

JINGZHANG AI CYCLING GREENWAY LOOP • Concept Booklet

RIDE • JZ LOOP

Concept proposal • PROVISIONAL boundary

Slow-traffic loop linking three areas & two wings

Three Areas + Two Wings

Nodes A1-A3 plus wing interfaces
:

A1 Zhongzhiyuan • A2 AI Origin • A3 Dazhongsi

Loop Structure (concept)

Main line through the three areas, closed via the two wing arcs:

Station chain

12 AI scenario nodes + 3 loop landmarks (provisional)

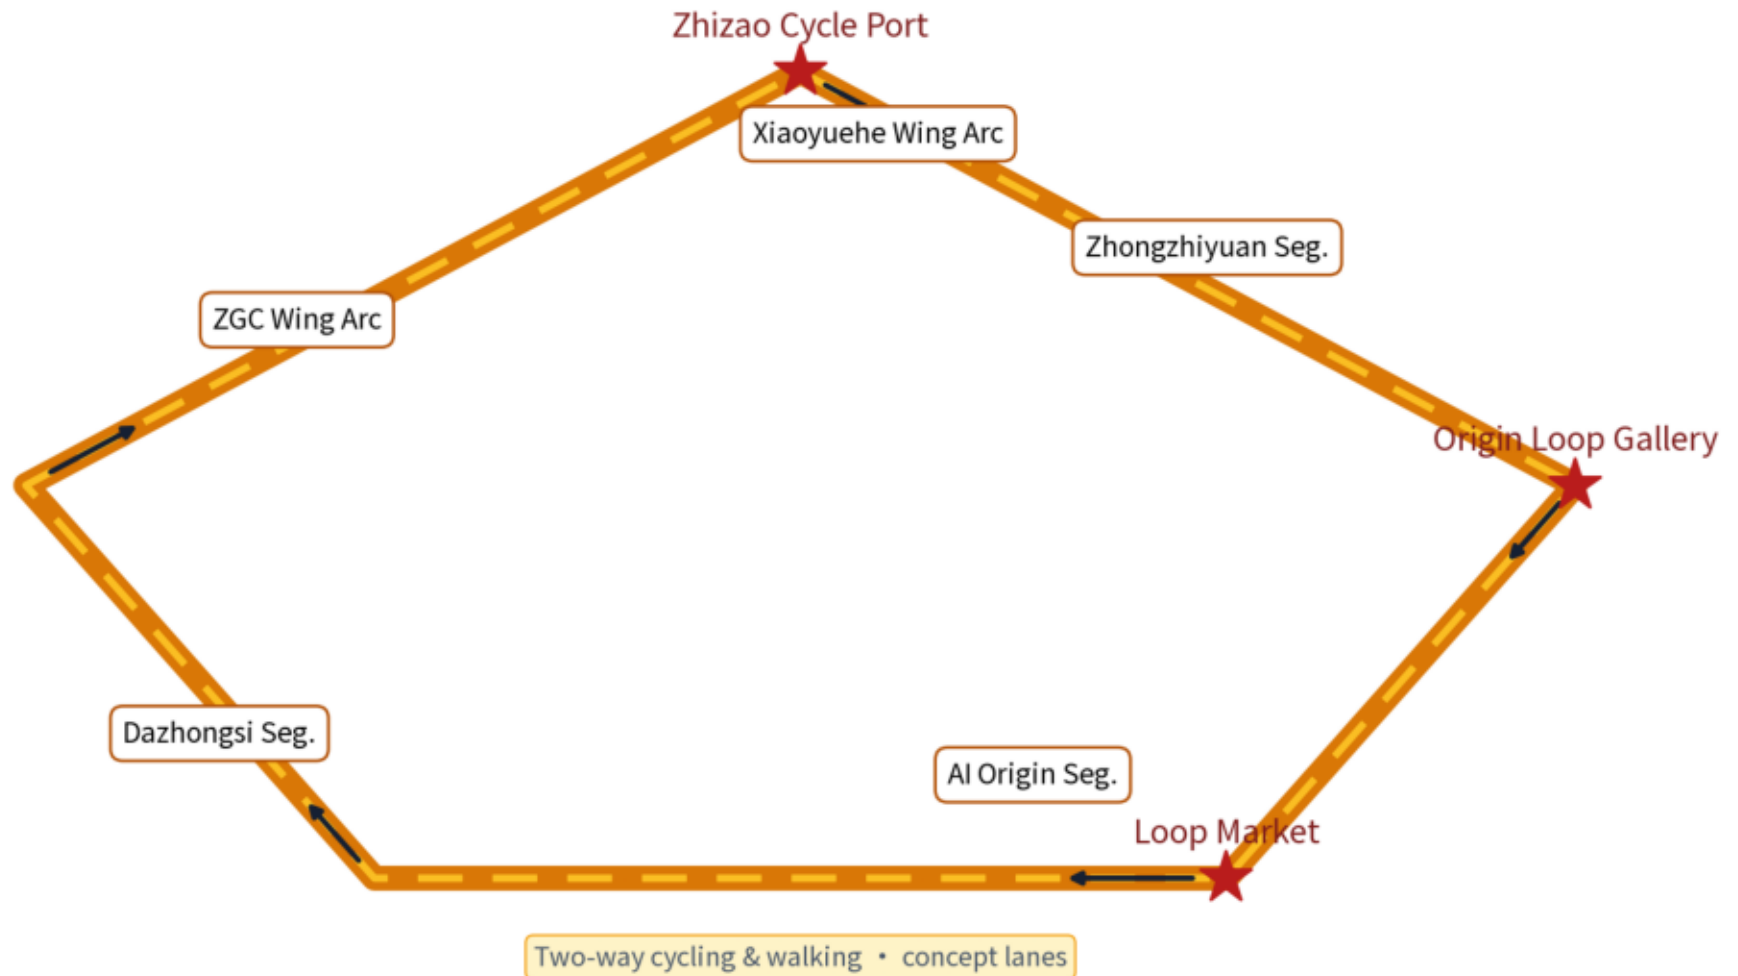

Note

The loop links the three areas and stitches the two wings; alignment is concept-only. Areas/ratios are provisional and recalculated after official data.

