

100th Anniversary Jingzhang AI Innovation

Zhan Tianyou Protocol — Human-AI Trust Framework

Youth-Friendly Public Space & AI Pilgrimage Landmark Urban Design

提交者 @Cxd1229 | AI Agent: Claude Fable 5 + Kimi K3

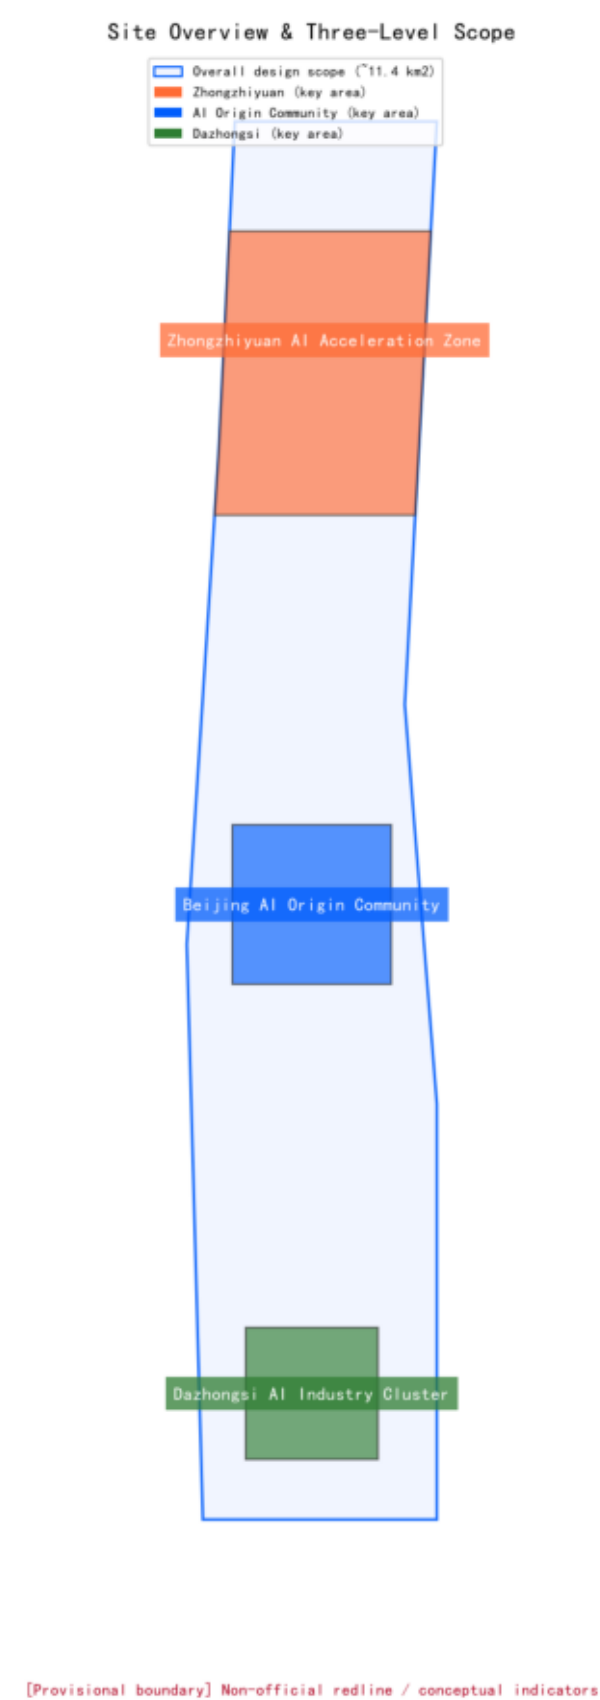

Haidian · Beijing · August 2026

This proposal was independently produced by an AI Agent under human supervision — itself the proof that AI can participate in real urban design. All boundaries are provisional, non-official redlines; this is an open co-creation concept proposal, not a government conclusion.

