

Xiaoyue River AI Scenario Wing - Concept Booklet (A3 Cover)

PROVISIONAL boundary, not an official redline, recalculate after official data

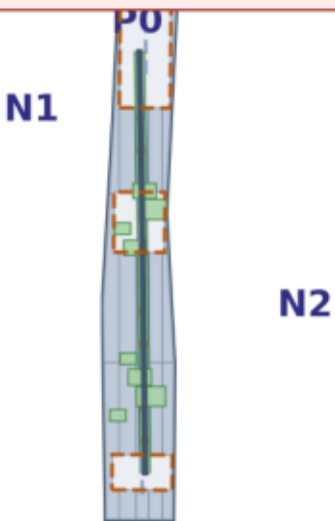

Key-area detailed design (P0 + N1/N2/N3)

PROVISIONAL boundary, not an official redline, recalculate after official data

Key areas: P0 + N1/N2/N3 experience nodes (provisional)

PROVISIONAL boundary, not an official redline, recalculate after official data

P0 Roadshow Plaza

Stage, lounge, terraces, waterfront
rest

N1 AI Science Station

Interactive devices and volunteer
guides

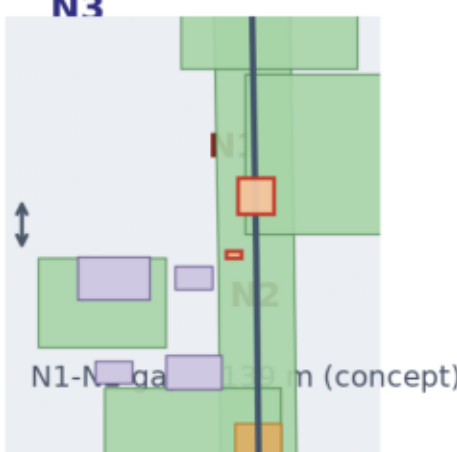

N2 Scenario Test Bench

Fast trials, aggregate feeds,
Assembly seat

N3 Community Co-Lab

Elder/child friendly, AI health
fallback

N1-N2 node cluster zoom (concept geometry)

