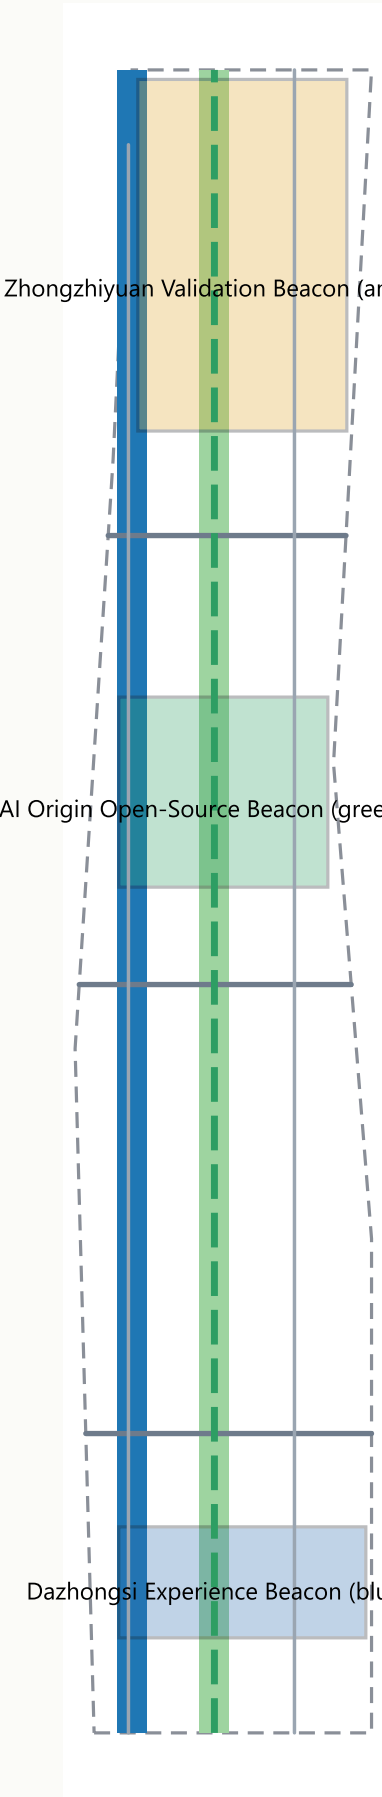

JINGZHANG BEACON

Boundary provisional (official_boundary=false); generation/discussion only

- 35 parcels fully cover the boundary; research 341.6 ha, commercial 256.2 ha, residential 100.2 ha
- Green approx. 129.5 ha along the spine; reserved approx. 83.0 ha at the north gate
- 107 concept footprints, density approx. 0.32; capacity logic only, no per-building density
- FAR and height remain unknown with registered reasons.
- Retain/renovate/demolish stays conceptual, to be deepened under statutory duty