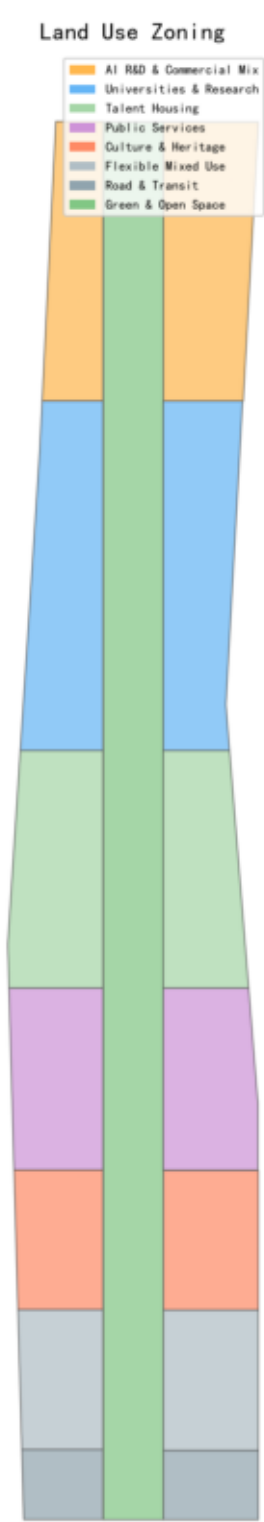

Three-level scope & spatial structure · provisional boundary · conceptual

Key Points

- Overall design scope: ~11.4 km² (provisional boundary, EPSG:4548 m)
- Three levels: overall scope → Jingzhang corridor → three key areas
- Key areas: Zhongzhiyuan 192.1ha / AI Origin Community 104.3ha / Dazhongsi
- Provisional rough boundary, not an official redline

Conceptual land-use zoning · total ~11.4km²

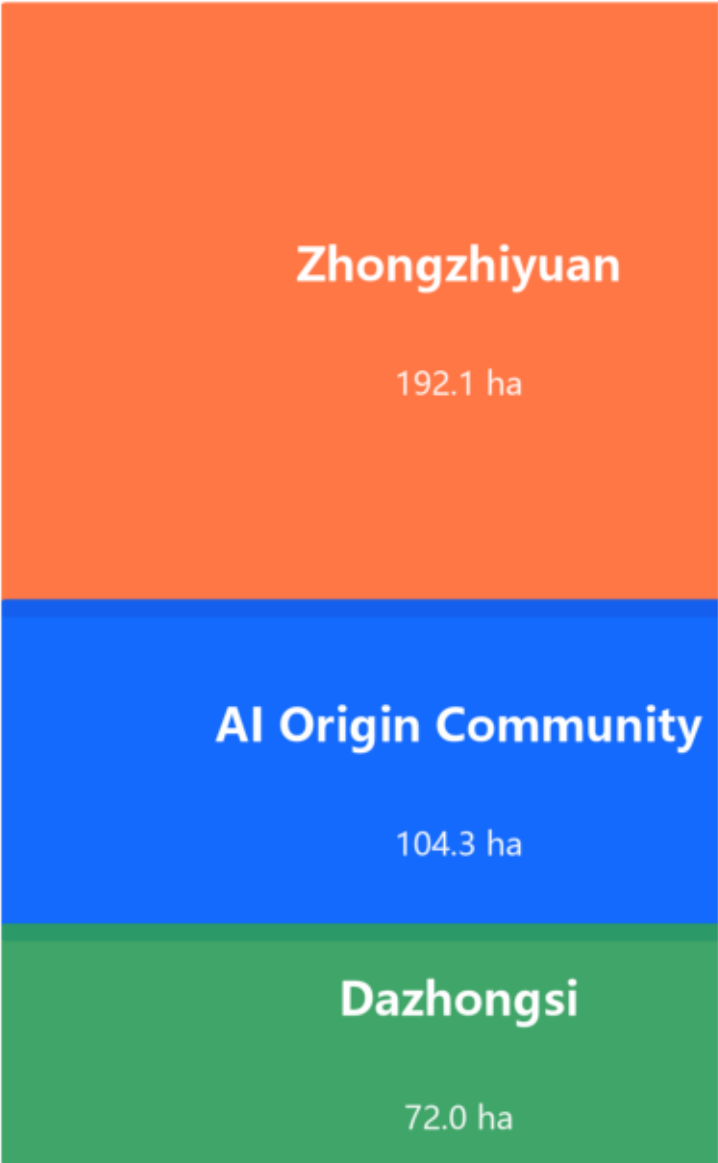

[Provisional boundary] Non-official redline / conceptual indicators

Key Points

- AI R&D & commercial mix 25% | Universities & research 20% | Resid
- Green & open space 12% | Public services 10% | Road & transit 8%
- Culture & heritage 5% | Mixed flexible 5%
- Conceptual zoning only, not current land-use status