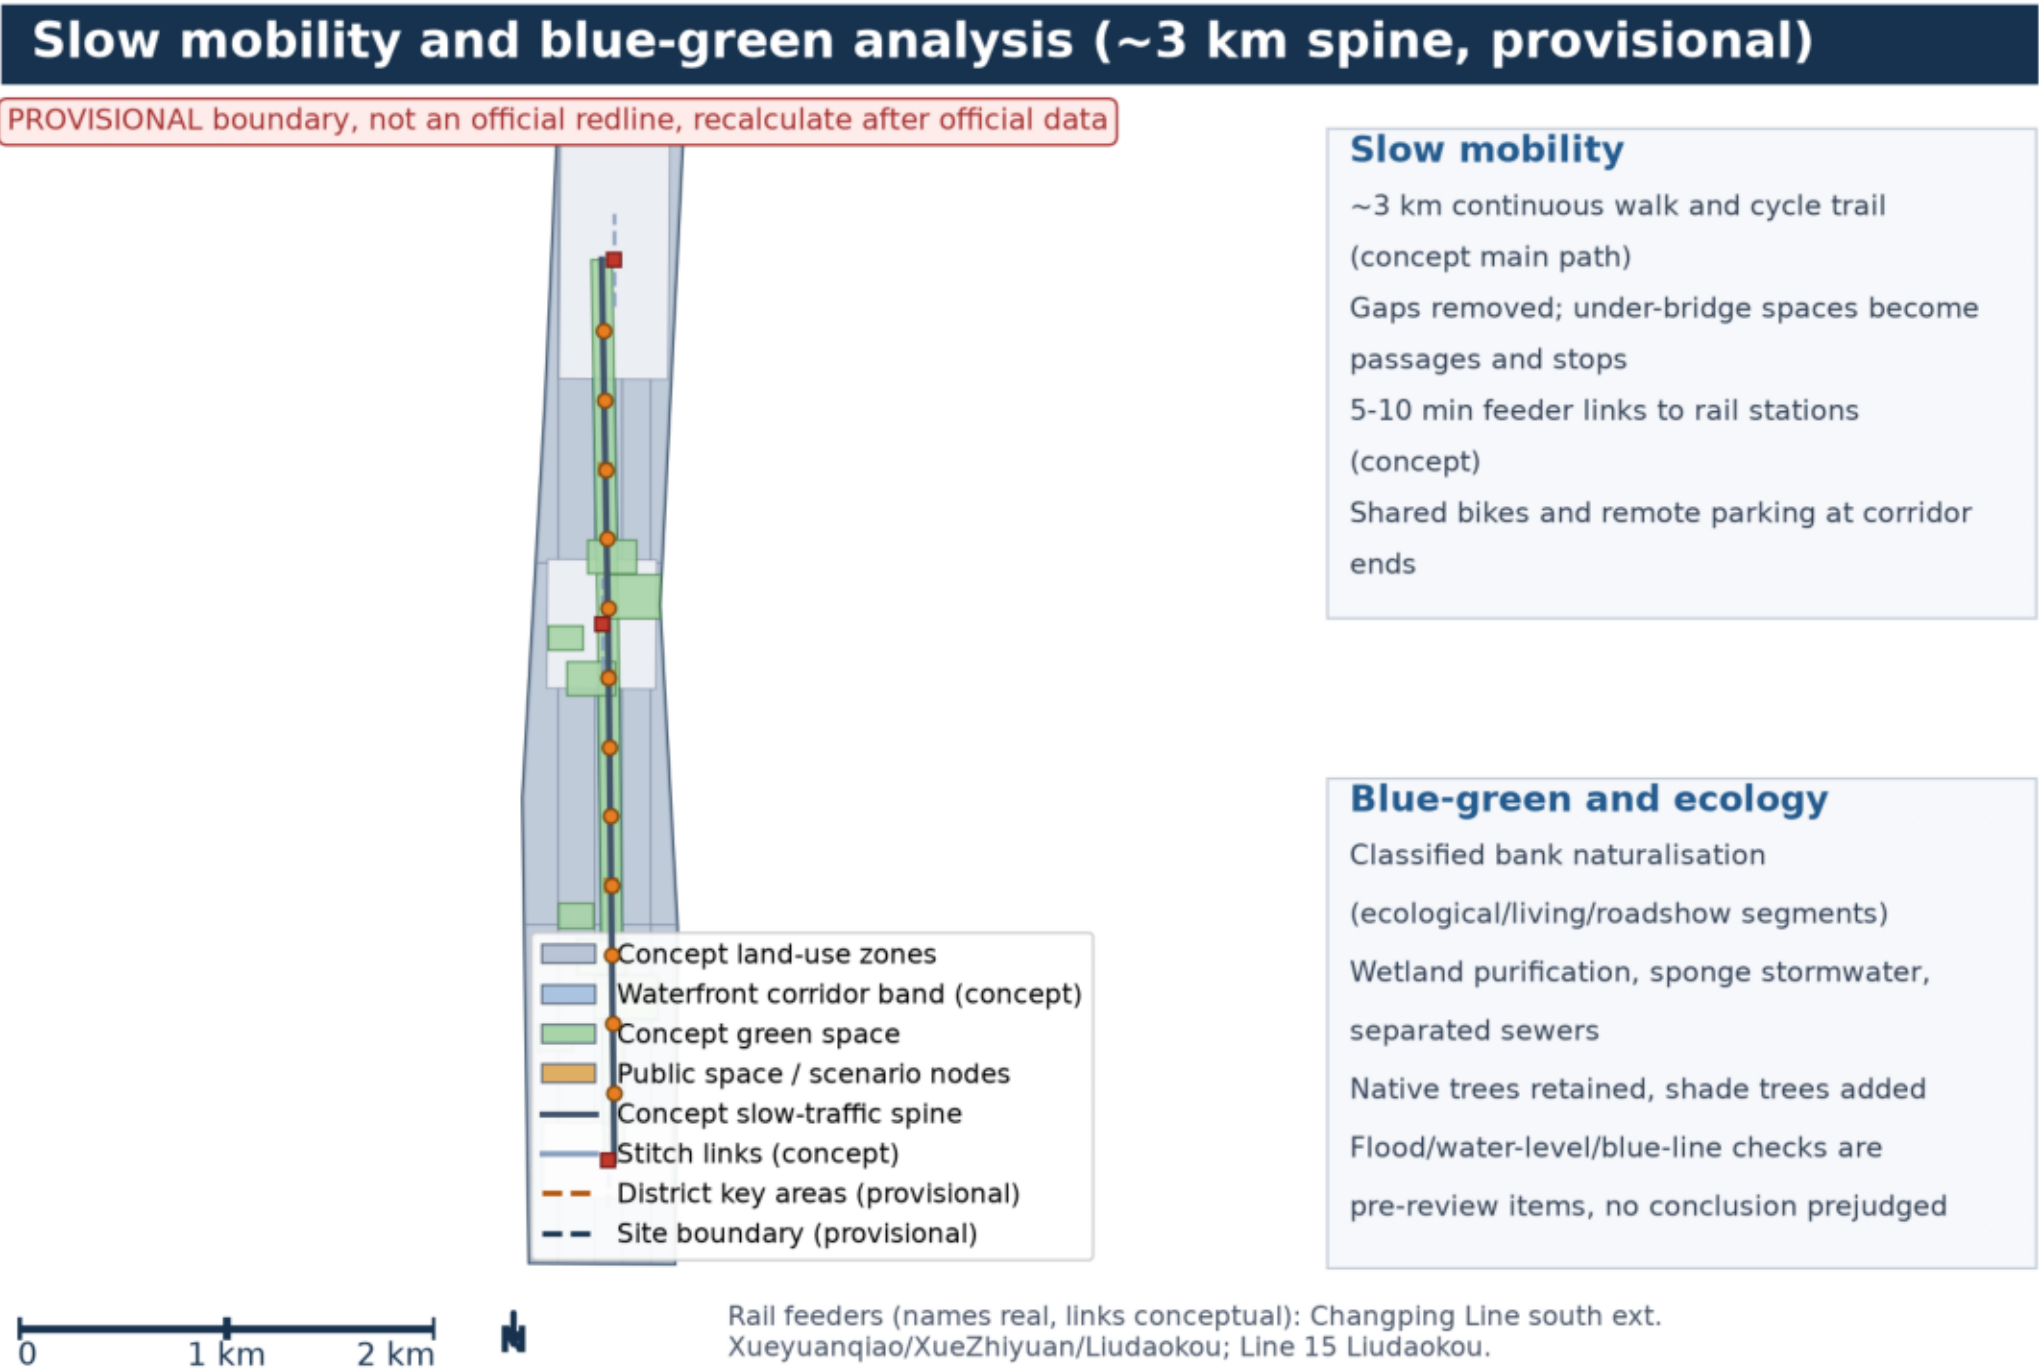

- Land-use zones
- Green space
- Slow-traffic spine
- Key areas
- Corridor band
- Public space
- Stitch links
- Site boundary

Note: N2 is a conceptual site (c.140 m from N1);
siting follows official geometry and pilot
review. District key areas: key_areas.geojson.