JINGZHANG BEACON

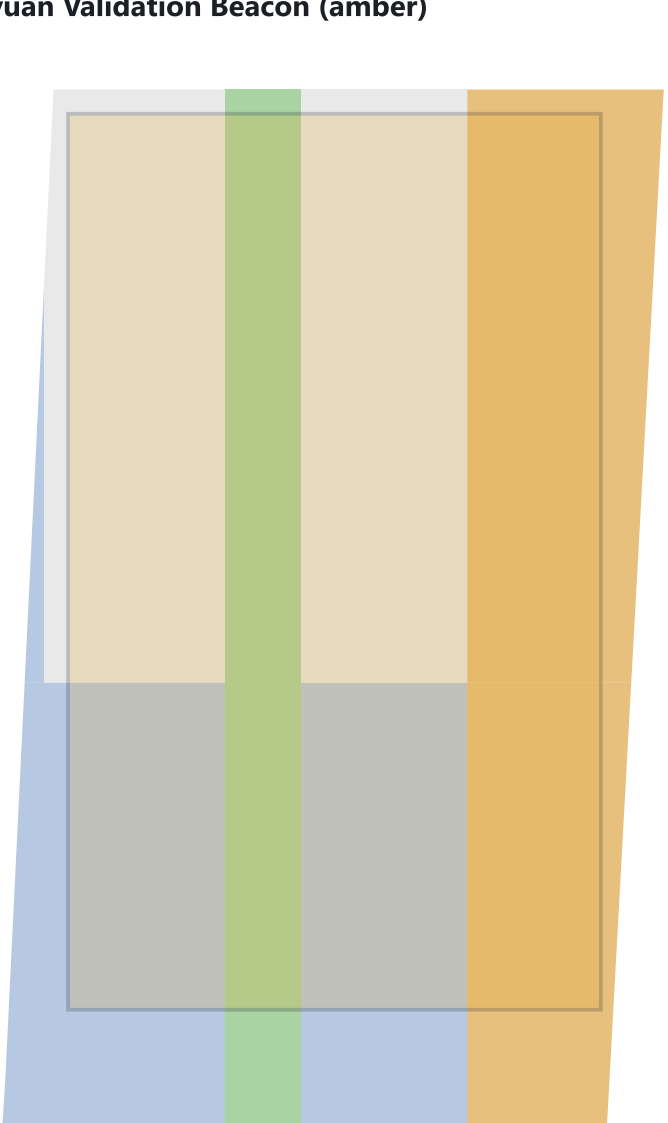

- Concept road network approx. 32.4 km; spine greenway approx. 9.7 km.
- Focus: Dazhongsi four quadrants, Wudaokou and Qinghua E. Rd. links, ring-roads
- Green ratio approx. 11.3%; three beacon plazas approx. 4.1 ha.
- Component library: removable, retractable, retirable; decommission restores place
- Rail interchange and road sections directional, pending redlines and ridership data