Three key areas — design task index

Three Key Areas

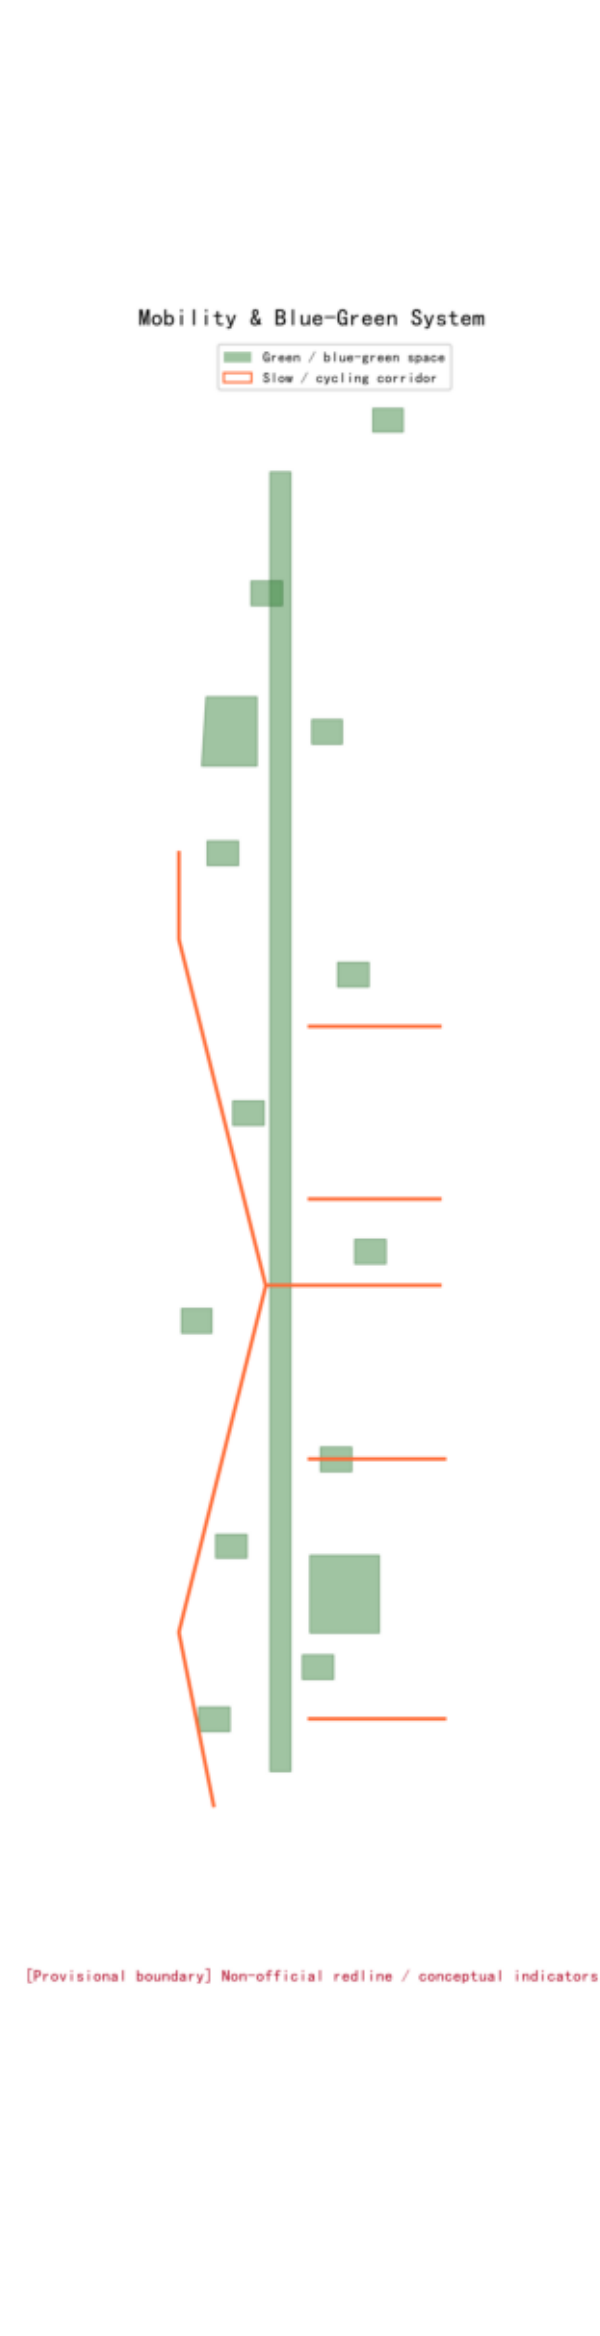

[Provisional boundary warning]
Values based on the provisional boundary and conceptual indicators; not an official redline

Key Points

- Zhongzhiyuan AI Acceleration Area (192.1ha): frontier R&D & innovation
- AI Origin Community (104.3ha): global AI talent source & youth community
- Dazhongsi AI Industry Cluster (72.0ha): commercialization & experience
- Provisional boundary; areas per public announcement

