

A0 boards - overview

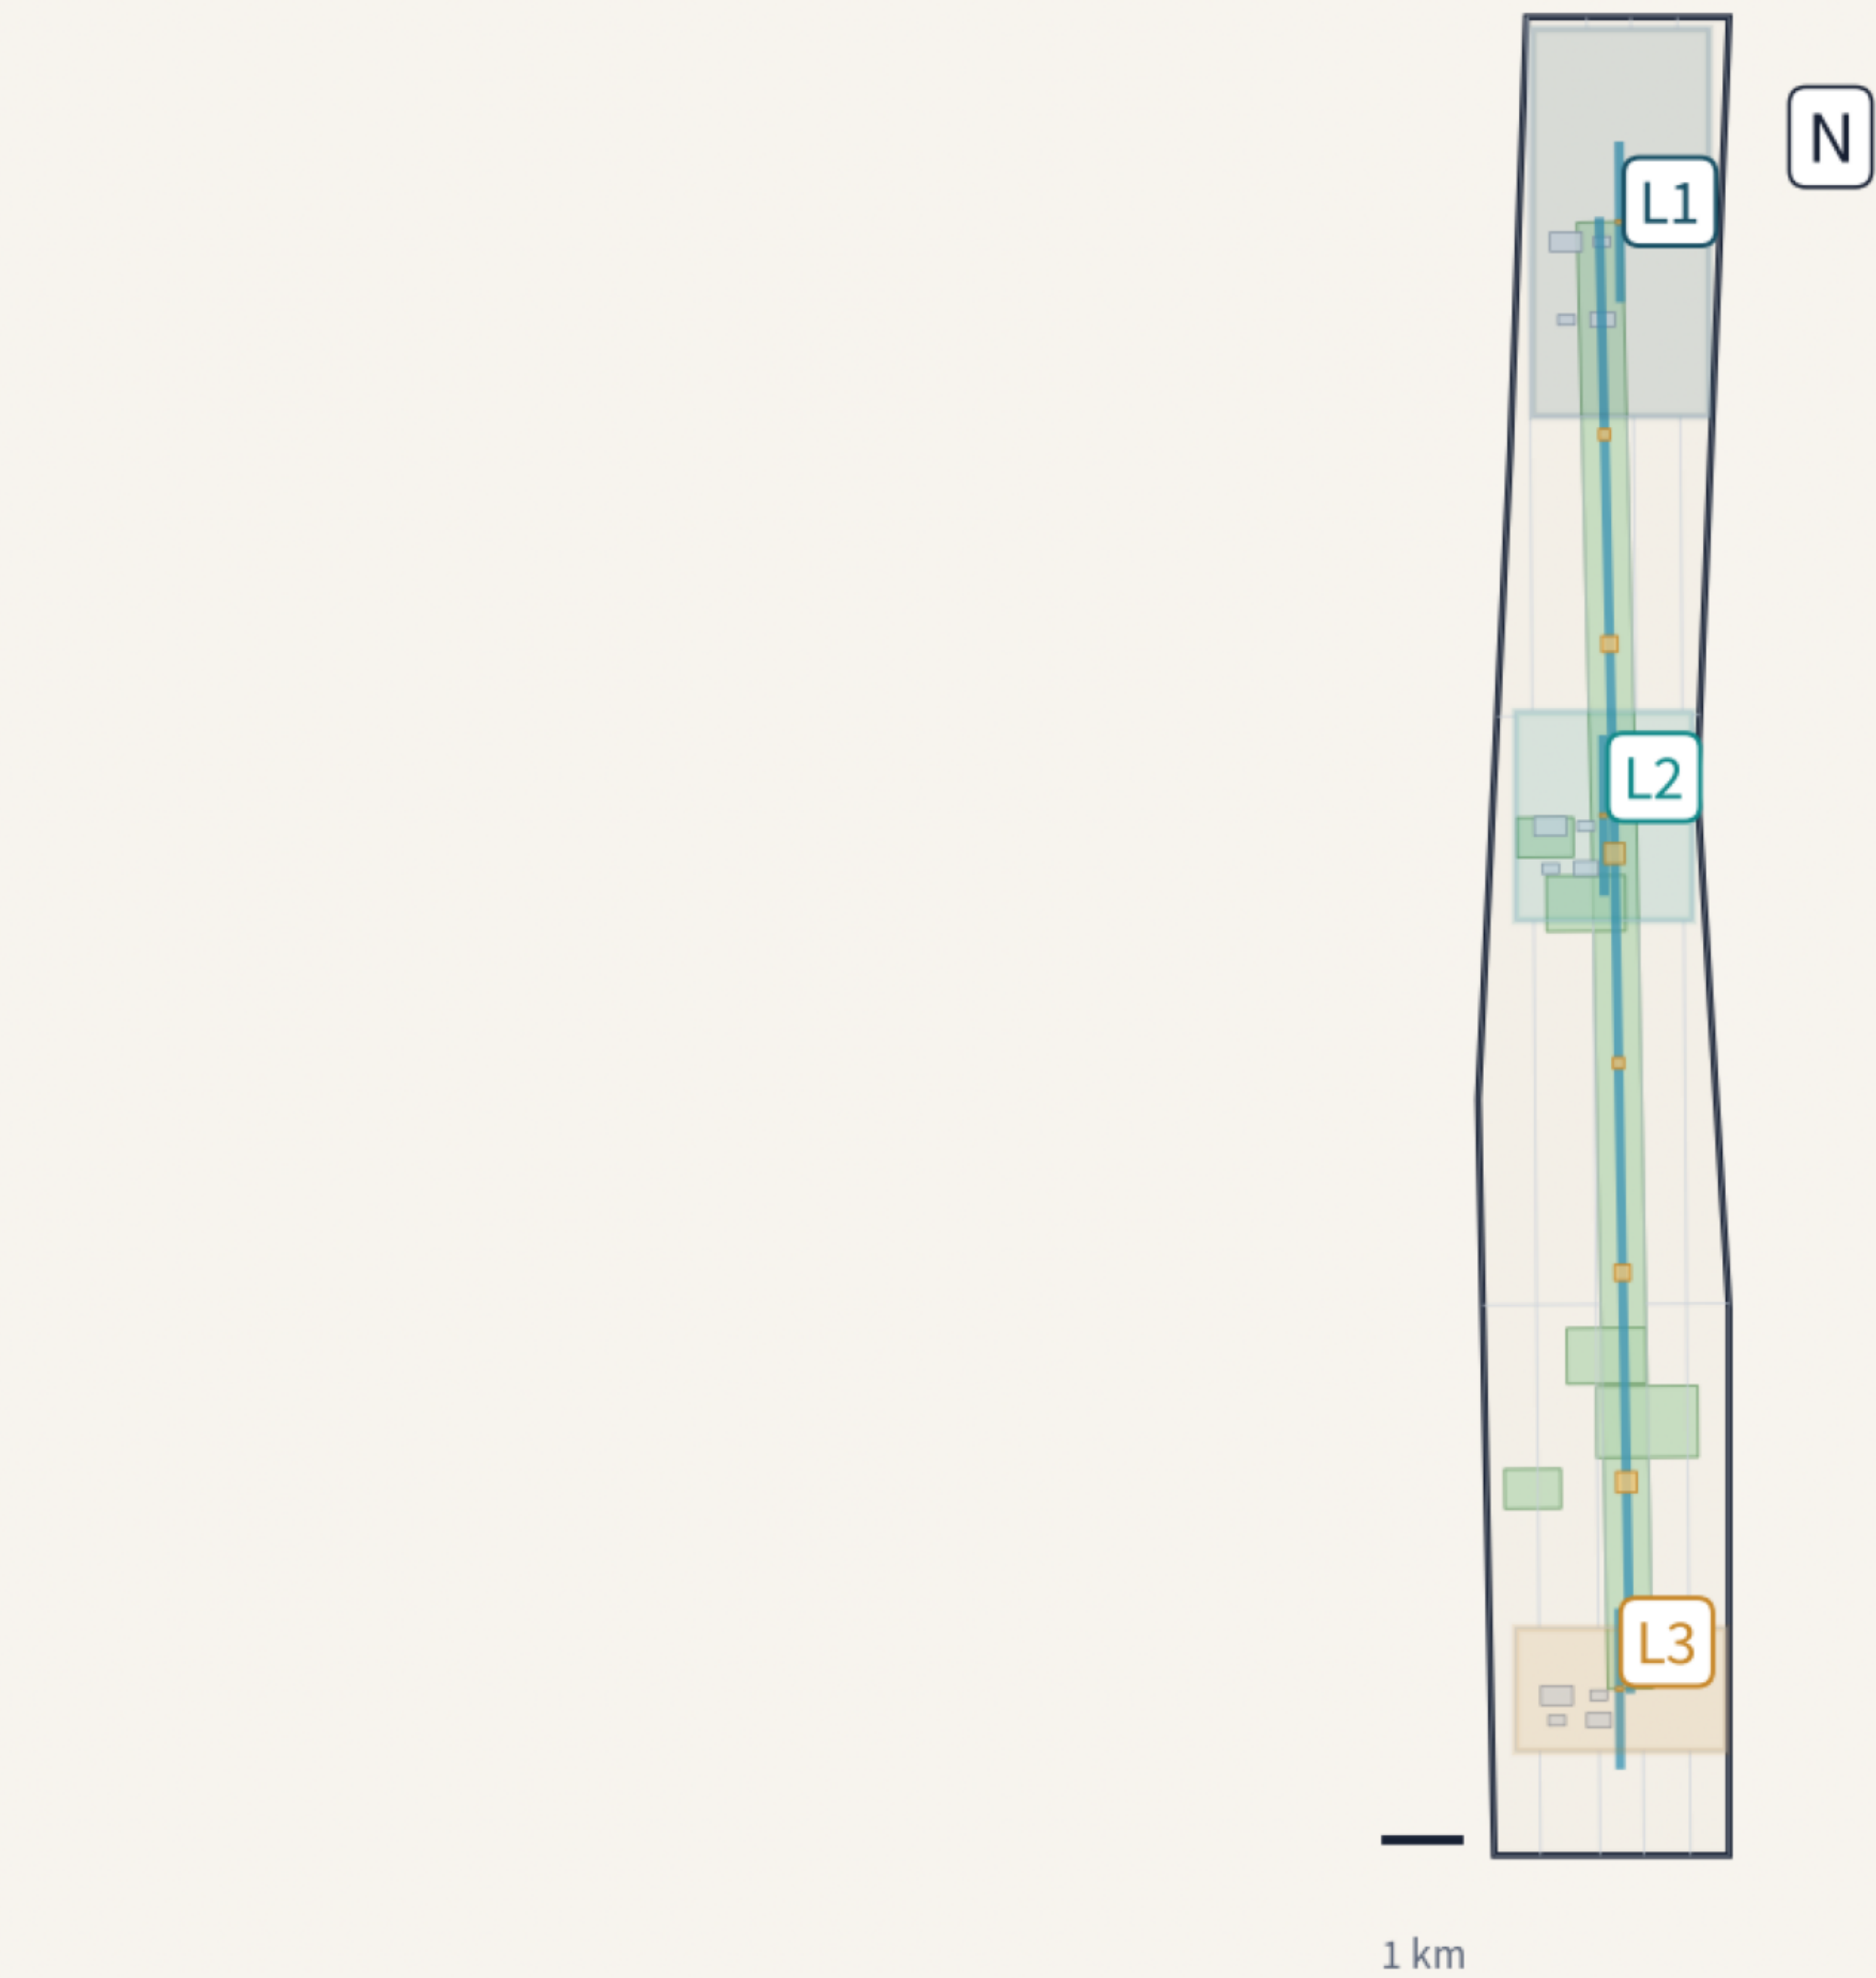

CHAINSCAPE VALLEY / one belt, two chains, three nodes

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL REDLINE - area about 11.41 million m²; recalculate after official data arrives

Overall design area - one belt, two chains, three nodes

CHAINSCAPE VALLEY / concept spatial framework

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL REDLINE - area shown as about 11.41 million m²; recalculate when official data arrives

- site boundary
- public space
- L1-L3 key areas
- concept green
- slow-mobility spine
- S1-S12 scenario nodes

Node mechanisms

- L1 Chain Harbor**
Models - compute - data - applications; acceleration
- L2 Star-Track**
Researchers/founders; shared work and training
- L3 Compute-Pivot**
Compute, testbed and public evaluation; values await official data
- Boundary**
Provisional concept polygon; not an official redline

A0 boards - key areas and land use

L1-L3 naming contract / retain-first renewal

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL REDLINE - area about 11.41 million m²; recalculate after official data arrives

Three key areas - concept node mechanisms

All labels use the same L1-L3 naming contract

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL REDLINE - area shown as about 11.41 million m²; recalculate when official data arrives