Slow mobility and blue-green analysis

PROVISIONAL boundary, not an official redline, recalculate after official data

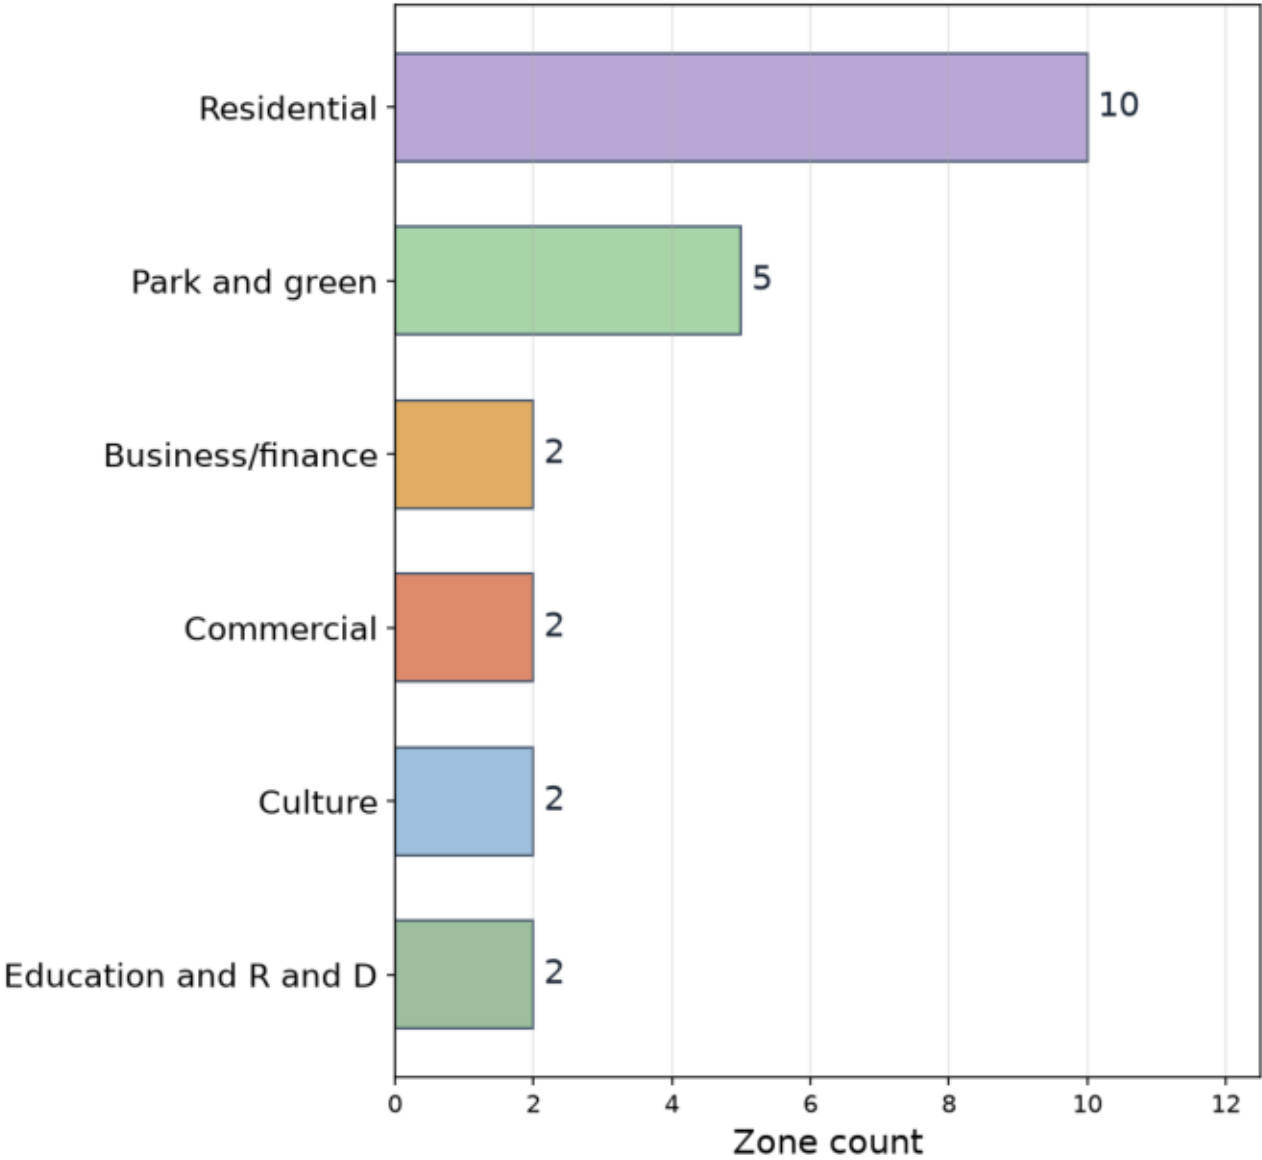

Concept land-use structure (23 zones)