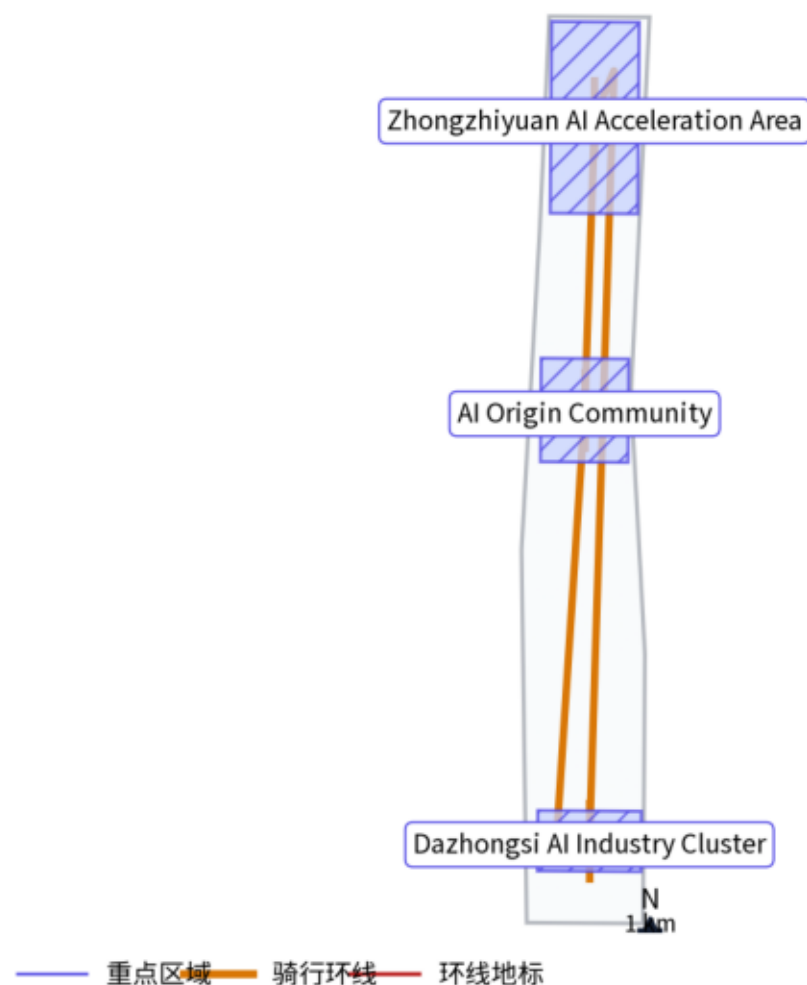

The loop links the three areas and stitches the two wings; alignment is concept-only. Areas/ratios are provisional and recalculated after official data.

Loop Spatial Structure (concept)

PROVISIONAL boundary • not an official redline • recalculate after official data

The loop is an original slow-traffic concept spanning the three areas with two wing arcs; alignment is schematic only - no redline or engineering conclusions.

Loop Nodes and Wing Synergy (concept)

Zhizao Cycle Port

AI全栈自主创新体系:骑行测试段

Origin Loop Gallery

AI创新生态:铁路遗产+AI文化展廊

Loop Market

智能原生新业态:骑行消费体验

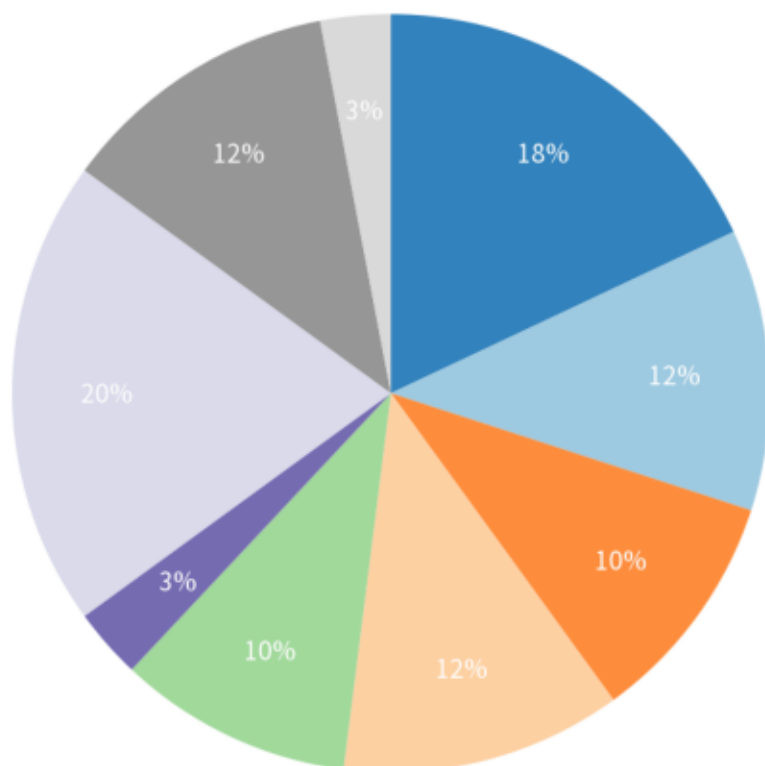

ZGC Wing

要素配置与资本IP界面

Xiaoyuehe Wing

场景赋能与公共体验路径

Correspondence is a conceptual synergy loop per agent.1; it implies no ownership or statutory zoning conclusions.

科研用地 18%

商务金融用地 12%

商业用地 10%

文化用地 12%

城镇住宅用地 10%

物流仓储与交通场站用地 3%

公园绿地 20%

防护绿地 12%

留白用地 3%

Caliber: concept-scenario single caliber (ring green band into parkland); baseline not published; recalculated after official data.

Land-use names follow the public subset of the Land Use Classification Guide; not a regulatory-plan conclusion.
