

Overall Design Overview (provisional geometry - concept)

Jingzhang Railway Heritage Park vitality belt (concept)

CHAINSCAPE VALLEY - CONCEPT BOOKLET (provisional)

Zhongzhiyuan AI Autonomous Innovation Accelerator

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL REDLINE - RECOMPUTE ON OFFICIAL DATA

Dazhongsi Stn (concept ref.)

Xiaoyue River
(concept ref.)

Legend (concept)

R&D / industry parcels

Blue space

Heritage park belt

AI scenario nodes

Rail station (concept ref.)

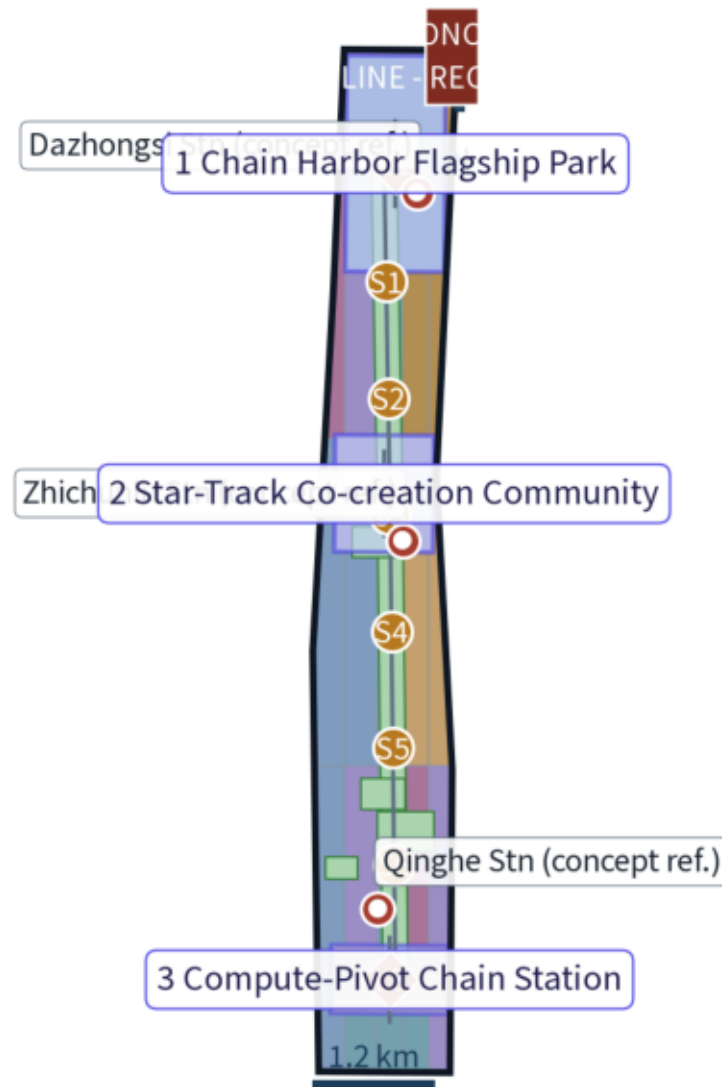

Concept slow-traffic spine

1.2 km

Geometry: package geometry layers (provisional); stations/river are public place-name references, not official boundaries.

Key Areas Detailed Design Index (concept locations)