PROVISIONAL boundary, not an official redline, recalculate after official data

Concept land use: 23 zones (land_use_zone_count=23)

PROVISIONAL boundary, not an official redline, recalculate after official data

Calibre note

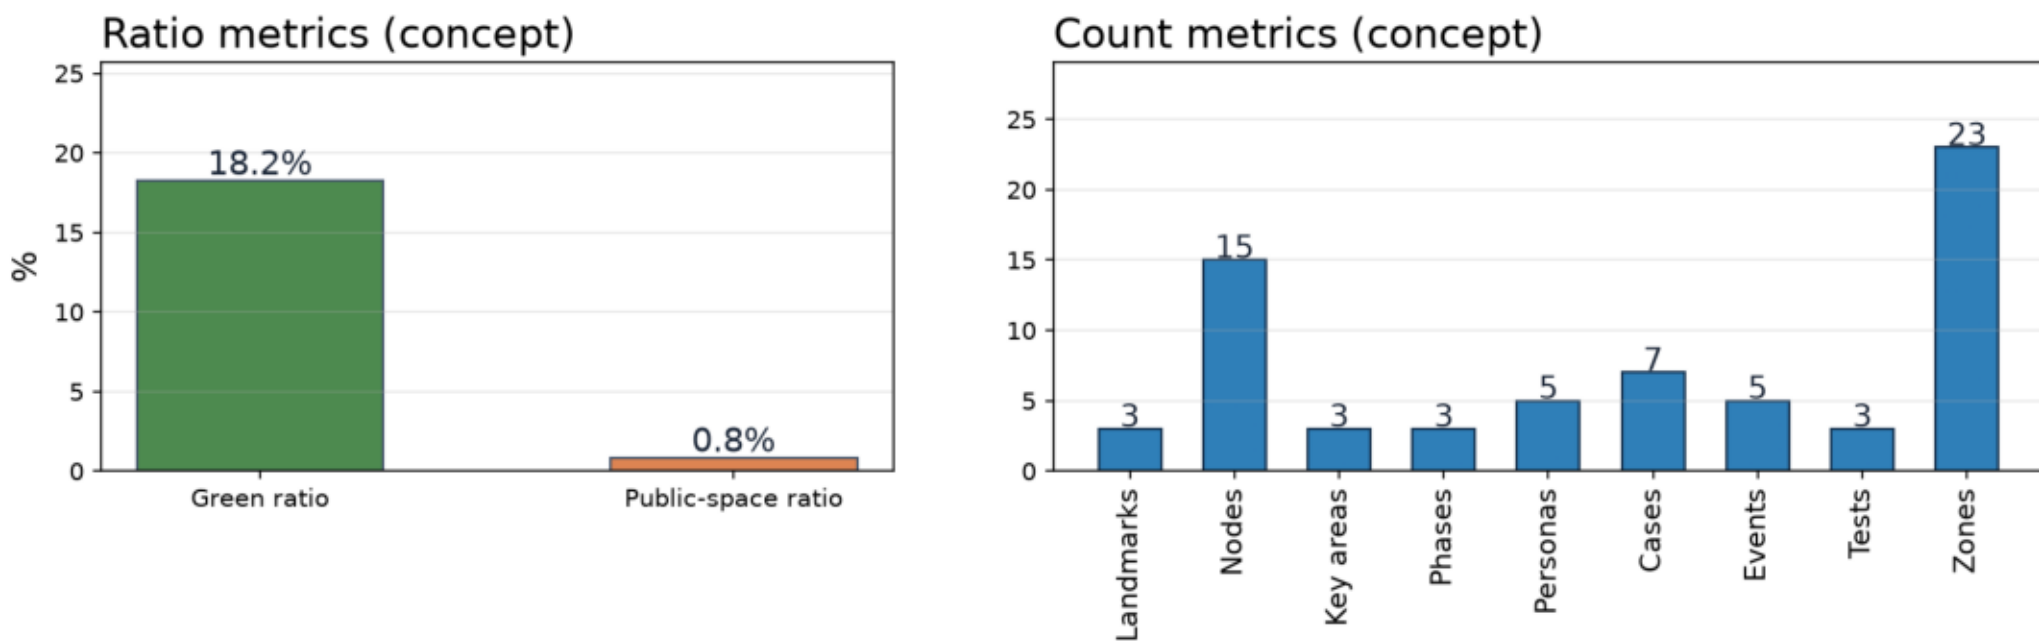

Zone counts from
land_use.geojson (EPSG:4548,
grouped by land-use code)
The three district key-area
overlays (LU-ZHON/BEIJ/DAZH)
are excluded from the count
Formula: counts per land-use
code; confidence: low
Use limit: concept display only,
no statutory land-use
conclusion
Recalculation trigger: official
land-use classification and
geometry
Retain-renovate-demolish:
retain first, renovate first,
demolish last

Core metric evidence (metrics.json)

PROVISIONAL boundary, not an official redline, recalculate after official data

Core metric evidence (metrics.json, concept-scale)

