

# CHAINSCAPE VALLEY: Zhongzhiyuan AI Autonomous Innovation Accelerator (concept)

BOOK 1/2

EPT BOUNDARY - NOT AN OFFICIAL REDLINE - RECOMPUT

## 1. Overall design and key areas (concept)

Three-tier official scope (text basis): coordinated research 43.6 km2 / overall design 11.4 km2 / key areas 368.4 ha total.  
This package deepens: Zhongzhiyuan AI Autonomous Innovation Accelerator (~192 ha).

Concept structure: one belt, two chains, three nodes - Chain Harbor Flagship Park, Star-Track Co-creation Community, Compute-Pivot Chain Station.

All locations are conceptual and subject to ownership coordination and professional review.

## Overall Design Overview (provisional geometry - concept)

Jingzhang Railway Heritage Park vitality belt (concept)

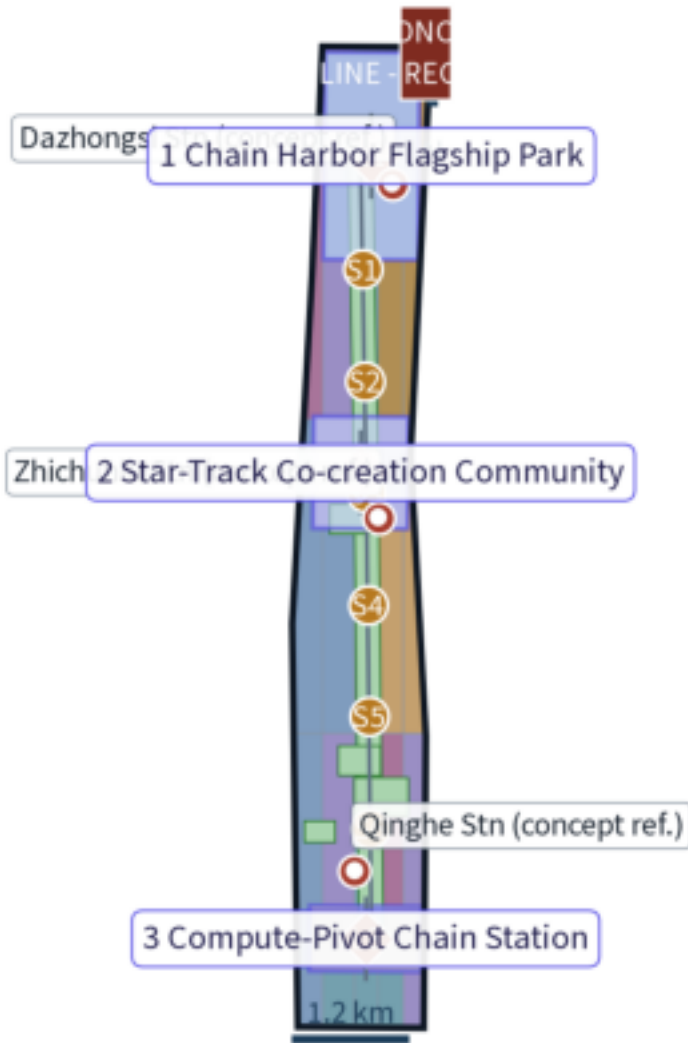

Dazhongsì Stn (concept ref.)

Zhichunlu Stn (concept ref.)

Xiaoyue River  
(concept ref.)