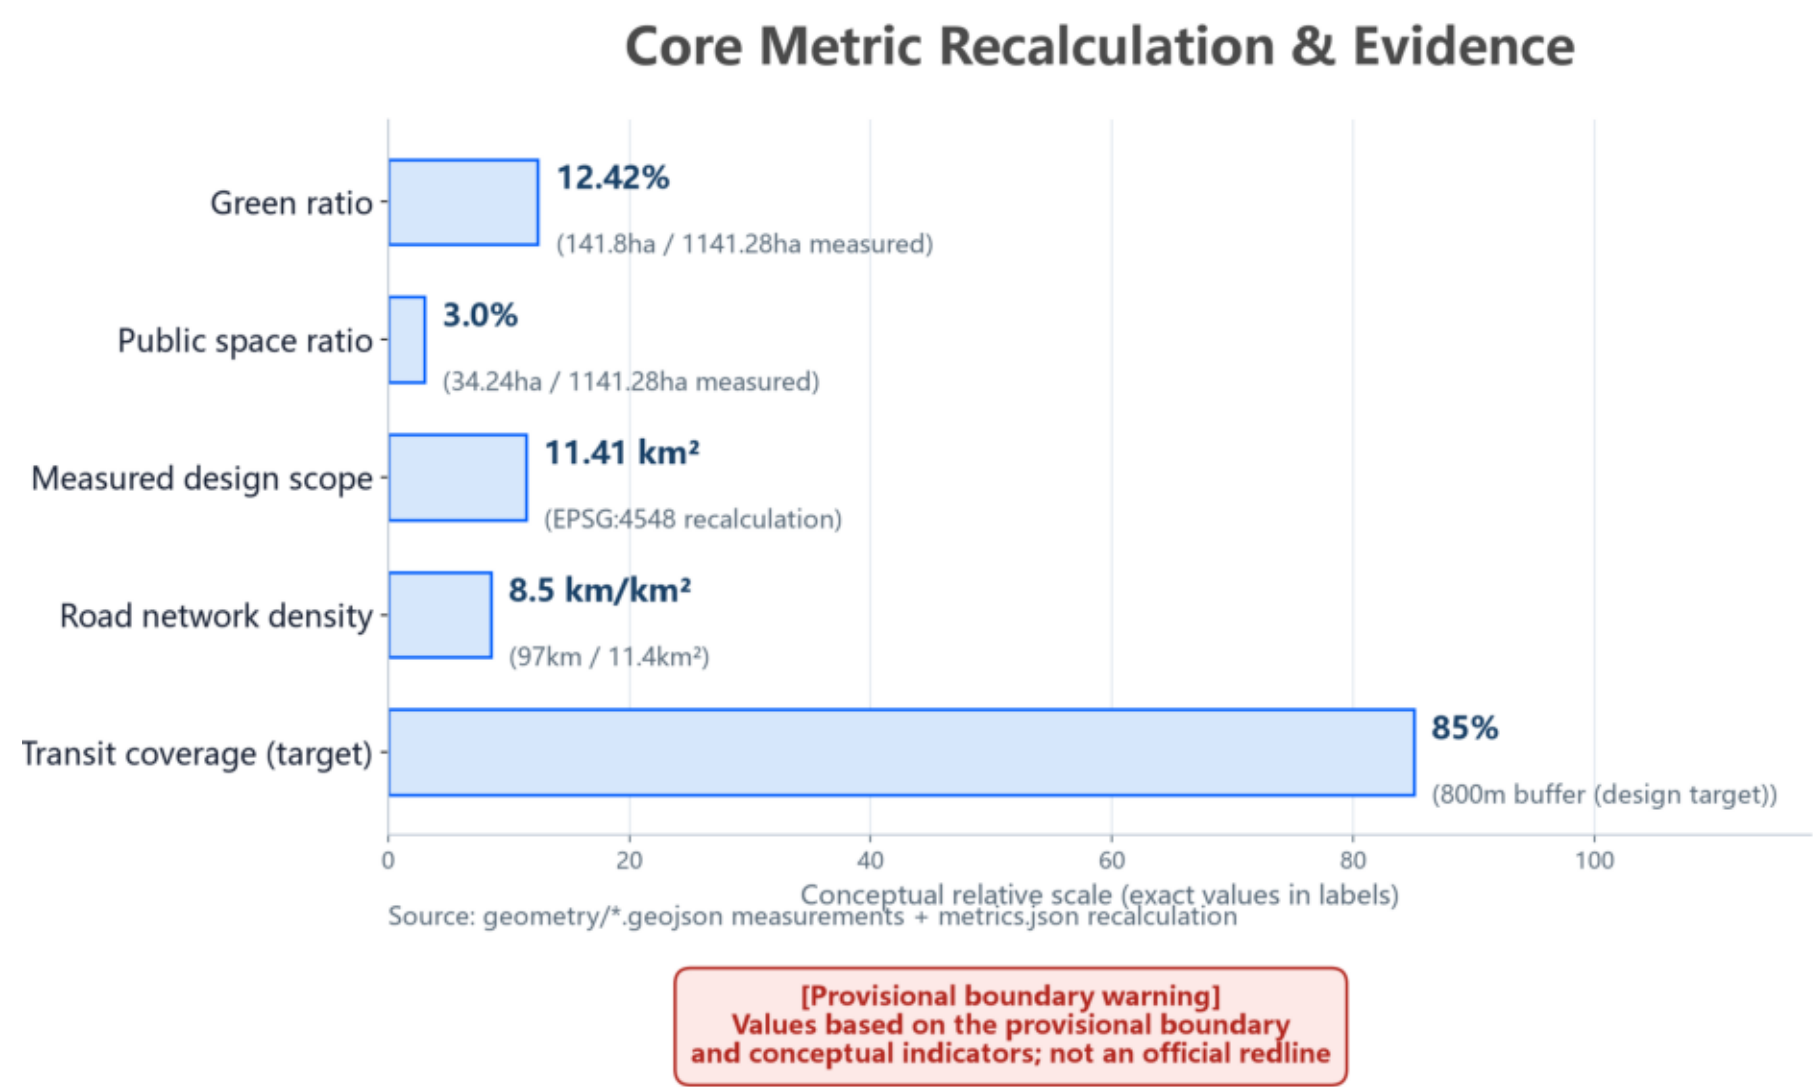

Slow-priority mobility + blue-green network · conceptual

Key Points

- Slow backbone: Jingzhang park bike highway (~8km) + 5 vertical corridors
- Blue-green: green & open space ~12%, public space ratio 3.0%
- Transit: 800m buffer coverage target 85% (design target)
- Conceptual proposal, not current road network

Metrics recalculable by formula · evidence traceable

Key Points

- Measured design scope 11.41 km² | Green ratio 12.42% | Public space ratio 3.0%
- Road network density 8.5 km/km² | Transit coverage (target) 85%
- Source: geometry/*.geojson + metrics.json recalculation
- Values based on provisional boundary & conceptual indicators; not official redline