PROVISIONAL boundary, not an official redline, recalculate after official data

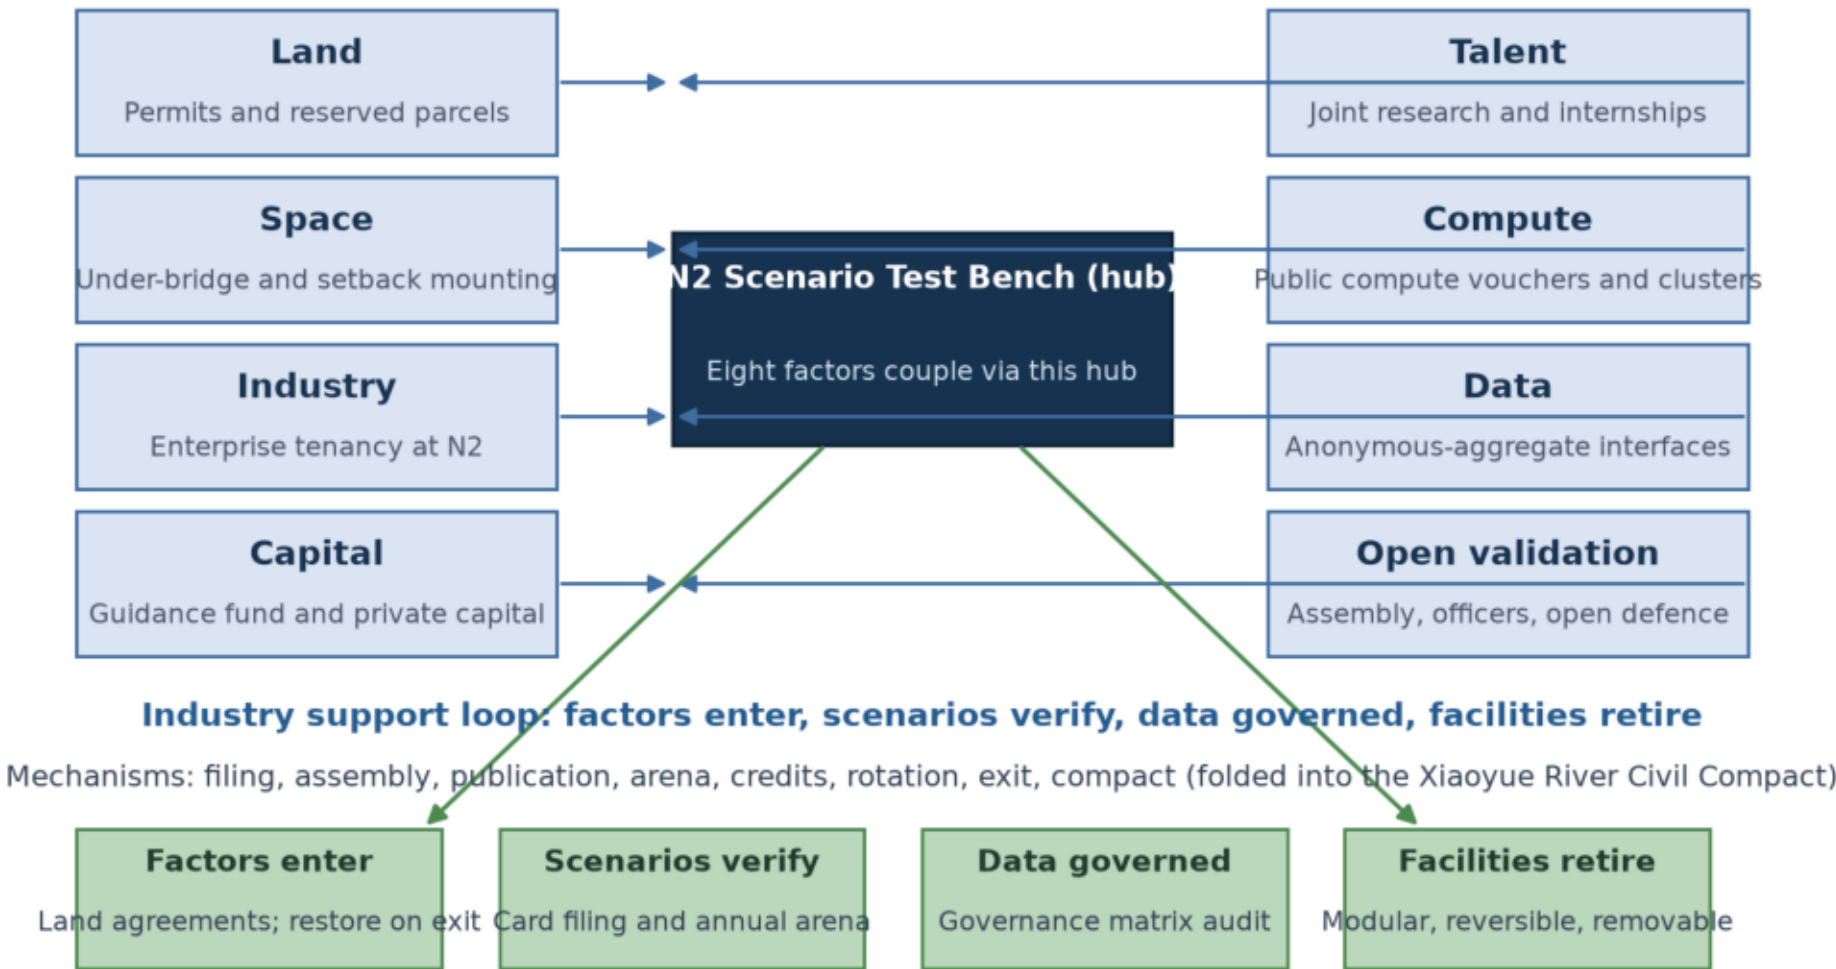

Per-metric calibre, source, formula, confidence, trigger
Calibre (consistent with metrics.json; shown rounded):
Green ratio = concept green area / site area (EPSG:4548) c.18.2%; public-space ratio c.0.8%
Counts: landmarks 3 / scenario nodes 15 / key areas 3 / phases 3 / personas 5 / cases 7 / events 5 / tests 3 / zones 23
Confidence: ratios low (concept geometry); counts high (layers and text counts)
Recalculation trigger: after official boundary, land-use, public-space and rail data release
Use limit: concept display and review; not a budget or engineering-feasibility basis

Ecosystem and factor mechanism map (concept)

PROVISIONAL boundary, not an official redline, recalculate after official data

Ecosystem and factor mechanism map (eight factors, concept)

PROVISIONAL boundary, not an official redline, recalculate after official data

Note: mechanisms and responsible bodies are concept suggestions only; no factor-supply commitment; this diagram replaces no statutory or engineering document.

One-Belt coordination and Three Zones Two Wings loops (concept): three zones + two wings (Zhongguancun Technology Service Wing / Xiaoyue River AI Scenario Wing) + Jingzhang Heritage Vitality Belt as culture-space connector (not one of the wings).

Concept level - COMMON DISPLAY ONLY - not statutory approval - Recalculated after official data