7 | Detailed Design of the Three Key Areas

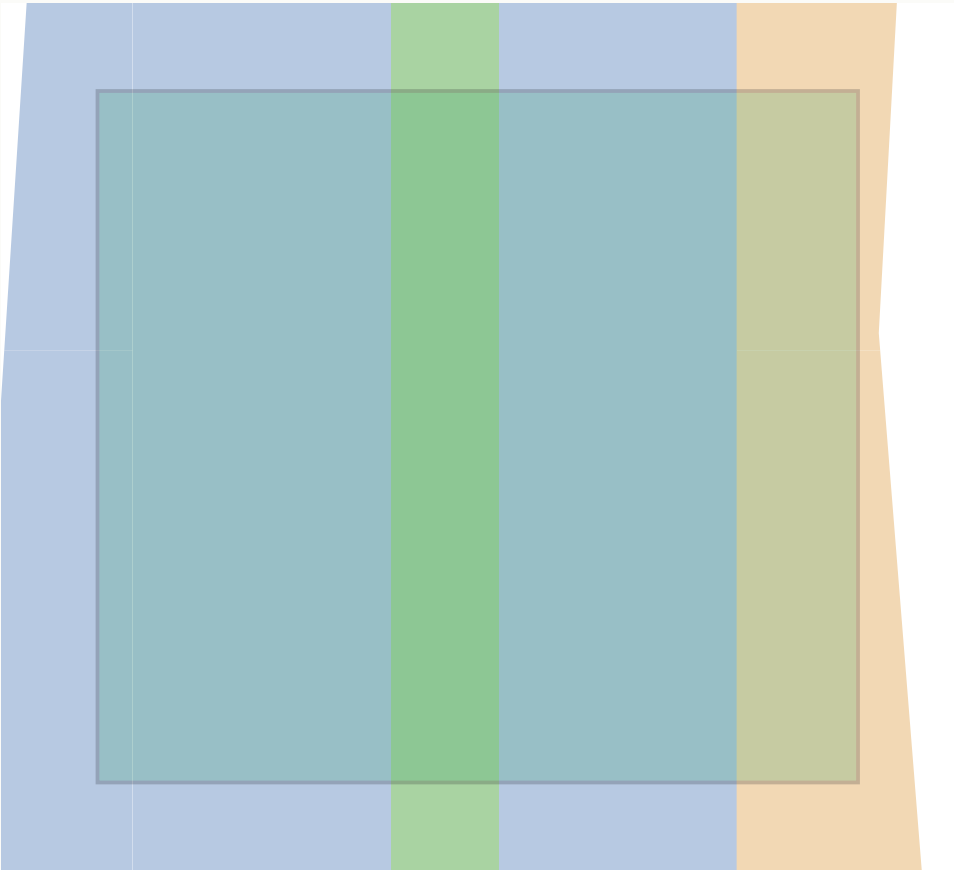

Boundary provisional (official_boundary=false); generation/discussion only

JINGZHANG BEACON

Zhongzhiyuan Validation Beacon (amber)

AI Origin Open-Source Beacon (green)

Dazhongsi Experience Beacon (blue)

- Zhongzhiyuan: three-tier gates, controlled labs, public audit desk, riverside lighthouse.
- AI Origin: open-source plaza, transfer street, campus stitching, origin stone.
- Dazhongsi: quadrant walkability, pitch lounge, signal bell.
- Identity by brand colours (amber/green/blue); live status colours follow audits.

Renewal project list (concept; no implementation commitment)

JZ-01 Spine slow-traffic gap stitching	near depends on: road redlines, under-bridge review
JZ-02 Zhongzhiyuan Qinghe low-carbon interface	near depends on: blue line, flood conditions
JZ-03 Origin campus transfer street	near depends on: campus boundary, ownership, ground floors
JZ-04 Dazhongsi four-quadrant walkability	mid depends on: station, junctions, utilities
JZ-05 Three beacon plazas	mid depends on: land permits, event safety, rights
JZ-06 AI public service and edge-compute nodes	mid depends on: energy, compute, safety, operator
JZ-07 Global AI Week public route	far depends on: public-space permits, event safety

- The three phases are three merge gates (data, ownership, assessment), not a timetable.
- Annual evaluation gives a framework only: scenarios open, pilot completion, appeal response, rollback rate, satisfaction sampling.

JINGZHANG BEACON

12 AI scenario cards (concept; 3 test/validation)

SC-01 Open-source release hall G	SC-02 Model eval & red-team sandbox A (test)
SC-03 Edge compute depot G/A	SC-04 AI slow-traffic navigation G
SC-05 Dazhongsi pitch lounge G	SC-06 Qinghe low-carbon corridor A
SC-07 Campus transfer street G	SC-08 Data-element lounge A
SC-09 AI living-service street G	SC-10 Global AI Week route G
SC-11 Full-stack controlled trial A (test)	SC-12 City-agent public audit desk A/R (test)

- 5 personas: developers, startups, corporates/visitors, residents, university members.
- Beacon Festival: spring open week, summer test season, autumn release week, winter governance review.
- Developer community: onboard -> transfer -> release -> on-time.
- International: state transparency as governance discourse; all funding/policy items are concepts.

JINGZHANG BEACON

- Site 1,141.3 ha | key areas 369.3 ha (announcement approx. 368.4 ha; recompute on official polygons)
- Green ratio 11.3% | public-space ratio 0.36% | building density 0.32 (EPSG:4548)
- compliance_matrix: all 23 announcement/taskbook requirements mapped.
- standard_matrix full; design_depth core items all complete.
- self_check: four gates PASS; formal-review-ready.
- Spatial review notes KEY_AREA_PROVISIONAL x3; full recalculation on official data.

- risk.json: eight dimensions; top risks policy uncertainty 4/5 and implementation complexity 4/5 (human review attached).
- Compliance in two columns: statutory requirements (within scope) vs self-set operational goals; Doc. 45/2020 is background_only.
- The 48 h fault drill is a designed script (not executed); no claim of completion.
- Copyright: sources and licences in sources.json and copyright_statement.md.
- Pending: official polygons, regulatory controls, redlines, ownership, heritage, municipal and operating baselines.
- No claim of official approval, approved controls, final ownership, scale or guaranteed implementation.