### Key Areas Detailed Design Index (concept locations)

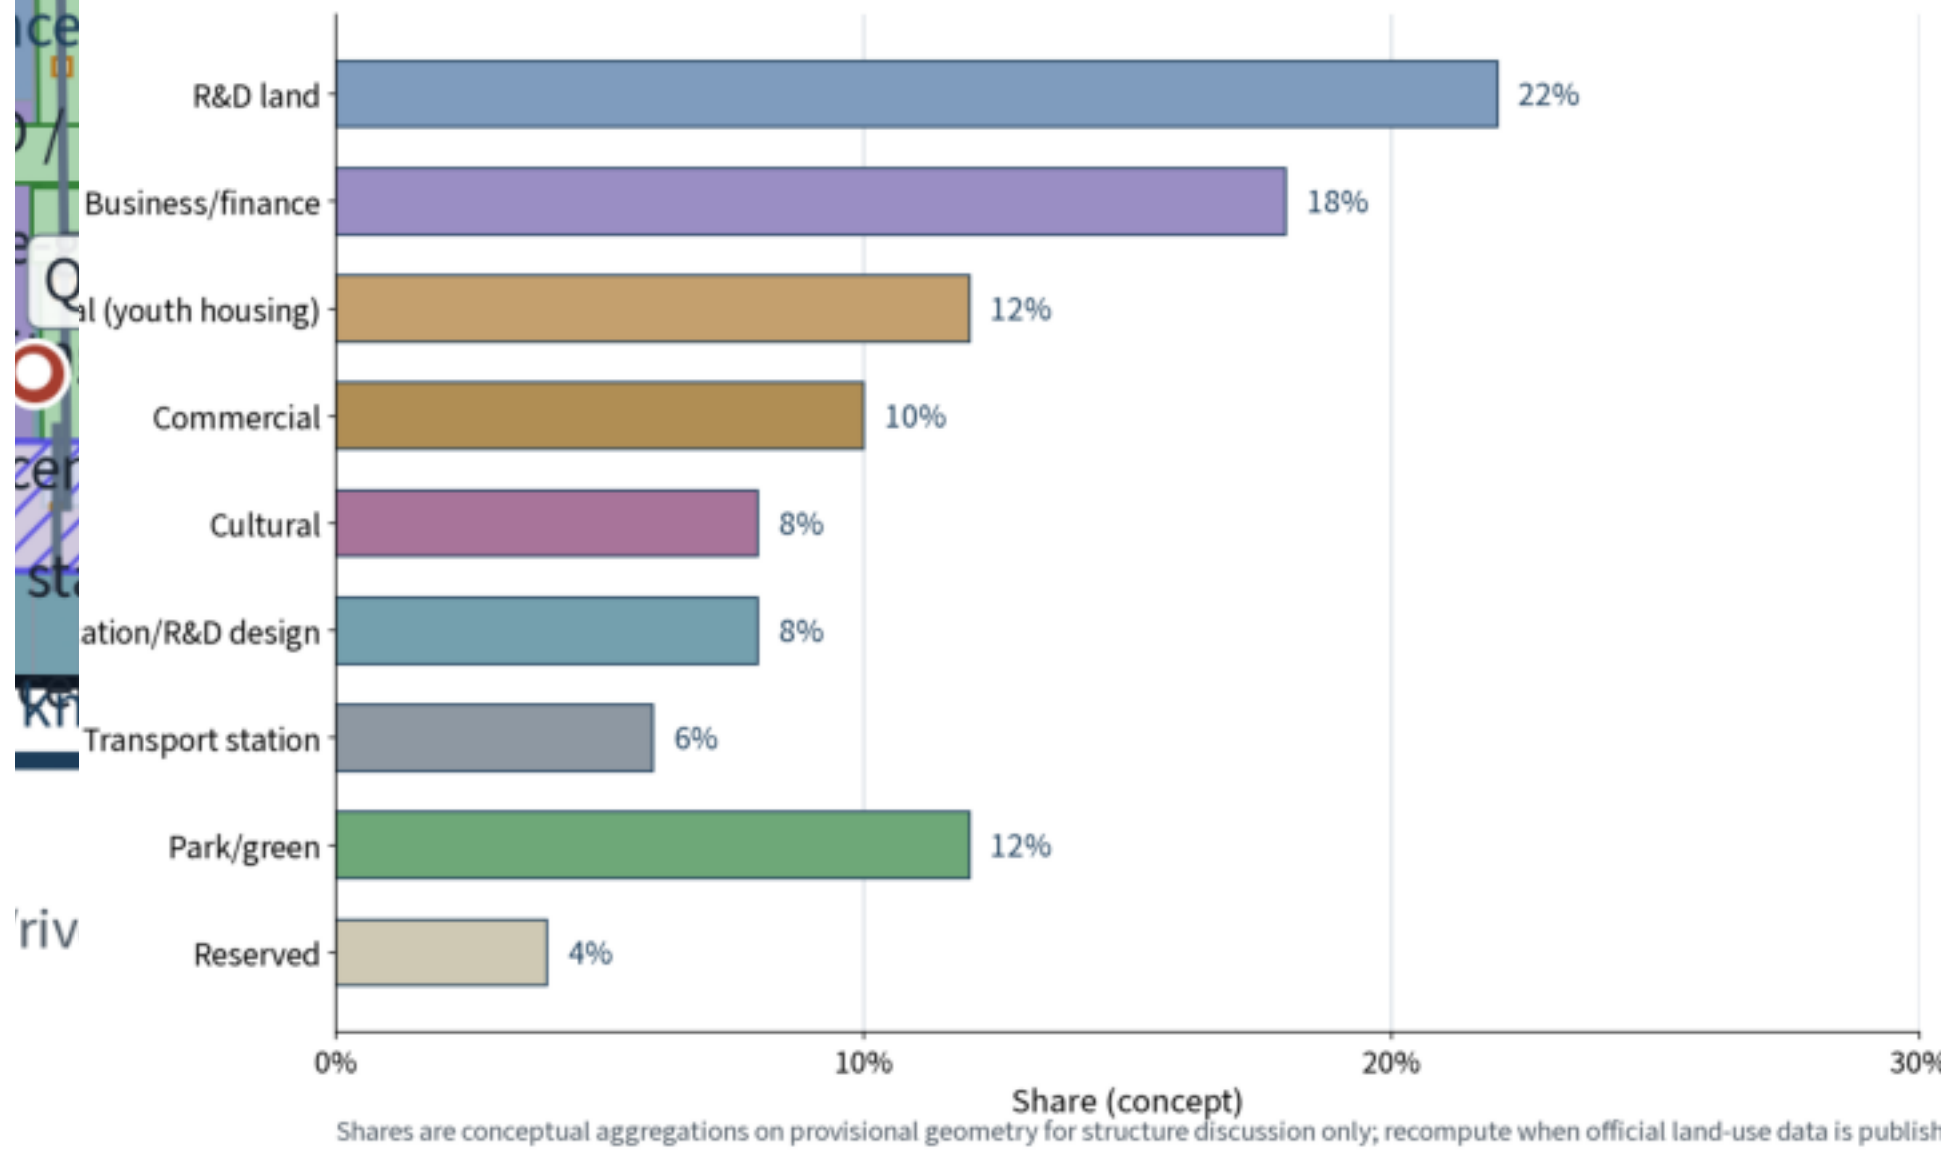

Node - function - operation mapping - scenario IDs

L1-L3 original concept nodes; S1-S6 AI scenario node IDs. All locations require ownership coordination and professional review.

### Land Use Structure (concept shares - not official)

Retain-renovate first - incremental excellence

EPT BOUNDARY - NOT AN OFFICIAL REDLINE - RECOMPUT

2. Ecosystem, metrics and operation (concept)

Full-stack AI ecosystem: foundation models - compute - data - industry applications, plus five services: acceleration, public evaluation, investment match, open pilot, AI training.

Governance baseline: anonymized aggregation only, human review of key decisions, no excessive monitoring.

Metrics: recomputed from provisional geometry at reduced precision; full recomputation when official data is published.

Mobility, Rail Connection and Blue-Green Analysis (concept)