Node - function - operation mapping - scenario IDs

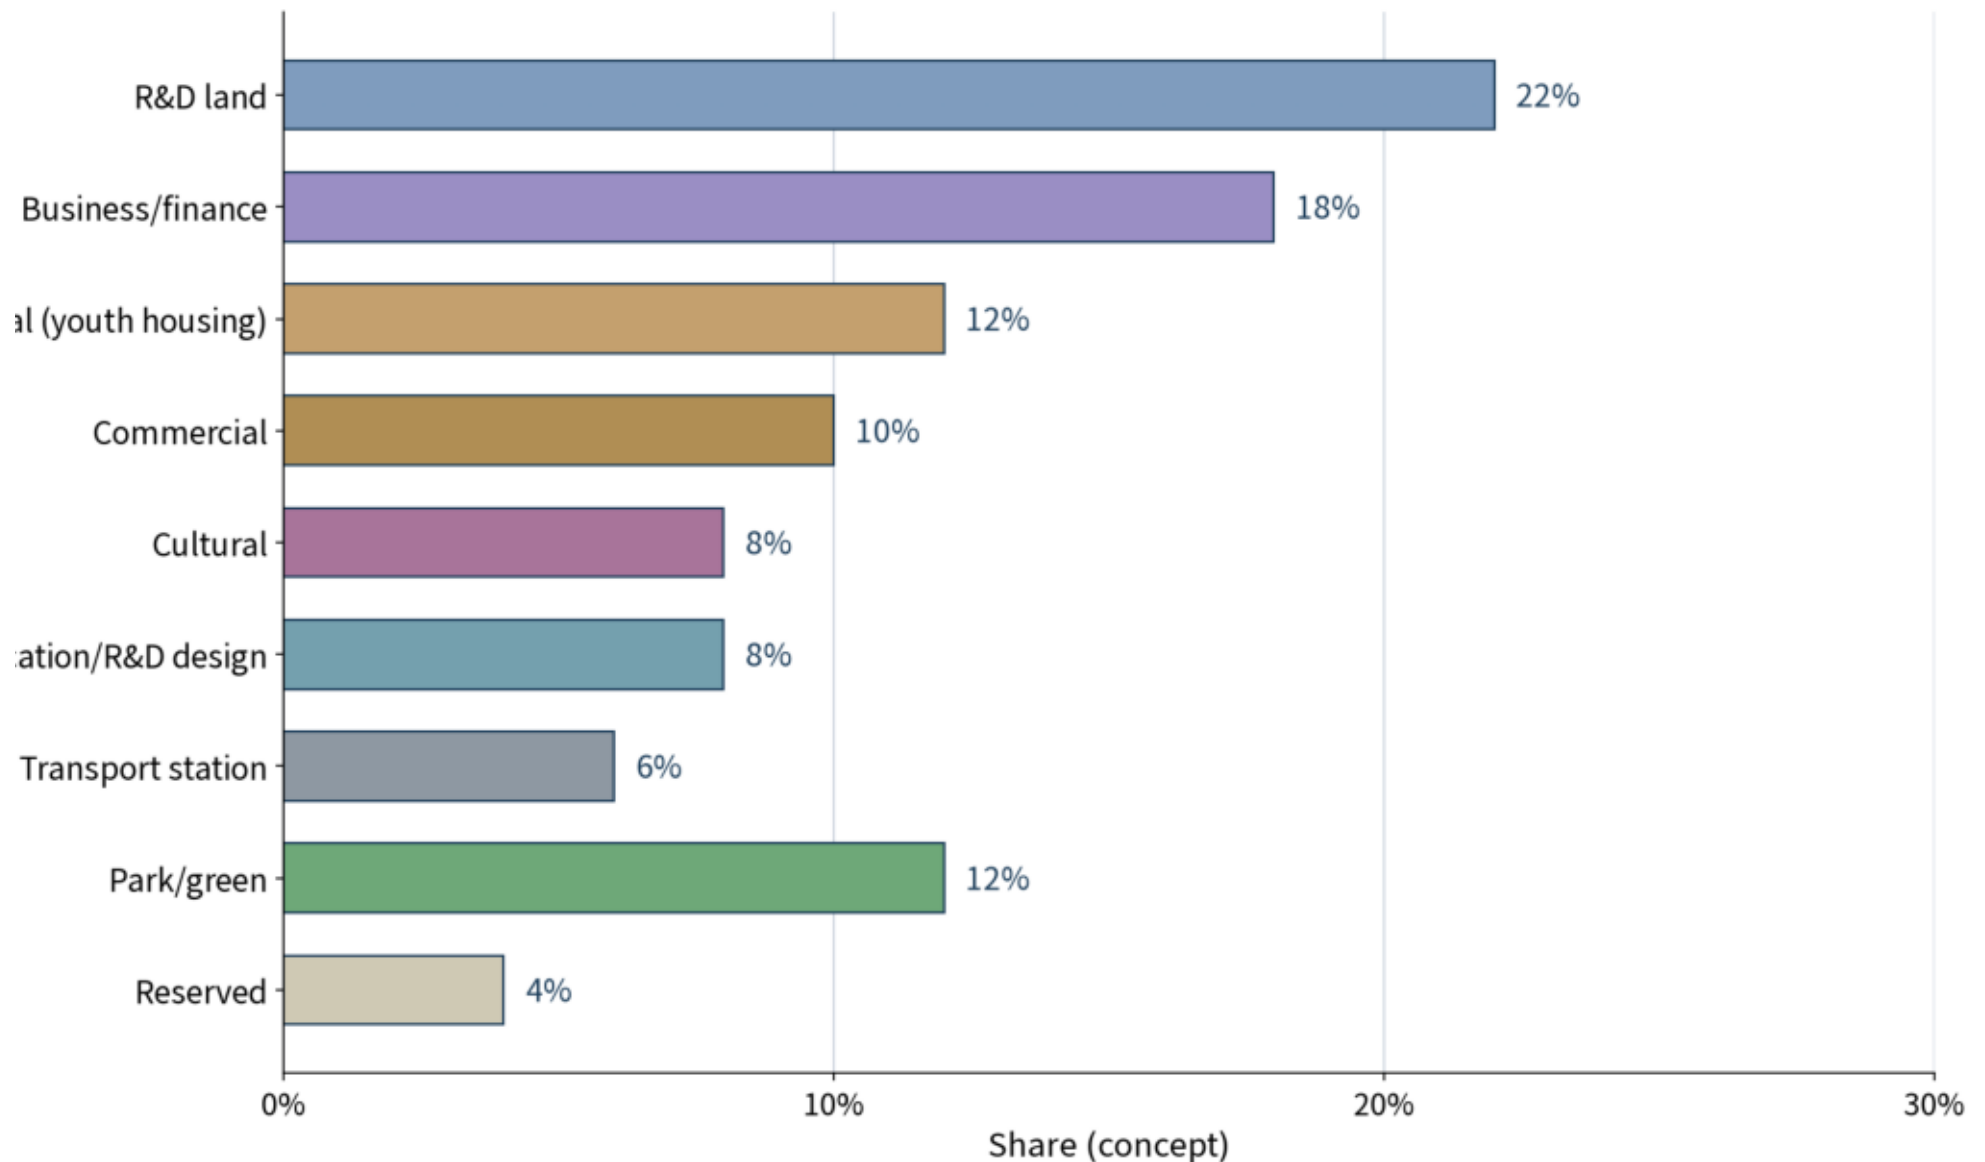

L1-L3 original concept nodes; S1-S6 AI scenario node IDs. All locations require ownership coordination and professional review.

Land Use Structure (concept shares - not official)