A0 boards - blue-green network and metrics

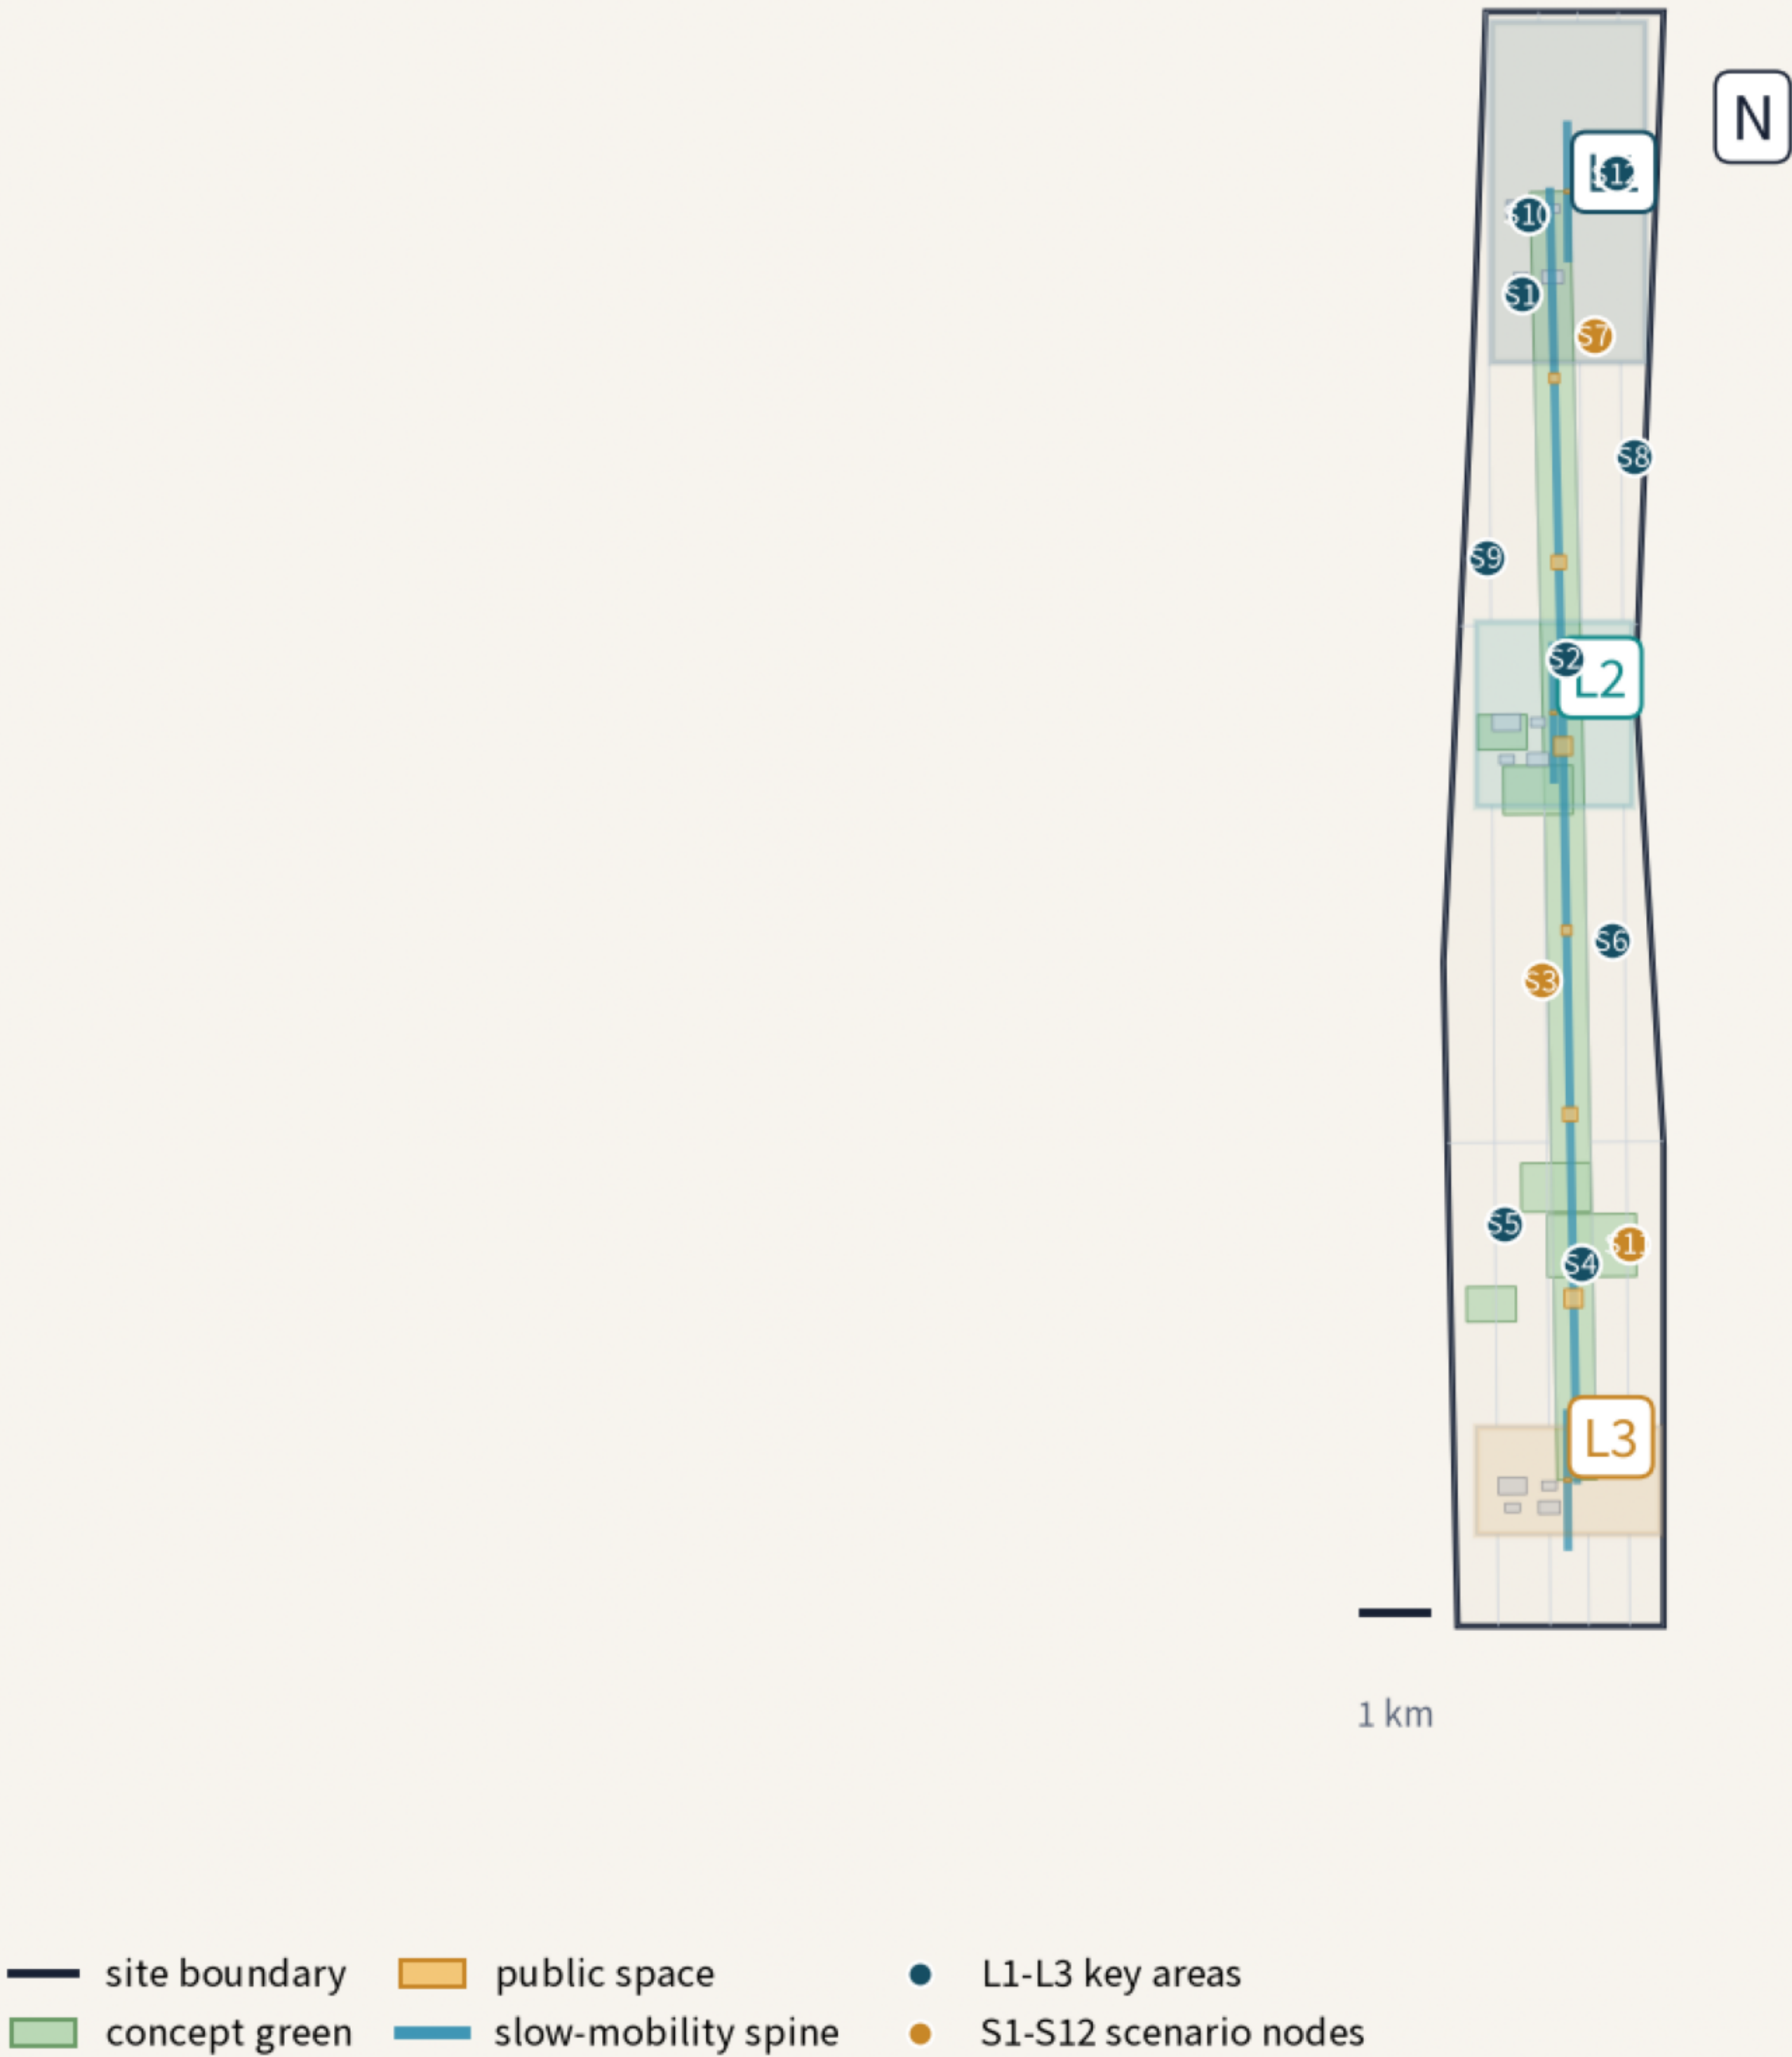

Provisional geometry / reduced precision / approval gaps

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL REDLINE - area about 11.41 million m²; recalculate after official data arrives

Blue-green network and slow mobility

Public-space and route geometry is conceptual; route approval remains open

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL REDLINE - area shown as about 11.41 million m²; recalculate when official data arrives

Network rules

Green
Concept green continuity along the heritage park

Blue
Slow-mobility spine + east-west links

S
S1-S12 are scenario IDs, not surveillance points

Fallback
Shuttle, low-altitude and operations require approval and human duty

A0 boards - AI ecosystem and protocols

S1-S12 scenarios / T1-T3 protocol meanings

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL REDLINE - area about 11.41 million m²; recalculate after official data arrives