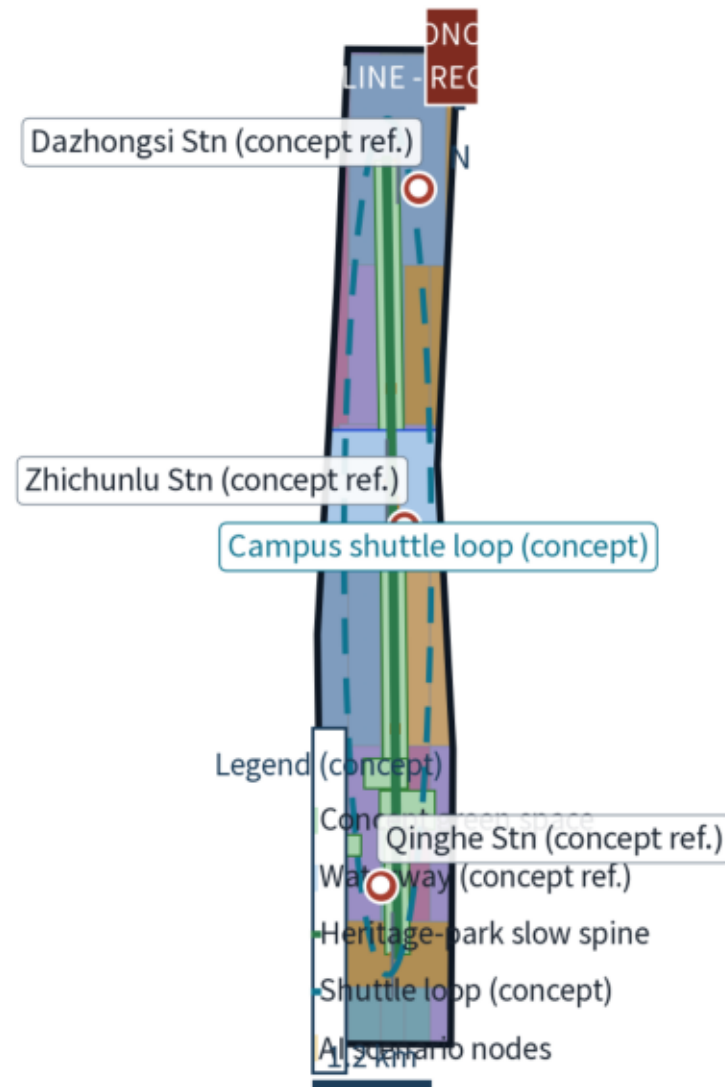

Retain-renovate first - incremental excellence

PROVISIONAL

Shares are conceptual aggregations on provisional geometry for structure discussion only; recompute when official land-use data is published.

Mobility, Rail Connection and Blue-Green Analysis (concept)

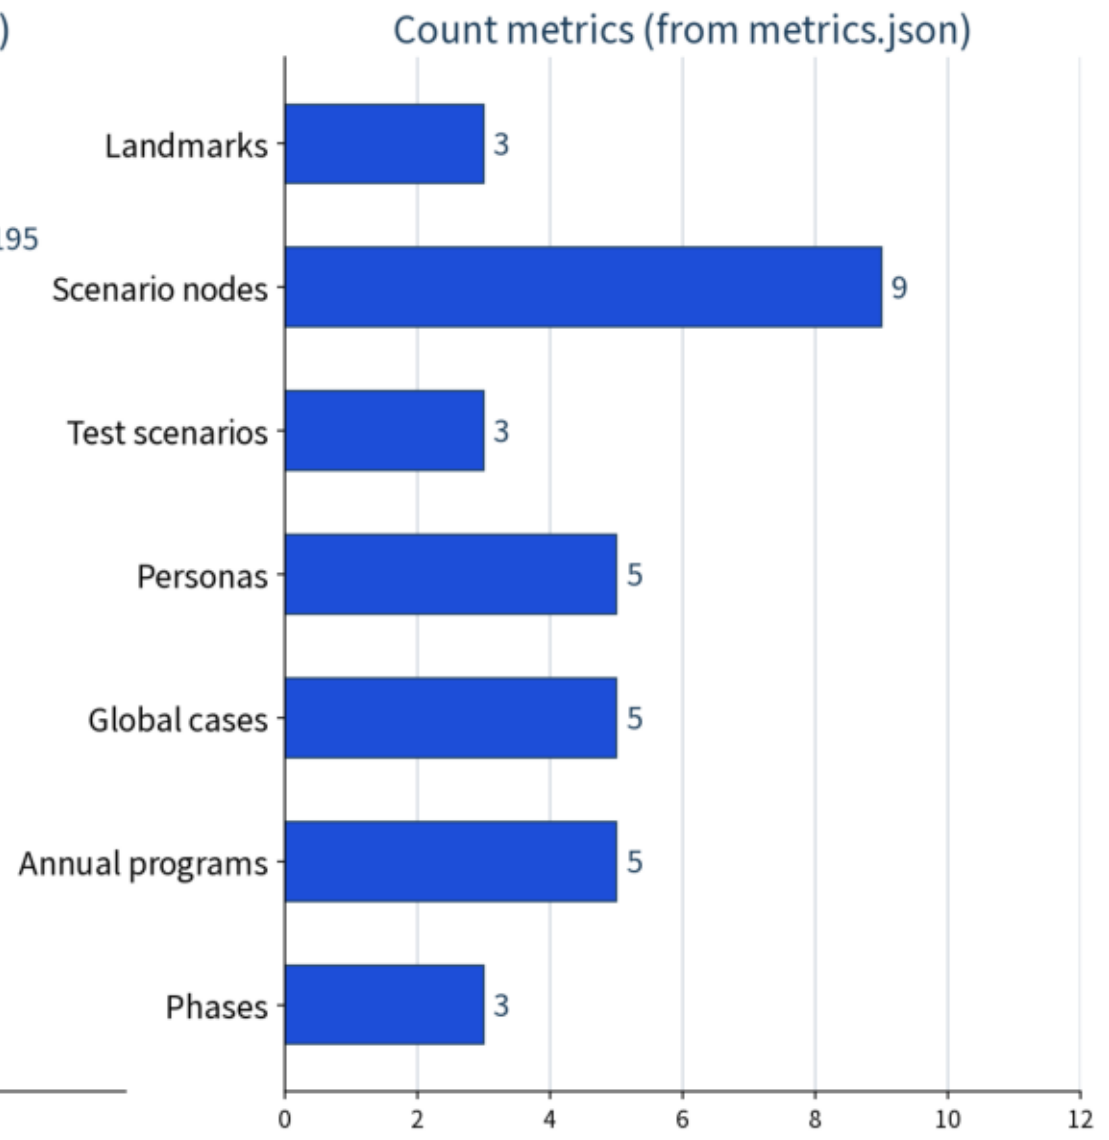

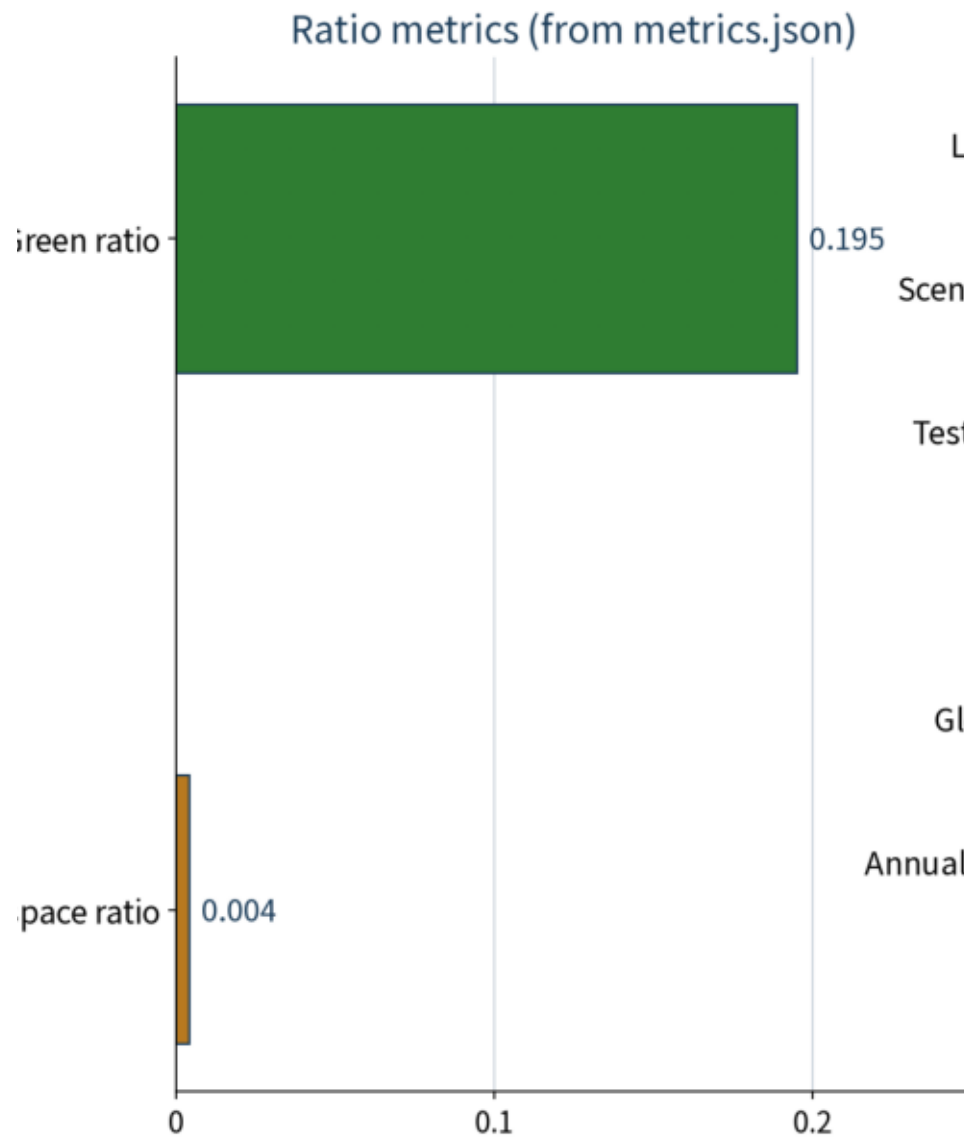

Shuttle routes/station locations are conceptual; alignment requires verification against rail protection zones; low-altitude and shuttle approvals pending.

Key Metric Evidence (provisional - reduced precision)

Ratios and counts shown separately

PROVISIONAL

Values recomputed from provisional geometry and displayed at reduced precision (≤ 3 significant digits); recompute on official data.

AI Full-Stack Innovation Ecosystem Map (concept)

Four-chain innovation - five services - three nodes

PROVISIONAL

Governance base: anonymized aggregation - human review - filing & disclosure - no excessive monitoring

Chain innovation spine

Flagship - co-creation - foundation: full-stack acceleration chain

Ecosystem map is a conceptual organization mapped to 5 services, 3 nodes and 12 scenario cards; not an official structure of any institution.