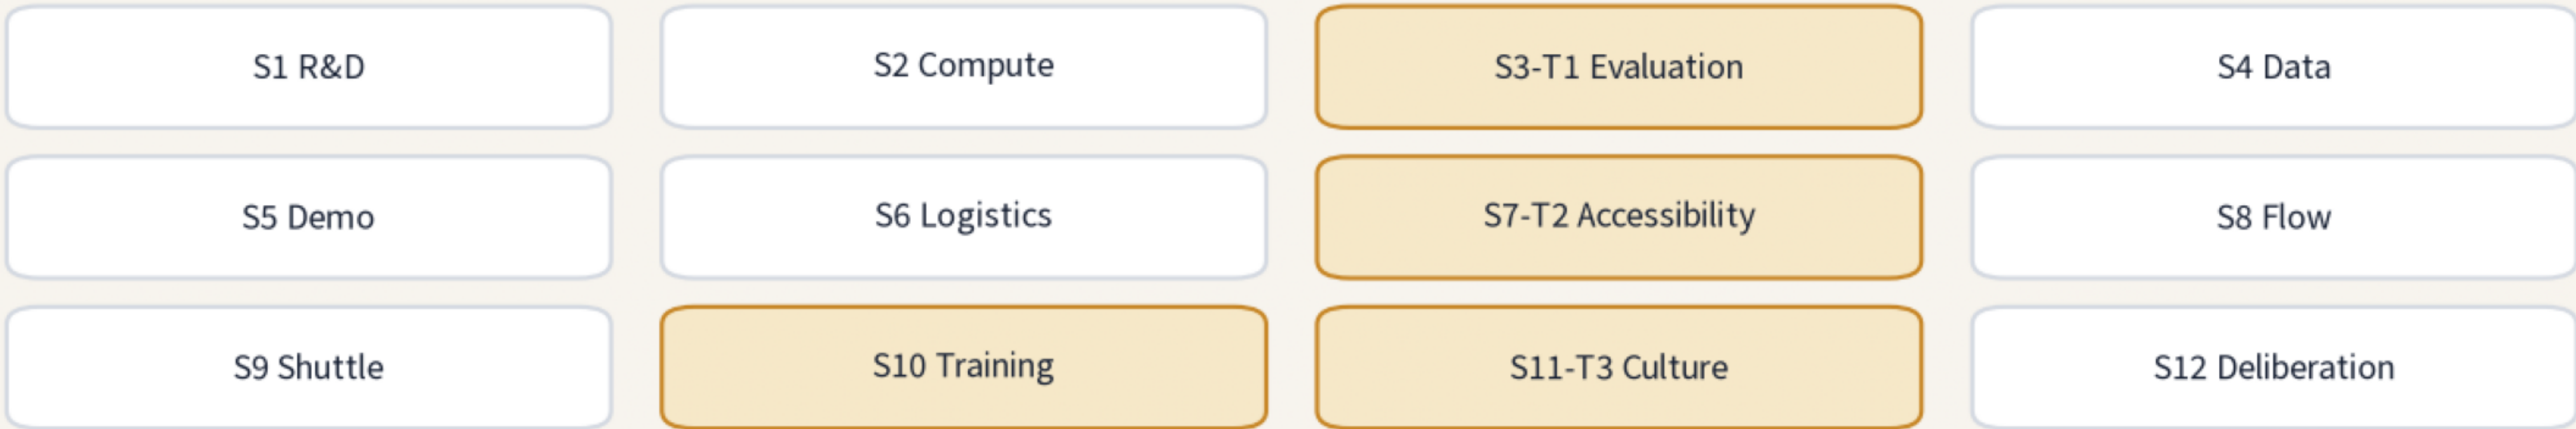

AI innovation ecosystem - L1-L3 / S1-S12 / T1-T3

Five global project benchmarks inform mechanisms only; no partnership is implied

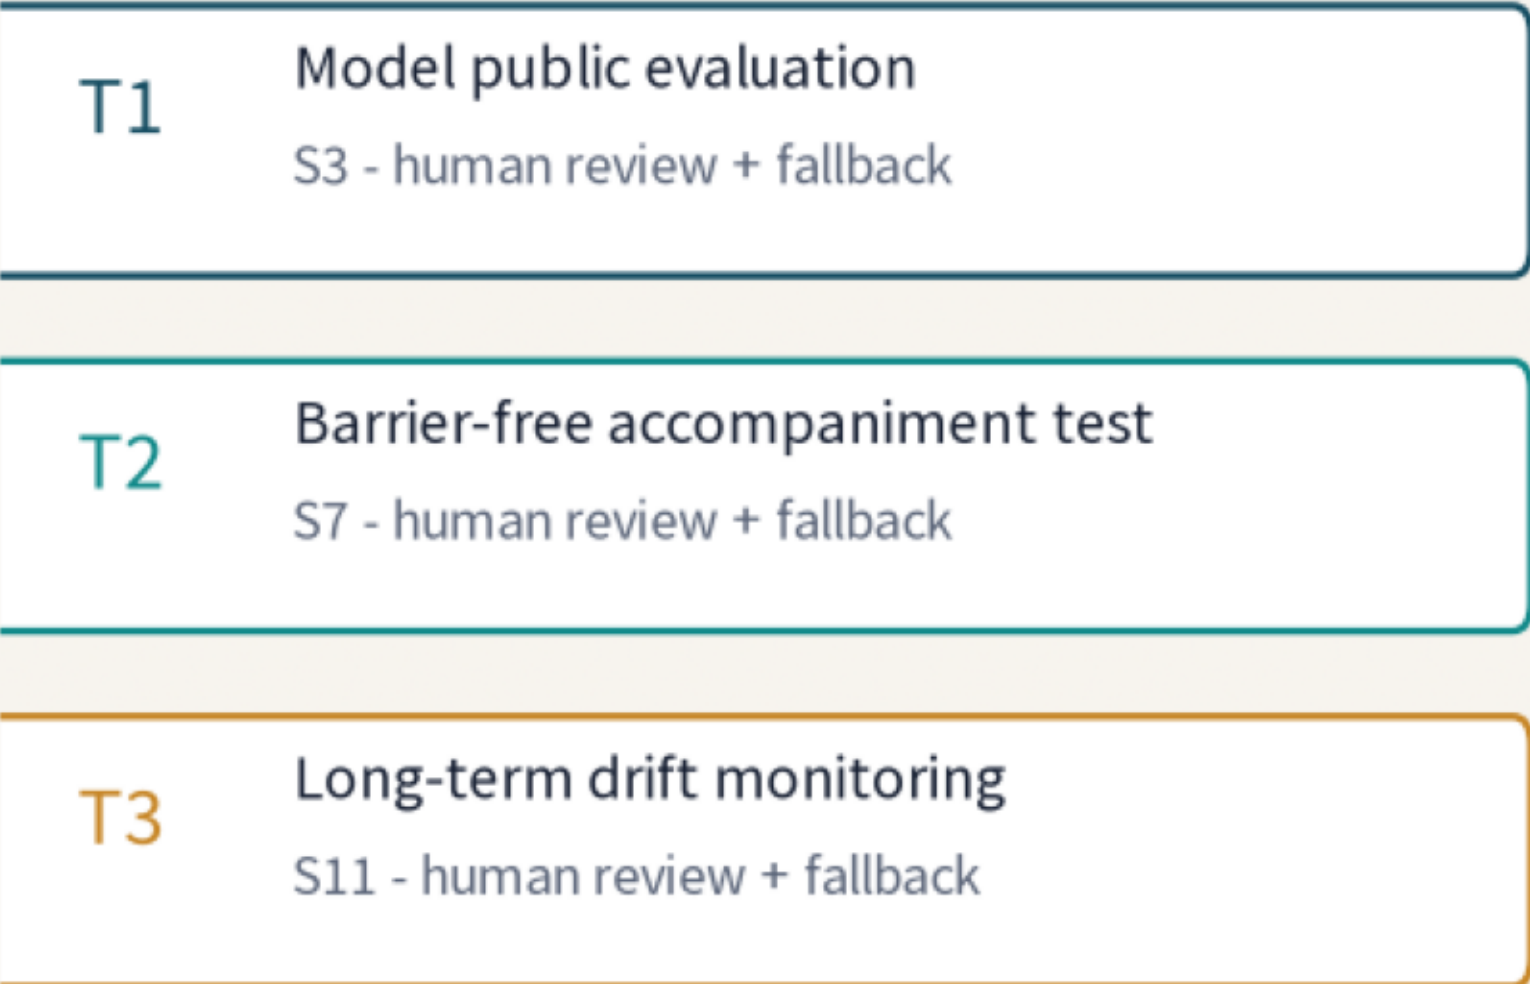

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL REDLINE - area shown as about 11.41 million m²; recalculate when official data arrives

S1-S12 scenario cards

Protocol anchors

AI governance floor

Anonymized aggregation; human review for key decisions; no individual tracking

Data and capacity baselines remain unverified
